Memory and Migration Julia Creet, Andreas Kitzmann, 2014-02-24 Memory plays an integral part in how individuals and societies construct their identity. While memory is usually considered in the context of a stable, unchanging environment, this collection of essays explores the effects of immigration, forced expulsions, exile, banishment, and war on individual and collective memory. The ways in which memory affects cultural representation and historical understanding across generations is examined through case studies and theoretical approaches that underscore its mutability. Memory and Migration is a truly interdisciplinary book featuring the work of leading scholars from a variety of fields across the globe. The essays are collaborative, successfully responding to the central theme and expanding upon the findings of individual authors. A groundbreaking contribution to an emerging field of study, Memory and Migration provides valuable insight into the connections between memory, place, and displacement.

Advances in the Homotopy Analysis Method Shijun Liao, 2013-11-26 Unlike other analytic techniques, the Homotopy Analysis Method (HAM) is independent of small/large physical parameters. Besides, it provides great freedom to choose equation type and solution expression of related linear high-order approximation equations. The HAM provides a simple way to guarantee the convergence of solution series. Such uniqueness differentiates the HAM from all other analytic approximation methods. In addition, the HAM can be applied to solve some challenging problems with high nonlinearity. This book, edited by the pioneer and founder of the HAM, describes the current advances of this powerful analytic approximation method for highly nonlinear problems. Coming from different countries and fields of research, the authors of each chapter are top experts in the HAM and its applications. Contents: Chance and Challenge: A Brief Review of Homotopy Analysis Method (S-J Liao) Predictor Homotopy Analysis Method (PHAM) (S Abbasbandy and E Shivanian) Spectral Homotopy Analysis Method for Nonlinear Boundary Value Problems (S Motsa and P Sibanda) Stability of Auxiliary Linear Operator and Convergence-Control Parameter (R A Van Gorder) A Convergence Condition of the Homotopy Analysis Method (M Turkyilmazoglu) Homotopy Analysis Method for Some Boundary Layer Flows of Nanofluids (T Hayat and M Mustafa) Homotopy Analysis Method for Fractional Swift-Hohenberg Equation (S Das and K Vishal) HAM-Based Package NOPH for Periodic Oscillations of Nonlinear Dynamic Systems (Y-P Liu) HAM-Based Mathematica Package BVPh 2.0 for Nonlinear Boundary Value Problems (Y-L Zhao and S-J Liao) Readership: Graduate students and researchers in applied mathematics, physics, nonlinear mechanics, engineering and finance. Keywords: Analytic Approximation Method; Nonlinear; Homotopy; Applied Mathematics Key Features: The method described in the book can overcome almost all restrictions of other analytic approximation method for nonlinear problems This book is the first in homotopy analysis method, covering the newest advances, contributed by many top experts in different fields

Religion of White Rage Stephen C. Finley, 2020-09-21 Critically analyses the historical, cultural and political dimensions of white religious rage in America, past and present This book sheds light on the phenomenon of white rage, and maps out the uneasy relationship between white anxiety, religious fervour, American identity and perceived black racial progress. Contributors to the volume examine the sociological construct of the e;white labourer;,, whose concerns and beliefs can be understood as religious in foundation, and uncover that white religious fervor correlates to notions of perceived white loss and perceived black progress. In discussions ranging from the Constitution to the Charlottesville riots to the evangelical community's uncritical support for Trump, the authors of this collection argue that it is not economics but religion and race that stand as the primary motivating factors for the rise of white rage and white supremacist sentiment in the United States.

Understanding Language Elizabeth Winkler, 2015-07-09 Understanding Language is the second edition of this introduction to linguistics aimed at all students who are new to the subject. The book is comprehensive in its coverage of the key areas of linguistics, yet explains these in an easy to understand, jargon-free way. Pictures, diagrams, tables and suggestions for further reading together with Grace Winkler's witty prose make this an accessible, student friendly guide which should enable students to navigate this often complicated area of study. Topics covered include: language acquisition speech sounds the make-up of words grammar meaning communication the history of English language variation and change language and technology. This is an essential introduction for any student taking linguistics at university, whether as their main subject of study, or in conjunction with related fields.

God's Babies John McKeown, 2014-12-17 The human population's annual total consumption is not sustainable by one planet. This unprecedented situation calls for a reform of religious cultures that promote a large ideal family size. Many observers assume that Christianity is inevitably part of this problem because it promotes family values and statistically, in America and elsewhere, has a higher birthrate than nonreligious people. This book explores diverse ideas about human reproduction in the church past and present. It investigates an extreme fringe of U.S. Protestantism, including the Quiverfull movement, that use Old Testament fruitful verses to support natalist ideas explicitly promoting higher fecundity. It also challenges the claim by some natalists that Martin Luther in the 16th century advocated similar ideas. This book argues that natalism is inappropriate as a Christian application of Scripture, especially since rich populations' total footprints are detrimental to biodiversity and to human welfare. It explores the ancient cultural context of the Bible verses quoted by natalists. Challenging the assumption that religion normally promotes fecundity, the book finds surprising exceptions among early Christians (with a special focus on Saint Augustine) since they advocated spiritual fecundity in preference to biological fecundity. Finally the book uses a hermeneutic lens derived from Genesis 1, and prioritising the modern problem of biodiversity, to provide ecological interpretations of the Bible's fruitful verses.

Thinking Peaceful Change Frank Möller, 2007-02-09 Frank Möller explores why the states and societies of the Baltic Sea region have not yet evolved into a security community despite the area undergoing, since the mid 1980s, considerable change with little turmoil. This book focuses on the tensions resulting from policies in the Baltic states aiming at an increase in both security and sovereignty. Möller shows how these states' attempts at increasing their security were intricately bound up with their efforts at autonomous nation-state building. Möller argues that a primary obstacle to security community building was the construction of nation-states based upon an exceedingly traditional template emphasizing the connection between the state, sovereignty, and military security. The Baltic states aspired to NATO membership amid unique challenges, such as the perceived threat of nascent Russian imperialism and the perseverance of a collective memory emphasizing anti-Soviet resistance. Möller also examines such key issues as the demise of the Soviet Union, the nonviolent withdrawal of Russian troops from the Baltic states, and U.S. foreign policy in northern Europe. Here is a profound, multifaceted look at issues of security in the contemporary world- a crucial tool for researchers and students of peace and conflict studies.

The Cambridge History of Medieval Monasticism in the Latin West Alison I. Beach, Isabelle Cochelin, 2020-01-09 Monasticism, in all of its variations, was a feature of almost every landscape in the medieval West. So ubiquitous were religious women and men throughout the Middle Ages that all medievalists encounter monasticism in their intellectual worlds. While there is enormous interest in medieval monasticism among Anglophone scholars, language is often a barrier to accessing some of the most important and groundbreaking research emerging from Europe. The Cambridge History of Medieval Monasticism in the Latin West offers a comprehensive treatment of medieval monasticism, from Late Antiquity to the end of the Middle Ages. The essays, specially commissioned for this volume and written by an international team of scholars, with contributors from Australia, Belgium, Canada, England, France, Germany, Italy, the Netherlands, Spain, Switzerland, and the United States, cover a range of topics and themes and represent the most up-to-date discoveries on this topic.

Homotopy Analysis Method in Nonlinear Differential Equations Shijun Liao,2012-06-22 Homotopy Analysis Method in Nonlinear Differential Equations presents the latest developments and applications of the analytic approximation method for highly nonlinear problems, namely the homotopy analysis method (HAM). Unlike perturbation methods, the HAM has nothing to do with small/large physical parameters. In addition, it provides great freedom to choose the equation-type of linear sub-problems and the base functions of a solution. Above all, it provides a convenient way to guarantee the convergence of a solution. This book consists of three parts. Part I provides its basic ideas and theoretical development. Part II presents the HAM-based Mathematica package BVPh 1.0 for nonlinear boundary-value problems and its applications. Part III shows the validity of the HAM for nonlinear PDEs, such as the American put option and resonance criterion of nonlinear travelling waves. New solutions to a number of nonlinear problems are presented, illustrating the originality of the HAM. Mathematica codes are freely available online to make it easy for readers to understand and use the HAM. This book is suitable for researchers and postgraduates in applied mathematics, physics, nonlinear mechanics, finance and engineering. Dr. Shijun Liao, a distinguished professor of Shanghai Jiao Tong University, is a pioneer of the HAM.

Beyond Perturbation Shijun Liao,2003-10-27 Solving nonlinear problems is inherently difficult, and the stronger the nonlinearity, the more intractable solutions become. Analytic approximations often break down as nonlinearity becomes strong, and even perturbation approximations are valid only for problems with weak nonlinearity. This book introduces a powerful new analytic method for nonlinear problems-homotopy analysis-that remains valid even with strong nonlinearity. In Part I, the author starts with a very simple example, then presents the basic ideas, detailed procedures, and the advantages (and limitations) of homotopy analysis. Part II illustrates the application of homotopy analysis to many interesting nonlinear problems. These range from simple bifurcations of a nonlinear boundary-value problem to the Thomas-Fermi atom model, Volterra's population model, Von Karman swirling viscous flow, and nonlinear progressive waves in deep water. Although the homotopy analysis method has been verified in a number of prestigious journals, it has yet to be fully detailed in book form. Written by a pioneer in its development, Beyond Perturbation: Introduction to the Homotopy Analysis Method is your first opportunity to explore the details of this valuable new approach, add it to your analytic toolbox, and perhaps make contributions to some of the questions that remain open.
