**The Wrong Way Down** Jeremy Burfoot, 2021-03-16 In August 2010, Jeremy Burfoot and his team headed off from London in an attempt to ride jet skis all the way to Sydney. This is the story of the preparation leading up to the attempt and the adventure itself. It was a 'never a dull moment' adventure where anything that could go wrong, generally did. Anyone interested in the river route from the North Sea to the Black Sea should read this book.

Anyone interested in long distance jet ski adventures should, likewise, find this book a great source of information.

The Jet Ski Manual Christophe Harmand,2012-04-10 Jet skis are immensely popular coastal 'playthings' - but they need careful handling and maintenance. This is a highly illustrated hands-on manual providing advice , hints and tips on choosing, driving, handling, maintaining and repairing a jet ski - the complete owner's manual. Many owners will prefer to service and maintain their own machine (much like they would with an outboard motor), rather than take it to a service agent, and the step by step photos in this book will enable them to do just this. This is a brand new, highly illustrated step-by-step guide for the jet ski owner (of which there are many in the UK alone) which provides helpful advice on all the aspects of ownership, handling and maintenance. There is no other book on the market which does this.

**Jet Ski** Luke Thompson,2001-03 For use in schools and libraries only. Written in easy-to-understand language, each of the Built for Speed books focuses on speedy machines and how to get involved with them for recreation or competition.

Motorized Obsessions Paul R. Josephson,2007-09-02 From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent - and loud - fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it - personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

*Colorado Canyons National Conservation Area and Black Ridge Canyons Wilderness, Resource Management Plan* ,2004  
*Hamilton's Jet* John Walsh,2014 The first stirrings of the embryonic engineering enterprise that became CWF Hamilton & Co Ltd began 75 years ago on a high country sheep station at the foot of Mt Cook ... the inventive Kiwi farmer, Bill Hamilton, and his idealistic English wife, Peggy, fashioned an extraordinary community turning rabbiters and farmhands into skilled trades-people. When Bill Hamilton won the contract to construct an aerodrome at Mt Cook in 1935, the sheep farmer-turned-engineer was on his way to establishing an engineering business eventually to employ 500 people in Christchurch that would leave its mark on the post-War infrastructural development of New Zealand. Yet it was Sir William Hamilton's jet boat hobby that made him internationally renowned. He and his team discovered for themselves the secret to a successful jet boat, one that could tackle the swift-flowing rivers of the South Island. Soon Hamilton's jet was making headlines conquering the Colorado River upstream through the Grand Canyon, river racing in Mexico, re-tracing Stanley's footsteps in Zaire and jetting Sir Edmund Hillary in the sacred Ganges in India. In the economically turbulent 1980's, CWF Hamilton & Co nearly succumbed like so many companies. To secure its future, the Company morphed from a multi-product heavy engineering business, aimed at the domestic market, to a single product-line manufacturer with a global perspective. That product was not the jet boat but the waterjet propulsion system itself. The untold story of the Company's success on the world stage from that point on, in competition with Rolls Royce no less, is a salutary lesson in how to make commercial success of Kiwi ingenuity. Hamilton Jet is now the dominant propulsion choice for high-speed oil industry crew boats, navy and coast guard patrol boats, fast ferries and lately offshore windfarm servicing vessels around the world. With millions of dollars of waterjet product leaving the Christchurch factory each week, the legacy and romance of Bill Hamilton lives on--Publisher's description.
