Elephants on the Edge G. A. Bradshaw, 2009-10-06 "At times sad and at times heartwarming . . . Helps us to understand not only elephants, but all animals, including ourselves" (Peter Singer, author of *Animal Liberation*). Drawing on accounts from India to Africa and California to Tennessee, and on research in neuroscience, psychology, and animal behavior, G. A. Bradshaw explores the minds, emotions, and lives of elephants. Wars, starvation, mass culls, poaching, and habitat loss have reduced elephant numbers from more than ten million to a few hundred thousand, leaving orphans bereft of the elders who would normally mentor them. As a consequence, traumatized elephants have become aggressive against people, other animals, and even one another; their behavior is comparable to that of humans who have experienced genocide, other types of violence, and social collapse. By exploring the elephant mind and experience in the wild and in captivity, Bradshaw bears witness to the breakdown of ancient elephant cultures. But, she reminds us, all is not lost. People are working to save elephants by rescuing orphaned infants and rehabilitating adult zoo and circus elephants, using the same principles psychologists apply in treating humans who have survived trauma. Bradshaw urges us to support these and other models of elephant recovery and to solve pressing social and environmental crises affecting all animals—humans included. "This book opens the door into the soul of the elephant. It will really make you think about our relationship with other animals."
—Temple Grandin, author of *Animals in Translation*

Relatively and Philosophically Earnest Bharath Sriraman, Simon Goodchild, 2009-10-01 Paul Ernest's name is synonymous with social constructivism as a philosophy of mathematics. His contributions to mathematics education have occurred at a very fundamental level and to a extent shaped theory development in this field. His research addresses fundamental questions about the nature of mathematics and how it relates to teaching, learning and society. For the last three decades Paul has been a prolific scholar who has published in a wide array of topics such as the relationship between the philosophy of mathematics and mathematics education, and more generally the philosophy of mathematics education, ethics and values in mathematics education, and the philosophy of research methodology. The title of this Festschrift is meant to be a pun to convey the sometimes relativistic dimension to mathematical certainty that Paul argued for in developing his philosophy, and also a play on words for the fact that absolute "earnestness" may perhaps be a Platonic construct, and not possible in the realm of language and human discourse! Paul Ernest's scholarly evolution and life can best be summarized in the words of Walt Whitman "Do I contradict myself? Very well then I contradict myself" (I am large, I contain multitudes). Indeed his presence has been large and multitudinous and this Festschrift celebrates his 65th Birthday with numerous contributions coming from the mathematics, philosophy and mathematics education communities around the world.

Storybridge to Second Language Literacy Irma-Kaarina Ghosn, 2013-09-01 Storybridge to Second Language Literacy makes a case for using authentic children's literature—alternately also referred to as 'stories' or 'real books'—as the medium of instruction in teaching English to young learners, particularly in contexts where children must access general curriculum subjects in English. The author first proposes theoretical foundations for the

argument that illustrated children's books are superior to traditional language teaching courses in the primary school. She builds the case around the motivational power of stories, the language and content of quality children's literature, and the potential of literature to contribute to development of second language academic literacy. She then reviews research of the past thirty years that clearly supports her claim. Finally, she uses transcripts from real classrooms to illustrate how teachers in diverse contexts make use of stories. Through the classroom vignettes, a practical model of literature-based instruction emerges that is adaptable to a wide range of primary school teaching contexts, including English as a second language contexts in core-English countries. Storybridge to Second Language Literacy compiles in one volume solid theoretical foundations for story-based instruction, research evidence of the past thirty years supporting the approach (not currently available in a single source), and extensive classroom vignettes illustrating diverse practical applications (not lesson plans). This makes the book valuable for anyone in the field of young learner ELT. MA students in TESOL will find the book useful and will develop an understanding of why and how literature-based instruction works and develop insight to guide their practice. Members of TESOL Elementary Education, EFL, and Bilingual Education SIGs, and IATEFL Young Learner SIG will be interested in the volume. Instructors of teacher development courses should also find the proposed volume a valuable addition to assigned readings. Each chapter is followed by 'Think about it' questions and 'Try it out' suggestions.

Child Language Matthew Saxton, 2017-10-02 This is the best book on the market for taking students from 'how children acquire their first language' to the point where they can engage with key debates and current research in the field of child language. No background knowledge of linguistic theory is assumed and all specialist terms are introduced in clear, non-technical language. It is rare in its balanced presentation of evidence from both sides of the nature-nurture divide and its ability to make this complicated topic engaging and understandable to everyone. This edition includes Exercises to foster an understanding of key concepts in language and linguistics A glossary of key terms so students can always check back on the more difficult terms Suggestions for further reading including fascinating TED Talks that bring the subject to life Access to Multiple Choice Quizzes and other online resources so students can check they've understood what they have just read

Innovation Imperative Göran Marklund, Nicholas S. Vonortas, Charles W. Wessner, 2009-01-01 Focuses on the changing roles and challenges of innovation and growth policy, and the strategies and measures that are critical in a globalizing world. This title provides guidance for innovation policy strategy formulations and design of innovation policy measures.

Processes and Process-Oriented in Foreign Language Teaching and Learning Wai Meng Chan, Kwee Nyet Chin, Masanori Nagami, Titima Suthiwan, 2011-10-27 There can be no products without processes. Though this statement may seem to be no more than an overused generalization, it encapsulates the undoubted importance of processes and process-oriented approaches in language teaching and learning. In foreign language education in recent decades, researchers and practitioners alike are increasingly focusing their attention on: 1) the learner as the active

subject of learning and the internal processes that constitute his/her learning leading to the development of communicative competence; 2) teaching approaches, curricula and materials that reflect this view of language learning; and 3) other factors such as the sociocultural context, social interactions and discourse, and individual learner characteristics and differences. The theme of this book reflects this paradigm shift, and the papers included here from the disciplines of foreign language education and second language acquisition provide vital insights into processes in curriculum planning, teaching methodology, teacher education and professional development, language acquisition, language discourse, classroom instruction and interactions, the development of language skills and learning strategies, and language learning motivation.

How Do You Know You're Not Wrong? Paul Copan, 2005-08-01 In today's postmodern world, believers more than ever before are faced with a host of objections to Christianity. Expert apologist Paul Copan describes these objections as anti-truth claims and with *How Do You Know You're Not Wrong* he provides a helpful resource with thorough, biblical answers to such regularly used objections as - Whatever works for you - Just as long as it makes you happy - All religions are basically the same - Christianity is anti-semitic At the end of each chapter, he provides practical and easy-to-share summary points to help readers intelligently and effectively answer the challenges of their non-Christian friends and neighbors.

Leadership by Design Richard N. Swett, 2005 Ambassador Richard Swett's groundbreaking new book investigates the unique civic leadership strengths of the architecture profession. Drawing upon the compelling history of the profession, both past and present, as well as from his own singular experience as the only architect to serve in Congress during the 20th century, Swett has produced an insightful volume that is both inspiring and instructive. He shares Mark Twain's view that "if the only tool you have is a hammer, after a while every problem begins to look like a nail." *Leadership by Design* is an eloquent plea to architects, leaders and citizens alike to expand the tool chest as we seek new leadership to design new solutions for the complex challenges facing our nation and the world.

The Independence of Lawyers Université de Pau et des pays de l'Adour, Council of Europe, 2003-01-01 This book contains the proceedings of a conference, organised by the Council of Europe and held in France in February 2002, to discuss a number of challenges relating to the independence of the legal profession, including problems arising from the development of the internet and electronic networks, the financial independence of lawyers linked with legal aid, and the independence of bar associations and their relationship with public authorities.

Jenny and the Magical Garden of Belief Jane Shannon-Petlin, 2010-10 Life wasn't perfect anymore ...since the death of her mother. Jenny knew her father was going to marry THAT woman, Catherine. Jenny hated her Well, actually, Jenny hated everyone. So she made the decision to run away from home. All right, ride away on her bike to be exact. She'd get where she was going so much faster than running. But where was Jenny going and what was she going to do? She was riding her bike in what seemed like an unknown area. Nothing looked right. Everything was in the wrong place. Where was she? One of the two figures walking her way would explain that to her soon enough.

Jenny was sure of one thing though, she was in The World Between. The World Between? The World Between what? Jenny soon finds out when she sees something too good to be true ...her mother. Find out why and how Jenny is reunited with her mother and what The World Between really is. Also, discover how life goes on even when you totally believe it can't possibly. Jane Shannon-Petlin is the mother of seven daughters. She resides in California with her husband, Bob, and three little ones still at home, ages 14, almost 12 and 9. Without the love and support of her husband and her girls, Katrina, Corene, Alina, Larissa, Tiana, Brinna and Septina, Jenny and the Magical Garden of Belief wouldn't be possible. People That Changed the Course of History: The Story of Karl Marx 200 Years After His Birth Rachel Basinger, 2017-12-31 What if you could be a student in the morning, an accountant in the afternoon, and a physical therapist in the evening – then try three completely different trades the following day? This was Karl Marx's vision for the world. Marx, a 19th century German philosopher, believed the proletariat, or the working class, was enslaved by the bourgeoisie, or ruling class. Despite being a small percentage of the population, the bourgeoisie controlled the vast majority of the world's wealth and all means of production. But what if all the workers of the world got together. Could they oust the ruling class? Within a few decades of his death, Marx's ideas swept across Europe and dramatically influenced the events of the 20th century. Millions perished at the hands of Russian dictator Joseph Stalin and other communist leaders, who followed their interpretations of Marx's philosophy to its unintended ends. But long before Stalin assumed power or the Iron Curtain fell across Europe, there was a boy born into a German middle-class family in 1818. You will learn about Marx's marriage to a young baroness, his seven children, and his longstanding relationship with fellow philosopher Friedrich Engels, one of the few people who could decipher Marx's messy handwriting. When you are done reading this book, you may not exclaim, "Workers of the world, unite!" (as Marx famously did at the end of "The Communist Manifesto"), but you'll understand more of what he meant by that – and more about the man behind the statement.

Lolita in the Afterlife Jenny Minton Quigley, 2021-03-16 A vibrant collection of sharp and essential modern pieces on Vladimir Nabokov's perennially provocative book—with original contributions from a stellar cast of prominent twenty-first century writers. In 1958, Vladimir Nabokov's *Lolita* was published in the United States to immediate controversy and bestsellerdom. More than sixty years later, this phenomenal novel generates as much buzz as it did when originally published. Central to countless issues at the forefront of our national discourse—art and politics, race and whiteness, gender and power, sexual trauma—*Lolita* lives on, in an afterlife as blinding as a supernova. *Lolita in the Afterlife* is edited by the daughter of *Lolita*'s original publisher in America. Geary's Guide to the World's Great Aphorists James Geary, 2008-12-08 Both an expert and a collector, James Geary has devoted his life to aphorisms—and the last few years to organizing, indexing, and even translating them. The result is *Geary's Guide*, featuring aphorists like Voltaire, Twain, Shakespeare, Nietzsche, Woody Allen, Muhammad Ali, Emily Dickinson, and Mae West, as well as international practitioners appearing in English for the first time. But it is more than just a conventional anthology. It is also an encyclopedia, containing brief biographies of each author in addition to a selection of his or her aphorisms. The book is a field guide, too, with aphorists organized into eight different species, such as Comics, Critics & Satirists; Icons & Iconoclasts; and Painters & Poets. The book's two indexes—by author and by subject—make it easily searchable, while its unique organizational structure and Geary's lively biographical entries set it apart from all previous reference works. A perfect follow-up to Geary's New York Times bestseller *The World in a Phrase*, *Geary's Guide* is eminently suitable for browsing or for sustained reading. A comprehensive guide to our most intimate, idiosyncratic literary form, the book is an indispensable tool for writers and public speakers as well as essential reading for all language lovers.
