

Critical Needs and Gaps in Understanding Prevention, Amelioration, and Resolution of Lyme and Other Tick-Borne Diseases Institute of Medicine, Board on Population Health and Public Health Practice, Committee on Lyme Disease and Other Tick-Borne Diseases: The State of the Science, 2011-05-31 A single tick bite can have debilitating consequences. Lyme disease is the most common disease carried by ticks in the United States, and the number of those afflicted is growing steadily. If left untreated, the diseases carried by ticks—known as tick-borne diseases—can cause severe pain, fatigue, neurological problems, and other serious health problems. The Institute of Medicine held a workshop October 11-12, 2010, to examine the state of the science in Lyme disease and other tick-borne diseases.

Climate change: Unpacking the burden on food safety Food and Agriculture Organization of the United Nations, 2020-03-01 Climate change is causing unprecedented damage to our ecosystem. Increasing temperatures, ocean warming and acidification, severe droughts, wildfires, altered precipitation patterns, melting glaciers, rising sea levels and amplification of extreme weather events have direct implications for our food systems. While the impacts of such environmental factors on food security are well known, the effects on food safety receive less attention. The purpose of *Climate change: Unpacking the burden on food safety* is to identify and attempt to quantify some current and anticipated food safety issues that are associated with climate change. The food safety hazards considered in the publication are foodborne pathogens and parasites, harmful algal blooms, pesticides, mycotoxins and heavy metals with emphasis on methylmercury. There is also, a dedicated section on the benefits of forward-looking approaches such as horizon scanning and foresight, which will not only aid in anticipating future challenges in a shifting global food safety landscape, but also help build resilient food systems that can be continually updated as more knowledge is assimilated. By building a more widespread and better understanding of the consequences climate change has on food safety, it is hoped that this document will aid in fostering stronger international cooperation in making our food safer by reducing the global burden of these concerns.

Encyclopedia of Caves and Karst Science John Gunn, 2004-08-02 The *Encyclopedia of Caves and Karst Science* contains 350 alphabetically arranged entries. The topics include cave and karst geoscience, cave archaeology and human use of caves, art in caves, hydrology and groundwater, cave and karst history, and conservation and management. The *Encyclopedia* is extensively illustrated with photographs, maps, diagrams, and tables, and has thematic content lists and a comprehensive index to facilitate searching and browsing.

Geospatial Technologies and Homeland Security Daniel Sui, 2008-05-25 Homeland security and context In the *Geographical Dimensions of Terrorism (GDOT)* (Cutter et al. 2003), the first book after 9/11 to address homeland security and geography, we developed several thematic research agendas and explored intersections between geographic research and the importance of context, both geographical and political, in relationship to the concepts of terrorism and security. It is good to see that a great deal of new thought and research continues to flow from that initial research agenda, as illustrated by many of the papers of this new book, entitled *Geospatial Technologies and Homeland Security: Research Frontiers and Future Challenges*. Context is relevant not only to understanding homeland security issues broadly, but also to the conduct of research on geospatial technologies. It is impossible to understand the implications of a homeland security strategy, let alone hope to make predictions, conduct meaningful modeling and research, or assess the value and dangers of geospatial technologies, without consideration of overarching political, social, economic, and geographic contexts within which these questions are posed.

Bariatric Endocrinology J. Michael Gonzalez-Campoy, Daniel L. Hurley, W. Timothy Garvey, 2018-10-26 This unique book – the first ever on bariatric endocrinology – is a comprehensive endocrine and metabolism approach to the diseases that result from excess fat mass accumulation and adipose tissue dysfunction. It takes an approach that places adipose tissue at the center of the clinical approach to patients, as opposed to the complications of adipose tissue accumulation and dysfunction, which has been the dominant approach to date. Initial chapters include discussion of adipose tissue physiology and pathophysiology (adiposopathy), hormonal, central nervous system, and gut microbiome regulation of energy balance and stores, and primary and secondary causes of adipose tissue weight gain. Subsequent chapters cover the evaluation and treatment of dyslipidemia, insulin resistance and hyperglycemic states, hypertension, neoplasia, and gonadal function in men and women. Management strategies, such as nutrition, physical activity, pharmacotherapy, and bariatric procedures, round out the presentation. Each chapter is bookended by bullet-pointed clinical pearls at the beginning and a full reading list at the end. Written and edited by experts in the field of endocrinology and obesity management, *Bariatric Endocrinology* redefines practice to focus not just on weight loss as measured in pounds lost, but on adipose tissue mass and pathology, decreasing fat mass for adiposity-related diseases and returning adipose tissue to normal function.

Critical Care Nursing Suzanne Bench, Kate Brown, 2011-02-10 *Critical Care Nursing: Learning from Practice* takes a unique approach to critical care. Based around case scenarios that have the patient as the central focus, each chapter is constructed around an example of a critically ill patient with specific care needs. The chapters then go on to critically explore the knowledge and skills required to deliver expert care. This book looks at a range of critical care scenarios, including: The patient with acute lung injury The patient with fever The patient with an acute kidney injury The patient with long term needs The patient with increased intra-abdominal pressure The Patient following cardiac surgery Each chapter develops knowledge of the related physiology/pathophysiology, appropriate nursing interventions that are research/evidence based, technical skills, data interpretation and critical appraisal skills, enabling the reader to apply fundamental knowledge to more complex patient problems. *Critical Care Nursing: Learning from Practice* is an essential resource for practitioners faced with complex and challenging patient cases.

Advances in Geroscience Felipe Sierra, Ronald Kohanski, 2015-11-10 This book provides the first comprehensive overview of a new scientific discipline termed Geroscience. Geroscience examines the molecular and cellular mechanisms that might explain why aging is the main risk factor for most chronic diseases affecting the elderly population. Over the past few decades, researchers have made impressive progress in understanding the genetics, biology and physiology of aging. This book presents vital research that can help readers to better understand how aging is a critical malleable risk factor in most chronic diseases, which, in turn, could lead to interventions that can help increase a healthy lifespan, or ‘healthspan.’ The book begins with an analysis of the Geroscience hypothesis, as well as the epidemiological underpinnings that define aging as a candidate main risk factor for most chronic diseases. Next, each chapter focuses on one particular disease, or group of diseases, with an emphasis on how basic molecular and cellular biology might explain why aging is a major risk factor for it. Coverage in the book includes: cancer, cardiovascular disease, dementias, stroke, Parkinson’s and Alzheimer’s diseases, osteoporosis, arthritis, diabetes asthma, emphysema, kidney disease, vision impairment, and AIDS/HIV. It finishes with a chapter on pain in the elderly and an overview of future steps needed to bring the newly acquired knowledge into the clinic and the public at large.

Atlas of Dermatology in Internal Medicine Néstor P. Sánchez, 2011-12-02 *Atlas of Dermatology in Internal Medicine* is the only concise text-atlas to cover the most common and most important cutaneous manifestations of systemic disease in children and adults. It features more than 150 clinical photographs that are accompanied by format-driven, clinically focused text on the diagnosis and management of cutaneous manifestations of connective tissue, pulmonary, renal, GI, endocrine, malignant, infectious, and HIV disease. There is also a separate chapter on skin diseases commonly seen in the ICU. A special feature is its systematic coverage of clinically relevant dermatopathology. The book is a

helpful tool for physicians and trainees in internal medicine, family medicine, pediatrics, emergency medicine, and critical care medicine, as well as family, emergency, and critical care nurse practitioners.

Ageing and Nutrition through Lifespan Stefanos Tyrovolas,2020-12-29 Population is ageing at an unprecedented speed globally. As concept, ageing is considered a continuous process starting from birth and is accompanied by various physiological changes and a number of chronic diseases that affect health and quality of life. Ageing as a continuous process is depending on life course exposures to health risks, lifestyle and nutrition, socioeconomic background, and other factors. There is considerable interest among scientists regarding the direct and indirect effect of nutrition in optimal ageing. Nutrition has a beneficial effect in a variety of chronic disease that impact the process of ageing. Given the importance of this issue, the journal *Nutrients* is planning a Special Issue on “Ageing and Nutrition through Lifespan” with the aim of providing a source for accurate, up-to-date scientific information on this topic. We invite you and your co-workers to consider submission of your original research findings or a review article on the topic. Manuscripts should focus on the direct impact of specific food components, dietary patterns, energy intake, macro-, micro- nutrients, alcohol intake, food insecurity as well as malnourishment and appetite to the ageing process (healthy, active, successful ageing, frailty and other similar indices) across lifespan. In a similar way, we also welcome manuscripts that focus on the indirect effect of nutrition to the ageing process throughout the pathway of chronic disease (i.e., obesity, diabetes, depression and mental diseases).

The Fearless Flights of Hazel Ying Lee Little, Brown Books for Young Readers,2021-02-02 An inspiring picture book biography about Hazel Ying Lee, the first Chinese American woman to fly for the US military. Hazel Ying Lee was born fearless -- she was not afraid of anything, and the moment she took her first airplane ride, she knew where she belonged. When people scoffed at her dreams of becoming a pilot, Hazel wouldn't take no for an answer. She joined the Women Airforce Service Pilots during World War II. It was a dangerous job, but Hazel flew with joy and boldness. This moving, true story about a groundbreaking figure will inspire young readers to challenge barriers and reach for the sky.

Dermatology Atlas for Skin of Color Diane Jackson-Richards,Amit G. Pandya,2014-07-19 This atlas, containing more than 300 color photos, focuses on those dermatologic conditions that are most common in ethnic skin or skin of color. It includes succinct explanations of each disease process, describes clinical findings and presents key information on diagnosis and treatment. Individual chapters are devoted to pigmentary disorders, follicular disorders, hair and scalp disorders, eczemas, papulosquamous disorders, granulomatous disorders, connective tissue diseases, infectious diseases, scarring disorders, cutaneous neoplasms, photodermatoses and drug eruptions. The fact that this atlas covers skin disorders that affect patients of all ethnic backgrounds ensures that it will be of worldwide relevance. It will serve as a valuable reference for dermatologists and a range of other health care providers.

Cyber Spying Tracking Your Family's (Sometimes) Secret Online Lives Eric Cole,Michael Nordfelt,Sandra Ring,Ted Fair,2005-03-15 *Cyber Spying Tracking Your Family's (Sometimes) Secret Online Lives* shows everyday computer users how to become cyber-sleuths. It takes readers through the many different issues involved in spying on someone online. It begins with an explanation of reasons and ethics, covers the psychology of spying, describes computer and network basics, and takes readers step-by-step through many common online activities, and shows what can be done to compromise them. The book's final section describes personal privacy and counter-spy techniques. By teaching by both theory and example this book empowers readers to take charge of their computers and feel confident they can be aware of the different online activities their families engage in. Expert authors have worked at Fortune 500 companies, NASA, CIA, NSA and all reside now at Sytex, one of the largest government providers of IT services Targets an area that is not addressed by other books: black hat techniques for computer security at the personal computer level Targets a wide audience: personal computer users, specifically those interested in the online activities of their families

Comprehensive Dermatologic Drug Therapy Stephen E. Wolverton,Jashin . Wu,2019-12-14 Designed with practical usability in mind, *Comprehensive Dermatologic Drug Therapy*, 4th Edition, helps you safely and effectively treat the skin disorders you're likely to see in your practice. Dr. Stephen E. Wolverton and new associate editor Dr. Jashin J. Wu lead a team of global experts to bring you concise, complete guidance on today's full spectrum of topical, intralesional, and systemic drugs. You'll prescribe with confidence thanks to expert coverage of which drugs to use, when to use them, and adverse effects to monitor. Includes new drug interaction tables, drug risk profiles, and FDA guidelines, as well as two new appendices that summarize chapter questions and summarize highest-risk drug interactions. Covers the best uses for new biologic therapeutics. Contains new chapters covering medical decision-making principles, PDE-4 and JAK inhibitors, interleukin 17 inhibitors, interleukin 23 inhibitors, additional biologic therapeutics, and hedgehog pathway inhibitors. Contains quick-access summaries of indications/contraindications, dosage guidelines, drug interactions, drug monitoring guidelines, adverse effects, and treatment protocols. Features a highly detailed, disease-specific index, as well as purchase information for major drugs. Helps you assess your knowledge and prepare for certification or recertification with about 800 review questions and answers throughout the book.

Innovative Technologies for Food Preservation Francisco J. Barba,Anderson Sant'Ana,Vibeke Orlien,Mohamed Koubaa,2017-09-21 *Innovative Technologies for Food Preservation: Inactivation of Spoilage and Pathogenic Microorganisms* covers the latest advances in non-thermal processing, including mechanical processes (such as high pressure processing, high pressure homogenization, high hydrodynamic pressure processing, pressurized fluids); electromagnetic technologies (like pulsed electric fields, high voltage electrical discharges, Ohmic heating, chemical electrolysis, microwaves, radiofrequency, cold plasma, UV-light); acoustic technologies (ultrasound, shockwaves); innovative chemical processing technologies (ozone, chlorine dioxide, electrolysis, oxidized water) and others like membrane filtration and dense phase CO₂. The title also focuses on understanding the effects of such processing technologies on inactivation of the most relevant pathogenic and spoilage microorganisms to ensure food safety and stability. Over the course of the 20th century, the interest and demand for the development and application of new food preservation methods has increased significantly. The research in the last 50 years has produced various innovative food processing technologies and the use of new technologies for inactivation of spoilage and/or pathogenic microorganisms will depend on several factors. At this stage of development there is a need to better understand the mechanisms that govern microbial inactivation as induced by new and innovative processing technologies, as well as suitable and effective conditions for inactivating the microorganism. Serves as a summary of relevant spoilage and pathogenic microorganisms for different foods as influenced by the application of innovative technologies for their preservation Provides readers with an in-depth understanding on how effective innovative processing technologies are for controlling spoilage and pathogenic microorganisms in different foods Integrates concepts in order to find the optimum conditions for microbial inactivation and preservation of major and minor food compounds

Advances in Soil Microbiology: Recent Trends and Future Prospects Tapan Kumar Adhya,Banwari Lal,Balaram Mohapatra,Dhiraj Paul,Subhasis Das,2018-03-15 This book presents a comprehensive collection of articles illustrating the importance of microbial community structure and function for ecosystem sustainability and environmental reclamation. It addresses a diverse range of topics, including microbial diversity, physiology, genomics, ecosystem

function, interaction, metabolism, and the fruitful use of microbial communities for crop productivity and environmental remediation. In addition, the book explores issues ranging from general concepts on the diversity of microorganisms in soil, and ecosystem function to the evolution and taxonomy of soil microbiota, with future prospects. It covers cutting-edge methods in soil microbial ecological studies, rhizosphere microflora, the role of organic matter in plant productivity, biological nitrogen fixation and its genetics, microbial transformation of plant nutrients in soil, plant-growth-promoting rhizobacteria, and organic matter transformation. The book also discusses the application of microbes in biodegradation of xenobiotic contaminants. It covers bio-fertilizers and their role in sustainable agriculture and soil health, biological control of insect pests and plant pathogens, and the latest tools of omics in soil microbiology, i.e. genomics, proteomics, transcriptomics and metabolomics, which offer pioneering approaches to the exploration of microbial structure and function.

Encyclopedia of Gerontology and Population Aging Danan Gu,Matthew E. Dupre,2021-11-03 This eight-volume encyclopedia brings together a comprehensive collection of work highlighting established research and emerging science in all relevant disciplines in gerontology and population aging. It covers the breadth of the field, gives readers access to all major sub-fields, and illustrates their interconnectedness with other disciplines. With more than 1300 cross-disciplinary contributors—including anthropologists, biologists, economists, psychiatrists, public policy experts, sociologists, and others—the encyclopedia delves deep into key areas of gerontology and population aging such as ageism, biodemography, disablement, longevity, long-term care, and much more. Paying careful attention to empirical research and literature from around the globe, the encyclopedia is of interest to a wide audience that includes researchers, teachers and students, policy makers, (non)governmental agencies, public health practitioners, business planners, and many other individuals and organizations.

CT Angiography of the Chest Martine Rémy-Jardin,2001 Written by experts who are internationally known for their pioneering work in spiral CT, this volume is a state-of-the-art guide to the techniques and clinical applications of CT angiography of the chest. The authors demonstrate the capabilities and uses of CT angiography in assessing the pulmonary vasculature and aorta and detecting pulmonary embolism, chest trauma, vascular diseases of the lung, thoracic outlet syndromes, and SVC syndromes. More than 200 detail-revealing CT angiography images provide a thorough understanding of the anatomy of the pulmonary vasculature, the normal variants that must be distinguished from pathology, and the appearances of different pathologic entities.

The Business of Conquest Nicole D. Legnani,2020-12-15 The Spanish conquest has long been a source of polemic, ever since the early sixteenth century when Spanish jurists began theorizing the legal merits behind native dispossession in the Americas. But in *The Business of Conquest: Empire, Love, and Law in the Atlantic World*, Nicole D. Legnani demonstrates how the financing and partnerships behind early expeditions betray their own praxis of imperial power as a business, even as the laws of the Indies were being written. She interrogates how and why apologists of Spanish Christian empire, such as José de Acosta, found themselves justifying the Spanish conquest as little more than a joint venture between crown and church that relied on violent actors in pursuit of material profits but that nonetheless served to propagate Christianity in overseas territories. Focusing on cultural and economic factors at play, and examining not only the chroniclers of the era but also laws, contracts, theological treatises, histories, and chivalric fiction, Legnani traces the relationship between capital investment, monarchical power, and imperial scalability in the Conquest. In particular, she shows how the Christian virtue of *caritas* (love and charity of neighbor, and thus God) became confused with *cupiditas* (greed and lust), because love came to be understood as a form of wealth in the partnership between the crown and the church. In this partnership, the work of the conquistador became, ultimately, that of a traveling business agent for the Spanish empire whose excess from one venture capitalized the next. This business was thus the business of conquest and featured entrepreneurial violence as its norm—not exception. *The Business of Conquest* offers an original examination of this period, including the perspectives of both the creators of the colonial world (monarchs, venture capitalists, conquerors, and officials), of religious figures (such as Las Casas), and finally of indigenous points of view to show how a venture capital model can be used to analyze the partnership between crown and church. It will appeal to students and scholars of the early modern period, Latin American colonial studies, capitalism, history, and indigenous studies.
