Angela Scarino,Anthony Liddicoat

Second Language Classrooms Craig Chaudron,1988 This important new book provides a critical overview of recent classroom-centered research and its implications for the teaching and learning of languages. Chaudron synthesizes and evaluates crucial research about the way student and teacher behaviours affect language learning and discusses research methods. Second Language Classrooms will be of vital interest to researchers, language teachers, and curriculum specialists, as well as readers with a general interest in education, linguistics, sociology, or psychology.-- Font no determinada.

Language Teaching Methodology David Nunan,2000

Computer Currents George Beekman,1994 Unlike many of the available introductory computer texts, *Computer Currents* focuses on the human side of computing instead of business applications, and emphasizes issues and trends rather than technical detail.

Teaching and Learning Languages Angela Scarino,Anthony Liddicoat,2009 ... a resource for reflecting on languages education, the role of languages teachers, and their programs and pedagogies in relation to contemporary educational understandings and contexts.

Classroom Instruction and Management Richard Arends,1997 *Classroom Instruction and Management* not only helps students develop a basic repertoire of teaching models, strategies, and skills but helps them to understand their theoretical and empirical foundations and shows them how to study these behaviors in field-based settings. Key features of this exciting new text include the following: content coverage, research focus, practical guidelines, end-of-chapter activities, and strategy instruction.
