*My Rights Are Divine* Nina Abdul Razzak,2014 Child abuse can be curbed in the Muslim Arab World, since preventive measures are really in our hands. They are actually a part of a binding force that impacts almost each and every step we take in life; that force is simply Islam: our religion, which does not only define our relationship with God (Allah) Almighty but is also in actuality a way of life. This book makes the argument that a culture in which true or authentic Islamic values are rightly implemented measures up to being one that safeguards and recognizes the rights granted to children by no one other than their merciful and gracious creator Allah. It also proposes a practical framework that explains the types of measures, cultural changes, and structural modifications needed to be implemented to combat child abuse in the Muslim Arab World, with all the religious, cultural, and social specificities of it as a region.

**Everything Elephants** Michael Don Knapik,2002 Images and information about a wide range of

elephant collectibles. This compendium has over 900 color images in over 130 categories with current prices, covering virtually every major manufacturer and artist, past and recent. These include Aronson, Bayre, Bratsoff, Goebel, Lladro, Loetz, Meissen, Nast, Neiman, Passman, Ronson, Royal Doulton, Royal Haeger, Shawnee, Swarovski, Vanderveen, Wedgewood, and many, many more.

**The Global Victimization of Children** Clayton A. Hartjen, S. Priyadarsini, 2012-01-02 This book describes the concept of child victimization in all its facets. Millions of young people throughout the world face violence, sexual, physical, and emotional abuse and exploitation on a daily basis. The worldwide victimization of young people can be prevented, or, at least, its incidence can be greatly reduced, if purposeful action is taken to do so. This volume researches and documents some of the ways in which young people throughout the world are victimized, and suggests strategies for preventing various forms of child victimization. Eight distinct forms of victimization are identified and analyzed in detail. Included are discussions on child prostitution and pornography, economic exploitation through child labor and trafficking, physical and other abuse inflicted on young people in

schools and other institutions, the use of children as armed combatants, and the denial of the basic needs and rights of children to such things as home and to education. In each chapter the authors discuss the nature of the victimization, its global dimensions and prevalence, and the measures governments and/or others are taking, or failing to take, to combat the harm based on the concept that youth victimization is a form of government crime.

*Reformist Voices of Islam: Mediating Islam and Modernity* Shireen Hunter, Shireen T

Hunter, 2014-12-18 In recent years, Islamic fundamentalist, revolutionary, and jihadist movements have overshadowed more moderate and reformist voices and trends within Islam. This compelling volume introduces the current generation of reformist thinkers and activists, the intellectual traditions they carry on, and the reasons for the failure of reformist movements to sustain broad support in the Islamic world today. Richly detailed regionally focused chapters cover Iran, the Arab East, the Maghreb, South Asia, Indonesia, Malaysia, Turkey, Europe, and North America. The editor's introductory chapter traces the roots of reformist thinking both in Islamic tradition and as a response to the challenge of modernity

for Muslims struggling to reconcile the requirements of modernization with their cultural and religious values. The concluding chapter identifies commonalities, comparisons, and trends in the modernizing movements.

*Anil's Ghost* Michael Ondaatje, 2010-10-08 Winning a Governor General's Literary Award for Fiction, the Kiriya Pacific Rim Book Prize and the Scotiabank Giller Prize, *Anil's Ghost* is another award-winning novel from Michael Ondaatje. Steeped in centuries of cultural achievement and tradition, Sri Lanka has been ravaged in the late twentieth century by bloody civil war. Anil Tissera, born in Sri Lanka but educated in England and the U.S., is sent by an international human rights group to participate in an investigation into suspected mass political murders in her homeland. Working with an archaeologist, she discovers a skeleton whose identity takes Anil on a fascinating journey that involves a riveting mystery. What follows, in a novel rich with character, emotion, and incident, is a story about love and loss, about family, identity and the unknown enemy. And it is a quest to unlock

the hidden past—like a handful of soil analyzed by an archaeologist, the story becomes more diffuse the farther we reach into history. A universal tale of the casualties of war, unfolding as a detective story, the book gradually gives way to a more intricate exploration of its characters, a symphony of loss and loneliness haunted by a cast of solitary strangers and ghosts. The atrocities of a seemingly futile, muddled war are juxtaposed against the ancient, complex and ultimately redemptive culture and landscape of Sri Lanka.

*Asian Religions, Technology and Science* István Keul, 2015-03-27 Over the past five decades, the field of religion-and-science scholarship has experienced a considerable expansion. This volume explores the historical and contemporary perspectives of the relationship between religion, technology and science with a focus on South and East Asia. These three areas are not seen as monolithic entities, but as discursive fields embedded in dynamic processes of cultural exchange and transformation. Bridging these arenas of knowledge and practice traditionally seen as distinct and disconnected, the book reflects on the ways of exploring the various dimensions of their

interconnection. Through its various chapters, the collection provides an examination of the use of modern scientific concepts in the theologies of new religious organizations, and challenges the traditional notions of space by Western scientific conceptions in the 19th century. It looks at the synthesis of ritual elements and medical treatment in China and India, and at new funeral practices in Japan. It discusses the intersections between contemporary Western Buddhism, modern technology, and global culture, and goes on to look at women's rights in contemporary Pakistani media. Using case studies grounded in carefully delineated temporal and regional frameworks, chapters are grouped in two sections; one on religion and science, and another on religion and technology. Illustrating the manifold perspectives and the potential for further research and discussion, this book is an important contribution to the studies of Asian Religion, Science and Technology, and Religion and Philosophy.

**The Clerics of Islam** Nabil Mouline, 2014-01-01 Followers of Muhammad b. 'Abd al-Wahhab, often considered to be Islam's Martin Luther, shaped the political and religious identity of the Saudi state while also enabling the significant worldwide expansion of Salafist Islam. Studies of the movement he

inspired, however, have often been limited by scholars' insufficient access to key sources within Saudi Arabia. Nabil Mouline was granted rare interviews and admittance to important Saudi archives in preparation for this groundbreaking book, the first in-depth study of the Wahhabi religious movement from its founding to the modern day. Gleaning information from both written and oral sources and employing a multidisciplinary approach that combines history, sociology, and Islamic studies, Mouline presents a new reading of this movement that transcends the usual resort to polemics.

*The Tamil Separatist War in Sri Lanka* Channa Wickremesekera, 2016-02-26 The complex and long-drawn war between the Sri Lankan government and the Liberation Tigers of Tamil Eelam (LTTE) ended with the defeat of the Tigers in 2009. This book provides a military history of the conflict in tracing its evolution from a battle between a ragtag guerrilla force and a mainly ceremonial army to one between an organized guerrilla force with semi-conventional capability and a state military apparatus that had morphed into a large and potent force with modern armour, aircraft and naval

vessels. Using a wide range of sources this book offers an incisive analysis of the progress and conclusion of one of the longest and most destructive wars in modern South Asia. Comprehensive and accessible, the volume will be of great interest to scholars and researchers of modern South Asia, especially Sri Lanka, military history, politics, defence and strategic studies, as well as the general reader.

Women and Terrorism Margaret Gonzalez-Perez, 2008-05-29 This book examines the relationship between women and terrorist activities in the post-World War II era. Utilizing comparative research into 26 terrorist organizations world-wide, the work identifies a dichotomy whereby women are significantly more active in domestic terrorist organizations than in international groups. Women and Terrorism argues that domestic terrorist organisations employ revolution, secession, or other means to change internal aspects of the state and the social and economic structure it maintains. This offers the possibility of change in women's societal status; therefore, women are drawn to domestic terrorist organizations in much higher proportions and choose a much greater level of activity, entering the

ranks of combat, leadership, and policymaking. By contrast, international terrorist groups oppose outside forces, such as imperialism, capitalism, Western culture, or other more nebulous concepts. Gonzalez-Perez argues that female lack of participation in these activities reflects the fact that women will be relegated to the status quo, regardless of the success or failure of the international terrorist movement.

**City of Sin** Catharine Arnold, 2010-08-05 If Paris is the city of love, then London is the city of lust. For over a thousand years, England's capital has been associated with desire, avarice and the sins of the flesh. Richard of Devises, a monk writing in 1180, warned that 'every quarter [of the city] abounds in great obscenities'. As early as the second century AD, London was notorious for its raucous festivities and disorderly houses, and throughout the centuries the bawdy side of life has taken easy root and flourished. In the third book of her fascinating London trilogy, award-winning popular historian Catharine Arnold turns her gaze to the city's relationship with vice through the ages. From the bath houses and brothels of Roman Londinium, to the stews and Molly houses of the 17th and

18thcenturies, London has always traded in the currency of sex. Whether pornographic publishers on Fleet Street, or fancy courtesans parading in Haymarket, its streets have long been witness to colourful sexual behaviour. In her usual accessible and entertaining style, Arnold takes us on a journey through the fleshpots of London from earliest times to present day. Here are buxom strumpets, louche aristocrats, popinjay politicians and Victorian flagellants - all vying for their place in London's league of licentiousness. From sexual exuberance to moral panic, the city has seen the pendulum swing from Puritanism to hedonism and back again. With latter chapters looking at Victorian London and the sexual underground of the 20thcentury and beyond, this is a fascinating and vibrant chronicle of London at its most raw and ribald.

*Saudi Arabia and Nuclear Weapons* Norman Cigar,2016-03-10 Nuclear proliferation in the Middle East remains an issue of concern. Saudi Arabia's actions will largely rest on Iran's decisions, and discussions and preparations within Saudi Arabia would suggest that it is ready to react to potential

shifts in the region's nuclear powers. Saudi Arabia and Nuclear Weapons uses an inside out approach that emphasises the Saudis' own national interests in relation to the nuclear threat, and their understanding of the role of nuclear weapons in defense, foreign policy and the concept of deterrence. It is the first study with comprehensive use of the local Arabic language military and civilian media to provide this understanding of official thinking and policy. The Saudi case study is contextualised against the prevailing proliferation models, to conclude that the Saudi case shares both commonalities and elements of uniqueness with other proliferation cases, implying the need for a 'multi-causal' approach. Its comparative analysis also suggests potential implications applicable more broadly to the issue of nuclear proliferation. A comprehensive study of Saudi Arabia's attitude to nuclear weapons, this book offers an exploration of nuclear proliferation that would interest students, scholars and policymakers working in Middle East studies, as well as Military and nuclear proliferation studies.

**Islam and Democracy in the 21st Century** Tauseef Ahmad Parray, 2023-09-15 This book starts with the prevailing idea of a conflicting relationship between Islam and the Western concept of democracy, both in theory and in practice. With this backdrop, the author addresses the crucial question—Is Islam compatible with democracy? The book offers very useful discussions in framing the contemporary debates surrounding Islam and democracy, treads through diverse theoretical Islamic texts like the ‘Quran’ and ‘Sunnah’, discusses the historical evolution of the concept of Shura—the primary source of democratic ethics in Islam, provides an assessment of the views and visions of some selected Muslim scholars (from 19th to 21st centuries) on Islam–democracy compatibility, and

examines the elements of compatibility between Islam and democracy without ignoring the basic differences that exist between the Western approach to democracy and Islamic political thought.
