Web Hosting Performance Measurement. Approach of a Web Hosting Benchmark in Times of Virtualization Kai Spriestersbach, 2023-02-23 Master's Thesis in the subject Computer Science - General, Cologne University of Applied Sciences, language: English, abstract: In this thesis, an approach for evaluating the performance of web hosting solutions is developed to facilitate the comparison of offerings from different providers and aid companies in choosing a web hosting service. The focus of the research is on identifying and investigating methodologies for collecting reproducible performance metrics within the constraints of common virtualized web hosting environments, using only PHP and MySQL functions. A comprehensive review of existing literature and research in web development and web hosting provides the theoretical basis for benchmarking web servers and measuring web performance. Industry expert interviews supplement this approach with practical experience and best practices. The analysis of commonly used benchmarks identified in the interviews showed that well-established benchmarks and web server load testing tools were infeasible due to the lack of command line interface access in shared and managed hosting environments. Benchmarks relying solely on PHP and MySQL functions appear promising, but they do not account for all relevant aspects and cannot incorporate external factors. External load testing tools and page speed tools were found to cover aspects not considered by server-side benchmarks, such as caching mechanisms and networking. The research also highlights the need to evaluate website loading speed and back-end administrative interface performance separately, as they are both relevant to customers but are affected differently by caching mechanisms. The integration of these data sources is recommended for a comprehensive and meaningful analysis. However, different user groups may attach different importance to certain aspects of hosting, depending on their intended use case. Therefore, a weighted evaluation of different benchmark data for different use cases is essential, leading to

Avances y perspectivas para el desarrollo territorial Universidad Austral de Chile (UACH),2018-11-30 A más de diez años de la creación de «Los Ríos» como nueva región, el desarrollo del territorio en esta parte del sur del país se ha visto expuesto a positivos cambios, tales como un mayor acceso a recursos y al control de la gestión. No obstante, se aprecian también estancamientos en diversas materias que demandan un constante seguimiento y mejoras a la planificación territorial. En la búsqueda de un desarrollo sustentable que permita una alianza virtuosa entre el sector público, privado y la ciudadanía —en armonía con los recursos naturales y el cuidado del medioambiente—, la Universidad Austral de Chile ha jugado un rol preponderante al favorecer la generación de bienes públicos, formando personas altamente calificadas y contribuyendo a la descentralización del conocimiento, la ciencia, la cultura y la tecnología. Este libro presenta diversos artículos, escritos en su mayoría por académicos de la UACH y profesionales vinculados a la casa de estudios, que dan cuenta de este aporte en los ámbitos del desarrollo sustentable, educación, descentralización y gestión, pero más aún, abordan profundos análisis del camino recorrido, proyectando asimismo propuestas para un mejor andar en relación con el progreso del territorio y su gente.

The Platform Society José van Dijck,Thomas Poell,Martijn de Waal,2018-10-02 Individuals all over the world can use Airbnb to rent an apartment in a foreign city, check Coursera to find a course on statistics, join PatientsLikeMe to exchange information about one's disease, hail a cab using Uber, or read the news through Facebook's Instant Articles. The promise of connective platforms is that they offer personalized services and contribute to innovation and economic growth, while bypassing cumbersome institutional or industrial overhead. In *The Platform Society*, Van Dijck, Poell and De Waal offer a comprehensive analysis of a connective world where platforms have penetrated the heart of societies-disrupting markets and labor relations, circumventing institutions, transforming social and civic practices and affecting democratic processes. This book questions what role online platforms play in the organization of Western societies. First, how do platform mechanisms work and to what effect are they deployed? Second, how can platforms incorporate public values and benefit the public good? The Platform Society analyzes intense struggles between competing ideological systems and contesting societal actors-market, government and civil society-raising the issue of who is or should be responsible for anchoring public values and the common good in a platform society. Public values include of course privacy, accuracy, safety, and security, but they also pertain to broader societal effects, such as fairness, accessibility, democratic control, and accountability. Such values are the very stakes in the struggle over the platformization of societies around the globe. The Platform Society highlights how this struggle plays out in four private and public sectors: news, urban transport, health, and education. Each struggle highlights local dimensions, for instance fights over regulation between individual platforms and city governments, but also addresses the level of the platform ecosystem as well as the geopolitical level where power clashes between global markets and (supra-)national governments take place.

The Other Alliance Martin Klimke,2011-09-04 Using previously classified documents and original interviews, *The Other Alliance* examines the channels of cooperation between American and West German student movements throughout the 1960s and early 1970s, and the reactions these relationships provoked from the U.S. government. Revising the standard narratives of American and West German social mobilization, Martin Klimke demonstrates the strong transnational connections between New Left groups on both sides of the Atlantic. Klimke shows that the cold war partnership of the American and German governments was mirrored by a coalition of rebelling counterelites, whose common political origins and opposition to the Vietnam War played a vital role in generating dissent in the United States and Europe. American protest techniques such as the sit-in or teach-in became crucial components of the main organization driving student activism in West Germany--the German Socialist Student League--and motivated American and German student activists to construct networks against global imperialism. Klimke traces the impact that Black Power and Germany's unresolved National Socialist past had on the German student movement; he investigates how U.S. government agencies, such as the State Department's Interagency Youth Committee, advised American policymakers on confrontations with student unrest abroad; and he highlights the challenges student protesters posed to cold war alliances. Exploring the catalysts of cross-pollination between student protest movements on two continents, *The Other Alliance* is a pioneering work of transnational history.

The Cambridge Handbook of Consumer Privacy Evan Selinger, Jules Polonetsky, Omer Tene, 2018-04-02 Businesses are rushing to collect personal data to fuel surging demand. Data enthusiasts claim personal information that's obtained from the commercial internet, including mobile platforms, social networks, cloud computing, and connected devices, will unlock path-breaking innovation, including advanced data security. By contrast, regulators and activists contend that corporate data practices too often disempower consumers by creating privacy harms and related problems. As the Internet of Things matures and facial recognition, predictive analytics, big data, and wearable tracking grow in power, scale, and scope, a controversial ecosystem will exacerbate the acrimony over commercial data capture and analysis. The only productive way forward is to get a grip on the key problems right now and change the conversation. That's exactly what Jules Polonetsky, Omer Tene, and Evan Selinger do. They bring together diverse views from leading academics, business leaders, and policymakers to discuss the opportunities and challenges of the new data economy.
