Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more attractive to young people, especially women.--Publisher’s description.
- 2 [India and the Knowledge Economy](#) Carl J. Dahlgren,Anuja Utz,2005-01-01 In the global knowledge economy of the twenty-first century, India’s development policy challenges will require it to use knowledge more effectively to raise the productivity of agriculture, industry, and services and reduce poverty. India has made tremendous strides in its economic and social development in the past two decades. Its impressive growth in recent years-8.2 percent in 2003-can be attributed to the far-reaching reforms embarked on in 1991 and to opening the economy to global competition. In addition, India can count on a number of strengths as it strives to transform itself into a knowledge-based economy-availability of skilled human capital, a democratic system, widespread use of English, macroeconomic stability, a dynamic private sector, institutions of a free market economy; a local market that is one of the largest in the world; a well-developed financial sector; and a broad and diversified science and technology infrastructure, and global niches in IT. But India can do more-much more-to leverage its strengths and grasp today’s opportunities. India and the Knowledge Economy assesses India’s progress in becoming a knowledge economy and suggests actions to strengthen the economic and institutional regime, develop educated and skilled workers, create an efficient innovation system, and build a dynamic information infrastructure. It highlights that to get the greatest benefits from the knowledge revolution, India will need to press on with the economic reform agenda that it put into motion a decade ago and continue to implement the various policy and institutional changes needed to accelerate growth. In so doing, it will be able to improve its international competitivenessand join the ranks of countries that are making a successful transition to the knowledge economy.

- 2 [Gender Indicators in Science, Engineering and Technology](#) Sophia Huyer,Gunnar Westholm,2007-01-01 This toolkit provides a survey of the differential gender patterns of participation by men and women in science and technology. It assesses information provided by current sex-disaggregated quantitative data, along with discussing the reasons for differential rates of participation between women and men. The volume also looks at international methods for measuring science and technology activities, personnel and qualifications, and occupations, as well as how these can be properly disaggregated by sex, age and other variables. A key question addressed includes how to define economic and employment activities that can constitute or incorporate scientific and technological activities.--Publisher’s description.

- 2 [Information and Communication Technologies for Women’s Socioeconomic Empowerment](#) Samia Melhem,Claudia Morrell,Nidhi Tandon,2009-10-02 This paper reviews how women in the developing world access and use information and communication technology (ICT). It examines the discourse and controversies surrounding the digital gender divide, including links to poverty and illiteracy. Major themes concerning women and ICTs are explored, such as women in the ICT workforce, how girls and women relate differently to ICT, and opportunities and barriers for women in science and technology in general. Current research relating to gender and ICT is often country-specific and is more prevalent in developed countries than in developing countries. This paper suggests where additional research is needed on barriers to women’s entry and access to ICT. The overall objective of this paper is to influence policy dialogue around women and ICT for development by raising awareness of the digital gender divide. Economic opportunity for women in ICT will not be realized until policies address gender considerations and ensure that ICT investment contributes to more sustainable and equitable development.
- 2 [Islands of Identity](#) Samuel Edquist,Janne Holmen,2015-01-31 ISLANDS OF IDENTITY: HISTORY-WRITING AND IDENTITY FORMATION IN FIVE ISLAND REGIONS IN THE BALTIC SEA GOTLAND, ÅLAND, SAAREMAA, HIUMAA AND BORNHOLM ARE FIVE ISLAND REGIONS IN THE BALTIC SEA WHICH CONSTITUTE, OR HAVE UNTIL RECENTLY CONSTITUTED, PROVINCES OR COUNTIES OF THEIR OWN. COMBINING PERSPECTIVES FROM TWO DISPARATE ACADEMIC FIELDS, USES OF HISTORY AND ISLAND STUDIES, THIS BOOK INVESTIGATES HOW REGIONAL HISTORY WRITING HAS CONTRIBUTED TO THE FORMATION OF REGIONAL IDENTITY ON THESE ISLANDS SINCE THE YEAR 1800. THE SPECIAL GEOGRAPHIC SITUATION OF THE ISLANDS-SOMEWHAT SECLUDED FROM THE MAINLAND BUT ALSO CONNECTED TO IMPORTANT WATERWAYS-HAS PROVIDED THEIR INHABITANTS WITH SHARED HISTORICAL EXPERIENCES. DUE TO VARYING GEOGRAPHIC AND HISTORICAL CIRCUMSTANCES, THE RELATIONSHIP BETWEEN REGIONAL AND NATIONAL IDENTITY IS HOWEVER DIFFERENT ON EACH ISLAND. WHILE REGIONAL HISTORY WRITING HAS IN MOST CASES AIMED AT INTEGRATING THE ISLAND INTO THE NATION STATE, IT HAS ON ÅLAND IN THE SECOND HALF OF THE 20TH CENTURY BEEN USED TO PORTRAY ITS INHABITANTS AS A SEPARATE NATION. DRAMATIC POLITICAL UPHEAVALS AS THE WORLD WARS HAS ALSO CAUSED SHIFTS IN HOW REGIONAL HISTORY WRITING HAS REPRESENTED THE RELATIONSHIP TO THE MAINLAND NATION STATE, AND HAS SOMETIMES ALSO RESULTED IN ALTERED NATIONAL LOYALTIES.

- 2 [Prefects, Governors and Commissioners](#) Gildas Tanguy,Jean-Michel Eymeri-Douzans,2020-12-28 Is the Prefect an exception, surviving only in France and some countries influenced by Napoleon? No! This book tells the varied stories of the resilience, in most European states and under different names, of the prefectural institution. It is the first comparative book in English studying these territorial administrators who have a go-between role in centre-periphery relations and a nodal role in territorial governance. Gathering a multidisciplinary team of scholars under the auspices of the European Group for Public Administration, this volume offers a fine-grained analysis of 17 national cases, examines cross-country data, and proposes a theoretical frame made of a Weberian ideal-type with three variants, to better comprehend and explain the permanence and changes of the prefectural figure.

📖 **Education in Political Science** Anja P. Jakobi,Kerstin Martens,Klaus Dieter Wolf,2009-09-10 This pioneering volume is devoted to the analysis of education from the perspective of political science, applying the full range of the discipline’s analytical perspectives and methodological tools. The contributions demonstrate how education policy can be explored systematically from a variety of political science perspectives: comparative politics, public policy analysis and public administration, international relations, and political theory. By applying a governance perspective on education policy, the authors explore the changing institutional settings, new actors’ constellations, horizontal modes of interaction and public-private regulatory mechanisms with respect to the role of the state in this policy field. The volume deals with questions that are not merely concerned with the content or outcomes of education, but it explicitly takes a political science view on how education politics work. Including country case studies from the Americas and across Europe, institutional analyses of education policy in the EU and the WTO/GATS as well as normative reflections on the topic, the volume provides a grand overview on the diversity of issues in education policy. Dealing with a so far neglected field of policy, this book provides a comprehensive and accessible analysis of a rapidly changing topic. Education in Political Science will be of interest to scholars and students of political science, education, sociology and economics.
