Human Rights and International Criminal Law Borhan Uddin Khan, Md. Jahid Hossain Bhuiyan, 2022-03-16 The book considers human rights approaches to crimes from a theoretical and practical perspective, analyses various crimes under international law, and examines the application, implementation and enforcement of international criminal law.

Witness to Aids Edwin Cameron, 2005-07-28 When Edwin Cameron announced to a stunned local and international media that he - one of South Africa's most prominent citizens - was himself living with the HIV/AIDS virus cutting swathes through the population of the continent, the impact was

immediate. In *Witness to AIDS*, Edwin Cameron's compelling memoir, he grapples with the meaning of HIV/AIDS: for him as he confronts the possibility of his own lingering death, and for all of us in facing up to one of the most desperate challenges of our time. In his intensely personal account of survival, Cameron blends elements of his destitute childhood with his daily duties as a senior judge and international human rights lawyer, while focusing always on the epidemic's central issues : stigma, unjust discrimination, and, most vitally, the life-and-death question of access to treatment. Cameron's remarkable story of his own survival in an epidemic that has cost millions of lives is at once moving and uplifting, sobering and ultimately hopeful. 'This book will be a major contribution by a courageous South African towards that quest for a better life for all.' - Nelson Mandela 'If truth is beauty, this relentlessly brilliant and hopeful book is beautiful. It is a text to live by, if we aspire to the possibility of a better life for all...in a world widely threatened by HIV/Aids.' - Nadine Gordimer, winner of the Nobel Prize for Literature, 1991

Introduction to International Disaster Management Damon P. Coppola, 2006-10-17 Written from a global perspective on risk, hazards, and disasters, *Introduction to International Disaster Management* provides practitioners, educators and students with a comprehensive overview of the players, processes and special issues involved in the management of large-scale natural and technological disasters. The book discusses special issues encountered in the management of international disasters, and explains the various private, non-governmental, national, and international agencies that assist in preparedness, mitigation, response and recovery during national and regional events. Concentrating on the four major phases of emergency management – mitigation, preparedness, response, and recovery – *Introduction to International Disaster Management* deals with such timely topics as Hurricane Katrina, the 2004 Asian tsunami, and SARS. It also serves as a reference to governmental and other agencies involved in international disaster management activities. This book is the first of its kind to take a global approach to the topic of international disaster management. * Serves as the first comprehensive resource dealing with the issues of international disaster management * Contains numerous case studies, examples of Best Practices in international disaster management, and a contact list of the governmental and nongovernmental agencies involved in international disaster management * Provides a global perspective on risk, hazards, and disasters that is written both for students within disaster management programs and for professionals entering the field

Mediated Terrorism in the 21st Century Elena Caoduro, Karen Randell, Karen A. Ritzenhoff, 2021-06-19 *Mediated Terrorism in the 21st Century* offers new interpretations of figures emerging from representations of terrorism and counterterrorism: the male hero, female agent, religious leader, victim/perpetrator, and survivor. This collection of essays by a broad array of international scholars reflects the altered image-making processes that have developed from George W. Bush's "war on terror." Building on current literature on media and terrorism, this volume analyzes the most recent technological developments that have impacted the way we experience terrorism: online videos, social media, cartoons, media feeds, and drones. The authors address different time periods, different terrorist groups, and explore the way filmmakers and television producers from the USA, Europe, South Africa, and the Middle East are documenting modern wars in popular culture.

Semiotic Encounters , 2009-01-01 *Semiotic Encounters: Text, Image and Trans-Nation* aims at opening up scholarly debates on the contemporary challenges of intertextuality in its various intersections with postcolonial and visual culture studies. Commencing with three theoretical contributions, which work towards the creation of frameworks under which intertextuality can be (re)viewed today, the volume then explores textual and visual encounters in a number of case studies. While (a) the dimension of the intertextual in the traditional sense (as specified e.g. by Genette) and (b) the widening of the concept towards visual and digital culture govern the structure of the volume, questions of the transnational and/or postcolonial form a recurrent subtext. The volume's combination of theoretical discussions and case studies, which predominantly deal with 'English classics' and their rewritings, film adaptations and/or rereadings, will mainly attract graduate students and scholars working on contemporary literary theory, visual

culture and postcolonial literatures.

Kashmiri Life Narratives Rakhshan Rizwan,2020-04-19 Kashmiri Life Narratives takes as its central focus writings -- memoirs, non-fictional and fictional Bildungsromane -- published circa 2008 by Kashmiris/Indians living in the Valley of Kashmir, India or in the diaspora. It offers a new perspective on these works by analyzing them within the framework of human rights discourse and advocacy. Literature has been an important medium for promoting the rights of marginalized Kashmiri subjects within Indian-occupied Kashmir, successfully putting Kashmir back on the global map and shifting discussion about Kashmir from the political board rooms to the international English-language book market. In discussing human rights advocacy through literature, this book also effects a radical change of perspective by highlighting positive rights (to enjoy certain things) rather than negative ones (to be spared certain things). Kashmiri life narratives deploy a language of pleasure rather than of physical pain to represent the state of having and losing rights.

Infectious Ideas Jennifer Brier,2009-11-01 Viewing contemporary history from the perspective of the AIDS crisis, Jennifer Brier provides rich, new understandings of the United States' complex social and political trends in the post-1960s era. Brier describes how AIDS workers--in groups as disparate as the gay and lesbian press, AIDS service organizations, private philanthropies, and the State Department--influenced American politics, especially on issues such as gay and lesbian rights, reproductive health, racial justice, and health care policy, even in the face of the expansion of the New Right. Infectious Ideas places recent social, cultural, and political events in a new light, making an important contribution to our understanding of the United States at the end of the twentieth century.

Scope and Quality Jaspreet Singh,Sonika Pal,Sherry,Amanpreet Singh,2020-04-14 The difference between scope and quality can be a little confusing for new project managers. But it shouldn't have to be. In this book, I discuss the differences—and relationships—between these two fundamental elements of a project's golden triangle.

Shooting Terror Meenakshi Bharat,2020-02-20 Shooting Terror highlights the disturbing immediacy of acts of terror and how cinema responds to them. It follows the changing representations of terrorism in Hindi cinema by fielding in-depth textual analyses of films such as Roja, Maachis, Black Friday, Tere Bin Laden, Uri: The Surgical Strike, among others. It traces how terror and the terrorist have come to be viewed in the Indian cultural space and lays the grounds for a multivalent, perspectival reading of cinema and terrorism. Moving from the threat of terror condensed in the Mogambo-esque villain in Mr. India, to the showcasing of terror and the terrorist in their lived-in realities in Haider and Shahid, the book explores the fraught connections between terror and the themes of devastation and trauma; between terror and the urban cityscape. It also seeks to highlight the place of humour and satire in films on terrorism and the presence of the reactionary far right in these films. One of the first books to present a composite picture of terrorism in contemporary Hindi cinema, this volume will be of interest to researchers and academics of cultural studies, media and film studies, and the study of sociopsychological violence in media and culture.

Inclusive Education : Practices and Challenges Dr. Deepa Sikand Kauts,2021-09-11 This book is an attempt to create awareness among practitioners and to strengthen the focus on inclusion in their strategies and future plans for education and highlight the areas that need particular attention to promote inclusive education and strengthen policy development. With this, we would move a step further and look into the current research trends in inclusive education as well as policy backdrops which provide us with the fair idea that how this idea of equity pedagogy is being propagated in the national educational policies of our country and further their translations in the Indian education realm. Papers compiled exhibit major concerns, issues, challenges and various practices for ensuring inclusion and inclusive pedagogical strategies for effective inclusive education. The researchers have also taken into account the social, cultural and learning diversities and the factors that facilitate to spot and remove barriers to learning and participation in education. It has the power to widen the scope of universal education by promoting access to all learners and accelerating educational equity too. This book also focuses on how stakeholders can contribute to the continuous growth of inclusive education and its implications for society, communities, schools and classrooms as well to provide clarity on theoretical and research perspectives to promote the integration of theory and practice of inclusive education. The volume will be highly beneficial for teachers, parents, policymakers, administrators and students who care about the needs of the learners and the development of an equitable education system in our country.

Sustainable Computing Shashank Awasthi,Goutam Sanyal,Carlos M. Travieso-Gonzalez,Pramod Kumar Srivastava,Dinesh Kumar Singh,Rama Kant,2023-01-01 This book presents recent advancements in Industry 4.0 and addresses how these can be useful in achieving sustainable solutions in Society 5.0. The book also serves as a reference for developing sustainable engineering solutions to various socio-economic and techno-commercial issues. The book is meticulously structured into two sections: Section I sheds light on fundamentals, nitty-gritties, and principles of technological innovations and advancement in artificial intelligence, cloud computing, industrial Internet of Things (IIOT), and Society 5.0, whereas Section II covers viable engineering solutions developments for revamping Industry 4.0 to Society 5.0. Overall, the authors aim to show how technological advancements can be used to address social issues and improve society.

Four Battlegrounds: Power in the Age of Artificial Intelligence Paul Scharre,2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club's Must-Read Books An invaluable primer to arguably the most important driver of change for our future. —P. W. Singer, author of *Burn-In* An award-winning defense expert tells the story of today's great power rivalry—the struggle to control artificial intelligence. A new industrial revolution has begun. Like mechanization or electricity before it, artificial intelligence will touch every aspect of our lives—and cause profound disruptions in the balance of global power, especially among the AI superpowers: China, the United States, and Europe. Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game-changing technology and dominate the future. *Four Battlegrounds* argues that four key elements define this struggle: data, computing power, talent, and institutions. Data is a vital resource like coal or oil, but it must be collected and refined. Advanced computer chips are the essence of computing power—control over chip supply chains grants leverage over rivals. Talent is about people: which country attracts the best researchers and most advanced technology companies? The fourth “battlefield” is maybe the most critical: the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy, society, and especially their military. Scharre's account surges with futuristic technology. He explores the ways AI systems are already discovering new strategies via millions of war-game simulations, developing combat tactics better than any human, tracking billions of people using biometrics, and subtly controlling information with secret algorithms. He visits China's “National Team” of leading AI companies to show the chilling synergy between China's

government, private sector, and surveillance state. He interviews Pentagon leadership and tours U.S. Defense Department offices in Silicon Valley, revealing deep tensions between the military and tech giants who control data, chips, and talent. Yet he concludes that those tensions, inherent to our democratic system, create resilience and resistance to autocracy in the face of overwhelmingly powerful technology. Engaging and direct, *Four Battlegrounds* offers a vivid picture of how AI is transforming warfare, global security, and the future of human freedom—and what it will take for democracies to remain at the forefront of the world order.

Advances in Potato Chemistry and Technology Jaspreet Singh, Lovedeep Kaur, 2016-01-19 *Advances in Potato Chemistry and Technology*, Second Edition, presents the latest knowledge on potato chemistry, including the identification, analysis, and uses of chemical components in potatoes. Beginning with a brief description of potato components, the book then delves into their role during processing, then presenting information on strategies for quality optimization that provides students, researchers, and technologists working in the area of food science with recent information and updates on state-of-the-art technologies. The updated edition includes the latest information related to the identification, analysis, and use of chemical components of potatoes, carbohydrate and non-carbohydrate composition, cell wall chemistry, an analysis of glycoalkaloids, phenolics and anthocyanins, thermal processing, and quality optimization. In addition, new and sophisticated methods of quality determination of potatoes and their products, innovative and healthy potato-based foods, the future of genetically modified potatoes, and the non-food use of potatoes and their products is discussed. Includes both the emerging non-food uses of potato and potato-by-products as well as the expanding knowledge on the food-focused use of potatoes. Presents case studies on the problems, factors, proposed solutions, and pros and cons of each, allowing readers facing similar concerns and issues to effectively and efficiently identify an appropriate solution. Written by a global collection of experts in both food and non-food potato science.

Roots Thembinkosi Lehloesa, 2011-08-22 In Africa no European country has had an influence as Britain. The first tangible break in the development was achieved by the South African parliament in 1934. But already Britain had shaped and predetermined South Africa's future. The country wanted no other than evolutionary change, and this theme informed all administrations. Deception was the name of the game as was the violation of resolutions of the United Nations. Thus by the 1990s Britain was relative to other European countries in a far better position to influence the policies of an African National Congress run government.
