Global Modernity from Coloniality to Pandemic Hatem Akil, Prof Dr Hatem Akil, Simone Maddanu, 2022-02-22 This book poses questions about viewing modernity today from the vantage point of traditionally disparate disciplines engaging scholars from sociology to science, philosophy to robotics, medicine to visual culture, mathematics to cultural theory, etc., including a contribution by Alain Touraine. From coloniality to pandemic, modernity can now represent a global necessity in which awareness of human and environmental crises, injustices, and inequality would create the possibility of a modernity-to-come.

Multinationals and Corporate Social Responsibility Jennifer A. Zerk, 2006-11-09 The 'corporate social responsibility' ('CSR') movement has been described as one of the most important social movements of our time. This book looks at what the CSR movement means for multinationals, for states and for international law. International law is often criticized for being too 'state-centred', and ill-equipped to deal with the challenges of globalization. However, drawing from many and varied examples of state, NGO and corporate practice, this 2006 book argues that, while international law has its limitations, it presents more opportunities for the CSR regulation of multinationals than many people assume. The main obstacles to better regulation are, therefore, not legal, but political.

In the Crossfire of History Lava Asaad, Fayeza Hasanat, 2022-09-16 This book incorporates literary works, testimonies, autobiographies, women's resistance movements, and films that add to the conversation on the resilience of women in the global south. The

essays question historical accuracy and politics of representation that usually undermine women's role during conflict, and they reevaluate how women participated, challenged, sacrificed, and vehemently opposed war discourses that work on obliterating women's role in shaping resistance movements.

Science Fiction and Indian Women Writers Urvashi Kuhad, 2021-07-29 Science fiction, as a literature of fantasy, goes beyond the mundane to ask the question: what if the world were different from the way it is? It often challenges the real, builds on imagination, places no limits on human capacities, and encourages readers to think outside their social and cultural conditioning. This book presents a systematic study of Indian women's science fiction. It offers a critical analysis of the works of four female Indian writers of science fiction: Rokeya Sakhawat Hossain, Manjula Padmanabhan, Priya Sarukkai Chabria and Vandana Singh. The author considers not only the evolution of science fiction writing in India, but also discusses the use of innovations and unique themes including science fiction in different Indian languages; the literary, political, and educational activism of the women writers; and eco-feminism and the idea of cloning in writing, to argue that this genre could be viewed as a vibrant representation of freedom of expression and radical literature. This ground-breaking volume will be useful for scholars and researchers of English literature. It will also prove a very useful source for further studies into Indian literature, science and technology studies, women's and gender studies, comparative literature and cultural studies.

Understanding Women's Experiences of Displacement Suranjana Choudhury, Nabanita Sengupta, 2021-11-29 The South Asian region has been especially prone to mass

displacement and relocations owing to its varied geographical settings as well as socio-political factors. This book examines the women's perspective on issues related to displacement, loss, conflict, and rehabilitation. It maps the diverse engagements with women's experiences of displacement in the South Asian region through a nuanced examination of unexplored literary narratives, life writing and memoirs, cultural discourses, and social practices. The book explores themes like sexuality and the female body, women and the national identity, violence against women in Indian Partition narratives, and stories of exile in real life and fairy tales. It also offers an understanding of the ruptures created by dislocation and exile in memory, identity, and culture by analyzing the spaces occupied by displaced women and their lived experiences. The volume looks at the multiplicity of reasons behind women's displacement and offers a wider perspective on the intersections between gender, migration, and marginalization. This book will be useful for scholars and researchers of cultural studies, literature, gender studies, conflict studies, development studies, South Asian studies, refugee studies, diaspora studies, and sociology.

Sisters in the Mirror Elora Shehabuddin, 2024-03-05 A must read.--CHOICE Outstanding Academic Title, 2022 Holds up a mirror to the unifying, braided futures underlying so-called 'Western' and 'Muslim' feminism that are both undermined by the power of capital, the world trade order, and cynical geopolitics.--2023 Association for Asian Studies Coomaraswamy Book Prize A crystal-clear account of the entangled history of Western and Muslim feminisms. Western feminists, pundits, and policymakers tend to portray the Muslim world as the last and most difficult frontier of global feminism. Challenging this view, Elora Shehabuddin presents a unique and engaging history of feminism as a story of colonial and

postcolonial interactions between Western and Muslim societies. Muslim women, like other women around the world, have been engaged in their own struggles for generations: as individuals and in groups that include but also extend beyond their religious identity and religious practices. The modern and globally enmeshed Muslim world they navigate has often been at the weaker end of disparities of wealth and power, of processes of colonization and policies of war, economic sanctions, and Western feminist outreach. Importantly, Muslims have long constructed their own ideas about women's and men's lives in the West, with implications for how they articulate their feminist dreams for their own societies. Stretching from the eighteenth-century Enlightenment era to the War on Terror present, *Sisters in the Mirror* shows how changes in women's lives and feminist strategies have consistently reflected wider changes in national and global politics and economics. Muslim women, like non-Muslim women in various colonized societies and non-white and poor women in the West, have found themselves having to negotiate their demands for rights within other forms of struggle--for national independence or against occupation, racism, and economic inequality. Through stories of both well-known and relatively unknown figures, Shehabuddin recounts instances of conflict alongside those of empathy, collaboration, and solidarity across this extended period. *Sisters in the Mirror* is organized around stories of encounters between women and men from South Asia, Britain, and the United States that led them, as if they were looking in a mirror, to pause and reconsider norms in their own society, including cherished ideas about women's roles and rights. These intertwined stories confirm that nowhere, in either Western or Muslim societies, has material change in girls' and women's lives come easily or without protracted struggle.

The Economization of Life Michelle Murphy, 2017-04-21 What is a life worth? In the wake of eugenics, new quantitative racist practices that valued life for the sake of economic futures flourished. In *The Economization of Life*, Michelle Murphy provocatively describes the twentieth-century rise of infrastructures of calculation and experiment aimed at governing population for the sake of national economy, pinpointing the spread of a potent biopolitical logic: some must not be born so that others might live more prosperously. Resituating the history of postcolonial neoliberal technique in expert circuits between the United States and Bangladesh, Murphy traces the methods and imaginaries through which family planning calculated lives not worth living, lives not worth saving, and lives not worth being born. The resulting archive of thick data transmuted into financialized “Invest in a Girl” campaigns that reframed survival as a question of human capital. The book challenges readers to reject the economy as our collective container and to refuse population as a term of reproductive justice.

The Gothic Other Ruth Bienstock Anolik, Douglas L. Howard, 2014-09-26 Literary use of the Gothic is marked by an anxious encounter with otherness, with the dark and mysterious unknown. From its earliest manifestations in the turbulent eighteenth century, this seemingly escapist mode has provided for authors a useful ground upon which to safely confront very real fears and horrors. The essays here examine texts in which Gothic fear is relocated onto the figure of the racial and social Other, the Other who replaces the

supernatural ghost or grotesque monster as the code for mystery and danger, ultimately becoming as horrifying, threatening and unknowable as the typical Gothic manifestation. The range of essays reveals that writers from many canons and cultures are attracted to the Gothic as a ready medium for expression of racial and social anxieties. The essays are grouped into sections that focus on such topics as race, religion, class, and centers of power.

Essential Guide to Food Additives Leatherhead Food International, 2008-02-19 Food additives are the cause of a great deal of discussion and suspicion. Now in its third edition, *Essential Guide to Food Additives* aims to inform this debate and bring the literature right up to date especially focussing on the changes in legislation since the last edition. Key topics include: * A basic introduction to the technology of food additives * Technical information on all food additives currently permitted in the European Union * Discussion covering the general issues surrounding the use of food additives, including the need for them * Coverage of the legal approval process for additives and the labelling of the finished product * Identification of sources or methods of production for each additive * Properties of individual additives and typical products they are used in This book will be an invaluable reference for researchers in the food and drink industry, undergraduates and graduates of courses in food science and technology and indeed all those who are interested in what they eat

The Economics of Child Labour Alessandro Cigno, Furio Camillo Rosati, 2005-07-28 This book provides a blend of theory, empirical analysis and policy discussion. The authors develop a comprehensive theory of child labour, and related variables such as fertility, and

infant mortality. The effects of trade are considered and country studies are included to illustrate and test different aspects of the theory in different geographical contexts.--BOOK JACKET.

The Squaw (Short Reads) Bram Stoker, 2010-10-01 Bram Stoker – The Squaw In this story, we encounter the wrath of the iconic cat from the front cover of The Pan Book of Horror Stories. And so does Elias P. Hutcheson – whose inflated boasts and careless attitudes are soon crushed . . . Pan Macmillan are proud to present a brand new reissue of the first ever edition of The Pan Book of Horror Stories. Fiendish, fantastic and downright chilling, these tales were originally selected for Pan by legendary horror anthologist Herbert van Thal. Fifty years on, they are as compelling, evocative and macabre as ever. Highlighted by a new introduction from Johnny Mains, ‘A Brief History of the Horrors’, the legacy of this astonishing collection – that became a defining influence on the genre – is self-evident. We have made an exclusive few available digitally, so choose your next nightmare here . . .

The Beast in the Boudoir Kathleen Kete, 2023-11-10 Kathleen Kete's wise and witty examination of petkeeping in nineteenth-century Paris provides a unique window through which to view the lives of ordinary French people. She demonstrates how that cliché of modern life, the family dog, reveals the tensions that modernity created for the Parisian bourgeoisie. Kete's study draws on a range of literary and archival sources, from dog-care books to veterinarians's records to Dumas's musings on his cat. The fad for aquariums, attitudes toward vivisection, the dread of rabies, the development of dog breeding—all are shown to reflect the ways middle-class people thought about their lives. Petkeeping, says

Kete, was a way to imagine a better, more manageable version of the world—it relieved the pressures of contemporary life and improvised solutions to the intractable mesh that was post-Enlightenment France. The faithful, affectionate family dog became a counterpoint to the isolation of individualism and lack of community in urban life. By century's end, however, animals no longer represented the human condition with such potency, and even the irascible, autonomous cat had been rehabilitated into a creature of fidelity and affection. Full of fascinating details, this innovative book will contribute to the way we understand culture and the creation of class. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1994.

Discovering Statistics Using SPSS Andy Field, 2009-01-21 'In this brilliant new edition Andy Field has introduced important new introductory material on statistics that the student will need and was missing at least in the first edition. This book is the best blend that I know of a textbook in statistics and a manual on SPSS. It is a balanced composite of both topics, using SPSS to illustrate important statistical material and, through graphics, to make visible important approaches to data analysis. There are many places in the book where I had to laugh, and that's saying a lot for a book on statistics. His excellent style

engages the reader and makes reading about statistics fun' - David C Howell, Professor Emeritus, University of Vermont USA This award-winning text, now fully updated with SPSS Statistics, is the only book on statistics that you will need! Fully revised and restructured, this new edition is even more accessible as it now takes students through from introductory to advanced level concepts, all the while grounding knowledge through the use of SPSS Statistics. Andy Field's humorous and self-deprecating style and the book's host of characters make the journey entertaining as well as educational. While still providing a very comprehensive collection of statistical methods, tests and procedures, and packed with examples and self-assessment tests to reinforce knowledge, the new edition now also offers: - a more gentle introduction to basic-level concepts and methods for beginners - new textbook features to make the book more user-friendly for those learning about more advanced concepts, encouraging 'critical thinking' - a brand new, full-colour design, making it easy for students to navigate between topics, and to understand how to use the latest version of SPSS Statistics - both 'real world' (the bizarre and the wonderful) and invented examples illustrate the concepts and make the techniques come alive for students - an additional chapter on multilevel modelling for advanced-level students - reinforced binding to make the book easier to handle at a computer workstation. The book also includes access to a brand new and improved companion Website, bursting with features including: - animated 'SPSS walk-through' videos clearly demonstrating how to use the latest SPSS Statistics modules - self-marking multiple choice questions - data sets for psychology, business and management and health sciences - a flash-card glossary for testing knowledge of key concepts - access to support material from SAGE study skills books.

Statistics lecturers are also provided with a whole range of resources and teaching aids, including: - the test bank - over 300 multiple-choice questions ready to upload to WebCT, Blackboard or other virtual learning environments - charts and diagrams in electronic format for inclusion in lecture slides - PowerPoint slides written by the author to accompany chapters of the text.

Quantitative Data Analysis with SPSS for Windows Alan Bryman, Duncan Cramer, 1997-01 Quantitative Data Analysis with SPSS for Windows explains statistical tests using the latest version of SPSS, the most widely used computer package for analysing quantitative data. Using the same formula-free, non-technical approach as the highly successful non-windows version, it assumes no previous familiarity with either statistics or computing, and takes the reader step-by-step through each of the techniques for which SPSS for Windows can be used, including: correlation simple and multiple regression multivariate analysis of variance and covariance factor analysis The book also contains a comprehensive range of exercises with answers, and covers issues such as sampling, statistical significance, and the selection of appropriate tests.

Natural Products Isolation Satya D. Sarker, 2008-02-05 The term “natural products” spans an extremely large and diverse range of chemical compounds derived and isolated from biological sources. Our interest in natural products can be traced back thousands of years for their usefulness to humankind, and this continues to the present day. Compounds and extracts derived from the biosphere have found uses in medicine, agriculture, cosmetics, and food in ancient and modern societies around the world. Therefore, the

ability to access natural products, understand their usefulness, and derive applications has been a major driving force in the field of natural product research. The first edition of Natural Products Isolation provided readers for the first time with some practical guidance in the process of extraction and isolation of natural products and was the result of Richard Cannell's unique vision and tireless efforts. Unfortunately, Richard Cannell died in 1999 soon after completing the first edition. We are indebted to him and hope this new edition pays adequate tribute to his excellent work. The first edition laid down the "ground rules" and established the techniques available at the time. Since its publication in 1998, there have been significant developments in some areas in natural product isolation. To capture these developments, publication of a second edition is long overdue, and we believe it brings the work up to date while still covering many basic techniques known to save time and effort, and capable of results equivalent to those from more recent and expensive techniques.
