Confronting Metaphor in Use Mara Sophia Zanotto, Lynne Cameron, Marilda do Couto Cavalcanti, 2008 It is timely for researchers to approach metaphor as social and situated, as a matter of language and discourse, and not just as a matter of thought. Over the last twenty five years, scholars have come to appreciate in depth the cognitive, motivated and embodied nature of metaphor, but have tended to background the linguistic form of metaphor and have largely ignored how this connects to its role in the discourses in which our lives are constructed and lived. This book brings language and social dimensions into the picture, offering snapshots of metaphor use in real language and in real lives across the very different cultures of Europe and Brazil and contributing to the theorizing of metaphor in discourse.

The Clash of Economic Ideas Lawrence H. White, 2012-04-09 The Clash of Economic Ideas interweaves the economic history of the last hundred years with the history of economic doctrines to understand how contrasting economic ideas have originated and developed over time to take their present forms. It traces the connections running from historical events to debates among economists, and from the ideas of academic writers to major experiments in economic policy. The treatment offers fresh perspectives on laissez faire, socialism and fascism; the Roaring Twenties, business cycle theories and the Great Depression; Institutionalism and the New Deal; the Keynesian Revolution; and war, nationalization and central planning. After 1945, the work explores the postwar revival of invisible-hand ideas; economic development and growth, with special attention to contrasting policies and thought in Germany and India; the gold standard, the interwar gold-exchange standard, the postwar Bretton Woods system and the Great Inflation; public goods and public choice; free trade versus protectionism; and finally fiscal policy and public debt.

New Paradigm in Macroeconomics R. Werner, 2005-03-21 Modern mainstream economics is attracting an increasing number of critics of its high degree of abstraction and lack of relevance to economic reality. Economists are calling for a better reflection of the reality of imperfect information, the role of banks and credit markets, the mechanisms of economic growth, the role of institutions and the possibility that markets may not clear. While it is one thing to find flaws in current mainstream economics, it is another to offer an alternative paradigm which, can explain as much as the old, but can also account for the many 'anomalies'. That is what this book attempts. Since one of the biggest empirical challenges to the 'old' paradigm has been raised by the second largest economy in the world - Japan - this book puts the proposed 'new paradigm' to the severe test of the Japanese macroeconomic reality.

Covering Globalization Anya Schiffrin, Amer Bisat, 2004-11-17 The first journalism textbook for reporters who cover finance and economics in developing and transitional countries, *Covering Globalization* is an essential guide to the pressing topics of our times. Written by economists from the Asian Development Bank and the International Monetary Fund as well as journalists who have worked for Dow Jones, the Financial Times, the New York Times, Fortune, and Reuters—and with an introduction by Nobel Laureate Joseph E. Stiglitz—this invaluable resource helps reporters write about subjects such as banking and banking crises, pension reform, privatization, trade agreements, central banks, the World Bank, sovereign debt restructuring, commodity markets, corporate governance, poverty-eradication programs, and the resource curse. Each chapter explains the basic economic principles and current thinking on a given topic and provides tips on what to look for when covering specific subjects; a way to structure business and economics stories; a way to use the Internet for reporting with links to more information online; extensive glossaries and much more.

A Political Economy of the United States, China, and India Shalendra D. Sharma, 2018-05-17 The precipitous rise in global and national economic inequality, which the inexorable force of globalization promised to address with affluence and abundance for all, has returned with a vengeance. The problem of worsening socioeconomic inequality and how best to ameliorate this pernicious resurgence occupies center stage of national and international politics. This study investigates the coexistence of high rates of economic growth and unparalleled prosperity (including a review of the decline in poverty levels in China and India and many other developing countries) with rises in income and wealth inequality in the United States, China, and India. This book examines the overall effectiveness of the measures taken by these three countries to address such anomalies, and what they should do to tackle the problem of widening inequality. This study breaks new ground by providing an original comparative analysis of the challenges facing the world's three major economies.

Bilateral Trade Agreements in the Asia-Pacific Vinod Aggarwal, Shujiro Urata, 2013-06-17 The Asia-Pacific region has witnessed a rapid rise in bilateral preferential trade agreements at the beginning of the twenty-first century. This trend could have potentially dramatic effects on the trading patterns of countries in the transpacific region and beyond. Some argue that these accords will spur multilateral negotiations, while others believe that they will irreparably damage the trading system. *Bilateral Trade Agreements in the Asia-Pacific* examines the underlying political and economic factors

driving these accords, based on a novel theoretical framework. Experts then provide overviews of political and economic trends in the region as well as detailed analysis of the trade strategies of Japan, China, Singapore, South Korea, Malaysia, Taiwan, Thailand, the United States and Mexico. By systematically evaluating and assessing the driving forces underlying the turn to bilateral trade agreements in the Asia-Pacific, this book provides the first comprehensive analysis of this crucial phenomenon. Growing numbers of countries both in the region and elsewhere in the world are now considering further negotiation of bilateral trade accords. Understanding how these arrangements will fit or conflict with existing institutions in the Asia-Pacific and the WTO makes this book imperative reading for policy-makers and scholars.

Free Trade Agreements Jeffrey J Schott, 2004-05-07 In this conference volume, distinguished economists and trade policymakers address the US initiatives to enter into free trade negotiations with a broad range of countries in the Asia-Pacific region, the Western Hemisphere, and Africa. The sheer number of these initiatives is unprecedented and has provoked major policy questions concerning US interests in the negotiations, the setting of priorities among the many contenders for concluding free trade agreements (FTAs) with the United States, the objectives of those trading partners, and the implications that these agreements could have for broader initiatives such as the Doha Round in the World Trade Organization and the Free Trade Area of the Americas. The papers in the volume were presented during a conference on FTAs and US trade policy, sponsored by the Institute in May 2003. The editor, Jeffrey Schott, summarizes the policy implications drawn from the conference papers and discussions, which are organized around several topics: the conceptual case for FTAs and how they have worked in the past; what FTAs imply for the broader global system; the specific agreements that are already being pursued (Australia, Central America, Morocco, southern Africa) or considered (ASEAN, Brazil, Egypt, Korea, and Taiwan). The volume includes a technical appendix with results of GTAP and gravity model simulations of the trade and welfare effects of the prospective agreements.

Capital Flows and Crises Barry J. Eichengreen, 2004 An analysis of the connections between capital flows and financial crises as well as between capital flows and economic growth.

The Corporate Greenhouse Doctor Yda Schreuder, 2013-07-04 As negotiations proceed for the post-Kyoto climate change regime, major obstacles stand in the path to their successful completion. The Corporate Greenhouse addresses the political economy of the climate change debate, questioning the disconnect between the current negotiation framework, based around the nation-state, and the neoliberal policies driving the world economy, organized around transnational corporations. Given the rapidly growing economic power and expanding carbon footprint of China, India and other developing economies, the debate on 'who is to blame, and who is to pay' can no longer be ignored. Carefully researched and sourced from original work and case studies, The Corporate Greenhouse explores the geopolitical division between North and South; questions the sustainability of capitalism in the current global economic environment; examines the impact of TNCs on worldwide CO2 emissions; and discusses the expected outcome of the EU Emissions Trading Scheme on corporate investment strategies. This timely book argues that treaties that fail to account properly for the activities of TNCs will

preclude effective, equitable solutions to the urgent issue of global climate change.

Guide to the WTO and GATT Autar Krishen Koul,2018-11-19 This book analyzes how today's system of international trade law and international economic relations has evolved over the last six decades. Focusing on the major innovations that came with the inception of the World Trade Organization (WTO) with its various agreements in 1994, it also provides in-depth commentary on the intense debate over important matters that remain unsettled. Topics covered include the WTO dispute settlement mechanism; the General Agreement on Trade in Services (OATS); the Agreement on Trade-Related Investment Measures (TRIMS); intellectual property rights – the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS); areas still covered by the General Agreement on Tariffs and Trade (GATT) 1947; the Most Favoured Nation (MFN) concept; special provisions relating to agriculture and textiles; sanitary and phytosanitary measures; technical barriers to trade; pre-shipment inspection; and import licensing procedures. The book would be an excellent resource for scholars as well as practitioners working in the field of international arbitration and trade laws.

Expert Knowledge in Global Trade Erin Hannah,James Scott,Silke Trommer,2015-08-27 This book explores tensions in global trade by examining the role of experts in generating, disseminating and legitimating knowledge about the possibilities of trade to work for global development. To this end, contributors assess authoritative claims on knowledge. They also consider structural features that uphold trade experts' monopoly over knowledge, such as expert language and legal and economic expertise. The chapters collectively explore the tensions between actors who seek to effect change and those who work to uphold the status quo, exacerbate asymmetries, and reinforce the dominant narrative of the global trade regime. The book addresses the following key overarching research questions: Who is considered to be a trade expert and how does one become a knowledge producer in global trade? How do experts acquire, disseminate and legitimate knowledge? What agendas are advanced by expert knowledge? How does the discourse generated within trade expertise serve to close off alternative institutional pathways

and modes of thinking? What potential exists for the emergence of more emancipatory global trade policies from contemporary developments in the field of trade expertise? This book will be of great interest to students and scholars of IPE, Trade Politics, International Relations, and International Organizations.
