Sediment Transfer from Shelf to Deep Water Roger M. Slatt, Carlos Zavala, 2012-02-08 The topic of hyperpycnal flows and their deposits, hyperpycnites, has recently emerged as the latest in a long list of hotly debated topics on deep-water sedimentary processes, environments, and deposits. This collection of chapters offers important new insights into the sediment delivery system to deep-marine waters.

Information Communication Technologies: Concepts, Methodologies, Tools, and Applications Van Slyke, Craig, 2008-04-30 The rapid development of information communication technologies (ICTs) is having a profound impact across numerous aspects of social, economic, and cultural activity worldwide, and keeping pace with the associated effects, implications, opportunities, and pitfalls has been challenging to researchers in diverse realms ranging from education to competitive intelligence.

Information and Communication Technologies for Economic and Regional Developments Rahman, Hakikur, 2006-12-31 This book includes evolution, planning, development, implementation and practical implications of diversified development practices around the world, focusing on socio-economic empowerment and regional developments through ICTs; it provides recommendations, success cases and failures of those practices that can be taken into consideration for future project preparation--Provided by publisher.

Democracy and New Media Henry Jenkins, David Thorburn, Brad Seawell, 2004 Essays on the promise and dangers of the Internet for democracy.

Novels of the Contemporary Extreme Alain-Philippe Durand, Naomi Mandel, 2006-06-08 This book investigates a new form of fiction that is currently emerging in contemporary literature across the globe. 'Novels of the contemporary extreme' - from North and South America, from Europe, and the Middle East - are set in a world both similar to and different from our own: a hyper real, often apocalyptic world progressively invaded by popular culture, permeated with technology and dominated by destruction. While their writing is commonly classified as 'hip' or 'underground' literature, authors of contemporary extreme novels have often been the center of public controversy and scandal; they, and their work, become international bestsellers. This collection of essays identifies and describes this international phenomenon, investigating the appeal of these novels' styles and themes, the reasons behind their success, and the fierce debates they provoked.

Hybrid Anisotropic Materials for Wind Power Turbine Blades Yosif Golfman, 2016-04-19 Based on rapid technological developments in wind power, governments and energy corporations are aggressively investing in this natural resource. Illustrating some of the crucial new breakthroughs in structural design and application of wind energy generation machinery, Hybrid Anisotropic Materials for Wind Power Turbine Blades explores new automated, repeatable production techniques that expand the use of robotics and process controls. These practices are intended to ensure cheaper fabrication of less-defective anisotropic material composites used to manufacture power turbine blades. This book covers new methods of casting or pultrusion that reduce thickness in the glass- and graphite-fiber laminate prepregs used in load-bearing skin blades and web shear spars. This optimized process creates thinner, more cost-effective prepegs that still maintain strength and reliability. The book also addresses a wide range of vital technical topics, including: Selection of carbon/fiberglass materials Estimation of combination percentages Minimization and optimal placement of shear webs (spars) Advantages of resin, such as lower viscosity and curing time Strength and manufacturing criteria for selecting anisotropic materials and turbine blade materials Analysis of dynamic fatigue life and vibration factors in blade design NDE methods to predict and control deflections, stiffness, and strength Written by a prolific composite materials expert with more than 40 years of research experience, this reference is invaluable for a new generation of composite designers, graduate students, and industry professionals involved in wind power system design. Assessing significant required changes in transmission, manufacturing, and markets, this resource outlines innovative methods to help the U.S. Department of Energy meet its goal of having wind energy account for 20 percent of total generated energy by 2030.

Tasks in Primary Mathematics Teacher Education Barbara Clarke, Barbro Grevholm, Richard Millman, 2008-10-25 Tasks in Primary Mathematics Teacher Education is intended to advance relevant research and innovative international practices in the preparation and professional development of mathematics teachers. Emerging from discussion at the ICMI study on teacher professional development, this volume, focused on primary and elementary teachers, culls a richness that can only be found by gathering wisdom from varied experiences around the world. The choice of tasks, and the associated pedagogies, is a key aspect of teaching and learning mathematics. Arguing that what students learn is largely defined by the tasks they are given, several major themes are presented. One such major strand, the form, function and focus of tasks, is discussed throughout several chapters, offering analysis, discussion of implementation, and exemplars of a broader category of illustrative techniques for developing critical understanding.

The Shining Path: Love, Madness, and Revolution in the Andes Orin Starn, Miguel La Serna, 2019-04-30 A narrative history of the unlikely Maoist rebellion that terrorized Peru even after the fall of global Communism. On May 17, 1980, on the eve of Peru's presidential election, five masked men stormed a small town in the Andean heartland. They set election ballots ablaze and vanished into the night, but not before planting a red hammer-and-sickle banner in the town square. The lone man arrested the next morning later swore allegiance to a group called Shining Path. The tale of how this ferocious group of guerrilla insurgents launched a decade-long reign of terror, and how brave police investigators and journalists brought it to justice, may be the most compelling chapter in modern Latin American history, but the full story has never been told. Described by a U.S. State Department cable as "cold-blooded and bestial," Shining Path orchestrated bombings, assassinations, and massacres across the cities, countryside, and jungles of Peru in a murderous campaign to seize power and impose a Communist government. At its helm was the professor-turned-revolutionary Abimael Guzmán, who launched his single-minded insurrection alongside two women: his charismatic young wife, Augusta La Torre, and the formidable Elena Iparraguirre, who married Guzmán soon after Augusta's mysterious death. Their fanatical devotion to an outmoded and dogmatic ideology, and the military's bloody response, led to the death of nearly 70,000 Peruvians. Orin Starn and Miguel La Serna's narrative history of Shining Path is both panoramic and intimate, set against the socioeconomic upheavals of Peru's rocky transition from military dictatorship to elected democracy. They take readers deep into the heart of the rebellion, and the lives and country it nearly destroyed. We hear the voices of the mountain villagers who organized a fierce rural resistance, and meet the irrepressible black activist María Elena Moyano and the Nobel Prize-winning novelist Mario Vargas Llosa, who each fought to end the bloodshed. Deftly written, The Shining Path is an exquisitely detailed account of a little-remembered war that must never be forgotten.

Albert Guzman Alberto Guzmán, 1972

The Man Who Wrote Pancho Villa Nicholas Cifuentes-Goodbody, 2016-02-22 Martin Luis Guzman was many things throughout his career in twentieth-century Mexico: a soldier in Pancho Villa's revolutionary army, a journalist-in-exile, one of the most esteemed novelists and scholars of the revolutionary era, and an elder statesman and politician. In The Man Who Wrote Pancho Villa, we see the famous author as he really was: a careful craftsman of his own image and legacy. His five-volume biography of Villa propelled him to the heights of Mexican cultural life, and thus began his true life's work. Nicholas Cifuentes-Goodbody shapes this study of Guzman through the lens of life writing and uncovers a tireless effort by Guzman to shape his public image. The Man Who Wrote Pancho Villa places Guzman's work in a biographical context, shedding light on the immediate motivations behind his writing in a given moment and the subsequent ways in which he rewrote or repackaged the material. Despite his efforts to establish a definitive reading of his life and literature, Guzman was unable to control that interpretation as audiences became less tolerant of the glaring omissions in his self-portrait.

The Shadow of the Strongman Martín Luis Guzmán, 2017-09-01 A searing novel of the post-1910 Mexican revolutionary era that itself challenged the Mexican political establishment, Guzmán's The Shadow of the Strongman (La Sombra del Caudillo) stands beside Azuela's The Underdogs (Los de abajo) in the pantheon of Mexican fiction. Unmasking the years of political intrigue and assassination that followed the Revolution, the novel was adapted in the 1960 film La Sombra del Caudillo, which was banned in Mexico for thirty years.

Poets on Paintings Robert D. Denham,2010-03-10 Ekphrasis, the description of pictorial art in words, is the subject of this bibliography. More specifically, some 2500 poems on paintings are catalogued, by type of publication in which they appear and by poet. Also included are 2000 entries on the secondary literature of ekphrasis, including works on sculpture, music, photography, film, and mixed media.

Financial Institutions and Services Robert S. Uh,2006 Book & Computer Disk. This book examines international aspects of financial institutions as well as their economic performance and development. Emphasis is placed on transition economics as well as Developing Countries. Issues within the scope of this new book include: financial reporting, efficiency of financial institutions, Middle-East financial institutions, money market liquidity, economic performance, risk capital allocation, financial market soundness, instability, devaluations, capital flight and related issues, including governance.

Outside Looking In, Inside Looking Out Jason G. Summers,2001

States and Non-Participatory Memberships in the WTO Felicia A. Grey,2019-02-25 This book examines non-participatory memberships or why states choose not to use the benefits of international institutions to which they belong. To investigate this question, the author explores why states choose not to litigate within the World Trade Organization’s Dispute Settlement Body (DSB). The research contributes to the literature on global governance and institutions generally, and of the WTO specifically. Additionally, the project includes comparative case analysis of WTO agreements and international disputes: China and Jamaica; Guatemala and Mexico; the United States and Mexico. This volume will interest policy makers, trade professionals, academics, and everyone who is interested in development studies.

The Venezuelan Nation Exploring Constructions of the Venezuelan Nation Beatriz Irene Ferrer-Castro,2004

Trade, Food Security, and Human Rights Ying Chen,2016-02-24 Most scholars attribute systemic causes of food insecurity to poverty, human overpopulation, lack of farmland, and expansion of biofuel programs. However, as Chen argues here, another significant factor has been overlooked. The current food insecurity is not absolute food shortage, since global food production still exceeds the need of the entire world population, but a problem of how to secure access to resources. Distorted agricultural trade undermines world food distribution, and uneven distribution impedes people’s access to food, particularly in poor developing countries. Examining EU and US agricultural policies and World Trade Organization negotiations in agriculture, the author argues how they affect the international agricultural trade, claiming that current food insecurity is the result of inequitable food distribution and trade practices. The international trade regime is advised to reconcile trade rules with the consideration of food security issues. Several other enforceable solutions to reduce world hunger and malnutrition are also advanced, including national capacity building, the improvement of governance, and strategic development of biofuel programs. This book will be of great interest to agricultural trade professionals and consultant policy makers in the EU, US and developing countries. Students and researchers with a concentration on international trade, agriculture economics, global governance and international law will benefit greatly from this study.

HURIDOCs Events Standard Formats: A Tool for Documenting Human Rights Violations, English ,2001 The Events Standard Formats constitute one of several tools developed by HURIDOCs to help human rights NGOs and other organizations enhance their capacity to monitor human rights. The formats can be used to document human rights violations, to facilitate database design, and to encourage standardized information exchange. The formats may be used in conjunction with HURIDOCs' Micro-thesauri.
