Roadside Giants Brian Butko,Sarah Butko,2005-09-27 From Lucy, the colossal elephant-shaped building on the Jersey Shore, to the grand donut atop Randy's in Los Angeles, this full-color guide profiles the commercial giants that loom over America's highways. Created to sell products and promote tourism in a big way, they can be found all over the United States. The authors have traveled far and wide to bring readers the world's largest duck in Long Island, an enormous Amish couple in Pennsylvania Dutch Country, and towering Paul Bunyans all over the Midwest. There are buildings shaped like hot dogs, ice cream cones, and baskets, as well as the roadside phenomena known as Muffler Men, giants who originally advertised mufflers but now have been converted to cowboys, Indians, spacemen, and pirates. Big fun!

Experimenting on a Small Planet William W. Hay, 2021-09-27 This book is a thorough introduction to climate science and global change. The author is a geologist who has spent much of his life investigating the climate of Earth from a time when it was warm and dinosaurs roamed the land, to today's changing climate. Bill Hay takes you on a journey to understand how the climate system works. He explores how humans are unintentionally conducting a grand uncontrolled experiment which is leading to unanticipated changes. We follow the twisting path of seemingly unrelated discoveries in physics, chemistry, biology, geology, and even mathematics to learn how they led to our present knowledge of how our planet works. He explains why the weather is becoming increasingly chaotic as our planet warms at a rate far faster than at any time in its geologic past. He speculates on possible future outcomes, and suggests that nature itself may make some unexpected course corrections. Although the book is written for the layman with little knowledge of science or mathematics, it includes information from many diverse fields to provide even those actively working in the field of climatology with a broader view of this developing drama. Experimenting on a Small Planet is a must read for anyone having more than a casual interest in global warming and climate change - one of the most important and challenging issues of our time. This new edition includes actual data from climate science into 2021. Numerous Powerpoint slides can be downloaded to allow lecturers and teachers to more effectively use the book as a basis for climate change education.

Against the Tide Martín López Corredoira, Carlos Castro Perelman, 2008 Nobody should have a monopoly of the truth in this universe. The censorship and suppression of challenging ideas against the tide of mainstream research, the blacklisting of scientists, for instance, is neither the best way to do and filter science, nor to promote progress in the human knowledge. The removal of good and novel ideas from the scientific stage is very detrimental to the pursuit of the truth. There are instances in which a mere unqualified belief can occasionally be converted into a generally accepted scientific theory through the screening action of refereed literature and meetings planned by the scientific organizing committees and through the distribution of funds controlled by club opinions. It leads to unitary paradigms and unitary thinking not necessarily associated to the unique truth. This is the topic of this book: to critically analyze the problems of the official (and sometimes illicit) mechanisms under which current science (physics and astronomy in particular) is being administered and filtered today, along with the onerous consequences these mechanisms have on all of us. Apart from the editors, Juan Miguel Campanario, Brian Martin, Wolfgang Kundt, J. Marvin Herndon, Marian Apostol, Halton C. Arp, Tom Van Flandern, Andrei P. Kirilyuk, Dmitri Rabounski and Henry H. Bauer, all of them professional researchers, reveal a pessimistic view of the miseries of the actual system, while a glimmer of hope remains in the leitmotiv claim towards the freedom in doing research and attaining an acceptable level of ethics in science.

Fly Away Snow Goose Juliet Waldron, 2018-03-01 Yaotl and Sascho splashed along the shores of the behcha, spears hefted, watching for the flash of fin to rise to the surface and sparkle in the sunlight. Tender feelings, barely discovered, flushed their faces. Waving their spears they laughed and teased one another with sprays of newly melted ice water. In the distance, the warning about the kw'ahtıı sounds, but on this fatal day it goes unheard; Yaotl and Sascho fall into the hands of the Indian Agents. Transport to Fort Providence residential school is only the beginning of their ordeal, for the teachers believe it is their sworn duty to “kill the Indian inside.” All attempts at escape are severely punished, but Yaotl and Sascho, along with two others, will try, beginning a journey of 900 Kilometers along the Mackenzie River. Like wild geese, brave hearts together, they are homeward bound.
