Mississippi Revival Roads Jason Beverly,2018-08-20 After receiving news that the cancer has spread and is incurable, Eddie Sullivan remains haunted by the tragic circumstances that have completely changed his life. Knowing that death is imminent, the retired police officer and his trusty canine, Baby, embark on a mystical road trip of revival from the Mississippi Gulf Coast to the Mississippi Delta. Along the way, the pair notch a few items off the bucket list, mend fractured relationships and visit some historical sights. In the master bathroom of their mid-eighties, ranch-style house, Eddie opens up to his wife, Carol, about his struggles with alcohol. He makes amends with his son, Evan, on a basketball court in Starkville. At a small café in downtown Oxford, Edward ends the stalemate with his daughter, Gracie, while they dance by the jukebox. He reconnects with his estranged father, Edward, in a Catholic church on the outskirts of Greenville. Despite a few challenges and supernatural occurrences during the journey, Eddie and Baby reach their final destination just before death appears.

Adoniram Judson Jason G. Duesing,2012-10-01 On February 19, 1812, Adoniram Judson, his wife Ann, and a few others set sail for the Far East from their American homeland. The launching of these missionaries by a newly formed outreach society marked the beginning of Americans formally joining the modern missions movement. With the advent of 2012 comes recognition of the bicentennial of Judson's departure and official start of the American missionary enterprise. This volume seeks to honor the life and mission of Judson while retelling his story for a new generation. With the occasion of the 200-year anniversary of Judson's departure as a fitting context for such

a presentation, the historians, theologians, and missiologists writing here under the guidance of editor Jason G. Duesing have endeavored not only to serve as Judson's biographers of past events, but also as his interpreters of what they hope will take place in the present and future. Contributors include Paige Patterson, Michael A. G. Haykin, Robert Caldwell, Nathan A. Finn, Candi Finch, Keith E. Eitel, Gregory A. Wills, and Daniel L. Akin.

Bearing Fruit Jason Pfladderer, 2021-10-26 A few months after the death of her husband, and no longer speaking to her son, Mary is called back to the church to look after a young orphan. Like Mary, Jerry McFarland has suffered great loss in his life: he lost his parents in a car accident at a young age, and now his grandmother and only family has passed away, leaving him without a caretaker. At the urging of the new reverend, Mary agrees to take Jerry in and raise him as her own. But having Jerry around the house reminds Mary of the son she lost - and it doesn't help that he won't stop sending letters and calling home in a plea to convince his mother to speak to him. Can Mary overcome the pain of her past and let Jerry into her heart? And can she make peace with the ghosts of the past when Christian's life becomes inescapably intertwined with young Jerry's? *Bearing Fruit* is the fourth book in a four-part series about the Grant family, each focusing on a different family member as they come to peace with the sins of the father.

A Century Turns William J. Bennett, 2010-01-11 A state of the union address as the twentieth century turned into the twenty-first—from the New York Times—bestselling author of *America, the Last Best Hope*. In *A Century Turns*, William J. Bennett explores America's recent and momentous history—the contentious election of 1988, the fall of the Berlin Wall and the collapse of global Communism, the presidency of William Jefferson Clinton, the technological and commercial boom of the 1990s, the war on terror, and the election of America's first black president. Surveying politics and pop culture, economics and technology, war and religion, Bennett pieces together the players, the personalities, the feats and the failures that transformed key moments in the American story. And he captures it all with piercing insight and unrelenting optimism.

America: The Last Best Hope (Volume III) William J. Bennett, 2011-10-11 Endeavors to present the history of the United States from a balanced perspective, describing both positive and negative events, and illuminating the powerful leaders who steered the country on the path of freedom.

Mirror, Mirror on the Wall Jean Stockdale, 2007-12-01 Jason was 2-years old when we brought his brother, Dawson, home from the hospital. I had fallen in love with mothering my first child. Honestly, how much tougher could rearing two children instead of one be? I thought to myself as I lay the tightly wound bundle on the couch. Jason timidly tiptoed over to see the new baby. I pulled the receiving blanket back from Dawson's face as Jason stared in wonder at his little brother. So far, so good, I whispered tentatively to my husband, Craig, as he hung back by the door. This won't be so difficult, I said confidently as I tried to bolster my sagging self-assurance. Lots of women have two babies in two years. We will be fine. Like hollow promises my words fell onto our hardwood floor. Neither Craig nor I believed a single word I had said. Sadly, we both knew better. Although I have now reared two

sons and launched them off into the adult world, I have not forgotten how I, as a new mom, felt. I loved God with all of my heart. My single-minded desire was to train my boys in the Lord. Without question my goal was to see my boys reach an early decision for Christ and to live for Him all the days of their lives. However, my own insecurities surfaced; I struggled with feelings of inadequacy. I have never forgotten the anxiety of those early days of mothering as I fought to catch my breath and find my bearings. Life seemed to be spinning wildly out of control and sucking me into the vortex of its madness Those deeply imbedded memories of my greatest joy intermingled with fretfulness and fear compel me to write a Bible study geared toward mothers of children of all ages. Mothering is just plain tough. There, I said it. It is full of twists and turns, ups and downs, jubilation and tribulation, ecstasy and insanity. I am sure you can relate Moms are on-call 24-hours a day, with no sick leave and no vacation days. On some days rearing children is closely akin to herding cats. Dealing with sleep deprivation and a temperamental 2-year-old can push you to the edge. A stubborn school-aged child can strain your last nerve to the breaking point. A testy teen can make you crazy. What's a mom to do? My heart's desire is to stand alongside you and to point you to Jesus. He is the source of our help and our hope. Take a good, long look into the mirror of God's Word and see Jesus Join Jean Stockdale for a look into the mirror of God's Word for timeless truths for training toddlers to teens. She will help you apply God's profound truths and make them practical in your life. As you become a doer of the Word and not a hearer only, she will help you look into God's mirror and see a work in progress for the glory of the Lord. As you work your way through this interactive study, God will work His truths into your life.

Re-thinking Intellectual Property YiJun Tian,2008-08-20 Copyright laws, along with other Intellectual Property Rights (IPRs), constitute the legal foundation for the global knowledge-based economy and copyright law now plays an increasingly important role in the creation of business fortunes, the access to and dissemination of knowledge, and human development in general. This book examines major problems in the current IPR regime, particularly the

copyright regime, in the context of digitization, knowledge economy, and globalization. The book contends that the final goals of IP law and policy-making are to enhance the progress of science and economic development, and the use and even-distribution of intellectual resource at the global level. By referring to major international IP consensus, recent developments in regional IP forums and the successful experiences of various countries, YiJun Tian is able to provide specific theoretical, policy and legislative suggestions for addressing current copyright challenges. The book contends that each nation should strengthen the coordination of its IP protection and development strategies, adopt a more systematic and heterogeneous approach, and make IP theory, policy, specific legal mechanisms, marketing forces and all other available measures work collectively to deal with digital challenges and in a way that contributes to the establishment of a knowledge equilibrium international society.

Stretching and Exploiting Thresholds for High-Order War Ben Connable, Jason H. Campbell, Dan Madden, 2016-05-05 Since 9/11, Russia, China, and Iran have successfully exploited or stretched U.S. thresholds for high-order war in order to further their strategic ends and, in the process, undermine U.S. interests. Each of these countries has made expert use of some combination of measures short of war to enact its strategies. This report describes those measures and how these nation-states use them and explains why U.S. notions of thresholds might be outdated.

Worlds in Transition Joseph Camilleri, Jim Falk, 2009-01-01 We are living through a unique moment of transition, marked by a frenetic cycle of invention, construction, consumption and destruction. However, there is more to this transition than globalization, argue the authors of this unique and penetrating study. In their highly innovative approach, they set this transition against a broader evolutionary canvas, with the emphasis on the evolution of governance. The book's detailed analysis of five strategic sectors (economy, environment, health, information and security) points to an intricate and rapidly evolving interplay of geopolitical, cultural and

Crime Scene Intelligence Albert M. Cruz, 2016-01-30 LT Albert Cruz's forensic entomology/explosive (E2) scientific project proved to be cutting edge and groundbreaking science in the forensic community. His thorough research and original analysis included a newly found forensic/intelligence analytical tool which could help bring

justice, fight the war on terrorism, and find ground truth in cases which involve domestic and international terrorism, war crimes, torture, drug trafficking, and chemical explosive identification by utilizing the common carrion fly. In addition, the project may be effective in counter-denial and deception operations which are known to be highly relevant and valuable to the Intelligence Community (IC) in cases of deceptive mass grave movement and genocide. More importantly, this unique forensic E2 experimental project revealed that explosive compounds such as TNT could be detected biologically-in this case by blowfly larvae which have fed on body tissue exposed to explosive residues-when toxicological analysis was no longer procurable. The results of the unique E2 forensic experiment provided empirical evidence that forensic entomology is unbiased and has a high degree of applicability to the IC. The science here is very helpful and when applied strategically to international war crime cases can provide myriad answers and help bring the guilty to justice in any war crime tribunal court system. Such information gained would also enable analysts to identify a specific batch of explosive, compare it to a known source of TNT, and relate it to a terrorist crime or cell.

The World of Materials Robert A. Wesolowski, Anthony P. Wesolowski, Roumiana S. Petrova, 2020-06-08 The world of materials is exciting because new materials are evolving daily. After an introduction to materials science, the book addresses the classification and structure of matter. It moves on to discuss crystal and mechanical properties. Next, the book employs various materials such as semiconductors and iron wires to teach concepts such as electrical conductivity, heat conductivity and allotropes. Corrosion is addressed and a chapter dedicated to interpretation of graphs and diagrams in materials science is presented. The book then progresses with chapters on ceramics, biomaterials, polymers and composites. To address the growing importance of recycling materials, polymer identification codes are explained. Interesting topics such as accidental materials discovery and materials failure are included. Each chapter ends with a chapter summary and questions and answers. Illustrations and worked examples are provided throughout. A lab manual is included as well. Presents an broad overview of materials science topics, including such topics as: crystal and mechanical properties of materials, semiconductors and iron wires, corrosion, ceramics, biomaterials, polymers, and composite materials; Examines modern-day materials, their synthesis, properties, alteration, and applications; Includes supplemental material, such as a lab manual and examples.

Losing the Long Game Philip H. Gordon, 2020-10-06 Foreign Affairs Best of Books of 2021 Book of the Week on Fareed Zakaria GPS Financial Times Best Books of 2020 The definitive account of how regime change in the Middle East has proven so tempting to American policymakers for decades—and why it always seems to go wrong. It's a first-rate work, intelligently analyzing a complex issue, and learning the right lessons from history. —Fareed

Zakaria Since the end of World War II, the United States has set out to oust governments in the Middle East on an average of once per decade—in places as diverse as Iran, Iraq, Afghanistan (twice), Egypt, Libya, and Syria. The reasons for these interventions have also been extremely diverse, and the methods by which the United States pursued regime change have likewise been highly varied, ranging from diplomatic pressure alone to outright military invasion and occupation. What is common to all the operations, however, is that they failed to achieve their ultimate goals, produced a range of unintended and even catastrophic consequences, carried heavy financial and human costs, and in many cases left the countries in question worse off than they were before. Philip H. Gordon's *Losing the Long Game* is a thorough and riveting look at the U.S. experience with regime change over the past seventy years, and an insider's view on U.S. policymaking in the region at the highest levels. It is the story of repeated U.S. interventions in the region that always started out with high hopes and often the best of intentions, but never turned out well. No future discussion of U.S. policy in the Middle East will be complete without taking into account the lessons of the past, especially at a time of intense domestic polarization and reckoning with America's standing in world.
