Directory of Web Sites Graham Bennett,1999 Overloaded with the mass of information on the Internet? Frustrated by how difficult it is to find what you really want? Now you don't need to spend hours browsing around the Internet or grappling with the huge number of hits from an Internet search engine: the Directory of Web Sites will take you straight to the best educational sites on the Internet. From archaeology to zoology, from dance to technology, the Directory provides information more than 5,500 carefully selected Web sites that represent the best of what the Internet has to offer. The sites are grouped by subject; each one features a full description; and the text is complemented throughout by screenshots and fact boxes. As well, sites have been selected purely on educational merit: all sites with overtly commercial content and influence from Internet providers have been excluded.

Hank Aaron (Revised Edition) Serena Kappes,2012-08-01 Born in 1934, Hank Aaron faced many roadblocks because of his race. In fact, his school did not even have a baseball team. When Jackie Robinson broke the race barrier and entered the major leagues, Aaron was given hope that his dream of playing professional baseball could someday come true. Aaron became one of baseball's best players-winning the World Championship, breaking Babe Ruth's home run record, and being inducted into the Baseball Hall of Fame.

Family Tradition Susan Masino,2011-04-01 Covering three generations of Hank Williams, Family Tradition is both unique and vast in scope. Beginning in the present day with Hank III – who gave the author unprecedented access – and time-traveling across the years, this examines just what kind of rebel mojo inspired this crazed family of country music, from Hank Sr. – often regarded as one of the most influential of American musicians – to Hank Jr., to this year's model, Hank III, who has somehow found a way to reconcile his legacy's deep-rooted twang and high-lonesome sound with particularly searing strains of punk and heavy metal, launching an all-out war with traditional Nashville in the process. Listen to Susan Masino live at Book Expo America on the BEA Podcast.

Greatest Sports Heroes of All Times Paul J. Christopher,Alicia Marie Smith,2006-08 Hold it! You really think we can come up with 50 greatest sports heroes? Well, we can and we have. Our heroes are not simply limited to the most popular spectator sports. On occasion our heroes go back several generations, not just to the names in the papers or the sports talk shows. Who are they? Well, certainly Jordan, Woods and Ming...but are you old enough to remember Max Schmeling or George Best? There are a lot more where they come from...skiers, cyclists, golfers and runners-all the best and more. What

did they do and why are they great? The book offers: a quick, personal biography of each of our famous athletes; summary statistics of some of the most important successes; the good, the bad and the ugly of their sports careers; why these individuals went on to influence their sport; and trivia questions to challenge your knowledge and more.

The Cooperstown Symposium on Baseball and American Culture, 2001 William M. Simons, Alvin L. Hall, 2002-04-01 This is an anthology of 23 papers that were presented at the Thirteenth Cooperstown Symposium on Baseball and American Culture, held June 6-8, 2001, and co-sponsored by the State University of New York at Oneonta and the National Baseball Hall of Fame and Museum. Featuring keynote remarks from George Plimpton, author of *Home Run: The Best Writing About Baseball's Most Exciting Moment*, this Symposium examined such topics as baseball's myths, legends and tall tales. These essays, divided into sections titled *Mythic Heroes*, *Media Mythology*, *Myth and Mystery* and *Myths in Progress*, go beyond the quick and easy judgments of the media and offer instead the longer, more informed views of scholars and researchers.

Hank: The Short Life and Long Country Road of Hank Williams Mark Ribowsky, 2016-11-22 A compassionate yet clear-eyed (Washington Post) portrait of country music's founding father and Hillbilly King. Mark Ribowsky's *Hank* has been hailed as the greatest biography yet (Library Journal, starred review) of the beloved icon. Hank Williams, a frail, flawed man who had become country music's first real star, instantly morphed into its first tragic martyr when he died in the backseat of a Cadillac at the age of twenty-nine. Six decades later, Ribowsky traces the miraculous rise of this music legend—from the dirt roads of rural Alabama to the now-immortal stage of the Grand Ole Opry, and, finally, to a lonely end on New Year's Day in 1953. Examining Williams's chart-topping hits while also re-creating days and nights choked in booze and desperation, *Hank* uncovers the real man beneath the myths, reintroducing us to an American original whose legacy, like a good night at the honkytonk, promises to carry on and on.

The Art and Science of Poisons Olen R. Brown, 2018-06-04 Poisons, due to their lethal nature, invoke a sense of fear in humans. Yet, they have also impacted other aspects of human life. Poisons have been used by nomadic hunters to kill their prey, by scientists to explore complex biochemical mechanisms of the body, by physicians to lower cholesterol and to kill cancer cells, by farmers and the general public to destroy pests, by the evil minded for homicide, and by tyrants as weapons of war. *The Art and Science of Poisons* presents two facets of poisons: the science behind them and their place in history and art. The science of poisons describes their biochemistry and how they kill. The science story voyages into the sub-microscopic world of atoms, molecules, and cells. Only there can we see the true miracles and mysteries of life and death. Chapters in the book explore poisons from snakes, spiders, scorpions, sea creatures, as well as poisons made by humans in the laboratory, and those which are derived from beautiful plants. The art of poisons, on the other hand, encompasses everything else about these agents that conjures up the image of the skull and crossbones. This side of the story explores the legends and tales of intrigue and surreptitious deaths of well-known personalities such as Socrates, Cleopatra, Hitler, and many more. General readers with a curiosity about science and an interest in history and human nature will enjoy both facets presented in this brief, yet varied exploration into the world of poisons.

Dear Hank Williams Kimberly Willis Holt, 2015-04-14 It's 1948 in Rippling Creek, Louisiana, and Tate P. Ellerbee's new teacher has just given her class an assignment—learning the art of letter-writing. Luckily, Tate has the perfect pen pal in mind: Hank Williams, a country music singer whose star has just begun to rise. Tate and her great-aunt and -uncle listen to him on the radio every Saturday night, and Tate just knows that she and Hank are kindred spirits. Told entirely through Tate's hopeful letters, this beautifully drawn novel from National Book Award-winning author Kimberly Willis Holt gradually unfolds a story of family love, overcoming tragedy, and an insightful girl learning to find her voice. This title has Common Core connections.

The Hank Show McKenzie Funk, 2023-10-03 The bizarre and captivating story of the most important person you've never heard of. The world we live in today, where everything is tracked by corporations and governments, originates with one manic, elusive, utterly unique man—as prone to bullying as he was to fits of surpassing generosity and surprising genius. His name was Hank Asher, and his life was a strange and spectacular show that changed the course of the future. In *The Hank Show*, critically acclaimed author and journalist McKenzie Funk relates Asher's stranger-than-fiction story—he careened from drug-running pilot to alleged CIA asset, only to be reborn as the pioneering computer programmer known as the father of data fusion. He was the multimillionaire whose creations now power a new reality where your every move is tracked by police departments, intelligence agencies, political parties, and financial firms alike. But his success was not without setbacks. He truly lived nine lives, on top of the world one minute, only to be forced out of the companies he founded and blamed for data breaches resulting in major lawsuits and market chaos. In the vein of the blockbuster movie *Catch Me if You Can*, this spellbinding work of narrative nonfiction propels you forward on a forty year journey of intrigue and innovation, from Colombia to the White House and from Silicon Valley to the 2016 Trump campaign, focusing a lens on the dark side of American business and its impact on the everyday fabric of our modern lives.

Issues in Web-Based Pedagogy Robert A. Cole, 2000-06-30 There has been an explosion of Web-based courses in higher education. Aiming at an interdisciplinary audience, the contributors draw upon diverse philosophical and empirical backgrounds to make claims about Web-based pedagogy. Among the points they raise is the concern that education is more easily commodified through Internet technologies, implying that traditional faculty roles in teaching (and research) are at risk. Moreover, current understandings of what it means to be a teacher or a student are undergoing redefinition as a result of these new distance-learning technologies. The contributors note that Web-based pedagogy is associated with sound instruction when particular strategies are adopted. As a corollary, this form of teaching is least effective when attempts are made to directly translate traditional styles of teaching. Political, social, and economic interests are competing to shape the direction that online education will take. The authors argue that opportunities exist for administrators and faculty to define the terms under

which Web-based learning will occur in their institutions.

Coach: The Greatest Teachers in Sports and Their Lessons for Us All Justin Spizman, 2022-02-08 Every great sports coach is a life coach. This book identifies 168 outstanding coaches who have much to teach us about optimizing our performance, our character, and our lives. Coaches build winning teams and enable each athlete they mentor, guide, cajole, and nurture to achieve top performance. More than this, every great sports coach is first and last a life coach. Sportswriter Justin Spizman identifies and profiles 168 of the greatest coaches and managers of all time. They have much to teach us about optimizing our performance, our character, and our lives. *Coach: The Greatest Teachers in Sports and Their Lessons for Us All* profiles coaches in every significant sport, from football, basketball, baseball, and hockey to gymnastics, skating, rowing, rugby, soccer, and more. From field to court, diamond, rink, and pitch, the big leagues to the Olympics, college, and high school, *Coach* delivers the most teachable moments and methods—for play, for competition, and for life. Rich in quotations, each profile ends with lessons for top performance on and off the field, in and beyond the arena. Justin Spizman tracks all the relevant stats—for every sport keeps score—but he seeks first and last to disclose the mind, the heart, and the force of character that drive each of the indispensable men and women behind the world's most envied and admired athletes. His profiles range from the likes of Cardinals manager Tony La Russa (already an MLB legend), to Aimee Boorman and Cecile Canqueteau-Landi (who both coached gymnastics phenom Simone Biles), Bill Belichick (the take-no-prisoners field general of the New England Patriots), Pat Summitt (who racked up 1,098 wins as coach of the University of Tennessee Lady Vols basketball team from 1974 to 2012), Marián Vajda (the coach behind tennis titan Novak Djokovic), and David Leadbetter (golf guru to champions Kathy Baker, Nick Faldo, and Michelle Wie).

Native Americans Today Bruce E. Johansen, 2010-06-22 This engaging collection of Native American profiles examines these individuals' unique life experiences within the larger context of U.S. history. *Native Americans Today: A Biographical Dictionary* focuses on the lives of contemporary Native Americans. Such treatments are rare, as most Native American biographies are historical (pre-1900) and cover familiar figures. Profiles collected here are written to be enjoyable as well as instructive, presented as examples of personal storytelling that should be savored not only for their factual content, but also for the humanity they evoke. The book spotlights Native American lives in the United States and Canada, mainly after 1900, though a few older figures are included because their lives evoke strikingly modern themes. The author, an expert on all things Native American, knows (or knew) several of the people in the entries, adding a special vibrancy to the writing. Among those profiled are former U.S. Senator Ben Nighthorse Campbell, activist Eloise Cobell, and controversial political prisoner Leonard Peltier, as well as writers, artists, and musicians. The compilation also includes non-Native Americans whose lives and careers impacted Indian life.

The House of Twenty Thousand Books Sasha Abramsky, 2017-03-28 A tender and compelling memoir of the author's grandparents, their literary salon, and a way of life that is no more. *The House of Twenty Thousand Books* is the story of Chimen Abramsky, an extraordinary polymath and bibliophile who amassed a vast collection of socialist literature and Jewish history. For more than fifty years Chimen and his wife, Miriam, hosted epic gatherings in their house of books that brought together many of the age's greatest thinkers. The atheist son of one of the century's most important rabbis, Chimen was born in 1916 near Minsk, spent his early teenage years in Moscow while his father served time in a Siberian labor camp for religious proselytizing, and then immigrated to London, where he discovered the writings of Karl Marx and became involved in left-wing politics. He briefly attended the newly established Hebrew University in Jerusalem, until World War II interrupted his studies. Back in England, he married, and for many years he and Miriam ran a respected Jewish bookshop in London's East End. When the Nazis invaded Russia in June 1941, Chimen joined the Communist Party, becoming a leading figure in the party's National Jewish Committee. He remained a member until 1958, when, shockingly late in the day, he finally acknowledged the atrocities committed by Stalin. In middle age, Chimen reinvented himself once more, this time as a liberal thinker, humanist, professor, and manuscripts' expert for Sotheby's auction house. Journalist Sasha Abramsky re-creates here a lost world, bringing to life the people, the books, and the ideas that filled his grandparents' house, from gatherings that included Eric Hobsbawm and Isaiah Berlin to books with Marx's handwritten notes, William Morris manuscripts and woodcuts, an early sixteenth-century Bomberg Bible, and a first edition of Descartes's *Meditations*. *The House of Twenty Thousand Books* is a wondrous journey through our times, from the vanished worlds of Eastern European Jewry to the cacophonous politics of modernity. *The House of Twenty Thousand Books* includes 43 photos.
