Soil is a whole world under our feet, full of fun words you may have heard but never quite understood, like hard-pan, humus, loam, and tilth. In this fifth book in the *Guides for the Prairie Gardener* series, master gardeners Janet and Sheryl provide the basics of soil science so that you can apply it to your gardening endeavours. They answer your questions on things like How do I test the chemical composition of my garden soil? What's the difference between organic, inorganic, and natural fertilizers? What exactly do mycorrhizal fungi do? In this handy Q-and-A guide, focused specifically on the prairie region, you'll learn what particles are dominant in your soil, how to make successful compost, the value of mulch, tips on no-till practices and cover crops, and solutions to problems such as compaction, heavy clay, salinity, and soil-borne diseases. Plants and Landscapes for Summer-dry Climates of the San Francisco Bay Region Nora Harlow,2004 Gardening.

Environmental Studies. Photographs by Saxon Holt. Illustrations by Richard Pembroke. This lavishly illustrated book celebrates the challenges and opportunities of gardening in Mediterranean climates, with special reference to northern California's San Francisco Bay Region. The core of the book is a catalog of more than 650 plants suited to regions with mild, usually wet winters and dry, often hot summers. These plants thrive with moderate to no summer irrigation when established, require little or no maintenance, and are reasonably available from nurseries, botanic gardens, native plant sales, or specialty seed suppliers. Many of the 542 color photographs show plants in garden settings to suggest attractive and compatible plant combinations. Summary charts provide information on each plant, such as bloom time, needs for water and sun, and preferences for coastal or inland microclimates. Lists suggest plants for special situations, such as hot sites, dryish shade, small gardens, and clay soils. Chapters on landscape design and maintenance inspire readers to make gardens that use little water and no harmful chemicals, with a focus on building healthy soil. Practical steps to successful design are supplemented with ideas for designing with microclimate, attracting wildlife, and fire safety. Sidebars by local experts discuss weather, natural landscapes, design solutions, and gardening with recycled water. A valuable resource for climate-compatible gardening in the San Francisco Bay Area that will also be of interest to gardeners in other parts of the world with a similar seasonal pattern of winter rain and dry summers. This book will occupy a prominent place in my library for many years to come. Katherine Greenberg, president Mediterranean Garden Society This book is beautifully designed with abundant photographs of plants, many in garden settings, and it is packed with the kind of information gardeners need for their own special situations. Simply stunning Bravo Phyllis M. Faber, editor University of California Press

The Gardener Rabindranath Tagore,1916

The American Gardener William Cobbett,2003-04-22 Back in print after 150 years Out of print since 1856, *The American Gardener* is perhaps the first classic work of American gardening literature. In it, William Cobbett, Victorian England's greatest and most gifted

journalist, draws upon his experiences during a two-year exile on a Long Island, New York, farm to lay out the rudiments of gardening for American farmers and, ultimately, to tailor principles developed in wet, drippy, weed-prone British gardens to their fine, sun-drenched counterparts in America. Full of practical knowledge memorably imparted with Cobbett's gift for the indelible phrase, *The American Gardener* offers advice still useful today on all aspects of gardening, with special attention to those plants successful in the New World, including the artichoke ("indeed, a thistle upon a gigantic scale") and the increasingly ubiquitous potato. Rediscovered 180 years after its composition, *The American Gardener* is evidence of a great mind and pen at work in the earliest days of American gardens. This Modern Library edition is published with a new Introduction by Verlyn Klinkenborg, a New York Times editorialist and the author of *The Rural Life*, *Making Hay*, and *The Last Fine Time*.
