Fire as an Agent in Human Culture Walter Hough,1926 This work undertakes the presentation of salient features of an encyclopedic subject in a more or less condensed fashion. The importance of the study of heating and illumination is thought to be its contribution to the history of culture as connected with the inventiveness displayed by man in the adaptation of the primary natural key force nearest to his needs in all the earlier stages of progress. The history also suggests the intellectual, esthetic, and religious reactions marking the several stages of culture gradually attained by man.

Keepers of the Flame Robert M. Hazen,Margaret Hindle Hazen,2014-07-14 For, Lo! We live in an Iron Age--In the age of Steam and Fire! wrote a poet mesmerized by the engines that were transforming American transportation, agriculture, and industry during his lifetime. Indeed, by the nineteenth century fire had become America's leitmotif--for good and for ill. Keeping the flame was deadly serious: even the slightest lapse of attention could convert a fire from friendly ally to ravaging destroyer. To examine the cultural context of fire in combustible America, Margaret Hazen and Robert Hazen gather more than a hundred illustrations, most never before published, together with anecdotes and information from hundreds of original sources, including newspapers, diaries, company records, popular fiction, art, and music. What results is an immensely entertaining and encyclopedic history that ranges from stories of the tragic great fires of the century to fire imagery in folktales and popular literature. Dealing more with technology than with fire in nature, the book provides a vast amount of information on fire manipulation and prevention in urban life. Hazen and Hazen discuss the people who worked with fire--or against it. Founders, gaffers, blacksmiths, boilers at saltworks, and housewives knew how to read a fire and employ it for their purposes. A few dedicated investigators inquired about the scientific nature of heat and flame. And firefighters gradually progressed from bucket brigades to using fire to fight fire with the newly invented steam engine. The colorful stories of these Americans--the risks they took and the rewards they received--will fascinate not only social historians but also a broad audience of general readers. Ancient Fire, Modern Fire Einar Jensen,2016-02-16 Creating fire is easy, yet understanding and learning to live with this friend and foe has never been easy; stopping fire is a dangerous--and often deadly--pursuit. Drawing on his experiences as an environmental historian, firefighter and life safety educator, author Einar Jensen presents an eye-opening look at fire and our history of dealing with it, then gives us the tools for being responsible and prepared--as parents and teachers, as communities and fire service professionals, and as homeowners in the wildland urban interface. "If we don't change our understanding of fire, our rules of engagement, or our cultural values, we should expect more tragedies and be willing to pay for them in ever-increasing volumes of dollars, blood, sweat and tears. I'm committed to preventing these tragedies, and I hope to bring more members into my prevention cadre." -- Einar Jensen Contents 1 - Fire, Our Friend and Foe 2 -- Fundamentals of Fire Science 3 - Youth & Firesetting: Playing with Fire Can Burn Us 4 - Fire's Dark Side: A Tool of Pain & Destruction 5 - Fire's Positive Side: A Tool of Creation 6 - Rules of Fire, Rites of Fire 7 - Sacred Fire 8 - Risk Perception and Fire 9 - Harmony with Fire 10 - Will We Keep Burning? Fire at Peshtigo Robert W. Wells,1968 Everyone has heard of the Great Chicago fire of 1871, but few have heard of another fire going on in Wisconsin and Michigan at the same time. The Peshtigo fire killed five times as many people as that in Chicago. It was one of the worst tragedies of its kind ever recorded in North America. -- Foreword.

The Wood Fire in No. 3 Francis Hopkinson Smith,1905

A dreadful Fire, with some account of those who escaped and those who perished FIRE.,1830

The Forgotten War Joseph F. Maraglino,2016-08-31 While in the process of writing this book, a catastrophic event occurred in US firefighting history. An elite force of firefighters, nineteen in number (eighteen men and one woman), died while fighting a forest fire in Arizona. A wind shift placed this raging inferno head-on into this force. One TV announcer claimed the winds were gushing up to fifty miles per hour. Television programs showed viewers what these firefighters had to protect themselves. They lay flat on the ground and put this tentlike apparatus over them, which was probably made of a fire-retardant material, but this could not protect these heroes from thousand-degree temperatures and gusting winds, which turned this inferno similar to a flamethrower. As a firefighter, even though youve fought similar fires, many times you never take anything for granted. As you will see in this book, fires thought to be under control were turned into second and larger alarms. The red devil sometimes throws you a curve ball, and it can cost you your life and civilians lives. While you have this story fresh in your minds, say a prayer for these firefighters who got burned alive. And on the eighth day, God created firefighters.

Fire Prevention and Fire Extinction James Braidwood,2022-11-21 Fire Prevention and Fire Extinction is an informational book on the subject of fires, attributed to James Braidwood, London's First Superintendent of the London Fire-Brigade, and a Civil Engineer. Published post humously, a memoir of Braidwood's states, The modern system of English fire brigades belongs wholly to the period of railways, steam navigation, and electric telegraphs, and it owes nearly all to the genius and disciplined heroism of a single individual, James Braidwood, who, but little more than four years ago, fell--as nobly for himself as sadly for others--at his chosen post of duty. The book covers the sub-topics: fire-proof structures, fire-proof safes, public fire brigades, private means for suppressing fires, fire-engines, fire annihilators, portable fire-escapes and water supply.

The Fire Line Fernanda Santos,2016-05-03 "In Fernanda Santos' expert hands, the story of 19 men and a raging wildfire unfolds as a riveting, pulse-pounding account of an American tragedy; and also as a meditation on manhood, brotherhood and family love. The Fire Line is a great and deeply moving book about courageous men and women." - Héctor Tobar, author of Deep Down Dark: The Untold Stories of 33 Men Buried in a Chilean Mine and the Miracle that Set Them Free. When a bolt of lightning

ignited a hilltop in the sleepy town of Yarnell, Arizona, in June of 2013, setting off a blaze that would grow into one of the deadliest fires in American history, the twenty men who made up the Granite Mountain Hotshots sprang into action. An elite crew trained to combat the most challenging wildfires, the Granite Mountain Hotshots were a ragtag family, crisscrossing the American West and wherever else the fires took them. The Hotshots were loyal to one another and dedicated to the tough job they had. There's Eric Marsh, their devoted and demanding superintendent who turned his own personal demons into lessons he used to mold, train and guide his crew; Jesse Steed, their captain, a former Marine, a beast on the fire line and a family man who wasn't afraid to say "I love you" to the firemen he led; Andrew Ashcraft, a team leader still in his 20s who struggled to balance his love for his beautiful wife and four children and his passion for fighting wildfires. We see this band of brothers at work, at play and at home, until a fire that burned in their own backyards leads to a national tragedy. Impeccably researched, drawing upon more than a hundred hours of interviews with the firefighters' families, colleagues, state and federal officials, and fire historians and researchers, New York Times Phoenix Bureau Chief Fernanda Santos has written a riveting, pulse-pounding narrative of an unthinkable disaster, a remarkable group of men and the raging wildfires that threaten our country's treasured wild lands. The Fire Line is the winner of the 2017 Spur Award for Best First Nonfiction Book, and Spur Award Finalist for Best Western Contemporary Nonfiction.

Fire Sebastian Junger, 2001-10-17 Junger's essays deal with the primal power of fire and with man's capacity for destruction.

Fire in the Heart Mary Emerick, 2017-09-05 FIRE IN THE HEART is a powerful memoir by a woman, once a shy, insecure schoolgirl, who reinvented herself as a professional wildland fire fighter. Determined to forge herself into a stronger, braver person, Mary climbs to new heights for a woman in the field in the 90s, eventually becoming a team commander of a Florida wildfire division. Filled with literal struggles for survival, tough choices and Mary's burning passion for what she does, Fire in the Heart, is an unflinching account of one woman's relationship with fire. But when she loses someone she loves to the famous Storm King Mountain forest fire in Colorado, which killed fourteen firefighters, Mary faces the hardest choice of her life; to stay in the game or turn back and try to find the woman she used to be. It is both a thrilling memoir about life-threatening work and a meditation on identity, strength, bravery, bonds, and survivor's guilt.

Young Men and Fire Norman Maclean, 2017-05 Twenty-five years after its first publication, Young Men and Fire is read avidly by students of literary nonfiction for its blend of hard-earned research, memoir, and an old man's wisdom. It tells one of the most infamous stories in the history of wildland firefighting: On August 5, 1949, a crew of fifteen of the United States Forest Service's elite airborne firefighters, the Smokejumpers, stepped into the sky above a remote forest fire in the Montana wilderness. On the ground, they were joined by a local fireguard. Two hours after the jump, all but three of the men were dead or mortally burned. For forty years, Maclean was haunted by these deaths. And for the last years of his life, he struggled to write a book that would put back together the scattered pieces of the Mann Gulch disaster and to give it the dignity of tragedy. The result is both the definitive account of what happened to the Smokejumpers on that remote Montana mountainside in 1949, and the narrative of a writer's quest for meaning in the face of elusive facts and the waning energies of old age.

Young Men and Fire Norman Maclean, 2010-03-25 On August 5, 1949, a crew of fifteen of the United States Forest Service's elite airborne firefighters, the Smokejumpers, stepped into the sky above a remote forest fire in the Montana wilderness. Two hours after their jump, all but three of these men were dead or mortally burned. Haunted by these deaths for forty years, Norman Maclean puts back together the scattered pieces of the Mann Gulch tragedy. Young Men and Fire won the National Book Critics Circle Award in 1992. A magnificent drama of writing, a tragedy that pays tribute to the dead and offers rescue to the living.... Maclean's search for the truth, which becomes an exploration of his own mortality, is more compelling even than his journey into the heart of the fire. His description of the conflagration terrifies, but it is his battle with words, his effort to turn the story of the 13 men into tragedy that makes this book a classic.—from New York Times Book Review Editor's Choice, Best Books of 1992 A treasure: part detective story, part western, part tragedy, part elegy and wholly eloquent ghost story in which the dead and the living join ranks cheerfully, if sometimes eerily, in a search for truth and the rest it brings.—Joseph Coates, Chicago Tribune An astonishing book. In compelling language, both homely and elegant, Young Men and Fire miraculously combines a fascinating primer on fires and firefighting, a powerful, breathtakingly real reconstruction of a tragedy, and a meditation on writing, grief and human character.... Maclean's last book will stir your heart and haunt your memory.—Timothy Foote, USA Today Beautiful.... A dark American idyll of which the language can be proud.—Robert M. Adams, The New York Review of Books Young Men and Fire is redolent of Melville. Just as the reader of Moby Dick comes to comprehend the monstrous entirety of the great white whale, so the reader of Young Men and Fire goes into the heart of the great red fire and comes out thoroughly informed. Don't hesitate to take the plunge.—Dennis Drabelle, Washington Post Book World Young Men and Fire is a somber and poetic retelling of a tragic event. It is the pinnacle of smokejumping literature and a classic work of 20th-century nonfiction.—John Holkeboer, The Wall Street Journal Maclean is always with the brave young dead. . . . They could not have found a storyteller with a better claim to represent their honor. . . . A great book.—James R. Kincaid, New York Times Book Review

Fire Stephen J. Pyne, 2011-07-01 The fate of humanity, like the fate of the earth, is tied to the fires that have made the world as we know it—the fires whose history is told as well in this book as it has ever been told before. If one wants to understand just how completely the story of the human past is also the story of fire on earth, there is no better place to start than this small book. William Cronon Here, in one concise book, is the essential story of fire. Noted environmental historian Stephen J. Pyne describes the evolution of fire through prehistoric and historic times down to the present, examining contemporary attitudes from a long-range, informed perspective. Fire: A Brief History surveys the principles behind aboriginal and agricultural fire practices, the characteristics of urban fire, and the relationship between controlled combustion and technology. Pyne describes how fire's role in cities, suburbs, exurbs, and wildlands has been shaped by an industrialized, urban way of thinking. Fire: A Brief History will be of value to readers interested in the environment from the standpoint of anthropology, geography, forestry, science and technology, history, or the humanities.

The Great Los Angeles Fire Edward Stewart, 1980

Fire Stephen J. Pyne, 2013-06-01 For over 400 million years, fire has been an integral force on our planet. It can be as innocent as a bonfire or as destructive and

lethal as a wildfire. Human history is rife with fires that have leveled cities—the Fire of Moscow in 1812 that destroyed seventy-five percent of the city, the Great Chicago Fire in 1871 that took down 17,000 buildings, and the fire that obliterated San Francisco after the 1906 earthquake are just a few. Fire is a force of nature that can consume everything in its wake, and yet it also has tremendous powers of cleansing and renewal. At the end of the day, we can't live without it. In *Fire*, Stephen J. Pyne offers a concise history of fire and its use by humanity, explaining how fire has been at the core of hunting, foraging, farming, herding, urbanizing, and managing nature reserves. He depicts how it gave humans power in ancient times, which resulted in humanity beginning to reshape the world for its own benefit. He describes how fire was used by aboriginal societies and the ways agricultural societies added control over fuel, but warns that our mastery of the science and art of fire has not given us complete control—fire disasters throughout history have defined cultures, and unexpected fires that begin as the result of other disasters have shocking effects. Pyne traces fire's influence on landscapes, art, science, and even climate, exploring the power a simple spark has over our imaginations. Lavishly illustrated with a host of rare and unexpected images, *Fire* is a sizzling and accessible tale of our relationship with this primal natural force.

Fire Alive! John Steiner,2013-07-29 Fire. The light by which we tell our stories and mythic tales. It kept the night at bay for hundreds of thousands of years. It guided humanity's migrations across the globe, and became mankind's first weapon of mass destruction. What if fire developed a mind of its own. ... Firefighting is already a tough job even in 2026. Captain Duane Longhand Longhurst and probationary firefight Malcolm O'Connell of Salt Lake City's Station 8 discover it's going to get much harder. A phenomenon of particle physics called Self-Propagating Organized Thermotroph or S.P.O.T. emerges to burn whatever they can to ingest the heat that fuels their semi-living existence. Breaking in a new enigmatic probie, and struggling with memories of past fire calls, Captain Longhurst has to now take on the blazing entities.
