Internet Governance and the Global South A. Bhuiyan,2014-05-29 A welcome addition to Palgrave's Global Media Policy and Business series, Internet Governance and the Global South documents the role of the global south in Internet policymaking and challenges the globalization theories that declared the death of the state in global decision-making. Abu Bhuiyan argues that the global Internet politics is primarily a conflict between the states - the United States of America and the states of the global south - because the former controls Internet policymaking. The states of the global south have been both oppositional and acquiescing to the sponsored policies of the United States on Internet issues such as digital divide, multilingualism, intellectual property rights and cyber security. They do not oppose the neoliberal underpinnings of the policies promoted by the United States, but ask for an international framework to govern the Internet so that they can work as equal partners in setting norms for the global Internet.

Misunderstanding the Internet James Curran,Natalie Fenton,Des Freedman,2016-02-05 The growth of the internet has been spectacular. There are now more than 3 billion internet users across the globe, some 40 per cent of the world's population. The internet's meteoric rise is a phenomenon of enormous significance for the economic, political and social life of contemporary societies. However, much popular and academic writing about the internet continues to take a celebratory view, assuming that the internet's potential will be realised in essentially positive and transformative ways. This was especially true in the euphoric moment of the mid-1990s, when many commentators wrote about the internet with awe and wonderment. While this moment may be over, its underlying technocentrism - the belief that technology determines outcomes - lingers on and, with it, a failure to understand the internet in its social, economic and political contexts. Misunderstanding the Internet is a short introduction, encompassing the history, sociology, politics and economics of the internet and its impact on society. This expanded and updated second edition is a polemical, sociologically and historically informed guide to the key claims that have been made about the online world. It aims to challenge both popular myths and existing academic orthodoxies that surround the internet.

Reshaping World Politics Craig Warkentin,2001 This text examines the ways in which non-governmental organizations (NGOs) contribute to the development and maintenance of global civil society. The author investigates eight NGOs and connects their organizational activities to global civil society's constitutive dynamics and processes.

Human Rights in the Global Information Society Rikke Frank Jorgensen,2006-06-09 International organizations, governments, academia, industry, and the media have all begun to grapple with the information society as a global policy issue. The first United Nations World Summit on the Information Society (WSIS), held in December 2003, recognized the connections between information technology and human rights with a Declaration of Principles—in effect, the first constitution for cyberspace—that called for the development of the information society to conform to recognized standards of human rights. Critical issues in the policy debates around WSIS have been the so-called digital divide, which reflects a knowledge divide, a social divide, and an economic divide; and the need for a nondiscriminatory information society to provide universal access to information technology in local languages throughout the developing world. Other crucial issues include the regulatory frameworks for information access and ownership and such basic freedoms as the right to privacy. The contributors to this timely volume examine the links between information technology and human rights from a range of disciplinary perspectives. Scholars, human rights activists, and practitioners discuss such topics as freedom of expression, access to information, privacy, discrimination, gender equality, intellectual property, political participation, and freedom of assembly in the context of the revolution in information and communication technology, exploring the ways in which the information society can either advance human rights around the world or threaten them. An afterword reports on the November 2005 WSIS, held in Tunis, and its reaffirmation of the fundamental role of human rights in the global information society. Contributors David Banisar, William Drake, Ran Greenstein, Anriette Esterhuysen, Robin Gross, Gus Hosein, Heike Jensen, Rikke Frank Jørgensen, Hans Klein, Charley Lewis, Meryem Marzouki, Birgitte Kofod Olsen, Kay Raseroka, Adama Samassékou, Mandana Zarrehparvar

The New Post-Oil Arab Gulf Nabil Sultan,David Weir,Zeinab Karake-Shalhoub,2012-01-16 The sharp increase in oil revenues since 2002 has left the Arab Gulf States with billions of petro-dollars. But how will these countries fare in the post-oil era? The rulers of these states are taking serious measures to ensure the survival of their economies, and indeed their regimes, in a world with scarce mineral resources. This volume explores the extent to which these countries have been and will be able to prepare for the future by transforming themselves into serious international destinations for tourism, finance, healthcare and education. It also considers the implications of failure for the future survival of their regimes. This study will provide food for thought for academi, policy makers and general readers. 'An incisive enquiry into an exciting region, the authors leave no stones unturned. It is bold in its examination of both the history and the crucial changes being wrought throughout the Gulf. The book, which has been fashioned with both detailed knowledge and academic rigour, will be of huge advantage to anyone seeking a practical chart to the region. The contributors have not been restrained in drawing examples of the Gulf States over-reaching themselves to danger points in the economic downturn. The severe lessons learned have been studiously researched. The fresh opportunities, political, economic, social and technological, are concisely considered. No matter where your interests lie, this is a solid foundation from which to build a 'Way Ahead' policy for the region.' -- Charles Wilson, Director of The Consultancy, an international human resources business with Gulf experience

Leper Knights David Marcombe,2003 One of the most unusual contributions to the crusading era was the idea of the leper knight - a response to the scourge of leprosy and the shortage of fighting men which beset the Latin kingdom in the twelfth century. The Order of St Lazarus, which saw the idea become a reality, founded establishments across Western Europe to provide essential support for its hospitaller and military vocations. This book explores the important contribution of the English branch of the order, which by 1300 managed a considerable estate from its chief preceptory at

Burton Lazars in Leicestershire. Time proved the English Lazarites to be both tough and tenacious, if not always preoccupied with the care of lepers. Following the fall of Acre in 1291 they endured a period of bitter internal conflict, only to emerge reformed and reinvigorated in the fifteenth century. Though these late medieval knights were very different from their twelfth-century predecessors, some ideologies lingered on, though subtly readapted to the requirements of a new age, until the order was finally suppressed by Henry VIII in 1544. The modern refoundation of the order, a charitable institution, dates from 1962. The book uses both documentary and archaeological evidence to provide the first ever account of this little-understood crusading order.DAVID MARCOMBE is Director of the Centre for Local History, University of Nottingham.

The Undergraduate's Companion to Arab Writers and Their Web Sites Dona S. Straley,2004-08-30 This companion provides information on the lives and works of about 150 authors who write primarily in Arabic, covering the first known works of Arabic literature in the 5th and 6th centuries A.D. to the present day. While concentrating on literary authors, writers from the fields of history, geography, and philosophy are also represented. The individuals represented were chosen primarily from the Encyclopedia of Arabic Literature. Among the major authors are Najib Mahfuz, the 1988 Nobel laureate; Nawal Saadawi, the Egyptian physician who is the leading female literary author in the Arab world and the most frequently translated into English; Abu al-Ala' al-Ma'arri, the 11th century poet whose verses are taught to every Arab schoolchild; and Avicenna, the great physician and philosopher, transmitter and interpreter of Aristotle, whose work on medicine was long the standard not only in the Middle East but also (in Latin translation) in Europe. In addition, entries will be included for the anonymous romances so common in Arabic literature, such as The Arabian Nights, a cycle of stories perhaps even better known in the West than in the Arab world. Interest in the history and culture of the Arab world at U.S. universities has taken a quantum leap since the events of September 11, 2001. In this book, the author demonstrates that at least three major, distinct literary and cultural traditions are included within the fields of Middle Eastern and Islamic studies—Arabic, Persian, and Turkic. The Arabic tradition is the oldest, largest, and most widely dispersed. Undergraduate courses in Arabic literature and culture are now being taught at both lower- and upper-levels at many universities. Such courses are often used by undergraduates to fulfill basic educational requirements for their degrees. Students in such courses often have difficulty finding information on Arab writers, and this volume fills the void.

Global Risk Management Louise K. Comfort,Mary Lee Rhodes,2022-08-31 The rise and spread of Covid-19 in the beginning of 2020 presents a once-in-a-century challenge and opportunity for decision makers, managers, scholars, and citizens to understand the risks, mitigate its impact and prepare for future crises. Drawing on a global network of scholars, this book presents a comparative analysis of ten nations’ response to a global pandemic, while operating nominally under the framework of the World Health Organization. The book introduces the concept of ‘collective cognition’ as an analytic lens for examining the nations’ response to Covid-19 during the first six months of the emerging pandemic (January – June 2020) and draws out insights for improving systems of global risk management. This book addresses four primary audiences: policy-makers and leaders in nations struggling to contain viruses while guiding their societies under threat; academic researchers, students, and educators engaged in preparing the next generation of professionals committed to investigating emerging risk: managers of non-profit and private organizations that operate and maintain the networks of social, technical, and economic services that are essential to functioning communities; and the informed general public interested in understanding this extraordinary sequence of events and in managing the novel risk of COVID-19 in a more informed, responsible way.
