The Ultimate Time Machine Joseph McMoneagle, 2023-06-28 Joseph McMoneagle is an extraordinary remote viewer, a psychic spy, whose experiences have given him a special insight into the nature of time and human perception. For more than seventeen years, he was a researcher and remote viewer for the top-secret Army project STARGATE. For years after that, he journeyed through time while working in a consciousness-development lab with out-of-body experience pioneer Robert A. Monroe. McMoneagle explores the questions that philosophers have for centuries debated: Does time really exist? Do our actions today really affect our future? Can we change the past? Do we slip between alternate realities? In *The Ultimate Time Machine*, McMoneagle delivers new insights into these mysteries, including: First-hand information--including transcripts from lab sessions--on the origins of humanity, the crucifixion of Jesus Xhrist, and the building of the Egyptian pyramids. Provocative suggestions about the nature of time, creation, and a constantly changing past. A detailed picture of our immediate future through the year 2075. More than 150 very explicit predictions on world population, aging, religious fragmentation, lifestyle changes, technological developments, and dozens of major changes to laws, customs and practices--all within a positive and constructive framework. A vision of the year 3000, comprising a test of what the author calls the Verne Effect--our ability to create and manipulate our future.

The Demagogue Wars C. Elmon Meade, 2022-05-20 What if 2020 not only continued for 50 to 100 years, but actually got worse? COVID-19 continually evolves and mutates, and it is not eradicated for several decades, which leads to a vastly different America. Politics devolves into tribalism, misinformation, and censorship reign supreme, identity politics via outsider social engineering goes unchecked, and socialism sweeps the Americas, Europe, and Africa. Technology plays a huge role in daily life due to the emergence of tech-trans-sapient cybernetic technology. Both the left and right have it all wrong, good guys become bad guys, and bad guys are redeemed. Believers over the arc of time have always thought their generational crisis would be the impetus for the end of the world as we know it and 2120 will be no different. The Plan will be revealed to a small indigenous girl who is a war refugee from Alberta, Canada. From immunity and healthcare to media, privacy, commerce, communication, and of course warfare, this page-turning political thriller is a fun ride through a dystopian future with terrifying new implements of war. The story is a mirror for examining who we are as political beings, and who we put our faith and trust in. The Right clashes with the Left, but as certain characters grow and evolve while others devolve into narcissistic madness, eventually both sides of the aisle get their acts together and start living up to the American potential.

Alan Turing Andrew Hodges, 1992 It is only a slight exaggeration to say that the British mathematician Alan Turing (1912-1954) saved the Allies from the Nazis, invented the computer and artificial intelligence, and anticipated gay liberation by decades--all before his suicide at age forty-one. This New York Times bestselling biography of the founder of computer science, with a new preface by the author that addresses Turing's royal pardon in 2013, is the definitive account of an extraordinary mind and life.--Amazon.com.
