Pawn Power in Chess Hans Kmoch, 2013-04-09 Profoundly original book demonstrates how basic relationships of one or two pawns constitute winning strategy. Multitude of examples illustrate theory. 182 diagrams. Index of games.

My System Aron Nimzowitsch, 2007 My System is at the top of a very short list of chess classics. This edition uses a brand-new translation that recreates the author's original intentions. For the first time an English-speaking audience can appreciate the true nature of this famous chess book.

Encyclopedia of American Indian History [4 volumes] Bruce E. Johansen, Barry M. Pritzker, 2007-07-23 This new four-volume encyclopedia is the most comprehensive and up-to-date resource available on the history of Native Americans, providing a lively, authoritative survey ranging from human origins to present-day controversies. From the origins of Native American cultures through the years of colonialism and non-Native expansion to the present, *Encyclopedia of American Indian History* brings the story of Native Americans to life like no other previous reference on the subject. Featuring the work of many of the field's foremost scholars, it explores this fundamental and foundational aspect of the American experience with extraordinary depth, breadth, and currency, carefully balancing the perspectives of both Native and non-Native Americans. *Encyclopedia of American Indian History* spans the centuries with three thematically organized volumes (covering the period from precontact through European colonization; the years of non-Native expansion (including Indian removal); and the modern era of reservations, reforms, and reclamation of semi-sovereignty). Each volume includes entries on key events, places, people, and

issues. The fourth volume is an alphabetically organized resource providing histories of Native American nations, as well as an extensive chronology, topic finder, bibliography, and glossary. For students, historians, or anyone interested in the Native American experience, *Encyclopedia of American Indian History* brings that experience to life in an unprecedented way.

Greening the Academy Samuel Fassbinder, Anthony Nocella, Richard Kahn, 2012-12-30 This is the academic Age of the Neoliberal Arts. Campuses—as places characterized by democratic debate and controversy, wide ranges of opinion typical of vibrant public spheres, and service to the larger society—are everywhere being creatively destroyed in order to accord with market and military models befitting the academic-industrial complex. While it has become increasingly clear that facilitating the sustainability movement is the great 21st century educational challenge at hand, this book asserts that it is both a dangerous and criminal development today that sustainability in higher education has come to be defined by the complex-friendly “green campus” initiatives of science, technology, engineering and management programs. By contrast, *Greening the Academy: Ecopedagogy Through the Liberal Arts* takes the standpoints of those working for environmental and ecological justice in order to critique the unsustainable disciplinary limitations within the humanities and social sciences, as well as provide tactical reconstructive openings toward an empowered liberal arts for sustainability. *Greening the Academy* thus hopes to speak back with a collective demand that sustainability education be defined as a critical and moral vocation comprised of the diverse types of humanistic study that will benefit the well-being of our emerging planetary community and its numerous common locales.

Earth and Faith Libby Bassett, John T. Brinkman, Kusumita Priscilla Pedersen, 2000

Resource Exploitation in Native North America Bruce E. Johansen, 2016-01-11 This wide-ranging survey of the environmental damage to Native American lands and peoples in North America—in recent times as well as previous decades—documents the continuing impact on the health, wellness, land, and communities of indigenous peoples. Beginning in the early 1950s, Native peoples were recruited to mine yellow dust—uranium—and then, over decades, died in large numbers of torturous cancers. Uranium-induced cancers have become the deadliest plague unleashed upon Native peoples of North America—one with grave consequences impacting generations of American Indian families. Today, resource-driven projects such as the Keystone XL pipeline continue to put the health and safety of American Indians at risk. Authored by an expert with 40 years of experience in the subject, this book documents the environmental provocations afflicting Native American peoples in the United States: from the toll of uranium mining on the Navajos to the devastation wrought by dioxin, PCBs, and other pollutants on the agricultural economy of the Akwesasne Mohawk reservation in northernmost New York. The detailed personal stories of human suffering will enable readers to grasp the seriousness of the injustices levied against Native peoples as a result of corporations' and governments' greed for natural resources.

Connecting Jesus to Social Justice Thomas Hughson, S.J., 2013-10-10 Connecting Jesus to Social Justice argues a doctrinally traditional, orthodox basis for Christian participation in the public sphere on behalf of social justice. The book addresses a situation internal to churches in the U.S. from a Catholic perspective yet not without analogies in other churches and Christian movements. This book is a contributive, as well as

distributive, idea of social justice from Catholic social teaching. The chapters take into account discussion on the public sphere and propose a theologically-principled, ecumenical and interreligious public for social justice.

Earthly Things Karen Bray, Heather Eaton, Whitney Bauman, 2023-10-03 Globalization and climate weirding are two of the leading phenomena that challenge and change the way we need to think and act within the planetary community. Modern Western understandings of human beings, animals, and the rest of the natural world and the subsequent technologies built on those understandings have thrown us into an array of social and ecological crises with planetary implications. Earthly Things: Immanence, New Materialisms, and Planetary Thinking, argues that more immanent or planetary ways of thinking and acting have great potential for re-thinking human-technology-animal-Earth relationships and for addressing problems of global climate weirding and other forms of ecological degradation. Older and often-marginalized forms of thought from animisms, shamanisms, and other religious traditions are joined by more recent forms of thinking with immanence such as the universe story, process thought, emergence theory, the new materialisms (NM's), object-oriented ontologies (OOO's), affect theory, and queer theory. This book maps out some of the connections and differences between immanent frameworks to provide some eco-intellectual commons for thinking within the planetary community, with a particular emphasis on making connections between more recent theories and older ideas of immanence found in many of the world's religious traditions. The authors in this volume met and worked together over five years, so the resulting volume reveals sustained and multifaceted perspectives on "thinking and acting with the planet."

Who Owns Religion? Laurie L. Patton, 2019 One afternoon, Laurie Patton, then chair of the religious studies department at her university, sat in her office collating death threats. A colleague had come under attack by members of the Hindu diaspora for a scholarly study that they judged offensive. A global petition demanded that the book be withdrawn, and threats against the author included explicit calls for his execution. This case is one of many in which the secular study of religion has scandalized-and been passionately refuted by-the very communities it had imagined itself embracing. Authors of seemingly arcane studies on subjects like the origins of the idea of Mother Earth or the sexual dynamics of mysticism have been targets of hate mail and topics of book-banning discussions. As a result, scholars of religion have struggled to describe their own work even to themselves. In this book, scholar and noted university administrator Laurie Patton looks at the cultural work of religious studies through scholars' clashes with religious communities, especially in the late 1980s and 90s. These kinds of controversies emerged with new frequency and passion during this period because of two conditions: 1) the rise of the multicultural politics of recognition, which changed the nature of debate in the public sphere and created the possibility for Patton calls eruptive public spaces; and 2) the emergence of the Internet, which changed the nature of readership. Others about whom scholars wrote to their colleagues were now also readers who could agree or condemn in public forums. These controversies were also fundamentally about something new: the very rights of secular, Western hermeneutics to interpret religions at all. Patton's book holds out hope that scholars can find a space for their work between the university and the communities they study. Their role, she suggests, is similar to that of the wise fool in many classical dramas and indeed in many religious

traditions. Scholars of religion have multiple masters and must move between them while speaking a truth that not everyone may be interested in hearing--

Justice in a Global Economy Pamela Brubaker, Rebecca Todd Peters, Laura A. Stivers, 2006-01-01 Today's complex social and economic problems leave many people in the affluent world feeling either overwhelmed or ambivalent. Even the small percentage of us who have examined the ethics behind our financial decisions and overcome the often-deterring factors of self-interest rarely know what to do to make any difference. By providing tools for examination and concrete actions for individuals, communities, and society at large, *Justice in a Global Economy* guides its readers through many of today's complex societal issues, including land use, immigration, corporate accountability, and environmental and economic justice. Beginning with a basic introduction to the impact of economic globalization, the book provides both critical assessments of the current political-economic structures and examples of people and communities who are actively working to transform society. Each chapter concludes with questions for discussion and reflection.

The Environmental Justice Reader Joni Adamson, Mei Mei Evans, Rachel Stein, 2022-02-08 From the First National People of Color Congress on Environmental Leadership to WTO street protests of the new millennium, environmental justice activists have challenged the mainstream movement by linking social inequalities to the uneven distribution of environmental dangers. Grassroots movements in poor communities and communities of color strive to protect neighborhoods and worksites from environmental degradation and struggle to gain equal access to the natural resources that sustain their cultures. This book examines environmental justice in its social, economic, political, and cultural dimensions in both local and

global contexts, with special attention paid to intersections of race, gender, and class inequality. The first book to link political studies, literary analysis, and teaching strategies, it offers a multivocal approach that combines perspectives from organizations such as the Southwest Network for Environmental and Economic Justice and the International Indigenous Treaty Council with the insights of such notable scholars as Devon Peña, Giovanna Di Chiro, and Valerie Kuletz, and also includes a range of newer voices in the field. This collection approaches environmental justice concerns from diverse geographical, ethnic, and disciplinary perspectives, always viewing environmental issues as integral to problems of social inequality and oppression. It offers new case studies of native Alaskans' protests over radiation poisoning; Hispanos' struggles to protect their land and water rights; Pacific Islanders' resistance to nuclear weapons testing and nuclear waste storage; and the efforts of women employees of maquiladoras to obtain safer living and working environments along the U.S.-Mexican border. The selections also include cultural analyses of environmental justice arts, such as community art and greening projects in inner-city Baltimore, and literary analyses of writers such as Jimmy Santiago Baca, Linda Hogan, Barbara Neely, Nez Perce orators, Ken Saro-Wiwa, and Karen Yamashita—artists who address issues such as toxicity and cancer, lead poisoning of urban African American communities, and Native American struggles to remove dams and save salmon. The book closes with a section of essays that offer models to teachers hoping to incorporate these issues and texts into their classrooms. By combining this array of perspectives, this book makes the field of environmental justice more accessible to scholars, students, and concerned readers.

Religion, Space, and the Environment Sigurd Bergmann, 2014-02-04 Religions often nurture important

skills that help believers locate themselves in the world. Religious perceptions, practices, emotions, and beliefs are closely interwoven with the environments from which they emerge. Sigurd Bergmann's driving emphasis here is to explore religion not in relation to, but as a part of the spatiality and movement within the environment from which it arises and is nurtured. *Religion, Space, and the Environment* emerges from the author's experiences in different places and continents over the past decade. At the book's heart lie the questions of how space, place, and religion amalgamate and how lived space and lived religion influence each other. Bergmann explores how religion and the memory of our past impact our lives in urban spaces; how the sacred geographies in Mayan and northeast Asian lands compare to modern eco-spirituality; and how human images and practices of moving in, with, and through the land are interwoven with the processes of colonization and sacralizing, and the practices of power and visions of the sacred, among other topics.

Indigenous Peoples and Environmental Issues Bruce E. Johansen, 2003-12-30 From Argentina to Zimbabwe, the industrialized world's encroachment on native lands has brought disastrous environmental harm to indigenous peoples. More than 170 native peoples around the world are facing life-and-death struggles to maintain environments threatened by oil spills, explosions, toxic chemicals, global warming, and other pollutants. This unique resource surveys those indigenous peoples and the environmental hazards that threaten their existence, providing a wealth of information not readily available elsewhere. Arranged geographically, each entry focuses on the peoples of a particular country and the environmental issues they face, from the global warming and toxic chemicals threatening the Arctic Inuits, to the logging

that is devastating indigenous habitats in Borneo. General entries overview such topics as climate change, dam sites, and Native American Concepts of Ecology. The 'Guide to Related Topics' and index provide access to recurring themes such as deforestation, hydroelectric power, mining, and land tenure.

"A Voyage on the North Sea" Rosalind E. Krauss, 2000-01 Here, Rosalind Krauss positions the work of Marcel Broodthaers within this alternative narrative. Referring to the artist's films, books, graphic design and museum 'fictions', she presents Broodthaers as standing at, and thus standing for, the 'complex' of the self-differing medium.

Ecological Indian Shepard Krech, Shepard Krech III, 1999 Krech (anthropology, Brown U.) treats such provocative issues as whether the Eden in which Native Americans are viewed as living prior to European contact was a feature of native environmentalism or simply low population density; indigenous use of fire; and the Indian role in near-extinctions of buffalo, deer, and beaver. He concludes that early Indians' culturally-mediated closeness with nature was not always congruent with modern conservation ideas, with implications for views of, and by, contemporary Indians. Adam Smith in Beijing Giovanni Arrighi, 2020-05-05 In the late eighteenth century, the political economist Adam Smith predicted an eventual equalization of power between the West and the territories it had conquered. In this magisterial new work, Giovanni Arrighi shows how China's extraordinary rise invites us to reassess radically the conventional reading of *The Wealth of Nations*. He examines how recent

US attempts to create the first truly global empire were conceived to counter China's spectacular economic success. Now America's disastrous failure in Iraq has made the People's Republic of China the true winner in the US War on Terror. China may soon become again the kind of noncapitalist market economy that Smith described, an event that will reconfigure world trade and the global balance of power.

The Undertaker Aleksandr Pushkin, 2021-03-01 The Undertaker is a supernatural gothic tale by Pushkin, which features Adrian Prokhorov, an undertaker, who comes to a new place. He is a very straight-forward man, and does not tolerate deviation from the norm. He is then invited to a wedding by his neighbours, where a lot of drinking is spent. The supernatural is just round the corner when a mishandled toast is proposed. The picturesque depiction of the danse macabre/walking-dead midnight party is exceptional, and Pushkin succeeds in portraying the horrifying aspect completely. A chilling story with a surprise ending that is not to be read after dark. Deservedly labelled the best Russian poet, Pushkin's short life (1799-1837) did not prevent him from ushering Russian literature into its modern era. A master of the vernacular language and multifarious and vivid writing style, Pushkin's oeuvre was of great influence to a whole legion of Russian writers and literary styles. Among his best-known works are the narrative poems *Ruslan and Ludmila* and *Eugene Onegin*, the drama *Boris Godunov*, several novels, short stories, and fairy

tales.
