Wireless Network Design Jeff Kennington,Eli Olinick,Dinesh Rajan,2010-11-10 This book surveys state-of-the-art optimization modeling for design, analysis, and management of wireless networks, such as cellular and wireless local area networks (LANs), and the services they deliver. The past two decades have seen a tremendous growth in the deployment and use of wireless networks. The current-generation wireless systems can provide mobile users with high-speed data services at rates substantially higher than those of the previous generation. As a result, the demand for mobile information services with high reliability, fast response times, and ubiquitous connectivity continues to increase rapidly. The optimization of system performance has become critically important both in terms of practical utility and commercial viability, and presents a rich area for research. In the editors' previous work on traditional wired networks, we have observed that designing low cost, survivable telecommunication networks involves extremely complicated processes. Commercial products available to help with this task typically have been based on simulation and/or proprietary heuristics. As demonstrated in this book, however, mathematical programming deserves a prominent place in the designer's toolkit. Convenient modeling languages and powerful optimization solvers have greatly facilitated the implementation of mathematical programming theory into the practice of commercial network design. These points are equally relevant and applicable in today's world of wireless network technology and design. But there are new issues as well: many wireless network design decisions, such as routing and facility/element location, must be dealt with in innovative ways that are unique and distinct from wired (fiber optic) networks. The book specifically treats the recent research and the use of modeling languages and network optimization techniques that are playing particularly important and distinctive roles in the wireless domain.

The Secret Society of Moses Flavio Barbiero,2010-01-19 A radical reexamination of Western history that suggests the descendants of Moses were the architects of the rise of the Roman Church and the ancestors of European aristocracy • Answers the inexplicable disappearance of all mention of Moses's descendants from the Bible • Reveals the key role played by Josephus Flavius in shaping early Christianity • Explains the connection of this secret priesthood to modern secret societies like the Freemasons After the book of Exodus, Moses's two sons and numerous descendants all vanish from the Bible. Flavio Barbiero's investigation of this strange absence and his study of the centuries-long power struggle between the priestly families fighting for control of the Temple of Jerusalem starts with the rebellion against Rome--and the emergence of Josephus Flavius, one of Moses's descendants, on the world stage. In AD 70 when the Temple in Jerusalem was destroyed by Titus Flavius and thousands of Jewish priests were exterminated, Josephus, now bearing his sponsor's last name, followed Titus Flavius to Rome with at least 250 relatives and friends. Here they were made Roman citizens but then subsequently disappeared from recorded history. Barbiero's careful study of early Christianity shows, however, that these surviving members of Moses's high-priest lineage succeeded in taking control of the nascent Roman Church and masterminded its extraordinary success. Using a wide range of evidence drawn from fields as disparate as archaeology, heraldry, and genetics, Barbiero shows how these descendants of Moses used the cult of Mithras to eventually seize control of the secular Roman authority as well. He then follows, step by step, the spread of the members of this secret priestly elite into what was to become the aristocracy of medieval Europe and how their influence continues to be felt in modern secret societies like Freemasonry.

Prophet of Discontent Jared A. Loggins,Andrew J. Douglas,2021-05-15 This book is openly available in digital formats thanks to a generous grant from the Andrew W. Mellon Foundation. Many of today's insurgent Black movements call for an end to racial capitalism. They take aim at policing and mass incarceration, the racial partitioning of workplaces and residential communities, the expropriation and underdevelopment of Black populations at home and abroad. Scholars and activists increasingly regard these practices as essential technologies of capital accumulation, evidence that capitalist societies past and present enshrine racial inequality as a matter of course. In *Prophet of Discontent*, Andrew J. Douglas and Jared A. Loggins invoke contemporary discourse on racial capitalism in a powerful reassessment of Martin Luther King Jr.'s thinking and legacy. Like today's organizers, King was more than a dreamer. He knew that his call for a "radical revolution of values" was complicated by the production and circulation of value under capitalism. He knew that the movement to build the beloved community required sophisticated analyses of capitalist imperialism, state violence, and racial formations, as well as unflinching solidarity with the struggles of the Black working class. Shining new light on King's largely implicit economic and political theories, and expanding appreciation of the Black radical tradition to which he belonged, Douglas and Loggins reconstruct, develop, and carry forward King's strikingly prescient critique of capitalist society.

The Future of Almost Everything Patrick Dixon,2015-08-27 From the man the Wall Street Journal describes as a 'global change guru', more than one hundred of the trends that touch every aspect of our lives. This new and updated edition looks even farther into the future, predicting trends past the first decades of the 22nd century. Patrick Dixon looks at how the future will be Fast, Urban, Tribal, Universal, Radical and Ethical - a future of boom and bust and great economic change as the emerging markets grow up; a future of great advances in medicine and also greater threats from viral epidemics; a future of political shocks and greater conflicts; a future in which people will strive for more privacy and businesses will change the way they relate to their staff and their customers; a future in which there will be driverless cars and solar power generated in the desert will power cities thousands of miles away. In this updated edition, Dixon shows how recent developments confirm his predictive scheme: Artificial intelligence and robotics - profound power and influence over our future world Beyond Brexit - the longer term future of the EU and UK The long-term impact of the MeToo movement The future of Truth - Fake News, propaganda and impact on democracy Presidential leadership - rise of powerful figureheads across the world, and potential future conflicts And in an entirely new chapter, Dixon extends his predictive horizon to see how the future will look one hundred years from now.

Matrixing Chi Al Case,2020-09-16 Matrixing is the first and only science of the martial arts. Matrixing has been used to resolve martial arts both common and rare, bringing new lights to ancient disciplines.In this book the science of matrixing is used to define chi power.Chi is a type of energy that permeates the universe. Actually, the universe is made of chi, thus, it is impossible for science and physics to define or measure chi in any way.With matrixing, however, it is possible to define, and measure, chi power. Further, in this book the author shares his most scientific methods for generating chi, and manipulating it. He does this through a profound study of the martial arts.About the author: Al Case began the martial arts in 1967. Since that time he has studied Kenpo, classical Karate, Wing Chun, Aikido, Northern Shaolin Ton Toi, Southern Shaolin Fut Ga, Tai Chi Chuan, Pa Kua Chang, indonesian weapons and more. He was a writer for the martial arts magazines, including a column in Inside Karate. He has written over 40 martial arts training manuals, and is the webmaster of MonsterMartialArts.com.

Salt in the Blood Patrick Dixon,Sheila Dixon,2021-06-24 “Everything creaks and bends in heavy seas – what will not bend will simply snap. So many times I wondered how much load we could carry in a powerful storm without breaking apart. If we flooded any faster I would drown in seconds.” Patrick Dixon spent years working as a doctor at University College Hospital, while his wife Sheila was a magistrate – high-pressure careers that demanded long hours away from their home, family and passion for sailing. It is a frustrating story many occasional sailors can relate to, but unlike most, Patrick and Sheila realised early enough that they could only bend so far before something snapped, they could only take on so much before they drowned. This is their story of how they made changes (some more challenging than others) that they knows other sailors could make too, regardless of where they are at the moment – how they changed their priorities but managed to sustain a new career that fitted in around life rather than the other way round. It is also the story of their personal journey, both physically (across the Atlantic and to little-visited corners of the Mediterranean) and metaphorically – how a doctor who treated cancer patients coped with a partner facing the same battle. Neither of them wanted to let that flood things either. Through their personal story, with plenty of mishaps that led to insights (both about sailing and life in general), and encounters that turned into opportunities, Patrick and Sheila explore the importance of prioritising the right things in life, and the simple benefits of travel. The book is packed with inspiring but practical advice for all those who have salt in the blood.

Haroun and the Sea of Stories Salman Rushdie,2014-04-23 It all begins with a letter. Fall in love with Penguin Drop Caps, a new series of twenty-six collectible and hardcover editions, each with a type cover showcasing a gorgeously illustrated letter of the alphabet. In a design collaboration between Jessica Hische and Penguin Art Director Paul Buckley, the series features unique cover art by Hische, a superstar in the world of type design and illustration, whose work has appeared everywhere from Tiffany & Co. to Wes Anderson's recent film Moonrise Kingdom to Penguin's own bestsellers Committed and Rules of Civility. With exclusive designs that have never before appeared on Hische's hugely popular Daily Drop Cap blog, the Penguin Drop Caps series debuted with an 'A' for Jane Austen's Pride and Prejudice, a 'B' for Charlotte Brönte's Jane Eyre, and a 'C' for Willa Cather's My Ántonia. It continues with more perennial classics, perfect to give as elegant gifts or to showcase on your own shelves. R is for Rushdie. Set in an exotic Eastern landscape peopled by magicians and fantastic talking animals, Salman Rushdie’s classic children’s novel Haroun and the Sea of Stories inhabits the same imaginative space as Gulliver’s Travels, Alice in Wonderland, and The Wizard of Oz. Haroun, a 12-year-old boy sets out on an adventure to restore the poisoned source of the sea of stories. On the way, he encounters many foes, all intent on draining the sea of all its storytelling powers.
