Operating Grants for Nonprofit Organizations 2003 Grants Program, Grants Program Staff, 2003 Highlights over 1,000 current operating grants--organized by state--each with contact and requirement information.

Eight Questions Paul Gotthardt, 2012-10 God doesn't always answer our questions. At times our search for guidance is met with silence. When this happens, frustrated and confused believers wonder why God is ignoring them. It's not that God is ignoring our prayers, but sometimes we need to answer his questions before he answers ours. God's questions challenge us to think differently about what it means to live in the will of God and what it means to truly follow the God who is asking them. EIGHT QUESTIONS CAN SHOW YOU HOW TO - make peace with unanswered questions; - live in God's will even when you don't understand what he's doing; and - understand how God's teaching style requires radical faith--and brings unbelievable peace.

The Genesis Conflict Walter J. Veith, 2002

Valley of the Guns Eduardo Obregón Pagán, 2018-10-11 In the late 1880s, Pleasant Valley, Arizona, descended into a nightmare of violence, murder, and mayhem. By the time the Pleasant Valley War was over, eighteen men were dead, four were wounded, and one was missing, never to be found. Valley of the Guns explores the reasons for the violence that engulfed the settlement, turning neighbors, families, and friends against one another. While popular historians and novelists have long been captivated by the story, the Pleasant Valley War has more recently attracted the attention of scholars interested in examining the underlying causes of western violence. In this book, author Eduardo Obregón Pagán explores how geography and demographics aligned to create an unstable settlement subject to the constant threat of Apache raids. The fear of surprise attack by day and the theft of livestock by night prompted settlers to shape their lives around the expectation of sudden violence. As the forces of progress strained natural resources, conflict grew between local ranchers and cowboys hired by ranching corporations. Mixed-race property owners found themselves fighting white cowboys to keep their land. In addition, territorial law enforcement officers were outsiders to the community and approached every suspect fully armed and ready to shoot. The combination of unrelenting danger, its accompanying stress, and an abundance of firearms proved deadly. Drawing from history, geography, cultural studies, and trauma studies, Pagán uses the story of Pleasant Valley to demonstrate a new way of looking at the settlement of the West. Writing in a vivid

narrative style and employing rigorous scholarship, he creatively explores the role of trauma in shaping the lives and decisions of the settlers in Pleasant Valley and offers new insight into the difficulties of survival in an isolated frontier community.

God's Cops James Estrada, Willie Newkirk Jr., 2013-09-20 First lets look at the Hoyle comparison: a typical Boeing 747-400 has about 6 million parts. The typical human genome is an organisms complete set of DNA. Genomes vary widely in size: the smallest known genome for a free-living organism (a bacterium) contains about 600,000 DNA base pairs, while human and mouse genomes have some 3 billion. Except for mature red blood cells, all human cells contain a complete genome. DNA in the human genome is arranged into 23 distinct chromosomes--physically separate molecules that range in length from about 50 million to 250 million base pairs (Unknown, 2011). Lets say despite the fact that people have three billion base pairs that are aligned perfectly and a 747 is only 6 million parts, but for purposes of this discussion lets say that we are only as complex as the 747. OK, here is the problem: first, a 747 was designed, without designers and builders there would be no 747. Remember the analogy I gave of removing the distributor cap from a car and throwing it at the engine and then expecting it to run? You and I have consciousness and we can build a 747. A 747 does not have consciousness and cant build a human. In fact, we are far more sophisticated than a 747 and we cant build a human from the ground up yet. Now detractors would say of course you can build a

747 because you have many more parts that comprise you that make you and you are an intelligent being. All true making me more complex than a 747 and thus more likely to have been designed than the 747, and we all know the 747 was designed. Not just designed by someone in a garage to get us by, engineered to stringent standards taking into account all the forces, stresses and elements it was going to encounter on Earth. Now remember: you are expected to believe that this thing (the 747) that was engineered and is less sophisticated than you are came about by engineering, but you who is realistically at least eight times more complex came about by random chance and mutation. Has anybody ever seen a Cessna randomly mutate into a 747? If we go around randomly killing Cessnas, will they mutate into F-18s so they can get away or fight back? You can argue faster Cessnas might survive more often than slower Cessnas but they are all still Cessnas. However, the faster Cessnas will only survive if they are piloted by people. Further, if we squeeze more and more people into the Cessna that still wont make it a 747. The Earth is covered over by 75% water. Why not 30%? Why not 100%? Because of the oceans we have are perfect amount of salt to produce the right amount of rainfall, otherwise Earth would either be a desert or a water world. The Earth is covered by salt water over the majority of its surface, water that is undrinkable to humans. Were it not for the formation of vast amounts of freshwater, we would not be here. Why is there any freshwater? Why isnt it all freshwater? The Earths composition allows for human life to survive in

every location upon it naturally with the exception of Antarctica. Remember one thing from the first time you boiled water: salt water freezes at a lower temperature and boils at a lower temperature. This means salt water evaporates at a lower temperature. If the oceans were all fresh water there would be a lot less water vapor in the air and less rain. In order to have more water vapor in a world with freshwater oceans you would need more of it to be exposed to the sun, which means more of the planet would need to be water. It seems we have just the right balance of salt water and salinity of that salt water to make rain, and just the right balance of freshwater to survive. The Earth might well roll around on its axis but for a single large moon to stabilize its orbit and provide tidal changes. If the oceans had been bigger the tidal effect would have been greater and much of the life that relies on tides would not exist. The Earth has an atmosphere that protects us from radiation and keeps

Studying the Qur'ān in the Muslim Academy Majid Daneshgar, 2020-01-30

Studying the Qur'an in the Muslim Academy examines what it is like to study and teach the Qur'an at academic institutions in the Muslim world, and how politics affect scholarly interpretations of the text. Guided by the author's own journey as a student, university lecturer, and researcher in Iran, Malaysia, and New Zealand, this book provides vivid accounts of the complex academic politics he encountered. Majid Daneshgar describes the selective translation and editing of Edward Said's classic work Orientalism into

various Islamic languages, and the way Said's work is weaponized to question the credibility of contemporary Western-produced scholarship in Islamic studies. Daneshgar also examines networks of journals, research centers, and universities in both Sunni and Shia contexts, and looks at examples of Quranic interpretation there. Ultimately, he offers a constructive program for enriching Islamic studies by fusing the best of Western theories with the best philological practices developed in Muslim academic contexts, aimed at encouraging respectful but critical engagement with the Qur'an.

The Encyclopedia of God Constance Victoria Briggs, 2003-04-01 Now That God Is Popular Again, What Do People Say About Him? Interest in the nature of the Supreme Being is growing again, especially among people who had turned away

from conventional religious approaches. God is in again, but what do we know about him? In this remarkable reference work, Constance Victoria Briggs, author of the popular *The Encyclopedia of Angels*, offers a stimulating and inspiring review of the thoughts of hundreds of scholars, religious authorities, mystics, writers, saints, prophets, philosophers, poets--even celebrities--on the nature of God. Although we can't question God, we can evaluate the information contained in these sources and draw our own conclusions about who and what God is, she says. It's my desire to portray God as a multi-faceted spiritual entity whose characteristics have shaped our lives since the dawn of mankind. In a highly accessible A-Z format, Briggs presents hundreds of short informative entries from diverse traditions and beliefs. From Arabot, the Seventh Heaven in Judaic lore, to Thomas Jefferson's beliefs in God, from Brahma, Hinduism's chief deity, to Mulungu, the Supreme Being in some East African beliefs--you'll find it all in this revealing tour through the world's beliefs. Among the riches in *The Encyclopedia of God*, you'll find a chronicle of the acts of God, past and future; God's relationship with the saints, prophets, and other holy men and women; God's relationship with the angels; the beliefs about God of world religions and ancient cultures; and new age thoughts on God. All entries are meticulously cross-referenced to give you quick access to related topics.

When a Loved One Dies K. D. Pryor, 2011 Brittany, France. Near the coast. A picturesque inn. Spectacular scenery. Tasty French treats. Time off from school. Tallis Challinor imagines this as the perfect vacation scenario, so when her grandfather suggests that she accompany him to the country of her ancestors, she is more than happy to tag along. What Tallis doesn't bargain on is another ghostly encounter, especially not so soon after she's sealed up a bunch of unruly ghosts on their side of the portal between the human and spirit realms. But, when she feels the energy radiating from the megalithic standing stones dotting the countryside around Carnac, France, an energy that feels frighteningly like the power exuding from the portal in her basement back home, she has a feeling she might be in trouble. And, she is right. When her grandfather goes missing, Tallis leaps into action. She calls the only ghostbuster she knows in France and, with help on the way, she gears up to

battle another set of spirits bent on causing destruction. Along the way, Tallis is forced to examine her life, her relationships, and her tightly-held beliefs about who she is and where she comes from. She also has to juggle two impossible males, both attractive but annoying, both seemingly set on driving her nuts or breaking her heart.
