The North Korean Economy Catherine Cavanaugh, 2017-09-04 Viewed from afar, North Korea may appear bizarre, or positively irrational. But as Nicholas Eberstadt demonstrates in this meticulously researched volume, there is a grim coherence to North Korea's political economy, and a ruthless logic undergirding it--one that unreservedly subordinates economic welfare to augmentation of political power. Thus, paradoxically, even as official policies and practices consign the DPRK economy to a perilous realm between crisis and catastrophe, the country's leadership maintains unchallenged domestic control and has actually managed to increase its international influence. Through painstaking collection of hard-to-uncover data and careful analysis, Eberstadt provides a quantitative tableau of North Korea's terrible failure in its economic race against South Korea; its stubborn adherence to policies all but guaranteed to stifle growth and undermine economic performance; and the longstanding official effort to ignore, or mitigate, pressures for economic reform. Eberstadt is skeptical of optimistic accounts from South Korea and elsewhere suggesting that the North Korean leadership is interested in resolving the current nuclear impasse, and getting on with the business of reform and development. So long as Pyongyang's rulers entertain the ambition of reunifying the Korean peninsula on its own terms, Eberstadt argues, economic reforms worthy of the name will be subversive of state authority--and vigilantly resisted by Pyongyang's rulers. This authoritative volume has received widespread attention from Asian specialists, well as those concerned with nuclear proliferation and world peace, and international relations professionals in general.

A Century of Genocide Eric D. Weitz, 2015-04-27 Why did the twentieth century witness unprecedented organized genocide? Can we learn why genocide is perpetrated by comparing different cases of genocide? Is the Holocaust unique, or does it share causes and features with other cases of state-sponsored mass murder? Can genocide be prevented? Blending gripping narrative with trenchant analysis, Eric Weitz investigates four of the twentieth century's major eruptions of genocide: the Soviet Union under Stalin, Nazi Germany, Cambodia under the Khmer Rouge, and the former Yugoslavia. Drawing on historical sources as well as trial records, memoirs, novels, and poems, Weitz explains the prevalence of genocide in the twentieth century--and shows how and why it became so systematic and deadly. Weitz depicts the searing brutality of each genocide and traces its origins back to those most powerful categories of the modern world: race and nation. He demonstrates how, in each of the cases, a strong state pursuing utopia promoted a particular mix of extreme national and racial ideologies. In moments of intense crisis, these states targeted certain national and racial groups, believing that only the annihilation of these enemies would enable the dominant group to flourish. And in each instance, large segments of the population were enticed to join in the often ritualistic actions that destroyed their neighbors. This book offers some of the most absorbing accounts ever written of the population purges forever associated with the names Stalin, Hitler, Pol Pot, and Milosevic. A controversial and richly textured comparison of these four modern cases, it identifies the social and political forces that produce genocide.

Essential Principles of Contract and Sales Law in the Northern Pacific Daniel P. Ryan, 2005-08-23 Taking an anthropological approach, Essential

Principles of Contract and Sales Law in the Northern Pacific highlights how regional customary and traditional law interact with Anglo-American concepts of contract and sales law to produce a unique amalgam of substantive law in this Pacific region. Author and law professor Daniel P. Ryan compiles and discusses the current contract and sales law applicable in the Pacific region, including the Republics of Palau and the Marshall Islands, Hawaii, Guam, Northern Mariana Islands, American Samoa, and the Federated States of Micronesia. Ryan compares and contrasts this regional law to international standards, including the UN Sale of Goods Convention, the UNIDROIT Principles of Contract Law, UNCITRAL Model Law for E-Commerce, the Uniform Commercial Code, the Revised Uniform Commercial Code, and the Restatement (Second) of Contracts. *Essential Principles of Contract and Sales Law in the Northern Pacific* is essential reading for members of the judiciary, academics, practitioners, students, and businesses within the region and their major trade partners.

United States of Jihad Peter Bergen,2016-02-02 A riveting, panoramic look at “homegrown” Islamist terrorism from 9/11 to the present Since 9/11, more than three hundred Americans—born and raised in Minnesota, Alabama, New Jersey, and elsewhere—have been indicted or convicted of terrorism charges. Some have taken the fight abroad: an American was among those who planned the attacks in Mumbai, and more than eighty U.S. citizens have been charged with ISIS-related crimes. Others have acted on American soil, as with the attacks at Fort Hood, the Boston Marathon, and in San Bernardino. What motivates them, how are they trained, and what do we sacrifice in our efforts to track them? Paced like a detective story, *United States of Jihad* tells the entwined stories of the key actors on the American front. Among the perpetrators are Anwar al-Awlaki, the New Mexico-born radical cleric who became the first American citizen killed by a CIA drone and who mentored the Charlie Hebdo shooters; Samir Khan, whose Inspire webzine has rallied terrorists around the world, including the Tsarnaev brothers; and Omar Hammami, an Alabama native and hip hop fan who became a fixture in al Shabaab’s propaganda videos until fatally displeasing his superiors. Drawing on his extensive network of intelligence contacts, from the National Counterterrorism Center and the FBI to the NYPD, Peter Bergen also offers an inside look at the controversial tactics of the agencies tracking potential terrorists—from infiltrating mosques to massive surveillance; at the bias experienced by innocent observant Muslims at the hands of law enforcement; at the critics and defenders of U.S. policies on terrorism; and at how social media has revolutionized terrorism. Lucid and rigorously researched, *United States of Jihad* is an essential new analysis of the Americans who have embraced militant Islam both here and abroad. — Washington Post, Notable Non-Fiction Books in 2016

Projecting Paranoia Ray Pratt,2001 A wide-ranging and idiosyncratic look at sixty years of politics and film that uncovers how American movies have mirrored and even challenged anxieties and paranoid perceptions embedded in American society since the start of the Cold War. The first book to take a sweeping look at 60 years of film and analyze them thematically.

The Secret Life of Sleep Kat Duff,2014-03-18 Unlock the astonishing facts,

myths, and benefits of one of the most endangered human resources—sleep. It has become increasingly clear that our sleep shapes who we are as much as, if not more than, we shape it. While most sleep research hasn't ventured far beyond research labs and treatment clinics, *The Secret Life of Sleep* taps into the enormous reservoir of human experiences to illuminate the complexities of a world where sleep has become a dwindling resource. With a sense of infectious curiosity, award winning author Kat Duff mixes cutting-edge research with insightful narratives, surprising insights, and timely questions to help us better understand what we're losing before it's too late. *The Secret Life of Sleep* tackles the full breadth of what sleep means to people the world over. Embark on an exploration of what lies behind and beyond our eyelids when we surrender to the secret life of sleep.

Technological Innovation in Legacy Sectors William B. Bonvillian, Charles Weiss, 2015-08-18 The American economy faces two deep problems: expanding innovation and raising the rate of quality job creation. Both have roots in a neglected problem: the resistance of Legacy economic sectors to innovation. While the U.S. has focused its policies on breakthrough innovations to create new economic frontiers like information technology and biotechnology, most of its economy is locked into Legacy sectors defended by technological/ economic/ political/ social paradigms that block competition from disruptive innovations that could challenge their models. Americans like to build technology covered wagons and take them out west to open new innovation frontiers; we don't head our wagons back east to bring innovation to our Legacy sectors. By failing to do so, the economy misses a major opportunity for innovation, which is the bedrock of U.S. competitiveness and its standard of living. *Technological Innovation in Legacy Sectors* uses a new, unifying conceptual framework to identify the shared features underlying structural obstacles to innovation in major Legacy sectors: energy, air and auto transport, the electric power grid, buildings, manufacturing, agriculture, health care delivery and higher education, and develops approaches to understand and transform them. It finds both strengths and obstacles to innovation in the national innovation environments - a new concept that combines the innovation system and the broader innovation context - for a group of Asian and European economies. Manufacturing is a major Legacy sector that presents a particular challenge because it is a critical stage in the innovation process. By increasingly offshoring production, the U.S. is losing important parts of its innovation capacity. Innovate here, produce here, where the U.S. took all the gains of its strong innovation system at every stage, is being replaced by innovate here, produce there, which threatens to lead to produce there, innovate there. To bring innovation to Legacy sectors, authors William Bonvillian and Charles Weiss recommend that policymakers focus on all stages of innovation from research through implementation. They should fill institutional gaps in the innovation system and take measures to address structural obstacles to needed disruptive innovations. In the specific case of advanced manufacturing, the production ecosystem can be recreated to reverse jobless innovation and add manufacturing-led innovation to the U.S.'s still-strong, research-oriented innovation system.

Advanced Parallel Processing Technologies Olivier Temam, Pen-chung Yew, Binyu Zang, 2011-09-15 This book constitutes the refereed proceedings of the 9th International Symposium on Advanced Parallel Processing Technologies, APPT 2011, held in Shanghai, China, in September 2011. The 13 revised full papers

presented were carefully reviewed and selected from 40 submissions. The papers are organized in topical sections on parallel distributed system architectures, architecture, parallel application and software, distributed and cloud computing.

The Gumilev Mystique Mark Bassin, 2016-02-04 Since the collapse of the Soviet Union, the legacy of the historian, ethnographer, and geographer Lev Nikolaevich Gumilev (1912–1992) has attracted extraordinary interest in Russia and beyond. The son of two of modern Russia's greatest poets, Nikolai Gumilev and Anna Akhmatova, Gumilev spent thirteen years in Stalinist prison camps, and after his release in 1956 remained officially outcast and professionally shunned. Out of the tumult of perestroika, however, his writings began to attract attention and he himself became a well-known and popular figure. Despite his highly controversial (and often contradictory) views about the meaning of Russian history, the nature of ethnicity, and the dynamics of interethnic relations, Gumilev now enjoys a degree of admiration and adulation matched by few if any other public intellectual figures in the former Soviet Union. He is freely compared to Albert Einstein and Karl Marx, and his works today sell millions of copies and have been adopted as official textbooks in Russian high schools. Universities and mountain peaks alike are named in his honor, and a statue of him adorns a prominent thoroughfare in a major city. Leading politicians, President Vladimir Putin very much included, are unstinting in their deep appreciation for his legacy, and one of the most important foreign-policy projects of the Russian government today is clearly inspired by his particular vision of how the Eurasian peoples formed a historical community. In *The Gumilev Mystique*, Mark Bassin presents an analysis of this remarkable phenomenon. He investigates the complex structure of Gumilev's theories, revealing how they reflected and helped shape a variety of academic as well as political and social discourses in the USSR, and he traces how his authority has grown yet greater across the former Soviet Union. The themes he highlights while untangling Gumilev's complicated web of influence are critical to understanding the political, intellectual, and ethno-national dynamics of Russian society from the age of Stalin to the present day.

Nanostructure Control of Materials R H J Hannink, A J Hill, 2006-02-28 The ability to measure and manipulate matter on the nanometer level is making possible a new generation of materials with enhanced mechanical, optical, transport and magnetic properties. This important book summarises key developments in nanotechnology and their impact on the processing of metals, polymers, composites and ceramics. After a brief introduction, a number of chapters discuss the practical issues involved in the commercial production and use of nanomaterials. Other chapters review ways of nanoengineering steel, aluminium and titanium alloys. Elsewhere the book discusses the use of nanoengineered metal hydrides to store hydrogen as an energy source, and the development of nanopolymers for batteries and other energy storage devices.

Other chapters discuss the use of nanotechnology to enhance the toughness of ceramics, the production of synthetic versions of natural materials such as bone, and the development of nanocomposites. Nanostructure control of materials is an ideal introduction to the ways nanotechnology is being used to create new materials for industry. It will be welcomed by R&D managers in such sectors as automotive engineering as well as academics working in this exciting area. The Power of the Media in Health Communication Valentina Marinescu,Bianca Mitu,2016-04-20 Health is a contested concept that has been defined in numerous ways. The media is extremely powerful in promoting health beliefs and in creating role models for contemporary people. The ways in which health is defined or understood can have wide-ranging implications and can have an impact on issues such as health promotion or health literacy. Health presentation in the media has a significant social impact because this type of message is important in changing people's beliefs, attitudes and behaviours relating to health and in promoting health-related knowledge among the target audience. The present volume provides an interdisciplinary and multicultural contemporary approach to the controversial link between medicine and media. The authors that have contributed to this volume analyse the media and medicine from different perspectives and different countries (USA, UK, Portugal, Turkey, Taiwan, Mexico, Estonia, Romania), thus offering a re-positioning of the study of media and medicine. The new perspectives offered by this volume will be of interest to any health communication or media studies student or academic since they bring to light new ideas, new methodologies and new results.

The Evolution of the Global Terrorist Threat Bruce Hoffman,Fernando Reinares,2014-10-28 Examining major terrorist acts and campaigns undertaken in the decade following September 11, 2001, internationally recognized scholars study the involvement of global terrorist leaders and organizations in these incidents and the planning, organization, execution, recruitment, and training that went into them. Their work captures the changing character of al-Qaeda and its affiliates since the invasions of Afghanistan and Iraq and the sophisticated elements that, despite the West's best counterterrorism efforts, continue to exert substantial direction over jihadist terrorist operations. Through case studies of terrorist acts and offensives occurring both in and outside the West, the volume's contributors investigate al-Qaeda and other related entities as they adapted to the strategies of Operation Enduring Freedom and subsequent U.S.-led global counterterrorism programs. They explore whether Osama bin Laden was indeed reduced to a mere figurehead before his death or continued to influence al-Qaeda's global activities. Did al-Qaeda become a loose collection of individuals and ideas following its expulsion from Afghanistan, or was it reborn as a transnational terrorist structure powered by a well-articulated ideology? What is the preeminent terrorist threat we face today, and what will it look like in the future? This anthology pinpoints the critical patterns and strategies that will inform counterterrorism in the coming decades.
