- 🔍 **CODING FREEDOM** E. Gabriella Coleman,2013 Who are computer hackers? What is free software? And what does the emergence of a community dedicated to the production of free and open source software--and to hacking as a technical, aesthetic, and moral project--reveal about the values of contemporary liberalism? Exploring the rise and political significance of the free and open source software (F/OSS) movement in the United States and Europe, Coding Freedom details the ethics behind hackers’ devotion to F/OSS, the social codes that guide its production, and the political struggles through which hackers question the scope and direction of copyright and patent law. In telling the story of the F/OSS movement, the book unfolds a broader narrative involving computing, the politics of access, and intellectual property. E. Gabriella Coleman tracks the ways in which hackers collaborate and examines passionate manifestos, hacker humor, free software project governance, and festive hacker conferences. Looking at the ways that hackers sustain their productive freedom, Coleman shows that these activists, driven by a commitment to their work, reformulate key ideals including free speech, transparency, and meritocracy, and refuse restrictive intellectual protections. Coleman demonstrates how hacking, so often marginalized or misunderstood, sheds light on the continuing relevance of liberalism in online collaboration.
- 🔍 **LAW TEACHING STRATEGIES FOR A NEW ERA** Tessa L. Dysart, Tracy Norton,2021 The abrupt move to online legal education in Spring 2020 accelerated the move to online legal education that has been slowing gathering steam in recent years. As more institutions consider the potential to expand their reach with online courses and programs, law professors must move past pandemic teaching and seriously consider how they can create and deliver quality legal education online. Law Teaching Strategies for a New Era: Beyond the Physical Classroom, the first comprehensive book on online legal education, explores techniques, tools, and strategies that can assist all types of law professors in that endeavor. The 34 chapters, authored by law professors from across the country, provide a comprehensive look at expanding legal education beyond the traditional classroom experience. Divided into four sections, the book starts by offering tips for getting started and fostering inclusion in online courses. It then moves to suggestions for course design of blended, synchronous, and asynchronous courses, including a chapter on measuring success through empirical research. Finally, it concludes with two sections on course-specific topics covering the range of legal education--from large first-year courses to seminars to skills-based courses and bar preparation. Both new online educators and seasoned veterans of online education will find tips and strategies to improve their online teaching--

- 🔍 **JOSEPHINE BAKER’S CINEMATIC PRISM** Terri Simone Francis,2021-01-19 Josephine Baker, the first Black woman to star in a major motion picture, was both liberated and delightfully undignified, playfully vacillating between allure and colonialist stereotyping. Nicknamed the Black Venus, Black Pearl, and Creole Goddess, Baker blended the sensual and the comedic when taking 1920s Europe by storm. Back home in the United States, Baker’s film career brought hope to the Black press that a new cinema centered on Black glamour would come to fruition. In Josephine Baker’s Cinematic Prism, Terri Simone Francis examines how Baker fashioned her celebrity through cinematic reflexivity, an authorial strategy in which she placed herself, her persona, and her character into visual dialogue. Francis contends that though Baker was an African American actress who lived and worked in France exclusively with a white film company, white costars, white writers, and white directors, she holds monumental significance for African American cinema as the first truly global Black woman film star. Francis also examines the double-talk between Baker and her characters in *Le Pompi  r de Folies Berg  re*, *La Sir  ne des Tropiques*, *Zou Zou*, *Princesse Tam Tam*, and *The French Way*, whose narratives seem to undermine the very stardom they offered. In doing so, Francis artfully illuminates the most resonant links between emergent African American cinephilia, the diverse opinions of Baker in the popular press, and African Americans’ broader aspirations for progress toward racial equality. Examining an unexplored aspect of Baker’s career, Josephine Baker’s Cinematic Prism deepens the ongoing conversation about race, gender, and performance in the African diaspora.
- 🔍 **CHIASMUS IN ANTIQUITY** John W. Welch,2020-06-30
- 🔍 **CHINA’S INFLUENCE AND AMERICAN INTERESTS** Larry Diamond,Orville Schell,2019-08-01 While Americans are generally aware of China’s ambitions as a global economic and military superpower, few understand just how deeply and assertively that country has already sought to influence American society. As the authors of this volume write, it is time for a wake-up call. In documenting the extent of Beijing’s expanding influence operations inside the United States, they aim to raise awareness of China’s efforts to penetrate and sway a range of American institutions: state and local governments, academic institutions, think tanks, media, and businesses. And they highlight other aspects of the propagandistic “discourse war” waged by the Chinese government and Communist Party leaders that are less expected and more alarming, such as their view of Chinese Americans as members of a worldwide Chinese diaspora that owes undefined allegiance to the so-called Motherland.Featuring ideas and policy proposals from leading China specialists, China’s Influence and American Interests argues that a successful future relationship requires a rebalancing toward greater transparency, reciprocity, and fairness. Throughout, the authors also strongly state the importance of avoiding casting aspersions on Chinese and on Chinese Americans, who constitute a vital portion of American society. But if the United States is to fare well in this increasingly adversarial relationship with China, Americans must have a far better sense of that country’s ambitions and methods than they do now.
- 🔍 **GLOBAL HEALTH IMPACT** Nicole Hassoun,2020-06-22 Every year nine million people are diagnosed with tuberculosis, every day over 13,400 people are infected with AIDs, and every thirty seconds malaria kills a child. For most of the world, critical medications that treat these deadly diseases are scarce, costly, and growing obsolete, as access to first-line drugs remains out of reach and resistance rates rise. Rather than focusing research and development on creating affordable medicines for these deadly global diseases, pharmaceutical companies instead invest in commercially lucrative products for more affluent customers. Nicole Hassoun argues that everyone has a human right to health and to access to essential medicines, and she proposes the Global Health Impact (global-health-impact.org/new) system as a means to guarantee those rights. Her proposal directly addresses the pharmaceutical industry’s role: it rates pharmaceutical companies based on their medicines’ impact on improving global health, rewarding highly-rated medicines with a Global Health Impact label. Global Health Impact has three parts. The first makes the case for a human right to health and specifically access to essential medicines. Hassoun defends the argument against recent criticism of these proposed rights. The second section develops the Global Health Impact proposal in detail. The final section explores the proposal’s potential applications and effects, considering the empirical evidence that supports it and comparing it to similar ethical labels. Through a thoughtful and interdisciplinary approach to creating new labeling, investment, and licensing strategies, Global Health Impact demands an unwavering commitment to global justice and corporate responsibility.
- 🔍 **THE ZONES OF REGULATION** Leah M. Kuypers,2011 ... A curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum’s learning activities are designed to help students recognize when they are in different states called zones, with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students’ understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others’ facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum’s learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD.--Publisher’s website.
- 🔍 **DEADLY LITTLE SECRETS** Kathryn Casey,2012-07-31 Ann Rule says, Kathryn Casey is one of the best true crime writers today—high praise indeed from the author of a host of nonfiction New York Times bestsellers including *Green River* and *The Stranger Beside Me*, the story of serial killer Ted Bundy. With *Deadly Little Secrets*, Casey once again explores the dark side of the Lone Star State, offering a riveting true story of a murderous Texas preacher responsible for the cold-blooded slaying of the mother of his children. Meticulously researched and spellbindingly told, *Deadly Little Secrets* pulls back the curtain on the horrific crimes of a supposed man of God who was more devoted to the Devil, and it demonstrates why such true crime luminaries as Edgar   Award winner Carleton Stowers and Gregg Olsen are confirmed Kathryn Casey fans. And don’t miss Kathryn Casey’s latest book, *Deliver Us*, a riveting account of the brutal murders of young women in the I-45/Texas Killing Fields.
- 🔍 **THE SEDUCTIONS OF QUANTIFICATION** Sally Engle Merry,2016-06-10 We live in a world where seemingly everything can be measured. We rely on indicators to translate social phenomena into simple, quantified terms, which in turn can be used to guide individuals, organizations, and governments in establishing policy. Yet counting things requires finding a way to make them comparable. And in the process of translating the confusion of social life into neat categories, we inevitably strip it of context and meaning—and risk hiding or distorting as much as we reveal. With *The Seductions of Quantification*, leading legal anthropologist Sally Engle Merry investigates the techniques by which information is gathered and analyzed in the production of global indicators on human rights, gender violence, and sex trafficking. Although such numbers convey an aura of objective truth and scientific validity, Merry argues persuasively that measurement systems constitute a form of power by incorporating theories about social change in their design but rarely explicitly acknowledging them. For instance, the US State Department’s *Trafficking in Persons Report*, which ranks countries in terms of their compliance with antitrafficking activities, assumes that prosecuting traffickers as criminals is an effective corrective strategy—overlooking cultures where women and children are frequently sold by their own families. As Merry shows, indicators are indeed seductive in their promise of providing concrete knowledge about how the world works, but they are implemented most successfully when paired with context-rich qualitative accounts grounded in local knowledge.

OLMAN,2023-09-01 WITH THIS VOLUME, THE FIELD OF RHETORIC OF SCIENCE JOINS ITS SISTER DISCIPLINES IN HISTORY AND PHILOSOPHY IN CHALLENGING THE DOMINANCE OF EURO-AMERICAN SCIENCE AS A GLOBAL EPISTEMOLOGY. THE DISCIPLINE OF RHETORIC UNDERSTANDS WORLD-MAKING AND COMMUNITY-BUILDING AS INTERDEPENDENT ACTIVITIES: THAT IS, IF WE PRACTICE SCIENCE DIFFERENTLY, WE DO POLITICS DIFFERENTLY, AND VICE VERSA.
