**American Military History Volume 1** Army Center of Military History,2016-06-05 American Military History provides the United States Army-in particular, its young officers, NCOs, and cadets-with a comprehensive but brief account of its past. The Center of Military History first published this work in 1956 as a textbook for senior ROTC courses. Since then it has gone through a number of updates and revisions, but the primary intent has remained the same. Support for military history education has always been a principal mission of the Center, and this new edition of an invaluable history furthers that purpose. The history of an active organization tends to expand rapidly as the organization grows larger and more complex. The period since the Vietnam War, at which point the most recent edition ended, has been a significant one for the Army, a busy period of expanding roles and missions and of fundamental organizational changes. In particular, the explosion of missions and deployments since 11 September 2001 has necessitated the creation of additional, open-ended chapters in the story of the U.S. Army in action. This first volume covers the Army's history from its birth in 1775 to the eve of World War I. By 1917, the United States was already a world power. The Army had sent large expeditionary forces beyond the American hemisphere, and at the beginning of the new century Secretary of War Elihu Root had proposed changes and reforms that within a generation would shape the Army of the future. But world war-global war-was still to come. The second volume of this new edition will take up that story and extend it into the twenty-first century and the early years of the war on terrorism and includes an analysis of the wars in Afghanistan and Iraq up to January 2009.

**At the Epicentre** Christine Loh,2004-01-01 What was really happening as Hong Kong struggled with SARS? In *At the Epicentre*, the story of those extraordinary weeks unfolds with all its drama - personal, national and international, political, medical and scientific. The authors give us the whole picture: from a day-by-day calendar of events to the experiences of a SARS-sufferer; from the heroic efforts of the medical staff in the hospitals to the work of the pioneering global network of laboratories that the World Health Organisation (WHO) created; from the amazing shift to openness of the Chinese authorities to a detailed study of how the global media covered the story. It is a story of individuals, of Dr Gregory Cheng recounting how it felt to have SARS, of the concentrated and intense work of Professor Malik Peiris as he struggled to identify the virus, of Dr David Heyman of the WHO as he dealt with intense political pressures yet moved the international effort along at high speed. The impact of SARS on Hong Kong was enormous and far-reaching. *At the Epicentre* explores the economic consequences, the way the community responded, and what might be the long-term political implications for Hong Kong, for China and for the international community. The authors are rigorous but fair in their criticisms, recognizing that what seems clear now was not always so in the heat of the battle. But most important are the lessons they draw from the events and experiences for the next time, for the authors all recognize that SARS is just the first global epidemic of the new century.

Pathology and Genetics of Head and Neck Tumours World Health Organization,International Agency for Research on Cancer,2005 This concise reference book provides an international standard for pathologists and oncologists and will serve as an indispensable guide for use in the design of studies monitoring response to therapy and clinical outcome. Sections on all WHO-recognized neoplasms and their variants include new ICD-O codes, incidence, age and sex distribution, location, clinical signs and symptoms, pathology, genetics, and predictive factors. This volume covers tumours of the nasal cavity and paranasal sinuses, of the nasopharynx, of the hypopharynx, larynx and trachea, of the oral cavity and oropharynx, of salivary glands, as well as odontogenic tumours, tumours of the ear, the paraganglionic system, and inherited tumour syndromes. Each entity is extensively discussed with information on clinicopathological, epidemiological, immunophenotypic and genetic aspects of these diseases.

CHENG,2013-07-01 Covering the issues about political, economic, social, education and more, this book examines how critical the government is when handling challenges from past to current. World Report on Ageing and Health World Health Organization,2015-10-22 The WHO World report on ageing and health is not for the book shelf it is a living breathing testament to all older people who have fought for their voice to be heard at all levels of government across disciplines and sectors. - Mr Bjarne Hastrup President International Federation on Ageing and CEO DaneAge This report outlines a framework for action to foster Healthy Ageing built around the new concept of functional ability. This will require a transformation of health systems away from disease based curative models and towards the provision of older-person-centred and integrated care. It will require the development sometimes from nothing of comprehensive systems of long term care. It will require a coordinated response from many other sectors and multiple levels of government. And it will need to draw on better ways of measuring and monitoring the health and functioning of older populations. These actions are likely to be a sound investment in society's future. A future that gives older people the freedom to live lives that previous generations might never have imagined. The World report on ageing and health responds to these challenges by recommending equally profound changes in the way health policies for ageing populations are formulated and services are provided. As the foundation for its recommendations the report looks at what the latest evidence has to say about the ageing process noting that many common perceptions and assumptions about older people are based on outdated stereotypes. The report's recommendations are anchored in the evidence comprehensive and forward-looking yet eminently practical. Throughout examples of experiences from different countries are used to illustrate how specific problems can be addressed through innovation solutions. Topics explored range from strategies to deliver comprehensive and person-centred services to older populations to policies that enable older people to live in comfort and safety to ways to correct the problems and injustices inherent in current systems for long-term care.

*Fascism Past and Present, West and East* Roger Griffin,Werner Loh,Andreas Umland,2006-04-27 In the opinion of some historians the era of fascism ended with the deaths of Mussolini and Hitler. Yet the debate about its nature as a historical phenomenon and its value as a term of historical analysis continues to rage with ever greater intensity, each major attempt to resolve it producing different patterns of support, dissent, and even hostility, from academic colleagues. Nevertheless, a number of developments since 1945 not only complicate the methodological and definitional issues even further, but make it ever more desirable that politicians, journalists, lawyers, and the general public can turn to experts for a heuristically useful and broadly consensual definition of the term. These developments include: the emergence of a highly prolific European New Right, the rise of radical right populist parties, the flourishing of ultra-nationalist movements in the former Soviet empire, the radicalization of some currents of Islam and Hinduism into potent political forces, and the upsurge of religious terrorism. Most monographs and articles attempting to establish what is meant by fascism are written from a unilateral authoritative perspective, and the intense academic

controversy the term provokes has to be gleaned from reviews and conference discussions. The uniqueness of this book is that it provides exceptional insights into the cut-and-thrust of the controversy as it unfolds on numerous fronts simultaneously, clarifying salient points of difference and moving towards some degree of consensus. Twenty-nine established academics were invited to engage with an article by Roger Griffin, one of the most influential theorists in the study of generic fascism in the Anglophone world. The resulting debate progressed through two 'rounds' of critique and reply, forming a fascinating patchwork of consensus and sometimes heated disagreement. In a spin-off from the original discussion of Griffin's concept of fascism, a second exchange documented here focuses on the issue of fascist ideology in contemporary Russia. This collection is essential reading for all those who realize the need to provide the term 'fascism' with theoretical rigor, analytical precision, and empirical content despite the complex issues it raises, and for any specialist who wants to participate in fascist studies within an international forum of expertise. The book will change the way in which historians and political scientists think about fascism, and make the debate about the threat it poses to infant democracies like Russia more incisive not just for academics, but for politicians, journalists, and the wider public.

**East Asian Economic Integration** Ross P. Buckley, Richard Weixing Hu, Douglas W. Arner, 2011-01-01 'This book offers a fascinating exploration of the contradictions of East Asian economic integration: a topic of enormous contemporary significance to observers of world political and economic affairs. The collection provides an unusually rigorous and systematic treatment of this important topic, drawing on contributions from an impressive array of experts. It will provide a valuable resource for students, scholars and other observers seeking deeper understanding of the contemporary dynamics and challenges of East Asian integration.' - Kate MacDonald, University of Melbourne, Australia 'East Asia is a crucial part of the global economy. This book analyses three key elements of East Asian economic integration: trade, investment and international finance. The authors are leading experts in their fields. Their book represents an important addition to the literature on a subject of fundamental importance both regionally and globally.' - Bradley J. Condon, ITAM, Mexico City This book analyses recent developments and likely future paths for trade and financial integration in East Asia. It suggests a more coherent, balanced way forward for regional economic integration and analyses implications for institution building in East Asia. East Asia has achieved a high degree of intra-regional trade, investment and GDP correlation, through an expanding web of free trade agreements and production networks. However, financially, most regional economies are linked more closely to North America and Europe than to each other. As trade integration has accelerated, financial and monetary integration has not kept pace. East Asian Economic Integration analyses potential reasons and remedies for this phenomenon through a multidisciplinary framework of law, politics and economics. This comprehensive book will appeal to researchers and students in political science, international relations, trade law, international finance law, and regional studies generally. It will also be of great interest to regional

**Islamization and Activism in Malaysia** Julian C. H. Lee, 2010 Islamization and Activism in Malaysia examines aspects of the increasing political and social profile of Islam in Malaysia and describes how different kinds of activists in Malaysia have sought to protect fundamental liberties and to improve the state of democracy in Malaysia. In particular, focus is paid to activists who engage with electoral process, the law and the public sphere, and in particular, to movements that cut across or combine these realms of action. Spanning the period of the Prime Ministership of Abdullah Badawi, Julian C. H. Lee's grounded analysis examines the most important issues of that period including the freedom of religion case of Lina Joy, the Islamic state debate, and events surrounding the 8 March 2008 general elections.

Pathology and Genetics of Tumours of Haematopoietic and Lymphoid Tissues World Health Organization, 2001 This is the third volume in the new World Health Organization series on histological and genetic typing of tumours. Tumours of the haematopoietic and lymphoid tissues are covered. This was a collaborative project of the European Association for Haematopathology and the Society for Haematopathology and others. The WHO classification is based on the principles defined in the Revised European-American Classification of Lymphoid Neoplasms (REAL) classification. Over 50 pathologists from around the world were involved in the project and proponents of all major lymphoma and leukaemia classifications have agreed to accept the WHO as the standard classification of haematological malignancies. So this classification represents the first true world wide consensus of haematologic malignancies. Colour photographs, magnetic resonance and ultrasound images and CT scans are included.

**Underground Front** Christine Loh, 2018-11-01 *Underground Front* is a pioneering examination of the role that the Chinese Communist Party has played in Hong Kong since the creation of the party in 1921, through to the present day. The second edition goes into greater depth on the party's view on "one country, two systems", "patriotism", and "elections". The introduction has been extensively revised and the concluding chapter has been completely rewritten in order to give a thorough account of the post-1997 governance and political system in Hong Kong, and where challenges lie. Christine Loh endeavours to keep the data and the materials up to date and to include the discussion of some recent events in Hong Kong. The appendices on the key targets of the party's united front activities also make the book an especially useful read for all who are interested in Hong Kong history and politics, and the history of modern China. 'Although the author calls herself an "outsider", this book provides such a distinctly incisive analysis that even an "insider" will pale by comparison. Christine Loh's exposition of the Communist Party's co-optation and persuasion is particularly revealing for anyone not versed in communist-speak. A must-read for anyone who cares for Hong Kong—simply because the Communist Party in Hong Kong is a heavyweight player in shaping our future.' —Ching Cheong 'Authoritative, thoroughly researched and lucidly written, Christine Loh's work must be read by everyone who wants to make sense of the Chinese Communist Party's agenda in Hong Kong. This book is remarkable for its fair-mindedness in evaluating the party's record. She provides an absorbing account of its leaders' hard-headed pragmatism in tolerating this outpost of colonial and capitalism during the Cold War and the Cultural Revolution. Her analysis of the party's involvement in contemporary Hong Kong is an impressive contribution to our understanding of Beijing's expanding involvement in Hong Kong affairs. The author has achieved a notable breakthrough with this fascinating study of a political organisation whose role and influence in Hong Kong have hitherto been shrouded in secrecy.' —Leo Goodstadt

**Inception Point: The Use Of Learning And Development To Reform The Singapore Public Service** Low James, 2018-03-16 *Inception Point: The Use of Learning and Development to Reform the Singapore Public Service* fills a gap in current literature on Singapore's modernisation. While the political leadership of the late Prime Minister Lee Kuan Yew and his People's Action Party (PAP) government were key to

Singapore's modernisation, the role of policy implementation was one shouldered by the Singapore Public Service, a story thus far neglected in literature. Inception Point argues that the Singapore Public Service used executive development and training to introduce reforms across the bureaucracy. In so doing, the bureaucracy constantly adjusted itself to help modernise Singapore. In the 40 years between decolonisation in 1959 and 2001, when the training arm of the bureaucracy became a statutory board, training had been used firstly, to socialise the bureaucracy away from its colonial-era organisational culture to prepare it for the tasks of nation-building. Subsequently, civil servants were mobilised into an 'economic general staff' through training and development, to lead the Singapore developmental state in the 1970s and the 1980s. The Public Service for the 21st Century (PS21) reforms in the 1990s was the epitome in harnessing development and training for reforms across the bureaucracy. Contents: Acknowledgements Abbreviations Introduction Neglect: The Origins of Singapore's Administration and Training (1819-1959) Early Political Socialisation: The Political Study Centre and Staff Training (1959-1969) Toward Managing the Developmental State The Staff Training Institute (1971-1975) Symbolism and Tinkering: The Civil Service Staff Development Institute and the Civil Service Institute (1975-1996) The First Dedicated Leadership Training Initiative: Civil Service College (1993-1996) Instrument for Reforms: Aligning the Civil Service College for PS21 (1996-2001) Conclusion: Training and Development as Inception Point of Reforms Sources and Bibliography Index Readership: Students and professionals interested in the history of the civil service in Singapore, interested in reforms for civil service in general. Keywords: Reforms; Learning and Development; Training and Development; Executive Development Bureaucracy; Public Administration; Governance; Leadership; Talent Management; Personnel Management; Human Resource Management; Modernisation; Development Studies Review: Key Features: This book is the first academic treatment of the administrative history of an important central agency in the Singapore Public Service It uses new primary sources including archival records which have never been cited or published, and dedicated interviews with key players during the period, including a minister, several permanent secretaries and numerous senior officers This book provides an academic treatment of the administrative history of an agency in the Singapore Public Service. Numerous government agencies have published souvenir-type or corporate-style books which included snippets of their evolution. This book is the first which employs an academically rigorous approach to examine the development of an agency in the Singapore Public Service This book is definitive work on the role of learning and executive development and reforms in the Singapore Public Service, being a pioneering work in these fields. By featuring the erstwhile underdeveloped role played by the Public Service in Singapore's modernisation, the book also draws out deeper texture beyond the current narrative

**Introduction to the Hong Kong Basic Law** Danny Gittings, 2013-07-01 Effective since China's resumption of sovereignty on 1 July 1997, the Hong Kong Basic Law lays down the general policies and system of government for Hong Kong under the one country, two systems formula. It guarantees Hong Kong a high degree of autonomy, enshrines the rights and freedoms of residents, and preserves a separate common law system with an independent judiciary. This introduction traces the origins of the Hong Kong Basic Law and the concepts and legal issues that surround it. Drawing on the experience of the first 15 years, it then analyses the content of the Hong Kong Basic Law, especially in relation to Hong Kong's political system, the judiciary, and human rights. Intended especially for students at all levels in law, politics, and other disciplines, this book—the only introductory guide of its kind to the subject—will also appeal to the general reader interested in Hong Kong's experience under one country, two systems. Danny Gittings's Introduction to the Hong Kong Basic Law makes a significant contribution to an important subject. It is expressed in reader-friendly terms. The insights that it provides are of value not only to lawyers but also to the general public. —The Hon. Mr. Justice Kemal Bokhary, Permanent Judge of the Hong Kong Court of Final Appeal (1997-2012), Non-Permanent Judge (2012- ). This well-researched and very readable introduction explains the history, practices and future of the Basic Law—Hong Kong's key constitutional document. It also explores how far the Basic Law is able to address the many political and legal issues now facing Hong Kong. The book is suitable for a wide range of readers. Students of Hong Kong law at all levels will find it essential reading. General readers with an interest in Hong Kong's governance will find in it a lucid and accurate guide—and a timely one as the debate about implementing democracy intensifies. —Professor Fu Hualing, Faculty of Law, University of Hong Kong. Many of us approach law books with trepidation. But Gittings, a legal academic, used to be a journalist and this shows in his ability to make the book accessible to the general reader. [...] The Basic Law will continue to be central to issues facing the city for years to come. This book enables the reader to quickly acquire a much better understanding of them. — South China Morning Post As Professor Gittings points out in his book, which includes a chapter on what might happen after Hong Kong's 50-year autonomy ends, readability was a key aim. Acronyms are kept to a minimum and details set up neatly and comprehensively in footnotes so that the main text is kept as clean as possible. — Hong Kong Lawyer

**China's Environmental Challenges** Judith Shapiro, 2013-04-17 China's huge environmental challenges are significant for us all. They affect not only the health and well-being of China but the very future of the planet. In this trailblazing book, noted China specialist and environmentalist Judith Shapiro investigates China's struggle to achieve sustainable development against a backdrop of acute rural poverty and soaring middle class consumption. Using five core analytical concepts to explore the complexities of this struggle - the implications of globalization, the challenges of governance; contested national identity, the evolution of civil society and problems of environmental justice and equity - Shapiro poses a number of pressing questions: Do the Chinese people have the right to the higher living standards enjoyed in the developed world? Are China's environmental problems so severe that they may shake the government's stability, legitimacy and control? To what extent are China's environmental problems due to patterns of Western consumption? And in a world of increasing limits on resources and pollution sinks, is it even possible to build an equitable system in which people enjoy equal access to resources without taking them from successive generations, from the poor, or from other species? China and the planet are at a pivotal moment; the path towards a more sustainable development model is still open. But - as Shapiro persuasively argues - making this choice will require humility, creativity, and a rejection of business as usual. The window of opportunity will not be open much longer. Chapter 1 - 'The Big Picture' - is available online.
