Democracy Works Torry D. Dickinson, Terrie A. Becerra, Summer B.C.

Lewis, 2015-12-03 Throughout the world, from the United States to Tanzania, Chechnya, and Sri Lanka, people increasingly work together and take actions to improve their lives, end inequality, and change global society. Action groups and movements see dialogue and learning as important ways to extend democracy and, with their inclusiveness, remake society. By putting strategy with theory, local groups and movements are able to begin making changes in civil society and institutions that allow people to begin living in new ways. Written for activists, people, and students interested in change, this book takes readers on a journey of discovery as it shows how various groups have brought theory and action together to make urban, rural, and transnational change. The case studies and explanatory articles reveal how feminist, antiracist, ecological, and peace movements reinforce each other to initiate and achieve well-placed and enduring change.

Turbo-folk Music and Cultural Representations of National Identity in Former Yugoslavia

Uroš Čvoro, 2016-03-03 Turbo-folk music is the most controversial form of popular culture in the new states of former Yugoslavia. Theoretically ambitious and innovative, this book is a new account of popular music that has been at the centre of national, political and cultural debates for over two decades. Beginning with 1970s Socialist Yugoslavia, Uroš Čvoro explores the cultural and political paradoxes of turbo-folk: described as 'backward' music, whose misogynist and Serb nationalist iconography represents a threat to cosmopolitanism, turbo-folk's iconography is also perceived as a 'genuinely Balkan' form of resistance to the threat of neo-liberalism. Taking as its starting point turbo-folk's popularity across national

borders, Čvoro analyses key songs and performers in Serbia, Slovenia and Croatia. The book also examines the effects of turbo on the broader cultural sphere - including art, film, sculpture and architecture - twenty years after its inception and popularization. What is proposed is a new way of reading the relationship of contemporary popular music to processes of cultural, political and social change - and a new understanding of how fundamental turbo-folk is to the recent history of former Yugoslavia and its successor states.

The Folk Singers and the Bureau Aaron Leonard, 2020-09-08 The first book to document the efforts of the FBI against the most famous American folk singers of the mid-twentieth century, including Woody Guthrie, 'Sis Cunningham, Pete Seeger, Lee Hays and Burl Ives. Some of the most prominent folk singers of the twentieth century, including Woody Guthrie, 'Sis Cunningham, Pete Seeger, Lee Hays, Burl Ives, etc., were also political activists with various associations with the American Communist Party. As a consequence, the FBI, along with other governmental and right-wing organizations, were monitoring them, keeping meticulous files running many thousands of pages, and making (and carrying out) plans to purge them from the cultural realm. In *The Folk Singers and the Bureau*, Aaron J Leonard draws on an unprecedented array of declassified documents and never before released files to shed light on the interplay between left-wing folk artists and their relationship with the American Communist Party, and how it put them in the US government's repressive cross hairs. At a time of increasing state surveillance and repression, *The Folk Singers and the Bureau* shows how the FBI and other governmental agencies have attempted to shape and repress American culture.

The Social Organization of Sports Medicine Dominic Malcolm, Parissa Safai, 2012-10-12 The Social Organization of Sports Medicine is the first book-length overview of the social scientific study of sports medicine, drawing together work from an international cadre of scholars who examine and provide interdisciplinary analysis of the dynamic and multi-faceted relationships between sports and medicine and within sports medicine. The book charts changing perceptions of sport within medical discourse, attempts by sports medicine providers to forge professional identities in response to these processes, the day-to-day experiences of deliverers of sports medicine and the reactions of recipients of that healthcare. The contents are organized in four sections, examining the competing and changing ways in which sports medicine is conceived, the ways in which it is organized, the ways in which it is practiced, and points of contestation between traditional and alternative and emerging forms of (sports) medicine. This collection of essays consolidates recent advances in this area of study and establishes a basis for the future development of the field.

Folklore, People, and Places Jack Hunter, Rachael Ironside, 2023-03-16 Folklore, People and Place is a contribution towards better understanding the complex interconnectivity of folklore, people and place, across a range of different cultural and geographical contexts. The book showcases a range of international case studies from different cultural and ecological contexts showing how folklore can and does mediate human relationships with people and place. Folklore has traditionally been connected to place, telling tales of the land and the real and imaginary beings that inhabit storied places. These storytelling traditions and practices have endured in a contemporary world, yet the role and value of folklore to people and places has changed. The book explores a broad range of international perspectives and considers how the relationship between folklore, people, and place has evolved for tourists and indigenous communities. It will showcase a range of international case studies from different cultural and ecological contexts showing how folklore can and does mediate human relationships with people and place. By exploring folklore in the context of tourism, this book engages in a critical discussion of the opportunities and challenges of using storied places in destination development. The case studies in the book provide an international perspective on the contemporary value of folklore to people and places engendering reflection on the role of folklore in sustainable tourism strategies. This book will be of interest to students, academics, researchers in fields such as anthropology, folklore, tourism, religious studies, human geography and related disciplines. It will also be of interest to scholars and practitioners of traditional ecological knowledge.

Research and Ethics for the Medical Profession J M Albareeq,A Abdul Aal,H Abozenah,F Alhourani,D Alromaihi,A Alsowaidi,M Corbally,E Fadel,O Sharif,S Skowronski,E Tierney,S Baithun,2017-06-29 This seminal work, *Research and Ethics for the Medical Profession*, shares a common thread among all its contributing authors, and that the medical and nursing profession are obligated to act compassionately, honestly, and with respect for the betterment of their patients. Doctors have a moral duty to act within the law of the land while recognizing that at times the legislature may lag behind the evolving, and at times urgent, needs of the profession. The culture of respect for ones patient is essential in the doctor-doctor relationship and preserves societys confidence in the doctor and the profession at large. Respect for the patient exists at each stage of the doctor-patient interaction as informed consent or when the patient rejects the planned procedure or requests a second opinion. This book would provide a guide to the professional working in todays complex environment; however, the physician should always place his patient first and never be afraid to admit uncertainty or seek help.

When Education Meets Politics in Taiwan Ka-ho Kwok, 2017-09-13 Politics affect education, particularly in transitional societies. It is obvious that Taiwan's education reform and democratization share the same set of players. All major educational players played a role at different stages in the electoral process striving for popular support. This book applies game theoretic tools and proposes "dynamic positioning" as a new framework that regards Taiwan's education reform from 1994 to 2016 as the outcome of players' strategic interactions (instead of top-down or bottom-up). The complex interplay is characterized by the continual adjustment of one's preferences and strategies in response to other players' moves. This concept helps explain how and why Taiwan's education reform was once embraced by most players (cooperation), but became a battlefield between different camps (non-cooperation) soon after a change of the ruling party in 2000. It disputes various structural approaches on educational change, including functionalism, conflict theory, globalization, and theories of liberal democracy. It also contributes to the field of game theoretical studies in education and the specific literature of politics, social change, and education reform.

Depression in Kerala Claudia Lang, 2018-06-18 This book examines depression as a widely diagnosed and treated common mental disorder in India and offers a significant ethnographic study of the application of a traditional Indian medical system (Ayurveda) to the very modern problem of depression. Based on over a year of fieldwork, it investigates the Ayurvedic response to the burden of depression in the Indian state of Kerala as one of the key processes of the local appropriation or glocalization of depression. More broadly, Lang considers: What happens with the category of depression when it leaves the West and travels to South Asia? How is depression appropriated in a South Asian society characterized by medical pluralism? She explores on the level of ideas, institutions and

materialities how depression interacts with and changes local worlds, clinical practice and knowledge and subjectivities. As depression travels from 'the West' to South India, its ontology, Lang argues, multiplies and thus leads to what she calls 'depression multiple'.

Polish Catholicism between Tradition and Migration Wojciech Sadlon, 2021-06-28

From a critical realist perspective, this book examines the manner and the extent to which religion is shaped by modernity. With a focus on Poland, one of the most monolithic and religiously active Catholic societies in the world – but which has undergone periods of intense transformation in its recent history – the author explores the transformations that have affected Catholicism from a position of reflexivity. Viewing Catholicism as a system of ideas elaborated by tradition, the author considers the relationship between human subjectivity and social structure by examining the shift from traditional religious practice to modern religious observance, particularly in an era of migration in which many Polish Catholics have relocated to western European countries, with profound changes in their religious outlook. Presenting a new approach to understanding religious change from the perspective of religious reflexivity, *Polish Catholicism between Tradition and Migration* will appeal to scholars across the social sciences with interests in religion, research methods, social change and critical realist thought.

Disaster Resilience Douglas Paton, David Moore Johnston, 2006 This book will fill the gaps that hamper the effective utilization of the resilience and sustainability concepts within emergency planning: one concerns the lack of a comprehensive review of this multi-level concept; the second relates to its multi-level nature. Specifically, the text identifies a need for the systematic integration of these different levels in a manner that illustrates the

holistic contribution of the resilience concept to emergency planning. By integrating these different levels in a manner that illustrates the holistic contribution of the resilience concept to emergency planning, a comprehensive working model of disaster resilience and sustainability can be developed. The text discusses the resources and strategies required at each level to facilitate resilience and how they can be integrated to develop a sustained capacity to adapt to nature (and other) hazard consequences. The nature and implications of these inter-relationships will be developed throughout the text and will lead towards the development of a comprehensive, integrated model of community resilience. A key focus of the text will thus be its articulating the inter-relationships between these levels. The importance of basing emergency planning on the holistic application of the concept will also be discussed. By representing resilience in a holistic manner, the text will also constitute a resource capable of assisting assessment of the community implications of any shortfall of resilience resources for emergency planning and for community recovery planning. The book brings together contributions from international experts in core areas. It includes chapters that provide an overarching framework within which the need for inter-relationships between levels to be developed is discussed. It also includes sections that link chapters to progressively develop a holistic multi-level model, and a chapter that describes the final comprehensive model and its implications for contemporary emergency management. It will be useful to those researching or teaching courses in emergency management, disaster management, community development, environmental planning, urban development, sociology, and applied psychology, as well as to emergency management agencies, risk management agencies, engineers and consultants, planners,

emergency and law enforcement agencies, and social and welfare agencies.

Folkboat Story Dieter Loibner, 2008-10-17 This modern classic of small boat literature details the history of the Nordic Folkboat--a class that enjoys remarkable popularity in some of the world's most beautiful and challenging sailing waters. A clinker design that sails equally fast and well whether it is made from wood or fiberglass, the Nordic Folkboat has been around for 60 years. It has stood the test of time as its minimalism, robustness and sea kindness have proved resistant to radical design modifications. Loibner guides us through all the layers of the Folkboat community, from those who sail competitively in the many Folkboat regattas worldwide, to the devoted following of recreational sailors who appreciate the sturdiness of the design when out cruising with family and friends, to what he refers to as the Lunatic Fringe. Any reader who has spent a thrilling afternoon on the

dancing prow of a small boat will appreciate the insights and journey of The Folkboat Story.
