Confronting the Challenges of Participatory Culture Henry Jenkins,2009-06-05 Many teens today

who use the Internet are actively involved in participatory cultures—joining online communities (Facebook, message boards, game clans), producing creative work in new forms (digital sampling, modding, fan videomaking, fan fiction), working in teams to complete tasks and develop new knowledge (as in Wikipedia), and shaping the flow of media (as in blogging or podcasting). A growing body of scholarship suggests potential benefits of these activities, including opportunities for peer-to-peer learning, development of skills useful in the modern workplace, and a more empowered conception of citizenship. Some argue that young people pick up these key skills and competencies on their own by interacting with popular culture; but the problems of unequal access, lack of media transparency, and the breakdown of traditional forms of socialization and professional training suggest a role for policy and pedagogical intervention. This report aims to shift the conversation about the digital divide from questions about access to technology to questions about access to opportunities for involvement in participatory culture and how to provide all young people with the chance to develop the cultural competencies and social skills needed. Fostering these skills, the authors argue, requires a

systemic approach to media education; schools, afterschool programs, and parents all have distinctive roles to play. The John D. and Catherine T. MacArthur Foundation Reports on Digital Media and Learning

America's Deadliest Export William Blum, 2013-01-01 'A fireball of terse information.' Oliver Stone 'A remarkable collection. Blum concentrates on matters of great current significance, and does not pull his punches. They land, backed with evidence and acute analysis.' Noam Chomsky For over sixty-five years, the United States war machine has been on automatic pilot. Since World War II we have been conditioned to believe that America's motives in 'exporting' democracy are honorable, even noble. In this startling and provocative book, William Blum, a leading dissident chronicler of US foreign policy and the author of controversial bestseller *Rogue State*, argues that nothing could be further from the truth. Moreover, unless this fallacy is unlearned, and until people understand fully the worldwide suffering American policy has caused, we will never be able to stop the monster.

Biosimilars Hiten J. Gutka, Harry Yang, Shefali Kakar, 2018-12-13 This book provides a comprehensive overview of the biosimilar regulatory framework, the development process and clinical aspects for development of biosimilars. The development path of a biosimilar is just as unique as a development path of a new drug, tailored by the mechanism of action, the quality of the molecule, published information on the reference product, the current competitive environment, the target market

and regulatory guidance, and most importantly, the emerging totality of evidence for the proposed biosimilar during development. For the ease of readers, the book comprises of six sections as follows: Section I: Business, Health Economics and Intellectual Property Landscape for Biosimilars Section II: Regulatory Aspects of Development and Approval for Biosimilars Section III: Biopharmaceutical Development and Manufacturing of Biosimilars Section IV: Analytical Similarity Considerations for Biosimilars Section V: Clinical aspects of Biosimilar Development Section VI: Biosimilars- Global Development and Clinical Experience Chapters have been written by one or more experts from academia, industry or regulatory agencies who have been involved with one or more aspects of biosimilar product development. The authors and editors have an expertise in commercialization and pricing of biosimilars, intellectual property considerations for biosimilars, chemistry manufacturing controls (CMC) and analytical development for biosimilars, regulatory and clinical aspects of biosimilar development. Besides the industry practitioners, the book includes several contributions from regulators across the globe.

Aspiration Agnes Callard,2018-03-01 Becoming someone is a learning process; and what we learn is the new values around which, if we succeed, our lives will come to turn. Agents transform themselves in the process of, for example, becoming parents, embarking on careers, or acquiring a passion for music or politics. How can such activity be rational, if the reason for engaging in the relevant pursuit is only available to the person one will become? How is it psychologically possible to feel the attraction of a form of concern that is not yet one's own? How can the work done to arrive at the finish line be ascribed to one who doesn't (really) know what one is doing, or why one is doing it? In Aspiration, Agnes Callard asserts that these questions belong to the theory of aspiration. Aspirants are motivated by proleptic reasons, acknowledged defective versions of the reasons they expect to eventually grasp. The psychology of such a transformation is marked by intrinsic conflict between their old point of view on value and the one they are trying to acquire. They cannot adjudicate this conflict by deliberating or choosing or deciding-rather, they resolve it by working to see the world in a new

way. This work has a teleological structure: by modeling oneself on the person he or she is trying to be, the aspirant brings that person into being. Because it is open to us to engage in an activity of self-creation, we are responsible for having become the kinds of people we are.

The Myth of the Good War Jacques R. Pauwels, 2015-03-06 In the spirit of historians Howard Zinn, Gwynne Dyer, and Noam Chomsky, Jacques Pauwels focuses on the big picture. Like them, he seeks to find the real reasons for the actions of great powers and great leaders. Familiar Second World War figures from Adolf Hitler to Franklin D. Roosevelt and Joseph Stalin are portrayed in a new light in this book. The decisions of Hitler and his Nazi government to go to war were not those of madmen. Britain and the US were not allies fighting shoulder to shoulder with no motive except ridding the world of the evils of Nazism. In Pauwels' account, the actions of the United States during the war years were heavily influenced by American corporations -- IBM, GM, Ford, ITT, and Standard Oil of New Jersey (now called Exxon) -- who were having a very profitable war selling oil, armaments, and equipment to both sides, with money gushing everywhere. Rather than analyzing Pearl Harbor as an

unprovoked attack, Pauwels notes that US generals boasted of their success in goading Japan into a war the Americans badly wanted. One chilling account describes why President Truman insisted on using nuclear bombs against Japan when there was no military need to do so. Another reveals that Churchill instructed his bombers to flatten Dresden and kill thousands when the war was already won, to demonstrate British-American strength to Stalin. Leaders usually cast in a heroic mould in other books about this war look quite different here. Nations that claimed a higher purpose in going to war are shown to have had far less idealistic motives. The Second World War, as Jacques Pauwels tells it, was a good war only in myth. The reality is far messier -- and far more revealing of the evils that come from conflicts between great powers and great leaders seeking to enrich their countries and dominate the world.

Conversations Janis F. Kearney, 2006 Cultural Writing. African American Studies. Biography and Memoir. Former Clinton diarist, Janis F. Kearney, pens a biography that is part historical narrative and part oral history. In 2001, Kearney began a journey, in search of black American's stories about the

south that shaped a man and a leader such as William Jefferson Clinton; and memories about this southern enigma, from those who knew him. Over a two year span she collected conversations, memories, and stories from men and women from across the country. These conversations, and a carefully painted abstract of the pre-civil rights Arkansas that Bill Clinton called home; are the centerpieces of this biography. CONVERSATIONS includes rare and unheard voices of black Americans speaking candidly about America's 42nd President. Their memories, stories and thoughts on William J. Clinton, the man, the president and the enigma offer unique and rare pictures of Bill Clinton and his role in American and presidential history. The book include narratives from former President William J. Clinton; former Transportation Secretary Rodney Slater, U.S. Congressman John Lewis; Civil Rights leader, and NFPW Founder Dorothy Height; Baseball Great Hank Aaron; Pulitzer Prize winning biographer David Levering Lewis, and Harvard Sociologist, professor, William Julius Wilson, and many more.

The Thing with Feathers Noah Strycker, 2015-03-03 [Strycker] thinks like a biologist but writes like

a poet. -- Wall Street Journal An entertaining and profound look at the lives of birds, illuminating their surprising world—and deep connection with humanity. Birds are highly intelligent animals, yet their intelligence is dramatically different from our own and has been little understood. As we learn more about the secrets of bird life, we are unlocking fascinating insights into memory, relationships, game theory, and the nature of intelligence itself. *The Thing with Feathers* explores the astonishing homing abilities of pigeons, the good deeds of fairy-wrens, the influential flocking abilities of starlings, the deft artistry of bowerbirds, the extraordinary memories of nutcrackers, the lifelong loves of albatrosses, and other mysteries—revealing why birds do what they do, and offering a glimpse into our own nature. Drawing deep from personal experience, cutting-edge science, and colorful history, Noah Strycker spins captivating stories about the birds in our midst and shares the startlingly intimate coexistence of birds and humans. With humor, style, and grace, he shows how our view of the world is often, and remarkably, through the experience of birds. You've never read a book about birds like this one.
