Cultural Boundaries of Science Thomas F. Gieryn, 1999-01-15 This text argues that an explanation for the cultural authority of science lies where scientific claims leave laboratories and enter boardrooms and living rooms. Here, one uses maps to decide who to believe - cultural maps demarcating science from pseudoscience, ideology, faith, or nonsense.

The Fate of the Forest Susanna B. Hecht, Alexander Cockburn, 2011-01-15 The Amazon rain forest covers more than five million square kilometers, amid the territories of nine different nations. It represents over half of the planet's remaining rain forest. Is it truly in peril? What steps are necessary to save it? To understand the future of Amazonia, one must know how its history was forged: in the eras of large pre-Columbian populations, in the gold rush of conquistadors, in centuries of slavery, in the schemes of Brazil's military dictators in the 1960s and 1970s, and in new globalized economies where Brazilian soy and beef now dominate, while the market in carbon credits raises the value of standing forest. Susanna Hecht and Alexander Cockburn show in compelling detail the panorama of

destruction as it unfolded, and also reveal the extraordinary turnaround that is now taking place, thanks to both the social movements, and the emergence of new environmental markets. Exploring the role of human hands in destroying—and saving—this vast forested region, *The Fate of the Forest* pivots on the murder of Chico Mendes, the legendary labor and environmental organizer assassinated after successful confrontations with big ranchers. A multifaceted portrait of Eden under siege, complete with a new preface and afterword by the authors, this book demonstrates that those who would hold a mirror up to nature must first learn the lessons offered by some of their own people.

The Monster of Florence Douglas Preston, 2008-06-10 In the nonfiction tradition of John Berendt and Erik Larson, the author of the #1 NYT bestseller *The Lost City of the Monkey God* presents a gripping account of crime and punishment in the lush hills surrounding Florence as he seeks to uncover one of the most infamous figures in Italian history. In 2000, Douglas Preston fulfilled a dream to move his family to Italy. Then he discovered that the olive grove in front of their 14th century farmhouse had been the scene of the most infamous double-murders in Italian history, committed by a serial killer known as the Monster of Florence. Preston, intrigued, meets Italian investigative journalist Mario Spezi to learn more. This is the true story of their search for--and identification of--the man they believe committed the crimes, and their chilling interview with him. And then, in a strange twist of fate, Preston and Spezi themselves become targets of the police investigation. Preston has his phone tapped, is interrogated, and told to leave the country. Spezi fares worse: he is thrown into Italy's grim Capanne prison, accused of being the Monster of Florence himself. Like one of Preston's thrillers, *The Monster of Florence*, tells a remarkable and harrowing story involving murder, mutilation, and suicide-

and at the center of it, Preston and Spezi, caught in a bizarre prosecutorial vendetta.

Fluent Forever Gabriel Wyner, 2014-08-05 NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you’ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at

its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

The Child of Pleasure Gabriele D'Annunzio,2022-11-21 The Child of Pleasure is a prose novel by the poet Gabriele D'Annunzio and is very poetic. Written simultaneously with Wilde's Dorian Gray, the story is very close in spirit to it. It tells of a young and beautiful dandy and seducer Andrea Sperelli. His numerous love affairs develop alongside his romance with the diabolic femme fatale Elena Muti. Like Dorian Gray, Andrea falls because of his sins. He finds the way out of the disaster thanks to his new affection for a pure and spiritual girl. But did he manage to forget Elena?

The Necrophiliac Gabrielle Wittkop,2011-05-26 For more than three decades, Lucien ' one of the most notorious characters in the history of the novel ' has haunted the imaginations of readers around the world. Remarkably, the astounding protagonist of Gabrielle Wittkop's lyrical 1972 novella, The Necrophiliac, has never appeared in English until now. This new translation introduces readers to a

masterpiece of French literature, striking not only for its astonishing subject matter but for the poetic beauty of the late author's subtle, intricate writing. Like the best writings of Edgar Allan Poe or Baudelaire, Wittkop's prose goes far beyond mere gothic horror to explore the melancholy in the loneliest depths of the human condition, forcing readers to confront their own mortality with an unprecedented intimacy.

A Book of Remarkable Criminals Henry Brodribb Irving, 1918 Are you fascinated by the nefarious figures in history who have opted to walk a darker path in life? Armchair criminologists will take devilish delight in this gruesome collection of true-crime tales. The volume brings together concise biographies of depraved, delusional, and just plain evil louts, ne'er-do-wells and murderers, along with gripping accounts of their misdeeds.

The Politics of Innovation Mark Zachary Taylor, 2016-05-04 Why are some countries better than others at science and technology (S&T)? Written in an approachable style, *The Politics of Innovation* provides readers from all backgrounds and levels of expertise a comprehensive introduction to the

debates over national S&T competitiveness. It synthesizes over fifty years of theory and research on national innovation rates, bringing together the current political and economic wisdom, and latest findings, about how nations become S&T leaders. Many experts mistakenly believe that domestic institutions and policies determine national innovation rates. However, after decades of research, there is still no agreement on precisely how this happens, exactly which institutions matter, and little aggregate evidence has been produced to support any particular explanation. Yet, despite these problems, a core faith in a relationship between domestic institutions and national innovation rates remains widely held and little challenged. The Politics of Innovation confronts head-on this contradiction between theory, evidence, and the popularity of the institutions-innovation hypothesis. It presents extensive evidence to show that domestic institutions and policies do not determine innovation rates. Instead, it argues that social networks are as important as institutions in determining national innovation rates. The Politics of Innovation also introduces a new theory of creative insecurity which explains how institutions, policies, and networks are all subservient to politics. It argues that,

ultimately, each country's balance of domestic rivalries vs. external threats, and the ensuing political fights, are what drive S&T competitiveness. In making its case, *The Politics of Innovation* draws upon statistical analysis and comparative case studies of the United States, Japan, South Korea, China, Taiwan, Thailand, the Philippines, Argentina, Brazil, Mexico, Canada, Turkey, Israel, Russia and a dozen countries across Western Europe.

Feeding the Whole Family Cynthia Lair, 2009-06-02 For nearly 15 years, Cynthia Lair's iconic cookbook *Feeding the Whole Family* has been the source for parents who want to cook one healthy meal for the entire family, including babies. *Feeding the Whole Family* starts with the basics of creating a whole foods diet, from understanding grains and beans to determining what meats are acceptable to eat. Lair then applies these lessons to cooking for young children and babies aged six months and older. In each recipe, Lair offers special instruction on how to adapt it so that younger children can enjoy the dish while parents can eat a more complicated version. All recipes utilize easy-to-find

ingredients, are simple to follow, and will be enjoyable for both child and parent. With a new foreword by Mothering magazine's editor and founder Peggy O'Mara, Feeding the Whole Family is a necessary staple for all families.

Pandora's Lunchbox Melanie Warner, 2013-02-26 If a piece of individually wrapped cheese retains its shape, colour, and texture for years, what does it say about the food we eat and feed our children? Former New York Timesbusiness reporter and mother Melanie Warner decided to explore that question when she observed the phenomenon of the indestructible cheese. She began an investigative journey that takes her to research labs, food science departments, and factories around the country. What she discovered provides a rare, eye-opening-and sometimes disturbing-account of what we're really eating. Warner looks at how decades of food science have resulted in the cheapest, most abundant, most addictive, and most nutritionally devastating food in the world, and she uncovers startling evidence about the profound health implications of the packaged and fast foods that we eat on a daily basis. From breakfast cereal to chicken subs to nutrition bars, processed foods account for

roughly 70 percent of our nation's calories. Despite the growing presence of farmers' markets and organic produce, strange food additives are nearly impossible to avoid. Combining meticulous research, vivid writing, and cultural analysis, Warner blows the lid off the largely undocumented-and lightly regulated-world of chemically treated and processed foods and lays bare the potential price we may pay for consuming even so-called healthy foods.

Let's Pretend This Never Happened Jenny Lawson, 2013-03-05 The #1 New York Times bestselling (mostly true) memoir from the hilarious author of *Furiously Happy*. “Gaspingly funny and wonderfully inappropriate.”—O, The Oprah Magazine When Jenny Lawson was little, all she ever wanted was to fit in. That dream was cut short by her fantastically unbalanced father and a morbidly eccentric childhood. It did, however, open up an opportunity for Lawson to find the humor in the strange shame-spiral that is her life, and we are all the better for it. In the irreverent *Let's Pretend This Never Happened*, Lawson's long-suffering husband and sweet daughter help her uncover the surprising discovery that the most terribly human moments—the ones we want to pretend never happened—are the very same moments that make us the people we are today. For every intellectual misfit who thought they were the only ones to think the things that Lawson dares to say out loud, this is a poignant and hysterical look at the dark, disturbing, yet wonderful moments of our lives. Playing the Cello, 1780–1930 George Kennaway, 2016-04-22 This innovative study of nineteenth-century cellists and cello playing shows how simple concepts of posture, technique and expression changed over time, while acknowledging that many different practices co-existed. By placing an awareness of this diversity at the centre of an historical narrative, George Kennaway has produced a unique cultural history of performance practices. In addition to drawing upon an unusually wide range of source materials - from instructional methods to poetry, novels and film - Kennaway acknowledges the instability and ambiguity of the data that supports historically informed performance. By examining nineteenth-century assumptions about the very nature of the cello itself, he demonstrates new ways of thinking about historical performance today. Kennaway's treatment of tone quality and projection, and of posture, bow-strokes and fingering, is informed by his practical insights as a professional cellist and teacher. Vibrato and portamento are examined in the context of an increasing divergence between theory and practice, as seen in printed sources and heard in early cello recordings. Kennaway also explores differing nineteenth-century views of the cello's gendered identity

and the relevance of these cultural tropes to contemporary performance. By accepting the diversity and ambiguity of nineteenth-century sources, and by resisting oversimplified solutions, Kennaway has produced a nuanced performing history that will challenge and engage musicologists and performers alike.
