Genetic Resources and Traditional Knowledge Tania Bubela, E. Richard Gold, 2012-01-01 This fascinating study describes efforts to define and protect traditional knowledge and the associated issues of access to genetic resources, from the negotiation of the Convention on Biological Diversity to the Declaration on the Rights of Indigenous Peoples and the Nagoya Protocol. Drawing on the expertise of local specialists from around the globe, the chapters judiciously mix theory and empirical evidence to provide a deep and convincing understanding of traditional knowledge, innovation, access to genetic resources, and benefit sharing. Because traditional knowledge was understood in early negotiations to be subject to a property rights framework, these often became bogged down due to differing views on the rights involved. New models, developed around the notion of distributive justice and self-determination, are now gaining favor. This book suggests – through a discussion of theory and contemporary case studies from Brazil, India, Kenya and Canada – that a focus on distributive justice best advances the interests of indigenous peoples while also fostering scientific innovation in both developed and developing countries. Comprehensive as well as nuanced, Genetic Resources and Traditional Knowledge will be of great interest to scholars and students of law, political science, anthropology and geography. National and international policymakers and those interested in the environment, indigenous peoples' rights and innovation will find the book an enlightening resource.

Weight-Loss Drugs Suellen May, 2009 Obesity is a serious problem in the United States, and various methods and strategies for losing excess weight have become more and more popular. In addition to the multitude of diet and exercise programs available to consumers, new drugs that promote weight loss are constantly being developed and marketed. While some of these drugs can contribute to healthy weight loss, there are many risks involved in their use and abuse. Weight-Loss Drugs takes a look at these drugs, and explains that though there is no 'magic pill' that melts the pounds away, some drugs have proven effective in supporting a sensible weight-loss plan. Likewise, other drugs have proven to be ineffective, dangerous, or even deadly. Chapters include: Fat and Weight Loss; Appetite Suppressants; Fen-Phen and Redux - The Making and Unmaking of Drugs; Stimulants; Going Off-Label for Weight Loss. May is also the author of Botox[registered] and Other Cosmetic Drugs in Chelsea House's Drugs: The Straight Facts series.

Ethnicity, Inc. John L. Comaroff, Jean Comaroff, 2009-09-15 In Ethnicity, Inc. anthropologists John L. and Jean Comaroff analyze a new moment in the history of human identity: its rampant commodification. Through a wide-ranging exploration of the changing relationship between culture and the market, they address a pressing question: Wherein lies the future of ethnicity? Their account begins in South Africa, with the incorporation of an ethno-business in venture capital by a group of traditional African chiefs. But their horizons are global: Native American casinos; Scotland's efforts to brand itself; a Zulu ethno-theme park named Shakaland; a world religion declared to be intellectual property; a chiefdom made into a global business

by means of its platinum holdings; San “Bushmen” with patent rights potentially worth millions of dollars; nations acting as commercial enterprises; and the rapid growth of marketing firms that target specific ethnic populations are just some of the diverse examples that fall under the Comaroffs’ incisive scrutiny. These phenomena range from the disturbing through the intriguing to the absurd. Through them, the Comaroffs trace the contradictory effects of neoliberalism as it transforms identities and social being across the globe. *Ethnicity, Inc.* is a penetrating account of the ways in which ethnic populations are remaking themselves in the image of the corporation—while corporations coopt ethnic practices to open up new markets and regimes of consumption. Intellectually rigorous but leavened with wit, this is a powerful, highly original portrayal of a new world being born in a tectonic collision of culture, capitalism, and identity.

Botanical Dietary Supplements: Gail B. Mahady, Harry H.S. Fong, N.R. Farnsworth, 2001-06-01 This volume provides reviews and details of the quality, safety and efficacy for some of the top-selling botanicals worldwide, including black cohosh, chamomile, comfrey, echinacea, garlic, ginkgo, ginseng, kava, milk thistle, St John's wort and valerian. The work was written based on a systematic review of the scientific literature from 1975-2000.; Each review includes a brief introduction, a section on quality including a definition of the crude drug, geographical distribution, and a listing of the major chemical constituents. The safety and efficacy sections summarize the medical uses, pharmacology, contraindications, warnings, precautions, adverse reactions, dose and dosage forms. The safety and efficacy sections were written for a busy health-care professional, and should enable one to ascertain which clinical uses are supported by clinical data, without having to read through all the pharmacology. Each chapter is fully referenced, enabling the reader to access further information when necessary.

Bitter Roots Abena Dove Osseo-Asare, 2014-01-13 For over a century, plant specialists worldwide have sought to transform healing plants in African countries into pharmaceuticals. And for equally as long, conflicts over these medicinal plants have endured, from stolen recipes and toxic tonics to unfulfilled promises of laboratory equipment and usurped personal patents. In *Bitter Roots*, Abena Dove Osseo-Asare draws on publicly available records and extensive interviews with scientists and healers in Ghana, Madagascar, and South Africa to interpret how African scientists and healers, rural communities, and drug companies—including Pfizer, Bristol-Myers Squibb, and Unilever—have sought since the 1880s to develop drugs from Africa’s medicinal

plants. Osseo-Asare recalls the efforts to transform six plants into pharmaceuticals: rosy periwinkle, Asiatic pennywort, grains of paradise, Strophanthus, Cryptolepis, and Hoodia. Through the stories of each plant, she shows that herbal medicine and pharmaceutical chemistry have simultaneous and overlapping histories that cross geographic boundaries. At the same time, Osseo-Asare sheds new light on how various interests have tried to manage the rights to these healing plants and probes the challenges associated with assigning ownership to plants and their biochemical components. A fascinating examination of the history of medicine in colonial and postcolonial Africa, *Bitter Roots* will be indispensable for scholars of Africa; historians interested in medicine, biochemistry, and society; and policy makers concerned with drug access and patent rights.

Drug-Induced Liver Disease Neil Kaplowitz, 2002-10-16 Featuring more than 4100 references, *Drug-Induced Liver Disease* will be an invaluable reference for gastroenterologists, hepatologists, family physicians, internists, pathologists, pharmacists, pharmacologists, and clinical toxicologists, and graduate and medical school students in these disciplines.

Nutrition in the Prevention and Treatment of Abdominal Obesity Ronald Ross Watson, 2014-02-26 *Nutrition in the Prevention and Treatment of Abdominal Obesity* focuses on the important roles that exercise, dietary changes, and foods play in promoting as well as reducing visceral fat. Nutritionists, dietitians, and healthcare providers seeking to address the abdominal obesity epidemic will use this comprehensive resource as a tool in their long-term goal of preventing chronic diseases, especially heart, vascular, and diabetic diseases. Experts from a broad range of disciplines are involved in dealing with the consequences of excessive abdominal fat: cardiology, diabetes research, studies of lipids, endocrinology and metabolism, nutrition, obesity, and exercise physiology. They have contributed chapters that define a range of dietary approaches to reducing risk and associated chronic diseases. They begin by defining visceral obesity and its major outcomes; they also discuss the importance and the challenges of dietary approaches to reduce abdominal obesity, as compared to clinical approaches, with major costs and risks. Offers detailed, well-documented reviews outlining the various dietary approaches to visceral obesity with their benefits and failures Includes chapters on types of foods, exercise, and supplements in reducing obesity and its chronic clinical companions, especially diabetes and cardiovascular disease Helps nutritionists, dietitians, and healthcare providers approach patients in making decision about nutritional therapies and clinical treatments for abdominal obesity, from an evidence-based perspective

Reversing Inflammation Don Colbert, 2015 A natural, whole-body approach to reducing inflammation and feeling your best Inflammation is an important component of the immune system. It is essential for the healing process since it is a programmed response, necessary for fighting infections and repairing damaged tissues. However, problems arise when this inflammatory reaction becomes systemic and goes unchecked for months or years. When this happens, the same chemicals used for healing can cause weight gain and eventually trigger a host of deadly diseases. Based on the life-changing principles shared in his New York Times best-selling books-tailored to specifically address inflammation-this book walks you through the process of building a healthy lifestyle. With nutritional and alternative health tips and an

interactive food journal, it reveals: What foods contribute to inflammation -
- What foods control inflammation Groundbreaking research on how fat contributes to inflammation -- How to shop and eat out while on the anti-inflammatory diet -- Supplements that support weight loss and overall health -- And so much more!--

Human Enhancement Drugs Katinka van de Ven, Kyle J. D. Mulrooney, Jim McVeigh, 2019-06-12 Despite increasing interest in the use of human enhancement drugs (HEDs), our understanding of this phenomenon and the regulatory framework used to address it has lagged behind. Encompassing public health, epidemiology, neuroethics, sport science, criminology, and sociology, this book brings together a broad spectrum of scholarly insights and research expertise from leading authorities to examine key international issues in the field of HEDs. As traditional and other new drug markets have occupied much of the academic attention, there has been a lack of scholarly focus on human enhancement drugs. This book provides readers with a much-needed understanding of the illicit drug market of HEDs. The authors, from a variety of cultural contexts, disciplines and perspectives, include both academics and practitioners. Topics explored in this collection amongst others include: • The anti-doping industry and performance and image enhancing drugs • Steroids and gender • The use of cognitive enhancing drugs in academia • The use of sunless synthetic tanning products • The (online) trade of HEDs • Regulations of the enhancement drugs market This collection will serve as a reference for students, academics, practitioners, law enforcement and others working in this area to reflect on the current state of research and consider future priorities. This detailed exploration will provide a valuable knowledge base for those interested in human enhancement drugs, while also promoting critical discussion.

Climate Change and Indigenous Peoples in the United States Julie Koppel Maldonado, Benedict Colombi, Rajul Pandya, 2014-04-05 With a long history and deep connection to the Earth's resources, indigenous peoples have an intimate understanding and ability to observe the impacts linked to climate change. Traditional ecological knowledge and tribal experience play a key role in developing future scientific solutions for adaptation to the impacts. The book explores climate-related issues for indigenous communities in the United States, including loss of traditional knowledge, forests and ecosystems, food security and traditional foods, as well as water, Arctic sea ice loss, permafrost thaw and relocation. The book also highlights how tribal communities and programs are responding to the changing environments. Fifty authors from tribal communities, academia, government agencies and NGOs contributed to the book. Previously published in *Climatic Change*, Volume 120, Issue 3, 2013.

The Scientific Imagination in South Africa William Beinart, Saul Dubow, 2021-05-20 An innovative three hundred year exploration of the social and political contexts of science and the scientific imagination in South Africa.

The Seductions of Quantification Sally Engle Merry, 2016-06-10 We live in a world where seemingly everything can be measured. We rely on indicators to translate social phenomena into simple, quantified terms, which in turn can be used to guide individuals, organizations, and governments in establishing policy. Yet counting things requires finding a way to make them comparable. And in the process of translating the confusion of social life into neat categories, we inevitably strip it of context and meaning—and risk hiding or distorting as much as we reveal. With *The Seductions of Quantification*, leading legal anthropologist Sally Engle Merry investigates the techniques by which information is gathered and analyzed in the production of global indicators on human rights, gender violence, and sex trafficking. Although such numbers convey an aura of objective truth and scientific validity, Merry argues persuasively that measurement systems constitute a form of power by incorporating theories about social change in their design but rarely explicitly acknowledging them. For instance, the US State Department's Trafficking in Persons Report, which ranks countries in terms of their compliance with antitrafficking activities, assumes that prosecuting traffickers as criminals is an effective corrective strategy—overlooking cultures where women and children are frequently sold by their own families. As Merry shows, indicators are indeed seductive in their promise of providing concrete knowledge about how the world works, but they are implemented most successfully when paired with context-rich qualitative accounts grounded in local knowledge.

Indigenous Peoples, Consent and Benefit Sharing Rachel Wynberg, Doris Schroeder, Roger Chennells, 2009-09-30 *Indigenous Peoples, Consent and Benefit Sharing* is the first in-depth account of the Hoodia bioprospecting case and use of San traditional knowledge, placing it in the global context of indigenous peoples' rights, consent and benefit-sharing. It is unique as the first interdisciplinary analysis of consent and benefit sharing in which philosophers apply their minds to questions of justice in the Convention on Biological Diversity (CBD), lawyers interrogate the use of intellectual property rights to protect traditional knowledge, environmental scientists analyse implications for national policies, anthropologists grapple with the commodification of knowledge and, uniquely, case experts from Asia, Australia and North America bring their collective expertise and experiences to bear on the San-Hoodia case.
