Mail From Jail George Wesche,2023-02-23 The big mistake of my life stems from the drug culture that I was caught up in as part of my counterculture lifestyle. We all experimented with drugs, but I took it a bit farther by selling a bit on the side. One thing led to another, and the next thing you know, it became a full-time job. It got out of hand, and the next thing I knew I got busted. It was a horror show for the family, and I ended up being sentenced to sixty-three months at Allenwood Federal Prison Camp in Allenwood, Pennsylvania. All of the time I was locked up with plenty of time on my hands. I wrote letters chronicling everything. Two real good friends of mine and myself wrote weekly over the four or so years that I was away. Well, it turns out that both of my friends saved all of the letters that I wrote to them and when I got home they each handed me a bag full of my mail from jail. This book is a compilation of my experiences in jail. Some names have been changed to protect the innocent. Enjoy!

Philosophies and Practices of Emancipatory Nursing Paula N. Kagan,Marlaine C. Smith,Peggy L. Chinn,2014-07-17 *** Awarded First Place in the 2015 AJN Book of the Year Award in two categories - History and Public Policy and Professional Issues *** This anthology presents the philosophical and practice perspectives of nurse scholars whose works center on promoting nursing research, practice, and education within frameworks of social justice and critical theories. Social justice nursing is defined by the editors as nursing practice that is emancipatory and rests on the principle of praxis which is practice aimed at attaining social justice goals and outcomes that improve health experiences and conditions of individuals, their communities, and society. There is a lack in the nursing discipline of resources that contain praxis approaches and there is a need for new concepts, models, and theories that could encompass scholarship and practice aimed at purposive reformation of nursing, other health professions, and health care systems. Chapters bridge critical theoretical frameworks and nursing science in ways that are understandable and useful for practicing nurses and other health professionals in clinical settings, in academia, and in research. In this book, nurses' ideas and knowledge development efforts are not limited to problems and solutions emerging from the dominant discourse or traditions. The authors offer innovative ways to work towards establishing alternative forms of knowledge, capable of capturing both the roots and complexity of contemporary problems as distributed across a diversity of people and communities. It fills a significant gap in the literature and makes an exceptional contribution as a collection of new writings from some of the foremost nursing scholars whose works are informed by critical frameworks.
