Darren Shan

**Miles** Miles Davis, Quincy Troupe, 1990-09-15 Miles discusses his life and music from playing trumpet in high school to the new instruments and sounds from the Caribbean.

Cookery and Dining in Imperial Rome Apicius, 2019-11-20 Cookery and Dining in Imperial Rome by Apicius is the oldest known cookbook in existence. There are recipes for cooking fish and seafood, game, chicken, pork, veal, and other domesticated animals and birds, for vegetable dishes, grains, beverages, and sauces; virtually the full range of cookery is covered. There are also methods for preserving food and revitalizing them in ways that are surprisingly still relevant.

The Vampire's Assistant Darren Shan, 2009 After traveling with Mr. Crepsley, the vampire who made him into a half-vampire, Darren returns to the freak show known as the Cirque du Freak and continues to fight his need to drink human blood.

The Sea Fairies L. Frank Baum, 2011-05-01 This delightful underwater fantasia from Wizard of Oz author L. Frank Baum is sure to enthrall younger readers -- and any parents or grandparents who happen to come along for the ride. A little girl named Mayre Griffiths wishes desperately to catch a glimpse of a mermaid. Not only is her wish granted, but she is also invited to pay a visit to the enchanted kingdom of these beautiful creatures.

Crash Course Paul Ingrassia, 2011-01-11 "A definitive account . . . It's hard to imagine anyone better than Paul Ingrassia to 'ride shotgun' on a journey through the sometimes triumphant, often turbulent, history of U.S. automaking. . . . [A] wealth of amusing, astonishing and enlightening nuggets."--Pittsburgh Tribune-Review This is the epic saga of the American automobile industry's rise and demise, a compelling story of hubris, missed opportunities, and self-inflicted wounds that culminates with the president of the United States ushering two of Detroit's Big Three car companies--once proud symbols of prosperity--through bankruptcy. With unprecedented access, Pulitzer Prize winner Paul Ingrassia takes us from factory floors to small-town dealerships to Detroit's boardrooms to the White House. Ingrassia answers the big questions: Was Detroit's self-destruction inevitable? Why did Japanese automakers manage American workers better than the American companies themselves did? Complete with a new Afterword providing fresh insights into the continuing upheaval in the auto industry--the travails of Toyota, the revolving-door management and IPO at General Motors, the unexpected progress at Chrysler, and the Obama administration's stake in Detroit's recovery--Crash Course addresses a critical question: America bailed out GM, but who will bail out America? With an updated Afterword by the author Praise for Crash Course "In order to understand just how much of a mess it was--not to mention how it got that way and how, if at all, it can be cleaned up--you really need to read Crash Course."--The Washington Post "Ingrassia tells Detroit's story with economy, vigour and restrained fury."--The Economist "A delightful mix of history and first-person reporting . . . Employing superb storytelling skills, Ingrassia explains in head-shaking detail the elements of a wholly avoidable collision."--Kirkus Reviews (starred review)

**With Speed and Violence** Fred Pearce, 2007-03-15 Nature is fragile, environmentalists often tell us. But the lesson of this book is that it is not so. The truth is far more worrying. Nature is strong and packs a serious counterpunch . . . Global warming will very probably unleash unstoppable planetary forces. And they will not be

gradual. The history of our planet's climate shows that it does not do gradual change. Under pressure, whether from sunspots or orbital wobbles or the depredations of humans, it lurches-virtually overnight. —from the Introduction Fred Pearce has been writing about climate change for eighteen years, and the more he learns, the worse things look. Where once scientists were concerned about gradual climate change, now more and more of them fear we will soon be dealing with abrupt change resulting from triggering hidden tipping points. Even President Bush's top climate modeler, Jim Hansen, warned in 2005 that we are on the precipice of climate system tipping points beyond which there is no redemption. As Pearce began working on this book, normally cautious scientists beat a path to his door to tell him about their fears and their latest findings. *With Speed and Violence* tells the stories of these scientists and their work—from the implications of melting permafrost in Siberia and the huge river systems of meltwater beneath the icecaps of Greenland and Antarctica to the effects of the ocean conveyor and a rare molecule that runs virtually the entire cleanup system for the planet. Above all, the scientists told him what they're now learning about the speed and violence of past natural climate change—and what it portends for our future. *With Speed and Violence* is the most up-to-date and readable book yet about the growing evidence for global warming and the large climatic effects it may unleash.

Reading Stephen King Brenda Miller Power, Jeffrey D. Wilhelm, 1997 This collection of essays grew out of the Reading Stephen King Conference held at the University of Maine in 1996. Stephen King's books have become a lightning rod for the tensions around issues of including mass market popular literature in middle and high school English classes and of who chooses what students read. King's fiction is among the most popular of pop literature, and among the most controversial. These essays spotlight the ways in which King's work intersects with the themes of the literary canon and its construction and maintenance, censorship in public schools, and the need for adolescent readers to be able to choose books in school reading programs. The essays and their authors are: (1) *Reading Stephen King: An Ethnography of an Event* (Brenda Miller Power); (2) *I Want to Be Typhoid Stevie* (Stephen King); (3) *King and Controversy in Classrooms: A Conversation between Teachers and Students* (Kelly Chandler and others); (4) *Of Cornflakes, Hot Dogs, Cabbages, and King* (Jeffrey D. Wilhelm); (5) *The 'Wanna Read' Workshop: Reading for Love* (Kimberly Hill Campbell); (6) *When 'IT' Comes to the Classroom* (Ruth Shagoury Hubbard); (7) *If Students Own Their Learning, What Do Teachers Do?* (Curt Dudley-Marling); (8) *Disrupting Stephen King: Engaging in Alternative Reading Practices* (James Albright and Roberta F. Hammett); (9) *Because Stories Matter: Authorial Reading and the Threat of Censorship* (Michael W. Smith); (10) *Canon Construction Ahead* (Kelly Chandler); (11) *King in the Classroom* (Michael R. Collings); (12) *King's Works and the At-Risk Student: The Broad-Based Appeal of a Canon Basher* (John Skretta); (13) *Reading the Cool Stuff: Students Respond to 'Pet Sematary'* (Mark A. Fabrizi); (14) *When Reading Horror Subliterature Isn't So Horrible* (Janice V. Kristo and Rosemary A. Bamford); (15) *One Book Can Hurt You...But a Thousand Never Will* (Janet S. Allen); (16) *In the Case of King: What May Follow* (Anne E. Pooler and Constance M. Perry); and (17) *Be Prepared: Developing a Censorship Policy for the Electronic Age* (Abigail C. Garthwait). Appended are a joint manifesto by National Council of Teachers of English (NCTE) and

International Reading Association (IRA) concerning intellectual freedom; an excerpt from a teacher's guide to selected horror short stories of Stephen King; and the conference program. Contains a 152-item reference list of literary works.(NKA)

**The Resonance of Unseen Things** Susan Lepselter, 2016-03-03 The Resonance of Unseen Things offers an ethnographic meditation on the “uncanny” persistence and cultural freight of conspiracy theory. The project is a reading of conspiracy theory as an index of a certain strain of late 20th-century American despondency and malaise, especially as understood by people experiencing downward social mobility. Written by a cultural anthropologist with a literary background, this deeply interdisciplinary book focuses on the enduring American preoccupation with captivity in a rapidly transforming world. Captivity is a trope that appears in both ordinary and fantastic iterations here, and Susan Lepselter shows how multiple troubled histories—of race, class, gender, and power—become compressed into stories of uncanny memory. “We really don’t have anything like this in terms of a focused, sympathetic, open-minded ethnographic study of UFO experiencers. . . . The author’s semiotic approach to the paranormal is immensely productive, positive, and, above all, resonant with what actually happens in history.” —Jeffrey J. Kripal, J. Newton Rayzor Professor of Religion, Rice University “Lepselter relates a weave of intimate alien sensibilities in out-of-the-way places which are surprisingly, profoundly, close to home. Readers can expect to share her experience of contact with complex logics of feeling, and to do so in a contemporary America they may have thought they understood.” —Debbora Battaglia, Mount Holyoke College “An original and beautifully written study of contemporary American cultural poetics. . . . The book convincingly brings into relief the anxieties of those at the margins of American economic and civic life, their perceptions of state power, and the narrative continuities that bond them to histories of violence and expansion in the American West.” —Deirdre de la Cruz, University of Michigan

*The Indo-Pacific Axis* Satish Chandra, Baladas Ghoshal, 2018-04-17 The term ‘Indo-Pacific’ is being used increasingly in the global strategic/geo-political discourse in recent years. The rise of China as an economic giant and a rising military power has led to the consequent shift of international politics and relations to Asia as the fulcrum. It has turned the whole region of Indo-Pacific as one security complex. Countries that are part of the region but also countries that are adjacent or outside the region, but also the countries adjoining the oceans look for a mechanism in accordance with a rule-based order. International law that would protect the rights of the nations to pursue global commons was emphasized. This timely volume presents a collection of articles by leading scholars on the subject from the region. It addresses the faultlines of both traditional and non-traditional security issues. Military modernization, especially of the naval forces of a number of powers, national ambitions of power projection, and plans to build ports in strategic locations are exacerbating insecurity and greater arms race. It also poses the question, whether the Indo-Pacific region will become a theatre of tension and instability, or a contributor to peace and prosperity for the larger populations that reside herein? Please note: Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri

Lanka.

*Mathematicians in Love* Rudy Rucker, 2008-07-08 A riveting new science fiction novel from the writer who twice won the Philip K. Dick Award for best SF novel. Bela and Paul, two wild young mathematicians, are friends and roommates, and in love with the same woman, who happens to be Alma, Bela's girlfriend. They fight it out by changing reality using cutting edge math, to change who gets the girl. The contemporary world they live in is not quite this one, but much like Berkeley, California, and the two graduate students are trying to finish their degrees and get jobs. It doesn't help that their unpredictable advisor Roland is a mad mathematical genius who has figured out a way to predict isolated and specific bits of the future that can cause a lot of trouble. . .and he's starting to see monsters in mirrors. Bela and Paul start to mess around with reality, and when that happens, all heaven and hell break loose. Those monsters of Roland's were really there, but who are they? This novel is a romantic comedy with a whole corkscrew of SF twists. At the publisher's request, this title is being sold without Digital Rights Management software (DRM) applied.

Dear Bess Harry S. Truman, 1998 This correspondence, which encompasses Truman's courtship of his wife, his service in the senate, his presidency, and after, reveals not only the character of Truman's mind but also a shrewd observer's view of American politics.

*Battle of the Odon* Georges Bernage, 2017 The Battle of the Odon evokes the clash between the British Army and the II SS Panzer Korps as they attacked across the Odon Valley during Operation Epsom in June 1944. The offensive was intended to outflank and seize the German occupied city of Caen, and important Allied objective for D-Day, but which would remain in German hands until mid-July.--Book jacket.
