*Self-Assembling Peptide Systems in Biology, Medicine and Engineering* A. Aggeli,N. Boden,Shuguang Zhang,Dr. Shuguang Zhang,Zhang Shuguang,2001-08-31 This is the first ever text on the intrinsic self-assembling behaviour of peptides and the implications of these properties for a broad range of applications. These include protein conformational diseases, the engineering of nanostructured biodegradable and biocompatible polymeric materials with potential applications in tissue engineering, biomedical devices, industrial fluids and personal care products. This new area of endeavour is outlined in a series of 25 articles summarising lectures presented at the first ever meeting on this topic held in Crete in July 1999. Audience: The articles address generic issues making the text readily amenable to postgraduate students, academics, and research scientists interested in new challenges at the physical sciences - life sciences interface.

**Urban Climate Mitigation Techniques** Mat Santamouris,Denia Kolokotsa,2016-01-08 The urban climate is continuously deteriorating. Urban heat lowers the quality of urban life, increases energy needs, and affects the urban socio-economy. Urban Climate Mitigation Techniques presents steps that can be taken to mitigate this situation through a series of innovative technologies and examples of best practices for the improvement of the urban climate. Including tools for evaluation and a comparative analysis, this book addresses anthropogenic heat, green areas, cool materials and pavements, outdoor shading structures, evaporative cooling and earth cooling. Case studies demonstrate the success and applicability of these measures in various cities throughout the world. Useful for urban designers, architects and planners, Urban Climate Mitigation Techniques is a step by step tour of the innovative technologies improving our urban climate, providing a holistic approach supported by well-established quantitative examples.

**Re-Orienting Fashion** Sandra Niessen,Ann Marie Leshkowich,Carla Jones,2003-04 Asian fashion has become a global phenomenon of significant economic, political and social import. But the industry in Asia remains characterized by the gap between traditional centres of fashion and power and the relatively marginalized periphery that includes Asia. The resulting fashions are ambiguous: despite their indigenous origins and inspiration, their survival depends upon the West. This book explores Asian fashion in a global economic and cultural context. In itself, this is pathbreaking because fashion studies have traditionally divided along the boundaries of the western/non-western dichotomy. When both production and consumption cut through these traditional boundaries, new fashion principles are expressed globally. How are western economic, cultural, political, iconic, and social forms inscribed in indigenous Asian fashion when (and often because) that fashion is an expression of resistance against western encroachment? How does dress become an active site for the negotiation of state ideals and gender roles in nations struggling to construct new identities informed by modern, western impulses? What role does gender play in negotiating dress symbols and how does this tie in with commodification by the global economic system? With chapters focusing on East, South, and Southeast Asian designers, retailers, consumers, and governments, this book moves Asian fashion centre-stage and should be of interest to dress and fashion theorists, anthropologists, sociologists and all those seeking to understand globalization and its effects

*Fashion and Postcolonial Critique* Elke Gaugele,Monica Tilton,2019 Fashion and Postcolonial Critique outlines a critical global fashion theory from a postcolonial perspective. It investigates contemporary articulations of postcolonial fashion critique, and analyzes fashion as a cultural, historical, social, and political phenomenon involved in and affected by histories of colonial domination, anti-colonial resistance, and processes of decolonization and globalization. Stemming from a range of different disciplines, such as art history, textile studies, anthropology, history, literary studies, cultural studies, sociology, fashion media, and fashion theory, the contributions in this book reflect the multidisciplinary and diverse nature of postcolonial fashion research today. Contributors Christine Checinska, Christine Delhaye, Burcu Dogramaci, Sonja Eismann, Elke Gaugele, Gabriele Genge, Birgit Haehnel, Sabrina Henry, Helen Jennings, Alexandra Karentzos, Hana Knížová, Christian Kravagna, Gabriele Mentges, Birgit Mersmann, Heval Okcuoglu, Walé Oyéjidé Esq., Leslie W. **The Arts of Transitional Justice** Peter D. Rush,Olivera Simić,2013-09-25 The Art of Transitional Justice examines the relationship between transitional justice and the practices of art associated with it. Art, which includes theater, literature, photography, and film, has been integral to the understanding of the issues faced in situations of transitional justice as well as other issues arising out of conflict and mass atrocity. The chapters in this volume take up this understanding and its demands of transitional justice in situations in several countries: Afghanistan, Serbia, Srebrenica, Rwanda, Northern Ireland, Cambodia, as well as the experiences of resulting diasporic communities. In doing so, it brings to bear the insights from scholars, civil society groups, and art practitioners, as well as interdisciplinary collaborations.

*Nanotechnology in Biology and Medicine* Tuan Vo-Dinh,2007-01-24 The combination of biology and nanotechnology has led to a new generation of nanodevices that make it possible to characterize the chemical, mechanical, and other molecular properties, as well as discover novel phenomena and biological processes occurring at the molecular level. These advances provide science with a wide range of tools for biomedical applications in therapeutic, diagnostic, and preventive medicine. Nanotechnology in Biology and Medicine: Methods, Devices, and Applications integrates interdisciplinary research and recent advances in instrumentation and methods for applying nanotechnology to various areas in biology and medicine. Pioneers in the field describe the design and use of nanobiosensors with various analytical techniques for the detection and monitoring of specific biomolecules, including cancer cells. The text focuses on the design of novel bio-inspired materials, particularly for tissue engineering applications. Each chapter provides introductory material including a description of methods, protocols, instrumentation, and applications, as well as a collection of published data with an extensive list of references. An authoritative reference written for a broad audience, Nanotechnology in Biology and Medicine: Methods, Devices, and Applications provides a comprehensive forum that integrates interdisciplinary research to present the most recent advances in protocols, methods, instrumentation, and applications of nanotechnology in biology and medicine.

**Organelle Proteomics** Delphine Pflieger,Jean Rossier,2010-11-19 This is the first book to examine organelle proteomics in depth. It begins by introducing the different analytical strategies developed and successfully utilized to study organelle proteomes, and detailing the use of multidimensional liquid chromatography coupled to tandem mass spectrometry for peptide sample analysis. Detailed protocols are provided and a section is devoted to methods enabling a global estimate of the reliability of the protein list assigned to an organelle.

**Motortown** Simon Stephens,2014-05-27 Danny returns from Basra to a foreign England and a different kind of battle. He visits an old flame, buys a gun and goes on a blistering road trip through the new home front. 'I don't blame the war. The war was alright. I miss it. It's just you come back to this.' Written during the London bombings of 2005, Motortown is a fierce, violent and controversial response to the anti-war movement - and to the war itself. Chaotic and complex, powerful and provocative, Simon Stephen's new play portrays a volatile and morally insecure world. Motortown premieres at the Royal Court Theatre on 21 April 2006. It follows the critically acclaimed On the Shore of the Wide World (Manchester Royal Exchange/National Theatre), winner of the Olivier Award for Best New Play (2005).

The Visible Self Joanne B. Eicher,Sandra Lee Evenson,2014-08-14 This anthropological investigation of dress featuring selected scholarly readings is ideal for courses focused on global perspectives and cultural aspects of dress.

**Textiles as National Heritage: Identities, Politics and Material Culture** Gabriele Mentges,Lola Shamukhitdinova,2017 The edited volume discusses the role of textile heritage in relation to the dynamics of nation building, cultural identity, politics, economy and the globalization of markets. It was sparked by a research project investigating the role of textiles, textile design and contemporary fashion in the post-Soviet societies of Central Asia and also includes perspectives on similar developments in Algeria and Peru in order to question dichotomous narrations of modernity relations between textile cultures and heritage building, cultural property, and the concept of cultural heritage. Thus, this book intends to stimulate the ongoing debate about textile culture as national heritage or as means of nation branding.

**Private Equity Demystified** John Gilligan, Mike Wright, 2020-11-05 Private equity has grown rapidly over the last three decades, yet largely remains poorly understood. Written in a highly accessible style, the book takes the reader through what private equity means, the different actors involved, and issues concerning sourcing, checking out, valuing, and structuring deals.

**Masonic Death Records from the Grand Lodge of Arkansas, 1941-1990** Desmond Walls Allen, 1999

**Testing the Limits** Mark J. Rozell, Gleaves Whitney, 2009-09-16 This collaboration of distinguished presidential scholars offers one of the first book-length post-presidency analyses of President George W. Bush and his policies. Mark J. Rozell and Gleaves Whitney have assembled a varied list of contributors from both ends of the political spectrum, bringing together academics and professionals to provide a glimpse into the politics and policies that defined President George W. Bush's presidency. Testing the Limits discusses all aspects of the Bush policy and administration, from staff appointments to foreign and domestic policy to budgetary politics. Several contributors focus their energy on the expansion of presidential powers during Bush presidency, assessing the increased influence of the Vice-President, the politicization of federal court appointments, and the development of executive privilege and presidential secrecy.
