Hotel Arthur Hailey,2014-05-13 The #1 New York Times–bestselling author of *Airport* reveals the inner workings of a New Orleans hotel—and the human drama unfolding behind its closed doors. The owner has four days to raise the money to save his financially ailing property. The general manager, once blacklisted from the hospitality business, struggles with one crisis after another. A rebellious heiress will do anything to attain her secret desires. The duke and the duchess in the lavish presidential suite are covering up a crime. And within one of the many guest rooms hides a professional thief. Filled with memorable characters and authentic detail about the inner machinery and secrets of a five-star hotel, this gripping New York Times bestseller sold millions of copies and was adapted for both film and TV. Set in a time when travel was still glamorous and grand independent hotels set the standard for luxury, it’s a read like a vacation in itself, from the author of such behind-the-scenes blockbusters as *The Moneychangers* and *Wheels*.

*Atlas of the Indian Tribes of North America and the Clash of Cultures* Nicholas J. Santoro,2009 Atlas of the Indian Tribes of the Continental United States and the Clash of Cultures The Atlas identifies of the Native American tribes of the United States and chronicles the conflict of cultures and Indians' fight for self-preservation in a changing and demanding new world. The Atlas is a compact resource on the identity, location, and history of each of the Native American tribes that have inhabited the land that we now call the continental United States and answers the three basic questions of who, where, and when. Regretfully, the information on too many tribes is extremely limited. For some, there is little more than a name. The history of the American Indian is presented in the context of America's history its westward expansion, official government policy and public attitudes. By seeing something of who we were, we are better prepared to define who we need to be. The Atlas will be a convenient resource for the casual reader, the researcher, and the teacher and the student alike. A unique feature of this book is a master list of the varied names by which the tribes have been known throughout history.

**Encyclopedia of American Indian History [4 volumes]** Bruce E. Johansen,Barry M. Pritzker,2007-07-23 This new four-volume encyclopedia is the most comprehensive and up-to-date resource available on the history of Native Americans, providing a lively, authoritative survey ranging from human origins to present-day controversies. From the origins of Native American cultures through the years of colonialism and non-Native expansion to the present, Encyclopedia of American Indian History brings the story of Native Americans to life like no other previous reference on the subject. Featuring the work of many of the field's foremost scholars, it explores this fundamental and foundational aspect of the American experience with extraordinary depth, breadth, and currency, carefully balancing the perspectives of both Native and non-Native Americans. Encyclopedia of American Indian History spans the centuries with three thematically organized volumes (covering the period from precontact through European colonization; the years of non-Native expansion (including Indian removal); and the modern era of reservations, reforms, and reclamation of semi-sovereignty). Each volume includes entries on key events, places, people, and issues. The fourth volume is an alphabetically organized resource providing histories of Native American nations, as well as an extensive chronology, topic finder, bibliography, and glossary. For students, historians, or anyone interested in the Native American experience, Encyclopedia of American Indian History brings that experience to life in an unprecedented way.

Northern Plains Native Americans Shane Balkowitsch,2023-10-17 North Dakotan Shane Balkowitsch's quest to take 1000 Native American wet-plates portraits in the present day is one step closer with this second volume. In this series of wet-plate collodion book of portraits of Northern Plains Native Americans, the photographer/author continues with his distinctive and unique presentation that is the only one to have ever been instigated or created for this particular group of Native Americans. The technique he uses, wet-plate collodion and the eye of the author align to present a masterful, unique, and respectful array that is sumptuous and compelling. Here the subjects are presented in their native garb, giving he subjects the opportunity explore their self-image, in a safe space where who they are how they see themselves are certain to be respected and admired. Wet-plate collodion is one of the earliest forms of photography. A wet-plate photographer makes a film based on a piece of glass or metal using collodion, submerges it in a silver nitrate solution to make it light sensitive, and then exposes the photograph usually in an old style wood bellows camera box and antique brass lens from the 1800's. The end result is a one-of-a-kind, archival object of art that will last many lifetimes. Shane and his Native American sitters have collaborated in the creation of a piece of contemporary history using classical methodology. The legacy he has created is indeed, who they were, what they were like, and what they did. There is nothing like it in the library of Native American portraiture in the modern era. The photographer's effort is to show that his subjects are still here--with their culture, dignity, and traditions.

Governing Africa's Forests in a Globalized World Laura A. German,Alain Karsenty,Anne-Marie Tiani,2009-12 Many countries around the world are engaged in decentralization processes, and most African countries face serious problems with forest governance, from benefits sharing to illegality and sustainable forest management. This book summarizes experiences to date on the extent and nature of decentralization and its outcomes, most of which suggest an underperformance of governance reforms, and explores the viability of different governance instruments in the context of weak governance and expanding commercial pressures over forests. Findings are grouped into two thematic areas: decentralization, livelihoods and sustainable forest management; and international trade, finance and forest sector governance reforms. The authors examine diverse forces shaping the forest sector, including the theory and practice of decentralization, usurpation of authority, corruption and illegality, inequitable patterns of benefits capture and expansion of international trade in timber and carbon credits, and discuss related outcomes on livelihoods, forest condition and equity. The book builds on earlier volumes exploring different dimensions of decentralization and perspectives from other world regions, and distills dimensions of forest governance that are both unique to Africa and representative of broader global patterns. Authors ground their analysis in relevant theory while attempting to distill implications of their findings for policy and practice.

*Later Middle English Literature, Materiality, and Culture* Brian Gastle,Erick Kelemen,2018-04-12 The essays in this volume consider the ways in which material and intellectual culture both shaped and were shaped by the literature of late medieval England. The first section, “Textual Material,” reflects on cultural and social issues generally referred to as the History of Ideas, and how those ideas manifest in later medieval English texts. Essays address, for example, affect in *The Book of Margery Kempe*, rhetoric in *Sir Gawain and the Green Knight*, anarchy in late medieval political texts, and temporality in Gower’s *Confessio Amantis*. The essays in the

second section, “Material Texts,” examine physical objects – from pilgrim badges, to manuscripts, to money, to early printed editions – and the cultural behaviors associated with them, interpreting these objects and exploring their connections to the important literary and political texts of the age such as Piers Plowman, Lydgate’s Troy Book, and Chaucer’s Canterbury Tales. All of the essays in this collection emerge from the relationships and connections between the issues that characterize Jim Dean’s work: the cultural, material, and aesthetic aspects of later medieval English literature. So too do they reflect a movement in medieval literary studies presaged by Dean’s career of scholarship and teaching, that critical approaches to literary texts are best undertaken with an understanding of the complex cultural and historical milieu that defines both the production of those texts and the production of our own work on those texts.

Dying in America Institute of Medicine, Committee on Approaching Death: Addressing Key End-of-Life Issues, 2015-03-19 For patients and their loved ones, no care decisions are more profound than those made near the end of life. Unfortunately, the experience of dying in the United States is often characterized by fragmented care, inadequate treatment of distressing symptoms, frequent transitions among care settings, and enormous care responsibilities for families. According to this report, the current health care system of rendering more intensive services than are necessary and desired by patients, and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families. Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life. Death is not a strictly medical event. Ideally, health care for those nearing the end of life harmonizes with social, psychological, and spiritual support. All people with advanced illnesses who may be approaching the end of life are entitled to access to high-quality, compassionate, evidence-based care, consistent with their wishes. Dying in America evaluates strategies to integrate care into a person- and family-centered, team-based framework, and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families. The findings and recommendations of this report will address the needs of patients and their families and assist policy makers, clinicians and their educational and credentialing bodies, leaders of health care delivery and financing organizations, researchers, public and private funders, religious and community leaders, advocates of better care, journalists, and the public to provide the best care possible for people nearing the end of life.

Printers without Borders A. E. B. Coldiron, 2015-04-09 This innovative study shows how printing and translation transformed English literary culture in the Renaissance. Focusing on the century after Caxton brought the press to England in 1476, Coldiron illustrates the foundational place of foreign, especially French language, materials. The book reveals unexpected foreign connections between works as different as Caxton's first printed translations, several editions of Book of the Courtier, sixteenth-century multilingual poetry, and a royal Armada broadside. Demonstrating a new way of writing literary history beyond source-influence models, the author treats the patterns and processes of translation and printing as co-transformations. This provocative book will interest scholars and advanced students of book history, translation studies, comparative literature and Renaissance literature.

**Running a Food Hub: Volume Two, a Business Operations Guide** James Matson, Jeremiah Thayer, Jessica Shaw, 2015-09-17 This report is part of a multi-volume technical report series entitled, Running a Food Hub, with this guide serving as a companion piece to other United States Department of Agriculture (USDA) reports by providing in-depth guidance on starting and running a food hub enterprise. In order to compile the most current information on best management and operations practices, the authors used published information on food hubs, surveyed numerous operating food hubs, and pulled from their existing experience and knowledge of working directly with food hubs across the country as an agricultural business consulting firm. The report’s main focus is on the operational issues faced by food hubs, including choosing an organizational structure, choosing a location, deciding on infrastructure and equipment, logistics and transportation, human resources, and risks. As such, the guide explores the different decision points associated with the organizational steps for starting and implementing a food hub. For some sections, sidebars provide “decision points,” which food hub managers will need to address to make key operational decisions. This illustrated guide may assist the operational staff at small businesses or third-party organizations that may provide aggregation, marketing, and distribution services from local and regional producers to assist with wholesale, retail, and institution demand at government institutions, colleges/universities, restaurants, grocery store chains, etc. Undergraduate students pursuing coursework for a bachelor of science degree in food science, or agricultural economics may be interested in this guide. Additionally, this reference work will be helpful to small businesses within the food trade discipline.
