Yearbook of International Organizations 1999-2000 Ed 99-2000,2000-01-30 The latest edition of this standard international reference work provides detailed information for over 32,000 organizations active in over 225 countries. It covers everything from intergovernmental and national bodies to conferences and religious orders and fraternities. Volume 3: Global Action Networks is an overview of the range and network of activities of the international organizations themselves -- organized alphabetically by subject and by region. Similar to a yellow pages, it groups international and regional bodies under 4,300 categories of common ideas, aims, and activities.

Economic Sanctions in International Law and Practice Masahiko Asada,2019-11-07 Providing perspectives from a range of experts, including international lawyers, political scientists, and practitioners, this book assesses current theory and practice of economic sanctions, discussing current legal and political challenges faced by the international community. It examines both the implementation of sanctions by major powers – the United States, the European Union, and Japan – as well as assessing the impact of those sanctions through case studies of Russia, Iran, Syria, and North Korea. Balancing theoretical analysis of legal considerations with national and regional level empirical analysis, it also includes coverage of sanctions issues by the UN Security Council and the EU, as well as the extraterritorial application of sanctions. A valuable reference for academics and practitioners, Economic Sanctions in International Law and Practice will be useful to those working in the fields of international law, diplomacy, and international political economy.

The Palestinian Military Hillel Frisch,2010-10-04 This book analyzes Palestinian attempts to create an organized military force from the period of the Mandate up to the present day. Beginning with a comparative overview of the relationship between insurgent movements and the quest to build up a standard military, the book looks, first, at how the 1936 revolt galvanized the Palestinian leadership to attempt to create a military. It then goes on to examines other major topics such as: the 1948 failure to create an organized armed force; Palestinian participation in other Arab armed forces; the creation of the PLA; attempts to develop a security apparatus after Oslo; and, finally, the question of security reform and peace-making. The book concludes by identifying the lessons from the Palestinian experience that can be applied in promoting healthy civil-military relations within political entities located in major conflict zones.

Managing Openness Mona Haddad,Ben Shepherd,2011 The global financial crisis triggered a broad reassessment of economic integration policies in developed and developing countries worldwide. The crisis-induced collapse in trade was the sharpest ever since World War II, affecting all countries and all product categories. A huge shock to the trading system, combined with severe macroeconomic instability, makes it natural for policymakers to call into question the basic underlying assumptions of trade liberalization and openness. In particular, outward-oriented or export-led growth strategies are being reassessed as openness is increasingly associated with greater volatility. However, it is crucial not to lose sight of the dynamic benefits that openness can offer. Examples include technology transfer, increased competitive pressure that reduces markups and improves efficiency, and economies of scale. The real question is how to manage outward-oriented strategies so as to maximize the benefits of openness while minimizing risks. This book aims to contribute to this important and ongoing policy debate, bringing together recent empirical work on the trade collapse, its causes and consequences, and the broader trade policy agenda in the post-crisis environment. It addresses critical policy issues revolving around the topic of outward-oriented growth strategy, including policy instruments that help manage risks associated with outward-orientation, lessons learned from the crisis for particular countries and regions, and how emerging trade policy issues such as climate change, commodities, global production networking, and migration affect the prospects for recovery and outward-oriented growth.

The Battle over a Civil State Limor Lavie,2018-06-25 Traces the genealogy of the Western philosophic concept of the civil state, how that concept

was assimilated into Egyptian political thought, and how it affected the 2013 coup against President Mursi. How is the concept of the civil state understood in Arab countries? In *The Battle over a Civil State*, Limor Lavie examines how this important concept, which originated in Western philosophy, became incorporated into Arab discourse. The civil state as understood in Arab political discourse, Lavie argues, attempts to bridge Islamic history and culture with modernity. It is an attempt to forge a middle ground between a purely theocratic rule and a purely secular rule, and a solution for the tensions between a desire to catch up with global modernization and democratization processes and the desire to reject those same processes. In the political discourse of most of the Arab Spring countries, the concept of the civil state played a pivotal role. In the public debate over the character of Egypt, in particular, following the January 25, 2011 uprising, the demand to establish a civil state was shared by all the political currents. However, when these currents sought to set out basic guidelines for Egypt's future, it soon became clear that they were far from reaching a consensus, and that the concept of the civil state was at the heart of the controversy between them. The struggle over Egypt's civil character in the post-Mubarak era was the main reason for the turbulence the country experienced on June 30, 2013—leading to the ouster of President Muhammad Mursi. Throughout, the book presents new insights on Egypt and Arab political thought. It's a welcome contribution to the study of modern Egypt, generally, and the history of concepts in the Arab world, particularly. □ □ Rami Ginat, author of *Egypt and the Struggle for Power in Sudan: From World War II to Nasserism*

International Perspectives on Spinal Cord Injury World Health Organization, International Spinal Cord Society, 2013 Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to people with spinal cord injury and their families. The aims of International perspectives on spinal cord injury are to: ---assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with the lived experience of people with spinal cord injury; ---make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.

The UN Friendly Relations Declaration at 50 Jorge E. Viñuales, 2020-10-08 The year 2020 marks the 75th anniversary of the United Nations Organisation, and the 50th anniversary of the United Nations Friendly Relations Declaration, which states the fundamental principles of the international legal order. In commemoration, some of the world's most prominent international law scholars from all continents have come together to offer a comprehensive study of the fundamental principles of international law. Each chapter in this volume reflects decades of experience, work and reflection by the most authoritative voices of the field. At the same time, the book is an invitation to end narrow specialisation and re-engage with the

wider body of rules and processes that lie at the foundations of the international legal order.

Microfluidics and Nanofluidics Handbook Sushanta K. Mitra,Suman Chakraborty,2016-04-19 This comprehensive handbook presents fundamental aspects, fabrication techniques, introductory materials on microbiology and chemistry, measurement techniques, and applications of microfluidics and nanofluidics. The second volume focuses on topics related to experimental and numerical methods. It also covers fabrication and applications in a variety of areas, from aerospace to biological systems. Reflecting the inherent nature of microfluidics and nanofluidics, the book includes as much interdisciplinary knowledge as possible. It provides the fundamental science background for newcomers and advanced techniques and concepts for experienced researchers and professionals.

Wastewater and Biosolids Management Ioannis K. Kalavrouziotis,2017-06-15 Wastewater and Biosolids Management covers a wide range of current, new and emerging topics in wastewater and biosolids. The book addresses the theoretical and practical aspect of the reuse and looks to advance our knowledge on wastewater reuse and its application in agricultural production. The book aims to present existing modern information about wastewater reuse management based on earlier literature on the one hand and recent research developments, many of which have not so far been implemented into actual practice on the other. It combines the practical and theoretical knowledge about 'wastewater and biosolids management' and in this sense it is useful for researchers, students, academicians as well as for professionals.

Crossing National Borders 安娜·瓦西利耶娃,Anna Vassilieva,2005 International migration and other types of cross-border movement of people are becoming an important part of international relations in Northeast Asia. In this particular study, experts on China, Japan, Korea, Mongolia and Russia examine the political, economic, social and cultural dimensions of the interaction between border-crossing individuals and host communities, highlighting the

challenges that face national and local leaders in each country and suggesting needed changes in national and international policies. The authors analyze population trends and migration patterns in each country: Chinese migration to the Russian Far East, Chinese, Koreans, and Russians in Japan, North Koreans in China, and migration issues in South Korea and Mongolia. The book introduces a wealth of empirical material and insight to both international migration studies and Northeast Asian area studies.

Netherlands Yearbook of International Law 2016 Martin Kuijer, Wouter Werner, 2017-12-13 International law holds a paradoxical position with territory. Most rules of international law are traditionally based on the notion of State territory, and territoriality still significantly shapes our contemporary legal system. At the same time, new developments have challenged territory as the main organising principle in international relations. Three trends in particular have affected the role of territoriality in international law: the move towards functional regimes, the rise of cosmopolitan projects claiming to transgress state boundaries, and the development of technologies resulting in the need to address intangible, non-territorial, phenomena. Yet, notwithstanding some profound changes, it remains impossible to think of international law without a territorial locus. If international law is undergoing changes, this implies a reconfiguration of territory, but not a move beyond it. The Netherlands Yearbook of International Law was first published in 1970. It offers a forum for the publication of scholarly articles of a conceptual nature in a varying thematic area of public international law.

Water Demand Management David Butler, Fayyaz Ali Memon, 2005-12-01 A common characteristic of water demand in urban areas worldwide is its inexorable rise over many years; continued growth is projected over coming decades. The chief influencing factors are population growth and migration, together with changes in lifestyle, demographic structure and the possible effects of climate change (the detailed implications of climate change are not yet clear, and anyway will depend on global location, but must at least increase the uncertainty in security of supply). This is compounded by rapid development, creeping urbanization and, in some places, rising standards of living. Meeting this increasing demand from existing resources is self-evidently an uphill struggle, particularly in water stressed/scarcely regions in the developed and developing world alike. There are typically two potential responses: either supply-side (meeting demand with new resources) or demand-side (managing consumptive demand itself to postpone or avoid the need to develop new resources). There is considerable pressure from the general public, regulatory agencies, and some governments to minimise the impacts of new supply projects (e.g. building new reservoirs or inter-regional transfer schemes), implying the emphasis should be shifted towards managing water demand by best utilising the water that is already available. *Water Demand Management* has been prepared by the academic, government and industry network WATERSAVE. The concept of the book is to assemble a comprehensive picture of demand management topics ranging from technical to social and legal aspects, through expert critical literature reviews. The depth and breadth of coverage is a unique contribution to the field and the book will be an invaluable information source for practitioners and researchers, including water utility engineers/planners, environmental regulators, equipment and service providers, and postgraduates. Contents Water consumption trends and demand forecasting techniques The technology, design and utility of rainwater catchment systems Understanding greywater treatment Water conservation products Water conservation and sewerage systems An introduction to life cycle and rebound effects in water systems Developing a strategy for managing losses in water distribution networks Demand management in developing countries Drivers and barriers for water conservation and reuse in the UK The economics of water demand management Legislation and regulation mandating and influencing the efficient use of water in England and Wales Consumer reactions to water conservation policy instruments Decision support tools for water demand management

Materials for Civil and Construction Engineers: Pearson New International Edition Michael S. Mamlouk, John P. Zaniwski, 2013-08-27 For courses in Civil Engineering Materials, Construction Materials, and Construction Methods and Materials offered in Civil, Environmental, or Construction engineering departments. This introduction gives students a basic understanding of the material selection process and the behavior of materials — a

fundamental requirement for all civil and construction engineers performing design, construction, and maintenance. The authors cover the various materials used by civil and construction engineers in one useful reference, limiting the vast amount of information available to the introductory level, concentrating on current practices, and extracting information that is relevant to the general education of civil and construction engineers. A large number of experiments, figures, sample problems, test methods, and homework problems gives students opportunity for practice and review.
