Pax and his mate, Bristle, have welcomed a litter of kits they must protect in a dangerous world. Meanwhile Peter—newly orphaned after the war, racked with guilt and loneliness—leaves his adopted home with Vola to join the Water Warriors, a group of people determined to heal the land from the scars of the war. When one of Pax's kits falls desperately ill, he turns to the one human he knows he can trust. And no matter how hard Peter tries to harden his broken heart, love keeps finding a way in. Now both boy and fox find themselves on journeys toward home, healing—and each other, once again. As he did for *Pax*, Jon Klassen, New York Times bestseller, Caldecott medalist, and two-time Caldecott Honoree, has created stunning jacket and interior illustrations.

In *Marketing on a Shoestring Budget*, Deborah Pitel covers the pros and cons of each promotional tool so they can judge what is best for their organization. She writes specifically for colleagues who have no formal marketing training and have to work off the “trial and error” method.

Race Rights Reparations Fernne Brennan, 2017-07-14 This book considers institutional racism as a problem that exists within modern societies. Its roots lie with the transatlantic slave trade and slavery and the solution involves ridding society of the problem. It is argued here that, first, there needs to be an acceptance of its existence, then developing the tools needed to deal with it and, finally, to implement those tools so that institutional racism can be permanently removed from society. The book has four themes: the first considers the nature of institutional racism, the second theme looks at instances of institutional racism through matters such as deaths in custody and skin lightening, the third considers the concept of reparations and the final area looks at the development of social movements as a way of pushing institutional racism up the political agenda. The development of a social movement is part of a social discourse which would, for example, push mentoring as a form of reparations. There is a need for more research on the manifestations of institutional racism and this book is part of that discourse. It is argued that the legacy of the slave trade and slavery is continuing and contemporary through the presence of institutional racism in society. This problem has not been addressed through legislation and policies devised to combat

racial discrimination. Institutional racism needs to be understood as being located in the processes and procedures of societal institutions.

Practical Design Patterns for Teaching and Learning with Technology Yishay Mor, Harvey Mellar, Steven Warburton, Niall Winters, 2014-05-08 These are challenging times in which to be an educator. The constant flow of innovation offers new opportunities to support learners in an environment of ever-shifting demands. Educators work as they have always done: making the most of the resources at hand, and dealing with constraints, to provide experiences which foster growth. This was John Dewey's ideal of education 80 years ago and it is still relevant today. This view sees education as a practice that achieves its goals through creative processes involving both craft and design. Craft is visible in the resources that educators produce and in their interactions with learners. Design, though, is tacit, and educators are often unaware of their own design practices. The rapid pace of change is shifting the balance from craft to design, requiring that educators' design work become visible, shareable and malleable. The participatory patterns workshop is a method for doing this through engaging practitioners in collaborative reflection leading to the production of structured representations of design knowledge. The editors have led many such workshops and this book is a record of that endeavour and its outcomes in the form of practical design narratives, patterns and scenarios that can be used to address challenges in teaching and learning with technology.

The Facebook Effect David Kirkpatrick, 2011-02 Kirkpatrick tells us how Facebook was created,

why it has flourished, and where it is going next. He chronicles its successes and missteps.

Organization Design Naomi Stanford, 2013-12-04 As the purse strings tighten company costs need to be cut without this affecting performance or sales. A common solution to this problem is to restructure the organization of the company i.e. adjust the lines and boxes on the organization chart with the aim of setting it up for high performance. This inevitably fails because an organization is a system; change one aspect and other facets will also change. *Organization Design: Engaging with change* looks at how to (re) design the organizational system in order to increase productivity, performance and value; providing the knowledge and methodology to design an agile organization capable of handling the kind of continuous organizational change that all businesses face. The book clarifies why and how organizations need to be in a state of readiness to design or redesign and emphasizes that people as well as business processes must be part of design considerations. Responding to developments across the world since the first edition, this book covers, among other topics: Technology changes that have impacted upon organizations Increased demands for 'sustainability' and corporate social responsibility The pressure on organizations to be smarter, more efficient and more effective Whilst the material on this subject targets a wide management audience, this book is specifically written for consultants, OD/HR practitioners and line managers working together to achieve the goal of organizational redesign for changing circumstances. Aided by a range of pedagogical features, this book is a must-read for students or practitioners involved in the field of organizational design, development and change.
