*Factual Fictions* Leonora Flis, 2010-08-11 *Factual Fictions: Narrative Truth and the Contemporary American Documentary Novel* focuses on contemporary American documentary narratives, specifically the documentary novel, as it re-emerged in the 1960s and later developed into various other forms. The book explores the connections between the documentary novel and the concurrent rise of New Journalism (a.k.a. "literary journalism") in the United States, situating the two genres in the cultural context of the tumultuous 1960s and an emerging postmodern ethos. Flis makes a comprehensive analysis of texts by Truman Capote, Norman Mailer, John Berendt, and Don DeLillo, while tackling discussions on various theoretical complexities with assurance and rigor. Interested in the precarious divide between fact and fiction, the author productively complicates traditional notions of the two poles. Furthermore, the book examines parallels between contemporary Slovene documentary narratives and their American counterparts. Flis's work, with its systematic and innovative approach to the subject matter, adds an important historical dimension to the developing field of literary journalism studies as well as to the more established area of 20th Century American literature.

**Hybrid Warfare** Ralph Thiele, 2021-11-08 Hybrid warfare is becoming a long-term strategic challenge for NATO and the EU. This book examines its conceptual foundations, actors and technologies from a holistic, systemic perspective. In particular, new, disruptive technologies have a catalytic effect on hybrid methods and tools. 19 Technologies prove to be particularly relevant. They improve the initial conditions for hybrid action, expand the arsenal of hybrid actors and improve the scope and prospects for success of their activities.

*Genetic Nature/Culture* Prof. Alan H. Goodman, Prof. Deborah Heath, M. Susan Lindee, 2003-11-06 The so-called science wars pit science against culture, and nowhere is the struggle more contentious—or more fraught with paradox—than in the burgeoning realm of genetics. A constructive response, and a welcome intervention, this volume brings together biological and cultural anthropologists to conduct an interdisciplinary dialogue that provokes and instructs even as it bridges the science/culture divide. Individual essays address issues raised by the science, politics, and history of race, evolution, and identity; genetically modified organisms and genetic diseases; gene work and ethics; and the boundary between humans and animals. The result is an entree to the complicated nexus of questions prompted by the power and importance of genetics and genetic thinking, and the dynamic connections linking culture, biology, nature, and technoscience. The volume offers critical perspectives on science and culture, with contributions that span disciplinary divisions and arguments grounded in both biological perspectives and cultural analysis. An invaluable resource and a provocative introduction to new research and thinking on the uses and study of genetics, *Genetic Nature/Culture* is a model of fruitful dialogue, presenting the quandaries faced by scholars on both sides of the two-cultures debate.

*The Oxford Handbook of War* Julian Lindley-French, Yves Boyer, 2012-01-19 The Oxford Handbook of War is the definitive analysis of war in the twenty-first century. With over forty senior authors from academia, government and the armed forces world-wide the Handbook explores the history, theory, ethics and practice of war. The Handbook first considers the fundamental causes of war, before reflecting on the moral and legal aspects of war. Theories on the practice of war lead into an analysis of the strategic conduct of war and non Western ways of war. The heart of the Handbook is a compelling analysis of the military conduct of war which is juxtaposed with consideration of technology, economy, industry, and war. In conclusion the volume looks to the future of this apparently perennial feature of human interaction.

**Bioethics and Social Reality**, 2005-01-01 This book explores the many connections that bioethical thinking has with social reality. Bioethics, if it is to be effective, must engage with and address the actualities of modern life: policies, regulations, markets, opinions, and technological advances. In these original contributions fifteen notable scholars working in the North West of England take on this challenge. The series *Values in Bioethics* makes available original philosophical books in all areas of bioethics, including medical and nursing ethics, health care ethics, research

ethics, environmental ethics, and global bioethics.

**The Literature of Georgia** Donald Rayfield,2013-12-16 The first comprehensive and objective history of the literature of Georgia, revealed to be unique among those of the former Byzantine and Russian empires, both in its quality and its 1500 years' history. It is examined in the context of the extraordinarily diverse influences which affected it - from Greek and Persian to Russian and modern European literature, and the folklore of the Caucasus.

**Teaching 20th-century European History** Robert Stradling,2001-01-01 Produced for the Council of Europe project Learning and teaching about the history of Europe in the 20th century, this book concentrates on the how rather than the what of teaching. Besides a study of selected themes and topics, it covers the teaching of sensitive issues, the reading of visual archives, analysing history on television and the Internet and assessing new technologies. Some of these new sources have not been made part of standard teacher training, yet they have a powerful role in the way young people perceive the past. The author is a Senior Research Fellow at Leirsinn Research Centre, University of Highlands and Islands Millennium Institute.

**Toward Sustainable Agricultural Systems in the 21st Century** National Research Council,Division on Earth and Life Studies,Board on Agriculture and Natural Resources,Committee on Twenty-First Century Systems Agriculture,2010-07-25 In the last 20 years, there has been a remarkable emergence of innovations and technological advances that are generating promising changes and opportunities for sustainable agriculture, yet at the same time the agricultural sector worldwide faces numerous daunting challenges. Not only is the agricultural sector expected to produce adequate food, fiber, and feed, and contribute to biofuels to meet the needs of a rising global population, it is expected to do so under increasingly scarce natural resources and climate change. Growing awareness of the unintended impacts associated with some agricultural production practices has led to heightened societal expectations for improved environmental, community, labor, and animal welfare standards in agriculture. *Toward Sustainable Agricultural Systems in the 21st Century* assesses the scientific evidence for the strengths and weaknesses of different production, marketing, and policy approaches for improving and reducing the costs and unintended consequences of agricultural production. It discusses the principles underlying farming systems and practices that could improve the sustainability. It also explores how those lessons learned could be applied to agriculture in different regional and international settings, with an emphasis on sub-Saharan Africa. By focusing on a systems approach to improving the sustainability of U.S. agriculture, this book can have a profound impact on the development and implementation of sustainable farming systems. *Toward Sustainable Agricultural Systems in the 21st Century* serves as a valuable resource for policy makers, farmers, experts in food production and agribusiness, and federal regulatory agencies.

**12 Steps to Raw Foods** Victoria Boutenko,2009-03-03 Why do we overeat time and time again? Why do we make poor diet choices while we want to be healthy? What makes losing weight so difficult? These and many other vital questions are addressed in *12 Steps to Raw Foods* in an open and sincere dialogue. Based on the latest scientific research, Victoria Boutenko explains the numerous benefits of choosing a diet of fresh rather than cooked foods. This book contains self-tests and questionnaires that help the reader to determine if they have hidden eating patterns that undermine their health. Using examples from life, the author explores the most common reasons for people to make unhealthy eating choices. Rather than simply praising the benefits of raw foods, this book offers helpful tips and coping techniques to form and maintain new, healthy patterns. Learn how to make a raw food restaurant card that makes dining with co-workers easy and enjoyable. Discover three magic sentences that enable you to refuse your mother-in-law's apple pie without offending her. Find out how to sustain your chosen diet while traveling. These are only a few of the many scenarios that Boutenko outlines. Written in a convenient 12-step format, this book guides the reader through the most significant physical, psychological, and spiritual phases of the transition from cooked to raw foods. Embracing the raw food lifestyle is more than simply turning off the stove. Such a radical change in the way we eat affects all aspects of life. Boutenko touches on the human

relationship with nature, the value of supporting others, and the importance of living in harmony with people who don't share the same point of view on eating. Already a classic, this enhanced second edition is aimed at anyone interested in improving their health through diet.

**A New Zealand Book of Beasts** Annie Potts, Philip Armstrong, Deidre Brown, 2014-03-01

Touching on indigenous Maori relationships with the now-extinct, flightless moa; the attitudes of Pakeha, or European, settlers toward sheep; the iconography of whales and dolphins; the problems of pest-control; and the pleasures of pet-keeping, this modern-day bestiary is a fascinating study of human & animal relations. In the book's four parts, the authors unravel the contradictory ways New Zealanders nurture and eradicate, glorify and demonize, cherish and devour, and describe and imagine animals. The study brings together insights from New Zealand's arts and literature, popular culture, historiography, media, and everyday life to describe and analyze their interactions with nga kararehe and nga manu, the beasts and birds of the land. In doing so, it illuminates fundamental aspects of New Zealand society: how New Zealanders understand their own identities and those of others; how they regard, inhabit, and make use of the natural world; and how they think about what they buy, eat, wear, watch, and read. Rich, multifaceted, and engaging, *A New Zealand Book of Beasts* satisfyingly explores how culture both shapes and is shaped by the & "beasts &" of Aotearoa.

Little-Known Asian Animals with a Promising Economic Future National Research

Council, Research Coun National Research Council, 2002-06 This National Academy of Sciences report describes banteng, madura, mithan, yak, kouprey, babirusa, javan warty pig, and other obscure but possibly globally useful wild and domesticated animals that are indigenous to Asia.

**Biotechnology in Animal Husbandry** R. Renaville, A. Burny, 2006-04-11 Animal biotechnology is a broad umbrella encompassing the polarities of fundamental and applied research including molecular modelling, molecular and quantitative genetics, gene manipulation, development of diagnostics and vaccines and manipulation of tissue or digestion metabolism by growth promoters. Although animal biotechnology in the broadest sense is not new, what is new is the level of complexity and precision involved in scientists' current ability to manipulate living organisms. This new book sets out to show that the important ideas in animal biotechnology are exciting and relevant to everyday experience. It represents an important update of the literature for research workers, lecturers, and advisers in animal science, but is also a core text for advanced undergraduate courses in animal science and biotechnology. It will be an essential acquisition for librarians in agriculture and veterinary science.

The Impact of European Institutions on the Rule of Law and Democracy Matej Avbelj, Jernej

Letnar Cernic, 2020-04-30 Since 2010 the European Union has been plagued by crises of democracy and the rule of law, which have been spreading from Central and Eastern Europe (CEE), catching many by surprise. This book argues that the professed success of the 2004 big bang enlargement mirrored the Potemkin villages erected in the new Member States on their accession to Europe. Slovenia is a prime example. Since its independence and throughout the accession process, Slovenia has been portrayed as the poster child of the 'New Europe'. This book claims that the widely shared narrative of the Slovenian EU dream is a myth. In many ways, Slovenia has fared even worse than its contemporary, constitutionally-backsliding, CEE counterparts. The book's discussion of the depth and breadth of the democratic crises in Slovenia should contribute to a critical intellectual awakening and better comprehension of the real causes of the present crises across the other CEE Member States, which threaten the viability of the EU and Council of Europe projects. It is only on the basis of this improved understanding that the crises can be appropriately addressed at national,

transnational and supranational levels.

The Acoustics of Wood (1995) Voichita Bucur,2017-11-22 Acoustics of Wood offers a detailed treatment of numerous topics that are valuable to those working with wood in architecture, engineering, acoustics, and the crafting of musical instruments. It presents a comprehensive account of the progress and current knowledge concerning wood acoustics, outlining the anatomy and physiology of wood and the specific applications in which its acoustic properties are relevant. Acoustics of Wood reviews state-of-the-art measurement systems and includes material that has not been widely published. Divided into three main parts, the book describes environmental acoustics, presents acoustics methods for the characterization of the elastic behavior of wood, and discusses acoustic methods for the assessment of wood quality.

**A Social History of the Media** Asa Briggs,Peter Burke,2005-07-29 It will be an ideal text for students in history, media and cultural studies and journalism, but it will also appeal to a wide general readership.

**Digital Era Governance** Patrick Dunleavy,Helen Margetts,Simon Bastow,Jane Tinkler,2008-06-19 Government information systems are big business (costing over 1 per cent of GDP a year). They are critical to all aspects of public policy and governmental operations. Governments spend billions on them - for instance, the UK alone commits £14 billion a year to public sector IT operations. Yet governments do not generally develop or run their own systems, instead relying on private sector computer services providers to run large, long-run contracts to provide IT. Some of the biggest companies in the world (IBM, EDS, Lockheed Martin, etc) have made this a core market. The book shows how governments in some countries (the USA, Canada and Netherlands) have maintained much more effective policies than others (in the UK, Japan and Australia). It shows how public managers need to retain and develop their own IT expertise and to carefully maintain well-contested markets if they are to deliver value for money in their dealings with the very powerful global IT industry. This book describes how a critical aspect of the modern state is managed, or in some cases mismanaged. It will be vital reading for public managers, IT professionals, and business executives alike, as well as for students of modern government, business, and information studies.
