*Archaeology 2.0* Eric C. Kansa,Sarah Witcher Kansa,Ethan Watrall,2011-11-01 How is the Web transforming the professional practice of archaeology? And as archaeologists accustomed to dealing with deep time, how can we best understand the possibilities and limitations of the Web in meeting the specialized needs of professionals in this field? These are among the many questions posed and addressed in *Archaeology 2.0: New Approaches to Communication and Collaboration*, edited by Eric Kansa, Sarah Witcher Kansa, and Ethan Watrall. With contributions from a range of experts in archaeology and technology, this volume is organized around four key topics that illuminate how the revolution in communications technology reverberates across the discipline: approaches to information retrieval and information access; practical and theoretical concerns inherent in design choices for archaeology's computing infrastructure; collaboration through the development of new technologies that connect field-based researchers and specialists within an international archaeological community and scholarly communications issues, with an emphasis on concerns over sustainability and preservation imperatives. This book not only describes practices that attempt to mitigate some of the problems associated with the Web, such as information overload and disinformation, it also presents compelling case studies of actual digital projects--many of which are rich in structured data and multimedia content or focused on generating content from the field in real time, and all of which demonstrate how the Web can and is being used to transform archaeological communications into forms that are more open, inclusive, and participatory. Above all, this volume aims to share these experiences to provide useful guidance for other researchers interested in applying technology to archaeology.

*One Water: Downtown Tucson 2050* Courtney Crosson,

*Archaeology* Barry W. Cunliffe,Wendy Davies,Colin Renfrew,2002 Twenty-six leading scholars from around the world have come together to celebrate the strengths, the energies and the sheer intellectual excitement of their discipline. They unashamedly proclaim that over the last hundred years archaeology has transformed itself from a genteel antiquarianpursuit, deeply rooted in the classical tradition, to a rigorous and demanding discipline, spanning the humanities and the sciences, yet at the same time one widely accessible to the public at large. The contributors show how our understanding of the past has changed, reveal the exciting ideas under current debate, and offer their visions of the future.The result is a remarkable overview of world archaeology, focusing on new and unexpected themes at the cutting edge of the discipline.

**The Byzantine Empire** Mary Boone,2012-09-30 The Byzantine Empire's existence (A.D. 330-1453) was marked by religious devotion, political treason, bloody struggles, and impressive artwork. Its long-lasting influence continues to play a role in the world's trade, education, politics, architecture, and the arts. Its rulers and people also worked tirelessly to spread Christianity throughout the land. These pages contain stories of the Byzantine Empire's many strengths and its eventual demise.

*Handbook of Gender in Archaeology* Sarah M. Nelson,2006 First reference work to explore the research on gender in archaeology.

**Women in Antiquity** Sarah Milledge Nelson,2007-03-01 Archaeology is one of our most powerful sources of new information about the past, about the lives of our ancient and not-so-ancient ancestors. The contributors to *Women in Antiquity* consider the theoretical problems involved in discerning what the archaeological evidence tells us about gender roles in antiquity. The book includes chapters on the history of gender research, historical texts, mortuary analysis, household remains, hierarchy, and ethnoarchaeology, with each chapter teasing out the inherent difficulty in interpreting ancient evidence as well as the promise of new understanding. *Women in Antiquity* offers a fresh, accessible account of how we might grasp the ways in which sexual roles and identities shaped the past.

**Racial Fever** Eliza Slavet,2009-08-25 What makes a person Jewish? Why do some people feel they have physically inherited the memories of their ancestors? Is there any way to think about race without reducing it to racism or to physical differences? These questions are at the heart of *Racial Fever: Freud and the Jewish Question*. In his final book, *Moses and Monotheism*, Freud hinted at the complexities of Jewishness and insisted that Moses was really an Egyptian. Slavet moves far beyond debates about how Freud felt about Judaism; instead, she explores what he wrote about Jewishness: what it is, how it is transmitted, and how it has survived. Freud's Moses emerges as the culmination of his work on transference, telepathy, and intergenerational transmission, and on the relationships between memory and its rivals: history, heredity, and fantasy. Writing on the eve of the Holocaust, Freud proposed that Jewishness is constituted by the inheritance of ancestral memories; thus, regardless of any attempts to repress, suppress, or repudiate Jewishness, Jews will remain Jewish and Judaism will survive, for better and for worse.

*Historical Dictionary of Polynesia* Robert D. Craig,2002 Alphabetically arranged entries, ranging in length from a paragraph to several pages, describe the important people, food, native animals, politics, history, and culture of Polynesia, which is made up of more than a dozen countries, including American Samoa, French Polynesia, Hawaii, New Zealand, and Tonga. The book includes a four-page list of acronyms, an extensive chronology, and appendices with the names of Polynesian islands and lists of political rulers of the various states through history. Author Craig (emeritus, history, Alaska Pacific U.) has created several other dictionaries on Oceania, Polynesian mythology, and Hawaii. Annotation copyrighted by Book News, Inc., Portland, OR.

**Ian McDonald: Chaga / Evolution's Store** John Lennard,2007-01-01 Ian McDonald is a major SF writer, whose *River of Gods* (2004) won the British Science Fiction Association award for Best Novel, and was shortlisted for the corresponding Hugo, Arthur C. Clarke, and British Fantasy Society awards. *Chaga* (published in the U.

**Teaching Strategies for Ethnic Studies** James A. Banks,2009 Presents resources and strategies teachers may use to incorporate content and concepts about racial, ethnic, and cultural groups into their mainstream curriculums, and provides information on the major ethnic groups in the U.S.

**The American Neptune** ,1998 A quarterly journal of maritime history.

**Romani Writing** Paola Toninato,2013-12-17 The Roma (commonly known as Gypsies) have largely been depicted in writings and in popular culture as an illiterate group. However, as *Romani Writing* shows, the Roma have a deep understanding of literacy and its implications, and use writing for a range of different purposes. While some Romani writers adopt an oral use of the written medium, which aims at opposing and deconstructing anti-Gypsy stereotypes, other Romani authors use writing for purposes of identity-building. Writing is for Romani activists and intellectuals a key factor in establishing a shared identity and introducing a common language that transcends linguistic and geographical boundaries between different Romani groups. Romani authors, acting in-between different cultures and communication systems, regard writing as an act of cultural mediation through which they are able to rewrite Gypsy images and negotiate their identity while retaining their ethnic specificity. Indeed, *Romani Writing* demonstrates how Romani authors have started to create self-images in which the Roma are no longer portrayed as objects, but become subjects of written representation.

*The Bloomsbury Companion to Islamic Studies* Clinton Bennett,2014-11-20 The Bloomsbury Companion to Islamic Studies is a comprehensive one volume reference guide to Islam and study in this area. A team of leading international scholars - Muslim and non-Muslim - cover important aspects of study in the field, providing readers with a complete and accessible source of information to the wide range of methodologies and theoretical principles involved. Presenting Islam as a variegated tradition, key essays from the contributors demonstrate how it is subject to different interpretations, with no single version privileged. In this volume, Islam is treated as a lived experience, not only as theoretical ideal or textual tradition. Featuring a series of indispensable research tools, including a substantial A-Z of key terms and concepts, chronology and a detailed list of resources, this is the essential reference guide for anyone working in Islamic Studies.

**Religious Sites in America** Mary Ellen Snodgrass,2000-10-26 Includes the Emmanuel A.M.E. Church, the French Huguenot Church, Kahal Kadosh Beth Elohim, Mepkin Abbey, and the Meher Spiritual Center in Myrtle Beach.

*The Shakespearean International Yearbook* Professor Tom Bishop,Professor Alexa Huang,Dr Brett D Hirsch,Professor Hugh Craig,2014-08-28 In 2002, for the second volume of this journal, Ian Lancashire reflected on the state of computing in Shakespeare. The decade since his review has seen dramatic change in the web of ‘digital Shakespeares’. This issue’s special section on Digital Shakespeares reflects on these developments and achievements, highlights current research in the field, and speculates on future directions.
