The Boys of '61 Charles Carleton Coffin, 1881  
Coffin writes his personal observations while with the United States Army and Navy during the Civil War. From the first battle of Bull Run to the fall of Richmond and the surrender of Lee, he experienced the war at close quarters and takes us through the intimacy of the march and the camp, among ordinary men and officers, as momentous events unfolded and important decisions were made.

**The Book of Abraham** Marek Halter, 2003  
Chronicling nearly two thousand years of history, this panoramic saga follows the destiny of Abraham, a Jewish scribe, and his descendants from the burning of Jerusalem under the Romans to the 1943 battle of the Warsaw ghetto.

**Thalaba the Destroyer** Robert Southey, 1801  
Teaching Physical Education Muska Mosston, Sara Ashworth, 1994 The definitive source for the groundbreaking ideas of the Spectrum of Teaching Styles introduced by Mosston and Ashworth and developed during 35 years in the field. This book offers teachers a foundation for understanding the decision-making structures that exist in all teaching/learning environments and for recognizing the variables that increase effectiveness while teaching physical education. In this thoroughly revised and streamlined edition, all chapters have been updated to include hundreds of real-world examples, concise charts, practical forms, and

concrete suggestions for deliberate teaching so that teachers can understand their classrooms' flow of events, analyze decision structures, implement adjustments that are appropriate for particular classroom situations, and deliberately combine styles to achieve effective variations. As in prior editions, individual chapters describe the anatomy of the decision structure as it relates to teachers and learners, the objectives (O-T-L-O) of each style, and the application of each style to various activities and educational goals. For physical education teachers.

*The Fairy-faith in Celtic Countries* Walter Yeeling Evans-Wentz, 1911 In this study, which is first of all a folk-lore study, we pursue principally an anthropo-psychological method of interpreting the Celtic belief in fairies, though we do not hesitate now and then to call in the aid of philology; and we make good use of the evidence offered by mythologies, religions, metaphysics, and physical sciences.

**Cardboard Gods** Josh Wilker, 2010 Wilker marks the stages of his life through the baseball cards he collected as a child. He captures the experience of growing up obsessed with baseball cards and explores what it means to be a fan of the game.

Books and Beyond [4 volumes] Kenneth Womack, 2008-10-30 There's a strong interest in reading for pleasure or self-improvement in America, as shown by the popularity of Harry Potter, and book clubs, including Oprah Winfrey's.

Although recent government reports show a decline in recreational reading, the same reports show a strong correlation between interest in reading and academic achievement. This set provides a snapshot of the current state of popular American literature, including various types and genres. The volume presents alphabetically arranged entries on more than 70 diverse literary categories, such as cyberpunk, fantasy literature, flash fiction, GLBTQ literature, graphic novels, manga and anime, and zines. Each entry is written by an expert contributor and provides a definition of the genre, an overview of its history, a look at trends and themes, a discussion of how the literary form engages contemporary issues, a review of the genre's reception, a discussion of authors and works, and suggestions for further reading. Sidebars provide fascinating details, and the set closes with a selected, general bibliography. Reading in America for pleasure and knowledge continues to be popular, even while other media compete for attention. While students continue to read many of the standard classics, new genres have emerged. These have captured the attention of general readers and are also playing a critical role in the language arts classroom. This book maps the state of popular literature and reading in America today, including the growth of new genres, such as cyberpunk, zines, flash fiction, GLBTQ literature, and other topics. Each entry is written by an expert contributor and provides a definition of the genre, an overview of its history, a look at trends and themes, a discussion of how the literary form engages contemporary issues, a review of the genre's critical reception, a discussion of authors and works, and suggestions for further reading. Sidebars provide fascinating details, and the set closes with a selected, general bibliography. Students will find this book a valuable guide to

what they're reading today and will appreciate its illumination of popular culture and contemporary social issues.

**Great Men and Famous Women** Charles Francis Horne, 1894

Teaching Engineering, Second Edition Phillip C. Wankat, Frank S. Oreovicz, 2015-01-15 The majority of professors have never had a formal course in education, and the most common method for learning how to teach is on-the-job training. This represents a challenge for disciplines with ever more complex subject matter, and a lost opportunity when new active learning approaches to education are yielding dramatic improvements in student learning and retention. This book aims to cover all aspects of teaching engineering and other technical subjects. It presents both practical matters and educational theories in a format useful for both new and experienced teachers. It is organized to start with specific, practical teaching applications and then leads to psychological and educational theories. The practical orientation section explains how to develop objectives and then use them to enhance student learning, and the theoretical orientation section discusses the theoretical basis for learning/teaching and its impact on students. Written mainly for PhD students and professors in all areas of engineering, the book may be used as a text for graduate-level classes and professional workshops or by professionals who wish to read it on their own. Although the focus is engineering education, most of this book will be useful to teachers in other disciplines. Teaching is a complex human activity, so it is impossible to develop a formula that guarantees it will be excellent. However, the methods in this book will help all professors become good teachers while spending less time preparing for the classroom. This is a new edition of the well-received volume

published by McGraw-Hill in 1993. It includes an entirely revised section on the Accreditation Board for Engineering and Technology (ABET) and new sections on the characteristics of great teachers, different active learning methods, the application of technology in the classroom (from clickers to intelligent tutorial systems), and how people learn.

**Brothers in Berets** Forrest L. Marion, 2018 The Air Force Special Operations Command (AFSOC) special tactics community is a small, tight-knit brotherhood of proficient and committed warriors, consisting of special tactics officers and combat controllers, combat rescue officers and pararescuemen, and officer and enlisted special operations weathermen. These warriors have consistently proven themselves to be an invaluable force multiplier throughout history in conflicts around the world. This is their story.--Provided by publisher.

*Democratic Experiments* Brice Laurent, 2017-05-12 An examination of nanotechnology as a lens through which to study contemporary democracy in both theory and practice. In *Democratic Experiments*, Brice Laurent discusses the challenges that emerging technologies create for democracy today. He focuses on nanotechnology and its attendant problems, proposing nanotechnology as a lens through which to understand contemporary democracy in both theory and practice. Arguing that democracy is at stake where nanotechnology is defined as a problem, Laurent examines the sites where nanotechnology is discussed and debated by scientists, policymakers, and citizens. It is at these sites where the joint production of nanotechnology and the democratic order can be observed. Focusing on the United States, France, and Europe, and various international organizations, Laurent analyzes representations of nanotechnology in science museums, collective

discussions in participatory settings, the making of categories such as “nanomaterials” or responsible innovation” in standardization and regulatory arenas, and initiatives undertaken by social movements. He contrasts American debates, in which the concern for public objectivity is central, with the French “state experiment,” the European goal of harmonization, and the international concern with a global market. In France, public debate proceeded in response to public protest and encountered a radical critique of technological development; the United States experimented with an innovative approach to technology assessment. The European regulatory approach results in lengthy debates over political integration; the United States relies on the adversarial functioning of federal agencies. Because nanotechnology is a domain where concerns over anticipation and participation are pervasive, Laurent argues, nanotechnology—and science and technology studies more generally—provides a relevant focus for a renewed analysis of democracy.

 werewolves in  
 their youth is  
 a collection of  
 eloquent and  
 moving stories  
 about the  
 fragility of  
 human  
 relationships  
 yet despite  
 this fragility  
 you never quite  
 shake the sense  
 that in the  
 alternately  
 amusing  
 profound and  
 downbeat  
 stories in here  
 loneliness is  
 as hopeless an  
 alternative as  
 conventional  
 community
