**Gender Equality in the Labor Market in the Philippines** Asian Development Bank, 2013-12 This report analyzes gender equality in the labor market and related policies and legislation in the Philippines, and concludes with recommendations to promote gender equality. Key mechanisms for attaining inclusive growth for women requires expanding employment opportunities and decent work outcomes for women to promote gender equality in labor markets. Economic growth in the Philippines, however, has not translated into sufficient employment growth and the employment growth has not been inclusive for women. Generally speaking, there has been little improvement in gender equality in the labor market, as measured by the share of women in waged employment in the nonagriculture sector. In the Philippines, the estimated proportion of women's annual earnings to men's annual earnings stands at less than 60%. However, employment growth alone is not sufficient to judge whether there is inclusive growth, especially in low-income countries where there is significant underemployment and a large informal employment sector. Gender inequality in the labor market is ascertained here by reference to seven gender gaps (or deficits for women): labor force participation, human capital, the unpaid domestic and care work burden, vulnerable employment, wage employment, decent work, and social protection. Despite a variety of gender-responsive legal and policy initiatives, an assessment of the labor market in the Philippines reveals that although some gender gaps have been reduced, women still

suffer from persistent gender deficits.

Strategy for Equality Between Women and Men, 2010-2015 ,2011 Recoge: 1. Equal economic independence - 2. Equal pay for equal work and work of equal value - 3. Equality in decision-making - 4. *Enterprise Restructuring and Unemployment in Models of Transition* Simon Commander, 1998-01-01  
This volume is primarily concerned with the first key component of transition: restructuring the changing behavior of firms and their complex interaction with the labor market, most particularly with unemployment. Chapter 1 gives an overview of firm behavior, restructuring, and the labor market in the transition. Chapter 2 focuses on the effect of output, ownership, and legal form on employment and wages in Central European firms. Chapter 3 explores employment and wage setting in three stages of Hungary's labor market transition. Chapter 4 considers enterprises in the Polish transition. Chapter 5 explains labor market flows in the midst of structural change. Chapter 6

explores the role of unemployment and restructuring in the transition, and chapter 7 presents a numerical model of transition. Emphasis is placed on the Czech and Slovak Republics, Bulgaria, Hungary, Poland, and Russia.

**Gender Pay Differentials** B. Mahy, R. Plasman, F. Rycx, 2006-04-26 This book provides new evidence on the magnitude and sources of pay inequalities between women and men in European countries and New Zealand on the basis of micro data. Particular attention is devoted to job access and workplace practices, promotions and wage growth, sectoral affiliation and rent-sharing, and unobserved heterogeneity and dynamics.

**Central Asian Economies in Transition** Emine Ayşen Hiç Gencer, Cevat Gerni, 2012 â oeCentral Asian Economies in Transition focuses on Central Asian countries (Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Azerbaijan) and their economic ties with Turkey. The book first summarizes the current state of Central Asian economies, enhanced through statistics and details [of] the economic and political challenges they face. The following parts cover the topics of economic integration and globalization, economic growth and development, international trade, and the energy sector. â oeCentral Asian Economies in Transition is based on selected papers from the series of International Conferences on Eurasian Economies, investigating Central Asian countries in a comparative manner, as well as [on] specially invited articles by prominent academicians; all edited with coherence and exhaustiveness in mind.

While some chapters are purely descriptive in nature, others include econometric analyses. The target audience for Central Asian Economies in Transition is anyone who is interested in Central Asian economies, their transition process towards a market economy regime and their integration to the global world. This includes academicians from any field of social sciences, as well as decision makers, politicians, businessmen and journalists. I believe that the reader will get a comprehensive picture of the Central Asian economies with specific details highlighted. I would like to take this opportunity to thank the editors for their painstaking efforts during the preparation of this book.

**The Economics of Transition** Egor Timurovich Gaïdar, 2003 This collection of essays discuss the economic policy problems that confront postcommunist countries. Most chapters focus on liberalization of the exchange rate and trade system, macroeconomic stabilization, and institutional reform.

Work and Family Policy Stephen Sweet, 2013-09-13 Numerous challenges exist in respect to integrating work and family institutions and there is remarkable cross-national variation in the ways that societies respond to these concerns with policy. This volume examines these concerns by focusing on cross-national variation in structural/cultural arrangements. Consistent support is found in respect to the prospects of expanding resources for working families both in the opportunity to provide care, as well as to

remain integrated in the workforce. However, the studies in this volume offer qualifiers, explaining why some effects are not as strong as might be hoped and why effects are sometimes restricted to particular classifications of workers or families. It is apparent that, when different societies implement similar policies, they do not necessarily do so with the same intended outcomes, and usage is mediated by how policies are received by employers and workers. The chapters in this book speak to the merits of international comparative analysis in identifying the strategies, challenges and benefits of providing resources to workers and their families. This book was originally published as a special issue of *Community, Work & Family*.
