Global Monitoring Report 2014/2015 World

Bank;International Monetary Fund,2014-10-21 The Global Monitoring Report 2014/2015: Ending Poverty and Sharing Prosperity was written jointly by the World Bank Group (WBG) and the International Monetary Fund, with substantive inputs from the Organisation for Economic Co-operation and Development. This year's report details, for the first time, progress toward the WBG's twin goals of ending extreme poverty by 2030 and promoting shared prosperity and assesses the state of policies and institutions that are important for achieving them. The report continues to monitor progress on the Millennium Development Goals (MDGs). Also for the first time, the report includes information about high-income countries. It finds that while gaps in living standards have been closing in many countries, the well-being of households in the bottom 40 percent, as measured by the non-income MDGs such as access to education and health services, remains below that of households in the top 60 percent. The focus of this year's report is on three elements needed to make growth more inclusive and sustainable: investment in human capital that favors the poor, the best use of safety nets, and steps to ensure the environmental sustainability of economic growth. These three elements are imperative to all countries' development strategies, and are also fundamental to global efforts to achieve the twin goals, the MDGs, and the Sustainable Development Goals that will succeed the MDGs. Global Monitoring Report 2014/2015 was prepared in collaboration with regional development banks and other multilateral partners.

Operations research models for scheduling railway infrastructure maintenance Gabriella Budai-Balke,2009

This thesis can be divided into two parts. In Part I we are

dealing with the problem of finding optimal time intervals for carrying out routine maintenance works and large projects in such a way that the track possession costs and maintenance costs are minimized. In Part II of this thesis we focus on rescheduling of the rolling stock in the passenger railways due to changing circumstances and more precisely on the Rolling Stock Rebalancing Problem (RSRP). The main objectives of this thesis are formulated as follows: 1. Review the existing literature on maintenance planning in relation with production. 2. Identify some tactical and operational railway infrastructure maintenance planning problems and develop operations research models for providing decision support. Investigate the effect of planning railway infrastructure maintenance on the train operation and identify rolling stock planning problems that occur during planned infrastructure maintenance. 3. Analyze the considered models, investigate their computational complexity, propose solution methods and test the solutions of the models.

Advances in Tourism, Technology and Systems

Fiber Fueled Will Bulsiewicz, MD, 2020-05-12 The instant New York Times, USA Today, and Publisher's Weekly bestseller A bold new plant-based plan that challenges popular keto and paleo diets, from an award-winning gastroenterologist. The benefits of restrictive diets like paleo and keto have been touted for more than a decade, but as renowned gastroenterologist Dr. Will Bulsiewicz, or Dr. B, illuminates in this groundbreaking book, the explosion of studies on the microbiome makes it abundantly clear that elimination diets are in fact hazardous to our health. What studies clearly now show--and what Dr. B preaches with his patients--is that gut health is the key to boosting our metabolism, balancing our hormones, and taming the inflammation that causes a host of diseases. And the scientifically proven way to fuel our guts is with dietary fiber from an abundant variety of colorful plants. Forget about the fiber your grandmother used to take--the cutting-edge science on fiber is incredibly exciting. As Dr. B explains, fiber energizes our gut microbes to create powerhouse postbiotics called short-chain fatty acids (SCFAs) that are essential to our health. SCFAs are scientifically proven to promote weight loss, repair leaky gut, strengthen the microbiome, optimize the immune system, reduce food sensitivities, lower cholesterol, reverse type 2 diabetes, improve brain function, and even prevent cancer. Restrictive fad diets starve the gut of the critical fiber we need, weaken the microbes, and make our system vulnerable. As a former junk-food junkie, Dr. B knows firsthand the power of fiber to dramatically transform our health. The good news is that our guts can be trained. Fiber-rich, real foods--with fruits,

vegetables, whole grains, seeds, nuts, and legumes--start working quickly and maintain your long-term health, promote weight loss, and allow you to thrive and feel great from the inside out. With a 28-day jumpstart program with menus and more than 65 recipes, along with essential advice on food sensitivities, *Fiber Fueled* offers the blueprint to start turbocharging your gut for lifelong health today.

The Handbook of Financing Growth Kenneth H. Marks, Larry E. Robbins, Gonzalo Fernandez, John P. Funkhouser, 2005-05-31 An in-depth look at the strategies, capital structure, and fund raising techniques for emerging growth and middle-market companies. Here is a comprehensive and practical guide to understanding and applying the basics of corporate finance to emerging growth and middle-market companies. Using empirical data and actual company cases to illustrate capital structures and financing approaches, the book provides a detailed discussion of the many funding instruments, from traditional bank loans and asset-based financing to different types of private equity and other creative solutions; the types of funding sources and their expected rates of returns; and typical deal terms.

Wind Turbine Syndrome Simon Chapman and Fiona Crichton, 2017-11-30 In *Wind Turbine Syndrome: A Communicated Disease*, Simon Chapman and Fiona Crichton explore the claims and tactics of the anti-windfarm movement, examine the scientific evidence, and

consider how best to respond to anti-windfarm arguments. This is an eye-opening account of the rise of the anti-windfarm movement, and a timely call for a more evidence-based approach.

International Farm Animal, Wildlife and Food Safety Law Gabriela Steier, Kiran K. Patel, 2017-01-09 This volume is an inspiring and breakthrough piece of academic scholarship and the first of its kind featuring a comprehensive reader-friendly approach to teach the intricacies of the various aspects of international farm animal, wildlife conservation, food safety and environmental protection law. The selected focus areas are grouped in sections, such as agrobiodiversity, fishing and aquaculture, pollinators and pesticides, soil management, industrial animal production and transportation, and international food trade. Farm animal welfare, environmental protection, biodiversity conservation, and food safety are the core of the selected chapters. Every chapter provides real-world examples to make the complex field easy to understand. With its systematic approach, this book is devoted to anyone interested in the subject, becomes a valuable resource for professionals working in food regulation, and provides a solid foundation for courses and master's programs in animal law, environmental policy, food and agriculture law, and regulation of these subjects around the world. Through its emphasis on sustainable food production, this work offers a cutting-edge selection of evolving topics at the heart of the pertinent discourse. As one of its highlights, this book also provides "Tools for Change," a unique compilation and analysis of laws from the major farm animal product trading nations. With these tools, practitioners, advocates, policy makers and other state-holders are equipped with information to start work toward improving farm animal

welfare, wildlife conservation, and food safety through the use of law and policy.

Management of Unintended and Abnormal Pregnancy Maureen Paul, Steve Lichtenberg, Lynn Borgatta, David A. Grimes, Phillip G. Stubblefield, Mitchell D. Creinin, 2011-08-24 Access to high quality abortion care is essential to women's health, as evidenced by the dramatic decrease in pregnancy-related morbidity and mortality since the legalization of abortion in the United States, and by high rates of maternal death and complications in those countries where abortion is still provided under unsafe conditions. The past two decades have brought important advances in abortion care as well as increasing cross-disciplinary use of abortion technologies in women's health care. Abortion is an important option for pregnant women who have serious medical conditions or fetal abnormalities, and fetal reduction techniques are now well-integrated into infertility treatment to reduce the risks of multiple pregnancies resulting from assisted reproductive technologies. **Management of Unintended and Abnormal Pregnancy: Comprehensive Abortion Care** is the textbook of the National Abortion Federation, and serves as the standard, evidence-based reference text in abortion care. This state-of-the-art textbook provides a comprehensive overview of the public health implications of unsafe abortion and reviews the best surgical and medical practices for pregnancy termination, as well as managing ectopic and other abnormal pregnancies. **Management of Unintended and Abnormal Pregnancy: Comprehensive Abortion Care** is the leading source for a comprehensive understanding of issues related to unintended and abnormal pregnancy. This textbook: is authored by internationally-known leaders in women's health care;

addresses unintended pregnancy and abortion from historical, legal, public health, clinical, and quality care perspectives; includes chapters on pregnancy loss, ectopic pregnancy, gestational trophoblastic disease, and multifetal pregnancy reduction; covers treatment of pregnancies in the first and second trimester by both medical and surgical techniques; and provides resources for clinical, scientific, and social support for the abortion provider and patient.

Protected Area Governance and Management Graeme L. Worboys, Michael Lockwood, Ashish Kothari, Sue Feary, Ian Pulsford, 2015-04-08 Protected Area Governance and Management presents a compendium of original text, case studies and examples from across the world, by drawing on the literature, and on the knowledge and experience of those involved in protected areas. The book synthesises current knowledge and cutting-edge thinking from the diverse branches of practice and learning relevant to protected area governance and management. It is intended as an investment in the skills and competencies of people and consequently, the effective governance and management of protected areas for which they are responsible, now and into the future. The global success of the protected area concept lies in its shared vision to protect natural and cultural heritage for the long term, and organisations such as International Union for the Conservation of Nature are a unifying force in this regard. Nonetheless, protected areas are a socio-political phenomenon and the ways that nations understand, govern and manage them is always open to contest and debate. The book aims to enlighten, educate and above all to challenge readers to think deeply about protected areas—their future and their past, as well as their present. The book has been compiled by 169 authors and deals with

all aspects of protected area governance and management. It provides information to support capacity development training of protected area field officers, managers in charge and executive level managers.

True Truffle (Tuber spp.) in the World Alessandra Zambonelli, Mirco Iotti, Claude Murat, 2016-07-26 This book focuses on the taxonomic diversity of the genus *Tuber* as economically important truffles. In contributions by internationally respected scientists, it examines truffle systematics, interactions with abiotic and biotic environments, strategies for spore dispersal, and molecular processes in truffles. Topics discussed include: evolutionary theories and phylogeny of *Tuber* species from Asia, Europe and North-America; the influence of climate on the natural distribution of *Tuber* species and fruiting body production, soil characteristics and vegetation in natural habitats; tools for tracing truffles in soil, host diversity, truffle inhabiting fungi and truffle-associated bacteria; and the relationships of small mammals and wild boars with truffles, as well as the smell of truffles. This book offers a valuable reference guide for all researchers working in the fields of mycology, ecology and the soil sciences, and will also be useful for farmers and foresters interested in truffle cultivation worldwide.

The Role of the Solicitor-General Gabrielle Appleby, 2016-06-16 Behind every government there is an impressive team of hard-working lawyers. In Australia, the Solicitor-General leads that team. A former Attorney-General once said, 'The Solicitor-General is next to the High Court and God.' And yet the role of government lawyers in Australia, and specifically the Solicitor-General as the most senior of government lawyers, is under-theorised and under-studied. *The Role of the Solicitor-General: Negotiating Law, Politics and the Public Interest*

goes behind the scenes of government – drawing from interviews with over 45 government and judicial officials – to uncover the history, theory and practice of the Australian Solicitor-General. The analysis reveals a role that is of fundamental constitutional importance to ensuring both the legality and the integrity of government action, thus contributing to the achievement of rule-of-law ideals. The Solicitor-General also works to defend government action and prosecute government policies in the court, and thus performs an important role as messenger between the political and judicial branches of government. But the Solicitor-General's position, as both an internal integrity check on government and an external warrior for government, gives rise to competing pressures: between the law, politics and the public interest. The office of the Solicitor-General in Australia has evolved many characteristics across the almost two centuries of its history in an attempt to navigate these tensions. These pressures are not unique to the Australian context. The understanding of the Australian position provided by this book is informed by, and will inform, comparative analysis of the role of government lawyers across the world.

Social Law 4.0 Ulrich Becker, Olga

Chesalina, 2021-01-08 Digitalisation and the changing world of work are calling into question the standard employment model as a basis for social security systems. Whilst a growing number of publications deal with the consequences for industrial relations and labour law, social law is still being left out of most research projects on digital work. This book aims at widening the perspective. It concentrates on the two most important questions in the context of social protection in a digitalised world, namely access to social protection systems and their future financing, putting emphasis on platform work. It gives an

overview of different national approaches to these questions, it analyses the respective solutions in a comparative manner, and it puts them into a transnational context. By bringing together case studies from Belgium, Italy, the United Kingdom, the Netherlands, Denmark, Sweden, Spain, France and Estonia and addressing the specific reform challenges for EU standard setting, EU coordination and the relation to tax law, the book provides new insights on what a Social Law 4.0 should look like.

Microbial Environmental Genomics (MEG) Francis Martin, Stephane Uroz, 2022-12-15 This volume guides researchers on how to characterize, image rare, and hitherto unknown taxa and their interactions, to identify new functions and biomolecules and to understand how environmental changes condition the activity and the response of the organisms living with us and in our environment. Chapters cover different organism types (i.e., archaea, bacteria, fungi, protists, microfauna and microeukaryotes) and propose detailed protocols to produce high quality DNA, to analyse active microbial communities directly involved in complex interactions or processes through stable isotope probing, to identify and characterize of new functional genes, to image in situ interactions and to apply bioinformatics analysis tools to complex metagenomic or RNAseq sequence data. Written in the successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-

by-step, readily reproducible protocols, and notes on troubleshooting and avoiding known pitfalls. Authoritative and cutting-edge, *Microbial Environmental Genomics (MEG): Methods and Protocols*, Second Edition aims to serve as a primary research reference for researchers in microbiology working to in the expanding field of molecular ecology and environmental genomics.

Sustainable Agriculture and Food Jules N. Pretty, 2008 'Jules Pretty brings together the most comprehensive and carefully selected collection of writings available about sustainable agriculture. Together with an excellent overview chapter, the collected works provide the best available source for an enlightened analysis and debate about sustainability in agriculture. The four volumes will serve both as an excellent reader for students and a unique reference for all with an interest in the pursuit of sustainability in the food system' Professor Per Pinstrup-Andersen, Cornell University, former Chair of CGIAR Science Council and World Food Prize Laureate, 2001 'This is the single most comprehensive overview of sustainable agriculture, from ancient beginnings to the most topical modern issues. Jules Pretty has assembled a marvellous collection of the most seminal papers that are driving sustainable agriculture in all parts of the world.' Jeffrey A. McNeely, Chief Scientist, IUCN-The World Conservation Union 'Showing that, after all, humans can learn from

experience, Jules Pretty has woven together the best of the old with the best of what is new and visionary. He gives us a solid, knowledge-based foundation for a badly needed new paradigm - that of an agriculture which sustains all life into the longer term. The impressive list of contributors ensures that all relevant areas have been competently assessed... A unique reference work for teachers, students and practitioners.' Hans R. Herren, World Food Prize Laureate, 1995 'An ambitious and deeply insightful series that unites the great minds not just of the agricultural, nutrition and environmental sciences, but also history, culture, economics, technology, learning and communications, policy, regulatory and institutional approaches. It will be a major reference work for all interested in the future of humanity and sustainable food and agricultural systems.' Parviz Koochafkan, Director, Environment, Climate Change and Bioenergy Division, FAO, Italy 'This work presents a body of knowledge that has come of age. It takes into account not only the science but also human behaviour, institutions and politics. It will be an invaluable support for practices that are rapidly gaining significance.' Professor Neils Røling, formerly of Wageningen University, The Netherlands This 4-volume set, edited by the world's leading expert on agricultural sustainability, brings together and interprets the most influential, important and time-tested international scholarship across the fields of agriculture and food production with a set overview and individual volume introductions that make sense of this diverse and complex field. Volume I covers the history of agriculture from its ancient origins through successive technological and institutional revolutions to the present. Volume II examines the relationship between agriculture and the environment including agricultural contamination, greenhouse gases

and climate change, environmental improvements and sustainability, integrated farming, eco-agriculture and agro-ecology, landscape restoration and environmental goods and services. Volume III provides full coverage of the modern industrialized global food system, corporate control, poverty, hunger and international successes, failures and challenges, diet and health, consumer behaviour and local alternatives to industrialization. Volume IV addresses how we think about land and our relationship to it, governance and stewardship of the rural commons, systems thinking, ecological literacy, social connections and a sustainable rural life, supportive and perverse agricultural subsidies and policies that shape food poverty and sustain agriculture into the future.
