Guidelines for the Transport and Handling of  
Limited Amounts of Hazardous and Noxious Liquid  
Substances in Bulk on Offshore Support Vessels  
,2007 This publication covers all of the relevant  
guidelines in full, providing guidance to shippers  
carrying hazardous and noxious materials. The  
guidelines have been developed in accordance with  
the provisions set forth in regulation 11(2) of  
Annex II to MARPOL 73/78 and in recognition of the  
need for standards which provide an alternative to  
the International Code for the Construction and  
Equipment of Ships Carrying Dangerous Chemicals in  
Bulk and the International Code for the  
Construction and Equipment of Ships Carrying  
Liquefied Gases in Bulk for these types of  
vessels.--Publisher's description.

*Anti-fouling Systems* International Maritime  
Organization,2005 The harmful effects of anti-  
fouling systems were considered by the  
International Maritime Organization's Marine  
Environment Protection Committee (MEPC) for the

first time in 1988, when the Paris Commission requested the MEPC to consider the need for measures to restrict the use of tributyltin (TBT) compounds on seagoing vessels. As a first step, the Committee at its thirtieth session in 1990 adopted resolution MEPC.46 (30) on ``Measures to control potential adverse impacts associated with the use of tributyltin compounds in anti-fouling paints'', which recommends that IMO Member Governments adopt measures to eliminate the use of anti-fouling paint containing TBT on non-aluminium-hulled vessels of less than 25'm in length and eliminate the use of TBT-based anti-fouling paints with an average leaching rate of more than four micrograms of organotin per square centimetre per day. These recommendations were intended to be interim measures until IMO could consider a possible total prohibition of TBT compounds in anti-fouling systems. From 1990 onwards, MEPC was presented with TBT monitoring results which reconfirmed the toxicity of TBT compounds, as well as with information on existing alternatives, including their effectiveness and the risk posed to the marine environment by these systems. This 2005 edition, reproduces the texts of the International Convention on the Control of Harmful Anti-Fouling Systems on Ships, 2001, the four Conference resolutions, and the Guidelines developed and adopted by the Organization.

**IMDG Code** International Maritime Organization, 2006 The International Maritime Dangerous Goods Code relates to the safe carriage of dangerous goods by sea, but does not include all details of procedures for packing of dangerous

goods or actions to take in the event of an emergency or accident involving personnel who handle goods at sea. These aspects are covered by the publications that are associated with the IMDG Code, which are included in this Supplement. Within a continuing process of revision of publications that are relevant to the IMDG Code, the EmS Guide: Emergency Response Procedures for Ships Carrying Dangerous Goods has been further amended at the 81st session of MSC in May 2006 and the details have been described in MSC.1/Circ.1025/Add/1. The International Code for the Safe Carriage of Packaged Irradiated Nuclear Fuel, Plutonium and High-Level Radioactive Wastes on Board Ships has been amended. This Supplement also includes texts of the Medical First Aid Guide, descriptions of the reporting procedures for incidents involving dangerous goods, harmful substances and/or marine pollutants, the IMO/ILO/UNECE Guidelines for Packing of Cargo Transport Units, the Recommendations on the Safe Use of Pesticides in Ships and other appropriate Assembly resolutions, resolutions and Circulars of the Maritime Safety Committee and Circulars of the Facilitation Committee and of the Sub-Committee on Dangerous Goods, Solid Cargoes and Containers.
