Engaged Fatherhood for Men, Families and Gender Equality Marc Grau

Grau,Mireia las Heras Maestro,Hannah Riley Bowles,2022 This aim of this open access book is to launch an international, cross-disciplinary conversation on fatherhood engagement. By integrating perspective from three sectors -- Health, Social Policy, and Work in Organizations -- the book offers a novel perspective on the benefits of engaged fatherhood for men, for families, and for gender equality. The chapters are crafted to engaged broad audiences, including policy makers and organizational leaders, healthcare practitioners and fellow scholars, as well as families and their loved ones.

Sundae's Best Riley Hart,2021-12-03 Grady Dalton is in a rut. He's thirty-eight, without a boyfriend, and has yet to find the place that feels like home. The closest he ever got was his best friend, Nathan. But it's been seven years since he passed, and life isn't getting easier. That's how he ends up in Briar County, hoping to grow roots in the place Nathan had loved. Deacon Sharpe spends his days serving homemade ice cream at Sundae's Best and his nights alone, pretending he's getting by after his wife's death better than he is. His world is rocked when a man shows up who claims to have been his brother-in-law's best friend and seems to miss Nathan as much as Deacon misses Patty. Their losses connect them, but soon, the weight of their loneliness eases with laughter, making ice cream, and Grady reminding Deacon

of what it feels like to be held again. Deacon tells himself it's platonic. How can it be more when he's forty and has never been with a man, never even been attracted to one? But then, he'd never felt those things about anyone other than Patty either. And when Grady touches him...kisses him...nothing else matters, and the rest of the world melts away. Together they can deal with family drama, small-town gossip, and Deacon's newly discovered feelings. But as it often does, life has one more curveball to throw their way... Sundae's Best is a small-town, bi/demisexual awakening romance, with characters who like to be held, swoony moments, a dog named Moose, and lots of ice cream. Sundae's Best can be read as a standalone.

The Book of Magic Brian Copenhaver, 2015-11-05 '. . . as when iron is drawn to a magnet, camphor is sucked into hot air, crystal lights up in the Sun, sulfur and a volatile liquid are kindled by flame, an empty eggshell filled with dew is raised towards the Sun . . .' An odd feature of the Bible is that it is full of stories featuring forms of magic and possession - from Joseph battling with Pharaoh's wizards to the supernatural actions of Jesus and his disciples. As, over the following centuries, the Christian church attempted to stamp out 'deviant' practices, there was a persistent interest in magic that drew strength from this Biblical validation. A strange blend of mumbo-jumbo, fraud and deeply serious study, magic was central to the European Renaissance, fascinating many of its greatest figures. Brian Copenhaver's wonderful anthology will be welcomed by everyone from those with the most

casual interest in the magical tradition to anyone drawn to the Renaissance and the tangled, arcane roots of the scientific tradition.

Evidence Based Practice for Health Professionals Bernadette Howlett,Teresa Gabiola Shelton,Ellen Rogo,2020-02-14 Evidence based practice (EBP) has become the standard in health care practice today. Evidence Based Practice for Health Professionals covers the fundamentals of applying medical evidence to clinical practice and discussing research findings with patients and fellow professionals. This essential text explains the basic concepts of EBP, its applications in health care, and how to interpret biostatistics and biomedical research. With examples derived from multiple health professions, Evidence Based Practice for Health Professionals teaches the skills needed to access and interpret research in order to successfully apply it to collaborative, patient-centered health care decisions. Students gain valuable practice with skill-building learning activities, such as explaining the evidence for treatments to patients, developing a standard of care, selecting a diagnostic tool, and designing community-based educational materials.

Evidence Based Practice for Health Professionals also helps prepare students to communicate knowledgeably with members of interprofessional healthcare teams as well as with pharmaceutical sales representatives--

Smoke 'Em If You Got 'Em Joel Bius, 2018-11-15 The American military-industrial complex and accompanying culture are most often associated with massive weapons procurement programs and advanced technologies. However, one aspect of the complex is not a weapon or even a machine, but one of the world's most highly engineered consumer products: the manufactured cigarette. *Smoke 'Em If You Got 'Em* describes the origins of the often comfortable, yet increasingly controversial relationship among the military, the cigarette industry, and tobaccoland politicians during the twentieth century. *Smoke 'Em If You Got 'Em* is also a study in modern American political economy. Bureaucrats, soldiers, lobbyists, government executives, legislators, litigators, or anti-smoking activists all struggled over far-reaching policy issues involving the cigarette. The soldier-cigarette relationship established by the Army in World War I and broken apart in the mid-1980s underpinned one of the most prolific social, cultural, economic, and healthcare-related developments in the twentieth century: the rise and proliferation of the American manufactured cigarette smoker and the powerful cigarette enterprise supporting them. Using the manufactured cigarette as a vehicle to explore political economy and interactions between the military and American society, Joel R. Bius helps the reader understand this

important, yet overlooked aspect of twentieth-century America.

Manual of Simulation in Healthcare Richard H. Riley, 2008 Medical simulation is a relatively new science that is achieving respectability among healthcare educators worldwide. Simulation and skills centres have become established to integrate simulation into mainstream education in all medical, nursing, and paramedical fields. Borrowing from the experience and methodologies of industries that are using simulation, medical educators are grappling with the problem of rapidly acquiring the skills and techniques required to implement simulation programmes into established curricula. This book assists both novice and experienced workers in the field to learn from established practitioners in medical simulation. Simulation has been used to enhance the educational experience in a diverse range of fields; therefore a wide variety of disciplines are represented. The book begins with a section on the logistics of establishing a simulation and skills centre and the inherent problems with funding, equipment, staffing and course development, and promotion. Section two deals with simulators and related training devices that are required to equip a stand-alone or institution-based centre. The features, strengths, and weaknesses of training devices are presented to help the reader find the appropriate simulator to fulfil their training requirements. There is a guide to producing scenarios and medical props that can enhance the training experience. The third section covers adult education and it reviews the steps required to develop courses that comply with 'best

practice' in medical education. Teaching skills, facilitating problem-based learning groups and debriefing techniques are especially important to multidisciplinary skills centres that find themselves becoming a centre for medical education. The manual concludes with guides for the major specialties that use simulation, including military, paediatrics, CPR and medical response teams, obstetrics, and anaesthesia.

Visual Methods in Psychology Paula Reavey, 2012-03-29 This comprehensive volume provides an unprecedented illustration of the potential for visual methods in psychology. Each chapter explores the set of theoretical, methodological, as well as ethical and analytical issues that shape the ways in which visual qualitative research is conducted in psychology. Using a variety of forms of visual data, including photography, documentary film-making, drawing, internet media, model making and collages, each author endeavors to broaden the scope for understanding experience and subjectivity, using visual qualitative methods. The contributors to this volume work within a variety of traditions including narrative psychology, personal construct theory, discursive psychology and conversation analysis, phenomenology and psychoanalysis. Each addresses how a particular visual approach has contributed to existing social and psychological theory in their topic area, and clearly outline how they carried out their specific research project. The contributors draw on qualitative sources of verbal data, such as spoken interview, diaries and naturalistic conversation alongside their use of

visual material. This book provides a unique insight into the potential for combining methods in order to create new multi-modal methodologies, and it presents and analyses these with psychology specific questions in mind. The range of topics covered includes sexuality, identity, group processes, child development, forensic psychology, race, and gender, making this volume a vital contribution to psychology, sociology and gender studies.

Ethnobotany of Tuberculosis in Laos Bethany Gwen Elkington, Djaja Djendoel Soejarto, Kongmany Sydara, 2014-11-11 This book highlights the common ground between biomedicine and traditional healing. Because of the destruction of forests, the degradation of old palm leaf manuscripts, and decreasing interest in traditional medicine by younger generations, it is becoming more and more important to record medicinal plant knowledge before it is lost. This research provides written and photographic documentation of some of the medicinal plant knowledge held by the people of Laos. Translating and validating some of the power of traditional medicine used in Laos into biomedical terms through laboratory analyses may serve to demonstrate its importance in a global language. In this text, the translational research was performed through in vitro laboratory analyses of select plant species with a history to treat symptoms of TB. The processes of plant collection, extraction, biological assays, and isolation/elucidation are also described and detailed in the Biochemical Validation section. The biomedical discoveries explored in, Ethnobotany of Tuberculosis in Laos, stresses the

importance of conserving and sustaining our natural ecosystems for medicinal preservation and utilization.

Wounded Lions Ronald A. Smith, 2016-04-15 The Jerry Sandusky child molestation case stunned the nation. As subsequent revelations uncovered an athletic program operating free of oversight, university officials faced criminal charges while unprecedented NCAA sanctions hammered Penn State football and blackened the reputation of coach Joe Paterno. In *Wounded Lions*, acclaimed sport historian and longtime Penn State professor Ronald A. Smith draws from university archives to answer the How? and Why? at the heart of the scandal. The Sandusky case was far from the first example of illegal behavior related to the football program--or the university's attempts to suppress news of it. As Smith shows, decades of infighting among administrators, alumni, trustees, faculty, and coaches established policies intended to protect the university, and the football team considered synonymous with its name, at all costs. If the habits predated Paterno, they also became sanctified during his tenure. Smith names names to show how abuses of power warped the Penn State Way even with hires like women's basketball coach Rene Portland, who allegedly practiced sexual bias against players for decades. Smith also details a system that concealed Sandusky's horrific acts just as deftly as it whitewashed years of rules violations, coaching malfeasance, and player crime while Paterno set records and raised hundreds of millions of dollars for the university.

Handbook of Metallurgical Process Design George E. Totten,Kiyoshi Funatani,Lin Xie,2004-05-25 Reviewing an extensive array of procedures in hot and cold forming, casting, heat treatment, machining, and surface engineering of steel and aluminum, this comprehensive reference explores a vast range of processes relating to metallurgical component design-enhancing the production and the properties of engineered components while reducing manufacturing costs. It surveys the role of computer simulation in alloy design and its impact on material structure and mechanical properties such as fatigue and wear. It also discusses alloy design for various materials, including steel, iron, aluminum, magnesium, titanium, super alloy compositions and copper.

How Tobacco Smoke Causes Disease ,2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

Faking It Devon McCormack,Riley Hart,2017-01-29 There's never a dull moment at Metropolis...the condominium known for having the hottest openly gay tenants in town. The boys of Metropolis are always on the prowl for a good time. They like their drinks heavy and their tricks easy. *Faking It* is a steamy gay romance packed with comedy and topped off with a sweet happily ever after.

Chemical Products and Processes Konrad Hungerbühler,Justin M. Boucher,Cecilia Pereira,Thomas Roiss,Martin Scheringer,2021-03-17 This

textbook provides both students and professionals alike with a transdisciplinary and comprehensive foundation to design responsible chemical products and processes that protect human health and the environment. It serves as a compact guide that brings together knowledge and tools from across multiple disciplines. Readers are introduced to a set of core topics with focus placed on basic technical methods and tools (including life cycle assessment, product and process risk assessment, and thermal safety concepts) as well as on important normative topics (including philosophical, societal, and business perspectives in addition to current environmental and safety legislation). Developed in collaboration with industry partners, this textbook also provides a workable, illustrative case study that guides readers through applying the fundamentals learned to the production and application of a real-world chemical product. Building upon the success of its first German edition published in 1998, this latest edition has been significantly updated and expanded to reflect developments over the past two decades. Its publication comes at a key time when the volume and pace of global chemical production is dramatically increasing, and the rise of social media and informed citizen scientists make the dialogue with stakeholders even more important and demanding. This textbook is a valuable resource for both the current and next generation of scientists and engineers that will be tasked with addressing the many challenges and opportunities that are appearing as a result. Covering a wide range of interconnected topics at a

fundamental level applicable across scientific study programs and professions, this textbook fills a need not met by many of the other more specialized textbooks currently available.

Uncertainty in Pharmacology Adam LaCaze, Barbara Osimani, 2020-02-20 This volume covers a wide range of topics concerning methodological, epistemological, and regulatory-ethical issues around pharmacology. The book focuses in particular on the diverse sources of uncertainty, the different kinds of uncertainty that there are, and the diverse ways in which these uncertainties are (or could be) addressed. Compared with the more basic sciences, such as chemistry or biology, pharmacology works across diverse observable levels of reality: although the first step in the causal chain leading to the therapeutic outcome takes place at the biochemical level, the end-effect is a clinically observable result—which is influenced not only by biological actions, but also psychological and social phenomena. Issues of causality and evidence must be treated with these specific aspects in mind. In covering these issues, the book opens up a common domain of investigation which intersects the deeply intertwined dimensions of pharmacological research, pharmaceutical regulation and the related economic environment. The book is a collective endeavour with in-depth contributions from experts in pharmacology, philosophy of medicine, statistics, scientific methodology, formal and social epistemology, working in constant dialogue across disciplinary boundaries.
