Mark Denny

Gliding for Gold Mark Denny, 2011-09-30 As anyone from cold climates knows, living with lots of ice and snow can lead to a special appreciation of sports such as skiing, sledding, and skating. Prolific physics popularizer Mark Denny's take on winter athletics lays out the physical principles that govern glaciated game play. After discussing the physical properties of ice and snow and describing the physics behind sliding friction and aerodynamic drag, Denny applies these concepts to such sports as bobsledding, snowboarding, and curling. He explains why clap skates would only hinder hockey players, how a curling rock curls, the forces that control luge speed, and how steering differs from skiing to snowboarding. With characteristic accuracy and a touch of wit, Denny provides fans, competitors, and coaches with handy, applicable insights into the games they love. The separate section of technical notes offers an original and mathematically rigorous exploration of the key aspects of winter sports physics. A physics-driven exploration of sports played on ice and snow that is truly fun and informative, *Gliding for Gold* is the perfect primer for understanding the science behind cold weather athletics.

Wolfbane (Illustrated) Cyril M. Kornbluth, Frederik Pohl, 2020-02-26 This science fiction novel takes place in the year 2203. A rogue planet, populated by strange machines known as Pyramids, has stolen the Earth from the Solar system, taking it off into interstellar space. The global population has crashed to a hundred million, due largely to the radical climate changes that followed the arrival of the alien planet. Most of the surviving humans are

'Citizens,' passive people living lives bound up with elaborate social rituals, various styles of meditation, and carefully prescribed selflessness.

Tell Me a Scary Story...But Not Too Scary! Carl Reiner, 2008-11-15 Everyone loves scary stories and award-winning comedy writer/director Carl Reiner invites readers to huddle close as he tells a young boy's tale of the mysterious house next door. Something with red beams of light shooting from its eyes was coming down the basement stairs. It came closer and closer... the hair on the back of my neck was sticking straight out. I finally saw it- and it was alive! As the story becomes spookier and spookier, Reiner pauses to ask Shall we turn the page- or is it too scary? That's for you to decide! Parents and children can read along together as they listen to spooky sound effects and Carl Reiner's hilarious performance of Tell Me a Scary Story... on the accompanying CD.
