

📖 **CONTROVERSIES IN THE MANAGEMENT OF GYNECOLOGICAL CANCERS** JONATHAN A. LEDERMANN,CARIEN L. CREUTZBERG,MICHAEL A. QUINN,2013-12-13 This is a novel text that highlights the controversial areas in the management of gynecological cancers. None of the topics in this book have definitive answers; they represent the everyday decision-making facing gynecologists, oncologists, radiologists, pathologists and other health professionals treating women with these conditions. This book is not to be used as a traditional textbook; it is a text that specialists and trainees will use to help them weigh up the arguments that exist in a variety of areas in the treatment of gynecological cancers. Each chapter will have two or more authors, selected either for their opposing views or for their ability to provide an opposite view or opinion to the other. The content will be evidence-based, illustrating contrasting evidence and scientific opinion in the literature. Each chapter will close on a summary indicating the direction of research needed to address the issues being discussed.

📖 **ATOMIC AND PLASMA-MATERIAL INTERACTION PROCESSES IN CONTROLLED THERMONUCLEAR FUSION** RATKO K. JANEV,HANS-WERNER DRAWIN,1993 Atomic and plasma-material interaction processes play an important role in thermonuclear fusion plasmas and the knowledge of these processes has a significant impact on fusion energy research and development. The present volume provides a comprehensive survey of atomic and plasma-material interaction aspects of controlled thermonuclear fusion. The review articles included in this volume describe the role of atomic and plasma-material interaction processes in the currently most active fusion research areas and emphasize the need for accurate quantitative information on these processes for resolving many outstanding issues in fusion research and reactor design development such as plasma energy balance, particle transport and confinement, impurity control, thermal power and helium exhaust, plasma heating and fuelling, edge plasma physics, development of fusion reactor plasma facing components and plasma diagnostics and modelling.

📖 **PHYSICS OF PLASMA-WALL INTERACTIONS IN CONTROLLED FUSION** D. E. POST,R. BEHRISCH,2013-11-21 Controlled thermonuclear fusion is one of the possible candidates for long term energy sources which will be indispensable for our highly technological society. However, the physics and technology of controlled fusion are extremely complex and still require a great deal of research and development before fusion can be a practical energy source. For producing energy via controlled fusion a deuterium-tritium gas has to be heated to temperatures of a few 100 million °C corresponding to about 10 keV. For net energy gain, this hot plasma has to be confined at a certain density for a certain time One promising scheme to confine such a plasma is the use of intense magnetic fields. However, the plasma diffuses out of the confining magnetic surfaces and impinges on the surrounding vessel walls which isolate the plasma from the surrounding air. Because of this plasma wall interaction, particles from the plasma are lost to the walls by implantation and are partially reemitted into the plasma. In addition, wall atoms are released and can enter the plasma. These wall atoms or impurities can deteriorate the plasma performance due to enhanced energy losses through radiation and an increase of the required magnetic pressure or a dilution of the fuel in the plasma. Finally, the impact of the plasma and energy on the wall can modify and deteriorate the thermal and mechanical properties of the vessel walls.

📖 **ANNALS & MAGAZINE OF NATURAL HISTORY** ,1904

📖 **SOIL-WATER INTERACTIONS** SHINGO IWATA,TOSHIO TABUCHI,BENNO P. WARKENTIN,1988 Emphasizing pioneering achievements, this work offers a clear and systematic description of various soil-water phenomena and their applications to soil problems such as water retention and the flux of water in soils and clays. 📖 **AJCC CANCER STAGING MANUAL** FREDERICK L, GREENE,DAVID L. PAGE,IRVIN D. FLEMING,APRIL G. FRITZ,CHARLES M. BALCH,DANIEL G. HALLER,MONICA MORROW,2013-11-21 The American Joint Committee on Cancer's Cancer Staging Manual is used by physicians throughout the world to diagnose cancer and determine the extent to which cancer has progressed. All of the TNM staging information included in this sixth edition is uniform between the AJCC (American Joint Committee on Cancer) and the UICC (International Union Against Cancer). In addition to the information found in the Handbook, the Manual provides standardized data forms for each anatomic site, which can be utilized as permanent patient records, enabling clinicians and cancer research scientists to maintain consistency in evaluating the efficacy of diagnosis and treatment. The CD-ROM packaged with each Manual contains printable copies of each of the book's 45 Staging Forms.

📖 **HOLOGRAPHIC AND SPECKLE INTERFEROMETRY** ROBERT JONES,CATHERINE WYKES,1989-01-26 Holographic and speckle interferometry are optical techniques which use lasers to make non-contracting field view measurements at a sensitivity of the wavelength of light on optically rough (i.e. non-mirrored) surfaces. They may be used to measure static or dynamic displacements, the shape of objects, and refractive index variations of transparent media. As such, these techniques have been applied to the solution of a wide range of problems in strain and vibrational analysis, non-destructive testing (NDT), component inspection and design analysis and fluid flow visualisation. This book provides a self-contained, unified, theoretical analysis of the basic principles and associated opto-electronic techniques (for example electronic speckle pattern interferometry). In addition, a detailed discussion of experimental design and practical application to the solution of physical problems is presented. In this new edition, the authors have taken the opportunity to include a much more coherent description of more than twenty individual case studies that are representative of the main uses to which the techniques are put. The bibliography has also been brought up to date.

📖 **OVARIAN CANCER BIOMARKERS** KHALID EL BAIRI,2021-10-09 This book comprehensively summarizes the biology, etiology, and pathology of ovarian cancer and explores the role of deep molecular and cellular profiling in the advancement of precision medicine. The initial chapter discusses our current understanding of the origin, development, progression and tumorigenesis of ovarian cancer. In turn, the book highlights the development of resistance, disease occurrence, and poor prognosis that are the hallmarks of ovarian cancer. The book then reviews the role of deep molecular and cellular profiling to overcome challenges that are associated with the treatment of ovarian cancer. It explores the use of genome-wide association analysis to identify genetic variants for the evaluation of ovarian carcinoma risk and prognostic prediction. Lastly, it highlights various diagnostic and prognostic ovarian cancer biomarkers for the development of molecular-targeted therapy.
