The Whirlwind War Frank N. Schubert,1995 CMH Publication 70-30. Edited by Frank N. Schubert and TheresaL. Kraus. Discusses the United States Army's role in the Persian Gulf War from August 1990 to February 1991. Shows the various strands that came together to produce the army of the 1990s and how that army in turn performed under fire and in the glare of world attention. Retains a sense of immediacy in its approach. Contains maps which were carefully researched and compiled as original documents in their own right. Includes an index.

Digital Design of Signal Processing Systems Shoab Ahmed Khan,2011-02-02 Digital Design of Signal Processing Systems discusses a spectrum of architectures and methods for effective implementation of algorithms in hardware (HW). Encompassing all facets of the subject this book includes conversion of algorithms from floating-point to fixed-point format, parallel architectures for basic computational blocks, Verilog Hardware Description Language (HDL), SystemVerilog and coding guidelines for synthesis. The book also covers system level design of Multi Processor System on Chip (MPSoC); a consideration of different design methodologies including Network on Chip (NoC) and Kahn Process Network (KPN) based connectivity among processing elements. A special emphasis is placed on implementing streaming applications like a digital communication system in HW. Several novel architectures for implementing commonly used algorithms in signal processing are also revealed. With a comprehensive coverage of topics the book provides an appropriate mix of examples to illustrate the design methodology. Key Features: A practical guide to designing efficient digital systems, covering the complete spectrum of digital design from a digital signal processing perspective Provides a full account of HW building blocks and their architectures, while also elaborating effective use of embedded computational resources such as multipliers, adders and memories in FPGAs Covers a system level architecture using NoC and KPN for streaming applications, giving examples of structuring MATLAB code and its easy mapping in HW for these applications Explains state machine based and Micro-Program architectures with comprehensive case studies for mapping complex applications The techniques and examples discussed in this book are used in the award winning products from the Center for Advanced Research in Engineering (CARE). Software Defined Radio, 10 Gigabit VoIP monitoring system and Digital Surveillance equipment has respectively won APICTA (Asia Pacific Information and Communication Alliance) awards in 2010 for their unique and effective designs.

Effective Succession Planning William Rothwell,2010-04-21 William Rothwell honored with the ASTD Distinguished Contribution Award in Workplace Learning and Performance. The definitive guide to a timely and timeless topic-- now fully revised and updated. As baby boomers continue to retire en masse from executive suites, managerial offices, and specialized or technical jobs, the question is—who will take their places? This loss of valuable institutional memory has made it apparent that no organization can afford to be without a strong succession program. Now in its fourth edition, Effective Succession Planning provides the tools organizations need to establish, revitalize, or revise their own succession planning and management (SP&M) programs. The book has been fully updated to address challenges brought on by sea changes such as globalization, recession, technology, and the aftereffects of the terror attacks. It features new sections on identifying and assessing competencies and future needs; management vs. technical succession planning; and ethics and conduct; and new chapters on integrating recruitment and retention strategies with succession planning programs. This edition incorporates the results of two extensive new surveys, and includes a Quick Start guide to help begin immediate implementation as well as a CD-ROM packed with assessments, checklists, customizable guides, and other practical tools.

Well Fed 2 Melissa Joulwan,2013-10-22 Well Fed 2: More Paleo Recipes For People Who Love To Eat is the follow-up to the deliciously popular Well Fed — by “The Clothes Make The Girl” blogger Melissa Joulwan — and it's packed with even more internationally-inspired recipes, mouth-watering photos, and easy meal ideas. Well Fed 2 proves that the Paleo diet — too often defined by what you give up — is really about what you gain: good health, a light heart, and memorable meals to share with the people you love.

Inflammatory Bowel Disease Ramona Rajapakse,2021-09-23 This book uses new thinking on precision medicine and the interplay of genetic factors, the microbiome, and external triggers to build on the core concepts of inflammatory bowel disease. It outlines the latest findings in targeting therapies to the individual patient with Crohn's and colitis, management of chronic infections in the setting of immunomodulators and biologics, non-surgical therapy of dysplasia in colitis patients, and redefining and structuring the problematic pouch. In addition, this book features useful chapters dedicated to the economic aspects of IBD in an increasingly constrained healthcare system, as well as the patient experience and the role of subspecialist telemedicine care. Written by specialists and thought leaders in the field, Inflammatory Bowel Disease: Pathogenesis, Diagnosis and Management provides a concise but highly relevant account of the latest thinking and concepts in IBD.

Organic-Inorganic Halide Perovskite Photovoltaics Nam-Gyu Park,Michael Grätzel,Tsutomu Miyasaka,2016-07-25 This book covers fundamentals of organometal perovskite materials and their photovoltaics, including materials preparation and device fabrications. Special emphasis is given to halide perovskites. The opto-electronic properties of perovskite materials and recent progress in perovskite solar cells are described. In addition, comments on the issues to current and future challenges are mentioned.

Catalogue of Risks Dirk Proske,2008-07-24 Since the German edition of this book, the topic of risk has experienced even greater attention, not only in the world of science but also in other fields, such as economics and politics. Therefore, many new publications have evolved. To keep with the idea of an encyclopedia for the topic of risk, this book has been completely reworked. Not only are many updated examples included in chapter “Risks and disasters” but also new chapters have been introduced, such as the chapter “Indetermination and risk”. This new chapter was developed since the question “Is it possible for risks to be completely eliminated, and if not why?” has become a major point of concern. Therefore, especially in this chapter, the focus of the book has - tended from a simple mathematical or engineering point of view to include much broader concepts. Here, not only aspects of system theory have to be considered, but also some general philosophical questions start to influence the considerations of the topic of risk. The main goal of this edition, however, is not only the extension and revision of the book, but also the translation into the English language to allow more readers access to the ideas of the book. The author deeply hopes that the success the book made in the German edition continues and that readers experience a major gain from reading the book.

Portraits of Automated Facial Recognition Lila Lee-Morrison,2019-11-30 Automated facial recognition algorithms are increasingly intervening in society. This book offers a unique analysis of these algorithms from a critical visual culture studies perspective. The first part of this study examines the example of an early facial recognition algorithm called »eigenface« and traces a history of the merging of statistics and vision. The second part addresses contemporary artistic engagements with facial recognition technology in the work of Thomas Ruff, Zach Blas, and Trevor Paglen. This book argues that we must take a closer look at the technology of automated facial recognition and claims that its forms of representation are embedded with visual politics. Even more significantly, this technology is redefining what it means to see and be seen in the contemporary world.

Deaf Gain H-Dirksen L. Bauman,Joseph J. Murray,2014-10-15 Deaf people are usually regarded by the hearing world as having a lack, as missing a sense. Yet a definition of deaf people based on hearing loss obscures a wealth of ways in which societies have benefited from the significant contributions of deaf people. In this bold intervention into ongoing debates about disability and what it means to be human, experts from a variety of disciplines—neuroscience, linguistics, bioethics, history, cultural studies, education, public policy, art, and architecture—advance the concept of Deaf Gain and challenge assumptions about what is normal. Through their in-depth articulation of Deaf Gain, the editors and authors of this pathbreaking volume approach deafness as a distinct way of being in the world, one which opens up perceptions, perspectives, and insights that are less common to the majority of hearing persons. For example, deaf individuals tend to have unique capabilities in spatial and facial recognition, peripheral processing, and the detection of images. And users of sign language, which neuroscientists have shown to be biologically equivalent to speech, contribute toward a robust range of creative expression and understanding. By framing deafness in terms of its intellectual, creative, and cultural benefits, Deaf Gain recognizes physical and cognitive difference as a vital aspect of human diversity. Protection of Materials and Structures from Space Environment J. Kleiman, Zelina Iskanderova, 2006-04-11 This publication presents the proceedings of ICPMSE-6, the sixth international conference on Protection of Materials and Structures from Space Environment, held in Toronto May 1-3, 2002. The ICPMSE series of meetings became an important part of the LEO space community since it was started in 1991. Since then, the meeting has grown steadily, attracting a large number of engineers, researchers, managers, and scientists from industrial companies, scientific institutions and government agencies in Canada, U. S. A. , Asia, and Europe, thus becoming a true international event. This year's meeting is gaining even stronger importance with the resumption of the ISS and other space projects in LEO, GEO and Deep Space. To reflect on these activities, the topics in the program have been extended to include protection of materials in GEO and Deep Space. The combination of a broad selection of technical and scientific topics addressed by internationally known speakers with the charm of Toronto and the hospitality of the organizers brings participants back year after year. The conference was hosted and organized by Integrity Testing Laboratory Inc. (ITL), and held at the University of Toronto's Institute for Aerospace Studies (UTIAS). The meeting was sponsored by the Materials and Manufacturing Ontario (MMO) and the CRESTech, two Ontario Centres of Excellence; Air Force Office of Scientific Research (AFOSR/NL); MD Robotics; EMS Technologies; The Integrity Testing Laboratory (ITL); and the UTIAS.

Hyperdocumentation Olivier Le Deuff, 2021-08-25 The term hyperdocumentation is a hyperbole that seems to characterize a paradox. The leading discussions on this topic bring in diverse ideas such as that of data, the fantasy of Big Data, cloud computing, artificial intelligence, algorithmic processing, the flow of information and the outstanding successes of disinformation. The purpose of this book is to show that the current context of documentation is just another step in human construction that has been ongoing for not centuries but millennia and which, since the end of the 19th century, has been accelerating. Coined by Paul Otlet in 1934 in his *Traite de Documentation*, hyperdocumentation refers to the concept of documentation that is constantly being expanded and extended in its functionalities and prerogatives. While, according to Otlet, everything could potentially be documented in this way, increasingly we find that it is our lives that are being hyperdocumented. Hyperdocumentation manifests as an increase not only in the quantity of information that is processed but also in its scope, as information is progressively integrated across areas that were previously poorly documented or even undocumented.

The Handbook of Neuropsychiatric Biomarkers, Endophenotypes and Genes Michael S. Ritsner, 2009-04-24 Neuropsychiatric disorders such as schizophrenia, mood disorders, Alzheimer's disease, epilepsy, alcoholism, substance abuse and others are one of the most debilitating illnesses worldwide characterizing by the complexity of the causes, and lacking the laboratory tests that may promote diagnostic and prognostic procedures. Recent advances in neuroscience, genomic, genetic, proteomic and metabolomic knowledge and technologies have opened the way to searching biomarkers and endophenotypes, which may offer powerful and exciting opportunity to understand the etiology and the underlying pathophysiological mechanisms of neuropsychiatric disorders. The challenge now is to translate these advances into meaningful diagnostic and therapeutic advances. This book offers a broad synthesis of the current knowledge about diverse topics of the biomarker and endophenotype strategies in neuropsychiatry. The book is organized into four interconnected volumes: "Neuropsychological Endophenotypes and Biomarkers" (with overview of methodological issues of the biomarker and endophenotype approaches in neuropsychiatry and some technological advances), "Neuroanatomical and Neuroimaging Endophenotypes and Biomarkers", "Metabolic and Peripheral Biomarkers" and "Molecular Genetic and Genomic Markers". The contributors are internationally and nationally recognized researchers and experts from 16 countries. This four-volume handbook is intended for a broad spectrum of readers including neuroscientists, psychiatrists, neurologists, endocrinologists, pharmacologists, clinical psychologists, general practitioners, geriatricians, health care providers in the field of neurology and mental health interested in trends that have crystallized in the last decade, and trends that can be expected to further evolve in the coming years. It is hoped that this book will also be a useful resource for the teaching of psychiatry, neurology, psychology and mental health.

Pedestrian and Evacuation Dynamics 2005 Nathalie Waldau, Peter Gattermann, Hermann Knoflacher, Michael Schreckenberger, 2007-05-26 Due to an increasing number of reported catastrophes all over the world, the safety especially of pedestrians today, is a dramatically growing field of interest, both for practitioners as well as scientists from various disciplines. The questions arising mainly address the dynamics of evacuating people and possible optimisations of the process by changing the architecture and /or the procedure.

Palliative Care for Advanced Alzheimer's and Dementia Jennifer V. Long, CRNA, CRNP, MS, 2010-07-23 2010 AJN Book of the Year Award Winner in both Gerontologic Nursing and Hospice and Palliative Care! This book...provides important information on best practices and appropriate ways to care for a person with Alzheimer's and advanced dementia. Drs. Martin and Sabbagh have assembled a team of experts to help craft recommendations that should ultimately become standards that all professional caregivers adopt. -Michael Reagan Son of former President Ronald Reagan President, Reagan Legacy Foundation This book testifies that caregivers can have a monumental impact on the lives of persons with advanced dementia. Through specialized programming and a renewed effort toward patient-centered care, caregivers can profoundly enrich the quality of life for these persons. Providing guidelines for health care professionals, caregivers, and family members, this book introduces palliative care programs and protocols for the treatment of people with advanced dementia. The book is designed to guide professional caregivers in meeting the needs of patients and their families, providing insight into the philosophy, assessment, planning, implementation, and evaluation measures involved in interdisciplinary palliative care. The chapter authors offer guidelines and standards of care based on contributions from nurses, physical therapists, social workers, dietitians, psychologists, family caregivers and pastors. An exhibit at the end of every chapter clearly articulates the standards of care appropriate for all advanced dementia facilities and health care staff. This book helps caregivers: Enhance the physiological, psychological, social, and spiritual well-being of the patient and the patient's family Anticipate and meet the patient's basic human needs: hunger, thirst, body positioning, hygiene, continence, and management of any pain Ensure that the patient's surroundings are safe, comfortable, and homelike Address health care decisions that will support the patient's right to self-determination until the end of life

Encyclopedia of Canonical Ḥadīth Gautier H.A. Juynboll, 2007-09-30 This encyclopedic work on Islam comprises English translations of all canonical ḥadīths, complete with their respective chains of transmission (isnāds). By conflating the variant versions of the same ḥadīth, the repetitiveness of its literature has been kept wherever possible to a minimum. The latest methods of isnād analysis, described in the general introduction, have been employed in an attempt to identify the person(s) responsible for each ḥadīth. The book is organized in the alphabetical order of those persons. These are the so-called 'common links'. Each of them is listed with the tradition(s) for the wording of which he can be held accountable, or with which he can at least be associated.

Environmental Issues in Latin America and the Caribbean Aldemaro Romero, Sarah E. West, 2006-02-23 This book is a collection of readings that explore environmental issues in Latin America and the Caribbean using natural science and social science methods. These papers demonstrate the value of interdisciplinary approaches to analyze and solve environmental problems. The essays are organized into five parts: conservation challenges; national policies, local communities, and rural development; market mechanisms for protecting public goods; public participation and environmental justice; and the effects of development policies on the environment.

The Transformational Power of Fasting Stephen Harrod Buhner, 2012-02-02 Fasting practices to reconnect with the sacred, regain a sense of your life's purpose, and heal physically and emotionally • Details what to expect during your fast physically, emotionally, and spiritually • Provides step-by-step guidelines on preparing for the fast, how long you should fast, what you can and can't do during the fast, and how to end your fast • Explains how fasting can help or heal many chronic conditions, such as type II diabetes, hypertension, cardiovascular disease, arthritis, psoriasis, and

insomnia For millennia humans have fasted for spiritual, emotional, and physical reasons--as a way to heal their bodies, reconnect to the sacred, regain a sense of life's purpose, and allow their souls to detoxify. We are evolutionarily designed to fast, and the body knows how to do it very well. Fasting allows the body and all its systems to rest, purify, and heal. During a fast, the body enters the same cleansing and healing cycle it normally enters during sleep. As a fast progresses, the body consumes everything that is not essential to bodily functioning--including bacteria, viruses, fibroid tumors, waste products in the blood, buildup around the joints, and stored fat--and the mind and heart release their toxic buildup as well. As Stephen Harrod Buhner reveals, in order to be truly transformed, you must first empty yourself. Offering step-by-step guidelines to fully prepare yourself for a deep fast, Buhner explores what to expect during and after spiritual, emotional, and physical fasting and detoxification. He details the necessary dietary and mental preparations leading up to your fast, what you can and can't do during a fast, and how to end your fast. He also explains how to plan the length of your fast and how to choose between a water fast, a juice fast, or a mono-diet fast. Revealing how fasting can help or heal many chronic conditions, such as type II diabetes, childhood seizures, hypertension, cardiovascular disease, arthritis, psoriasis, insomnia, and fibromyalgia, Buhner shows fasting as a way to truly inhabit the body, to experience its sacredness, and to activate its deep capabilities for self-healing.
