Weaving Services and People on the World Wide Web Irwin King,Ricardo Baeza-Yates,2009-06-23 Ever since its inception, the Web has changed the landscape of human experiences on how we interact with one another and data through service infrastructures via various computing devices. This interweaving environment is now becoming ever more embedded into devices and systems that integrate seamlessly on how we live, both in our working or leisure time. For this volume, King and Baeza-Yates selected some pioneering and cutting-edge research work that is pointing to the future of the Web. Based on the Workshop Track of the 17th International World Wide Web Conference (WWW2008) in Beijing, they selected the top contributions and asked the authors to resubmit their work with a minimum of one third of additional material from their original workshop manuscripts to be considered for this volume. After a second-round of reviews and selection, 16 contributions were finally accepted. The work within this volume represents the tip of an iceberg of the many exciting advancements on the WWW. It covers topics like semantic web services, location-based and mobile applications, personalized and context-dependent user interfaces, social networks, and folksonomies. The presentations aim at researchers in academia and industry by showcasing latest research findings. Overall they deliver an excellent picture of the current state-of-the-art, and will also serve as the basis for ongoing research discussions and point to new directions.

Description and Analysis of the VA National Formulary Institute of Medicine,Division of Health Care Services,VA Pharmacy Formulary Analysis Committee,2000-11-03 The VA National Formulary generated controversy, which motivated congressional scrutiny and a directive to the VA to commission this report reviewing the experience with the National Formulary and formulary system. This Institute of Medicine committee was pleased to assist the Congress with this review, in part because the committee saw in the VHA example an opportunity to understand and anticipate problems that all publicly funded programs are likely to encounter in this new age of pharmaceuticals. The Congress asked the committee to review the restrictiveness of the National Formulary, its impact on the costs and quality of care in the VHA, and how it compared to formularies and drug management practices in the private sector and in other public programs, especially Medicaid. Detailed in the pages that follow, the committee's findings and conclusions on these questions are, the committee believes, highly instructive, though not always in the ways that we anticipated.

Urology & Nephrology Bernard L Schwartz,2002-05 PDR eMedguides are clear and concise internet navigational directories designed to lead physicians directly to websites that have been reviewed by peer leaders and professionals in various medical specialties. Countering the Problem of Falsified and Substandard Drugs Institute of Medicine,Board on Global Health,Committee on Understanding the Global Public Health Implications of Substandard, Falsified, and Counterfeit Medical Products,2013-06-20 The adulteration and fraudulent manufacture of medicines is an old problem, vastly aggravated by modern manufacturing and trade. In the last decade, impotent antimicrobial drugs have compromised the treatment of many deadly diseases in poor countries. More recently, negligent production at a Massachusetts compounding pharmacy sickened hundreds of Americans. While the national drugs regulatory authority (hereafter, the regulatory authority) is responsible for the safety of a country's drug supply, no single country can entirely guarantee this today. The once common use of the term counterfeit to describe any drug that is not what it claims to be is at the heart of the argument. In a narrow, legal sense a counterfeit drug is one that infringes on a registered trademark. The lay meaning is much broader, including any drug made with intentional deceit. Some generic drug companies and civil society groups object to calling bad medicines counterfeit, seeing it as the deliberate conflation of public health and intellectual property concerns. Countering the Problem of Falsified and Substandard Drugs accepts the narrow meaning of counterfeit, and, because the nuances of trademark infringement must be dealt with by courts, case by case, the report does not discuss the problem of counterfeit medicines.

Removing the Barriers to Global Health Equity Theodore H. MacDonald,Rashmin Tamnhe,2018-04-24 Medical research and global awareness of health inequalities continue to grow apace. Why then is global health inequality widening, with benefits disproportionately affecting the richest third? How can obstacles to more equitable healthcare be overcome? This passionately-argued book presents answers that will be essential reading for everyone interested in global health, public health, public policy and economics. Policy makers in global communities and government, political activists and all those with an interest in equality in healthcare will find stimulating, well-supported analyses of the interaction between neoliberal policies, geopolitical issues and health. Meanwhile professionals in international healthcare organisations, care agencies, and international charities will find challenging and refreshing socio-political solutions to those offered by the current neoliberal paradigm.

Innovation and Entrepreneurship Charles H. Matthews,Ralph Brueggemann,2015-03-12 This book presents a new model, the competency framework, for students, innovators, entrepreneurs, managers, and anyone who wants to better understand the dynamic world of innovation and entrepreneurship. Focused on both the individual and strategic organizational level, this book is about people and the competencies each person needs to learn to be successful in creating a more dynamic future. Matthews and Brueggemann's framework for innovation and entrepreneurship competencies empowers individuals to excel at innovation and new venture creation. It provides a practical guide and clear and concise understanding of the knowledge, skills, attitudes, and experiences that are needed to increase imagination, creativity, innovation and new venture creation capability. Innovation and Entrepreneurship will be attractive for students of entrepreneurship, innovation, management and cross-disciplinary classes, such as design thinking. Presented in a modular format, Innovation & Entrepreneurship informs the future direction of people and technology, as well as the educational systems producing the next generation of innovators and entrepreneurs. Based on extensive academic research, this book is organized into two sections: Twelve innovation elements and twelve competency categories. The elements are the foundation

and the competency categories are the building blocks that inform our path toward a more precise understanding of how innovation and entrepreneurship plays an important role in economic development and our daily lives.

The Silver Swan Benjamin Black,2008-03-04 The inimitable Quirke returns in another spellbinding crime novel, in which a young woman's dubious suicide sets off a new string of hazards and deceptions Two years have passed since the events of the bestselling Christine Falls, and much has changed for Quirke, the irascible, formerly hard-drinking Dublin pathologist. His beloved Sarah is dead, his surrogate father lies in a convent hospital paralyzed by a devastating stroke, and Phoebe, Quirke's long-denied daughter, has grown increasingly withdrawn and isolated. With much to regret from his last inquisitive foray, Quirke ought to know better than to let his curiosity get the best of him. Yet when an almost forgotten acquaintance comes to him about his beautiful young wife's apparent suicide, Quirke's old itch to cut into the quick of things, to delve into the dark of what was hidden is roused again. As he begins to probe further into the shadowy circumstances of Deirdre Hunt's death, he discovers many things that might better have remained hidden, as well as grave danger to those he loves. Haunting, masterfully written, and utterly mesmerizing in its nuance, The Silver Swan fully lives up to the promise of Christine Falls and firmly establishes Benjamin Black (a.k.a. John Banville) among the greatest of crime writers.

Glocal Pharma (Open Access) Ericka Johnson,Ebba Sjögren,Cecilia Åsberg,2016-05-12 The Open Access version of this book, available at <http://www.tandfebooks.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. An exploration of how global pharmaceutical products are localized - of what happens when they become ‘glocal’ - this book examines the tensions that exist between a global pharmaceutical market and the locally bounded discourses and regulations encountered as markets are created for new drugs in particular contexts. Employing the case study of the emergence, representation and regulation of Viagra in the Swedish market, Glocal Pharma offers analyses of commercial material, medical discourses and legal documents to show how a Swedish, Viagra-consuming subject has been constructed in relation to the drug and how Viagra is imagined in relation to the Swedish man. Engaging with debates about pharmaceuticalization, the authors consider the ways in which new identities are created around drugs, the redefinition of health problems as sites of pharmaceutical treatment and changes in practices of governance to reflect the entrance of pharmaceuticals to the market. With attention to ‘local’ contexts, it reveals elements in the nexus of pharmaceutcalization that are receptive to cultural elements as new products become embedded in local markets. An empirically informed study of the the ways in which the presence of a drug can alter the concept of a disease and its treatment, understandings of who suffers from it and how to cure it - both locally and internationally - this book will appeal to scholars of sociology and science and technology studies with interests in globalization, pharmaceuticals, gender and the sociology of medicine.

The New Terrain of International Law Karen J. Alter,2014-01-24 A compelling new look at the role of today's international courts In 1989, when the Cold War ended, there were six permanent international courts. Today there are more than two dozen that have collectively issued over thirty-seven thousand binding legal rulings. The New Terrain of International Law charts the developments and trends in the creation and role of international courts, and explains how the delegation of authority to international judicial institutions influences global and domestic politics. The New Terrain of International Law presents an in-depth look at the scope and powers of international courts operating around the world. Focusing on dispute resolution, enforcement, administrative review, and constitutional review, Karen Alter argues that international courts alter politics by providing legal, symbolic, and leverage resources that shift the political balance in favor of domestic and international actors who prefer policies more consistent with international law objectives. International courts name violations of the law and perhaps specify remedies. Alter explains how this limited power--the power to speak the law--translates into political influence, and she considers eighteen case studies, showing how international courts change state behavior. The case studies, spanning issue areas and regions of the world, collectively elucidate the political factors that often intervene to limit whether or not international courts are invoked and whether international judges dare to demand significant changes in state practices.
