The Theme of Boundaries in the Poetry of Robert Frost Katrin Gischler,2005-11-22 Seminar paper from the year 2004 in the subject American Studies - Literature, grade: 65%, University of Reading (Department of English and American Literature), course: Writing America 2, 8 entries in the bibliography, language: English, abstract: Robert Lee Frost belongs to one of the most popular and influential writers of the 20th century. Although his career started only at the age of forty, he made his mark as a poet, becoming more and more widely known until at the end he was the United States' de facto poet laureate.¹ The clarity of Frost's diction, the colloquial rhythms, the simplicity of his images and above all the folksy speaker- these are intended to make the poems look natural, unplanned. By investing in the New England terrain he revitalised the tradition of New England regionalism. Readers who accepted Frost's persona and his setting as typically American accepted the powerful myth that this rural part of the country was the heart of America. Among the major concerns that appear in Frost's poetry are the fragility of life, the consequences of rejecting or accepting the conditions of one's life, the passion of inconsolable grief, the difficulty of sustaining intimacy, the fear of loneliness and isolation, the tensions between the individual and society, and the place of tradition and custom.³ The tensions between the individual and society become apparent in Frost's examination and metaphorical use of geographical boundaries. In this respect, I am going to focus on one of Frost's most popular poems Mending Wall from the volume of poems called North of Boston (1914) and a more less known poem Trespass from A Witness Tree (1942).

Robert Frost's Poetry of Rural Life George Monteiro,2015-02-23 "Wise old Vergil says in one of his Georgics, 'Praise large farms, stick to small ones,'" Robert Frost said. "Twenty acres are just about enough." Frost started out as a school teacher living the rural life of a would-be farmer, and later turned to farming full time when he bought a place of his own. After a sojourn in England where his first two books were published to critical acclaim, he returned to New England, acquired a new farm and became a rustic for much of the rest of his life. Frost claimed that all of his poetry was farm poetry. His deep admiration for Virgil's Georgics, or poems of rural life, inspired the creation of his own New England "georgics," his answer to the haughty 20th-century modernism that seemed certain to define the future of Western poetry. Like the "West-Running Brook" in his poem of the same name, Frost's poetry can be seen as an embodiment of contrariness.

Street Smart Gabriel Roth,2017-07-05 The poor health of today's roads--a subject close to the hearts of motorists, taxpayers, and government treasurers around the world--has resulted from faulty incentives that misdirect government decision-makers, according to the contributors to Street Smart. During the 1990s, bad government decision-making resulted in the U.S. Interstate Highway System growing by only one seventh the rate of traffic growth. The poor maintenance of existing roads is another concern. In cities around the world, highly political and wasteful government decision-making has led to excessive traffic congestion that has created long commutes, reduced safety, and caused loss of leisure time.Street Smart examines the privatization of roads in theory and in practice. The authors see at least four possible roles for private companies, beyond the well-known one of working under contract to design, build, or maintain governmentally provided roads. These include testing and licensing vehicles and drivers; management of government-owned facilities; franchising; and outright private ownership. Two chapters describe the history of private roads in the United Kingdom and the United States. Contemporary examples are provided of road pricing, privatizing, and contracting out are evident in environs as diverse as Singapore, Southern California, and Scandinavia, and cities as different as Bergen, Norway, and London, England. Finally, several chapters examine strategies for implementing privatization. The principles governing providing scarce resources in free societies are well known. We apply them to such necessities as energy, food, and water so why not to road space? The main obstacle to private, or semi-private, ownership of roads is likely to remain the reluctance of the political class to give up a lucrative source of power and influence.Those who want decisions about road services to be controlled by the interplay of consumers and suppliers in free markets, rat

In Search of the Sacred Book Aníbal Gonzalez,2018-05-18 In Search of the Sacred Book studies the artistic incorporation of religious concepts such as prophecy, eternity, and the afterlife in the contemporary Latin American novel. It departs from sociopolitical readings by noting the continued relevance of religion in Latin American life and culture, despite modernity's powerful secularizing influence. Analyzing Jorge Luis Borges's secularized "narrative theology" in his essays and short stories, the book follows the development of the Latin American novel from the early twentieth century until today by examining the attempts of major novelists, from María Luisa Bombal, Alejo Carpentier, and Juan Rulfo, to Julio Cortázar, Gabriel García Márquez, and José Lezama Lima, to "sacralize" the novel by incorporating traits present in the sacred texts of many religions. It concludes with a view of the "desacralization" of the novel by more recent authors, from Elena Poniatowska and Fernando Vallejo to Roberto Bolaño.

Consuming Schools Trevor Norris,2011-01-01 The increasing prevalence of consumerism in contemporary society often equates happiness with the acquisition of material objects. Consuming Schools describes the impact of consumerism on politics and education and charts the increasing presence of commercialism in the educational sphere through an examination of issues such as school-business partnerships, advertising in schools, and corporate-sponsored curriculum. First linking the origins of consumerism to important political and philosophical thinkers, Trevor Norris goes on to closely examine the distinction between the public and the private sphere through the lens of twentieth-century intellectuals Hannah Arendt and Jean Baudrillard. Through Arendt's account of the human activities of labour, work, and action, and the ensuing eclipse of the public realm and Baudrillard's consideration of the visual character of consumerism, Norris examines how school commercialism has been critically engaged by in-class activities such as media literacy programs and educational policies regulating school-business partnerships.

Advanced Natural Gas Engineering Xiuli Wang,Michael Economides,2013-11-25 Natural gas is playing an increasing role in meeting world energy demands because of its abundance, versatility, and its clean burning nature. As a result, lots of new gas exploration, field development and production activities are under way, especially in places where natural gas until recently was labeled as “stranded . Because a significant portion of natural gas reserves worldwide are located across bodies of water, gas transportation in the form of LNG or CNG becomes an issue as well. Finally natural gas is viewed in comparison to the recently touted alternatives. Therefore, there is a need to have a book covering all the unique aspects and challenges related to natural gas from the upstream to midstream and downstream. All these new issues have not been addressed in depth in any existing book. To bridge the gap, Xiuli Wang and Michael Economides have written a new book called Advanced Natural Gas Engineering. This book will serve as a reference for all engineers and professionals in the energy business. It can also be a textbook for students in petroleum and chemical engineering curricula and in training departments for a large group of companies.
