A History of Travel in 50 Vehicles (History in 50) Paula Grey,2016-09-06 Paula Grey explores how creative thinkers—collaborating or competing and always building on the work of their predecessors—have envisioned new ways to move about in the world. The story of travel is the human story. From the first migrations out of Africa on weary feet to horses, camels, rafts, chariots, steamships, trains, hot air balloons, cars, submarines, and moon rockets, humans have combined imagination, daring, and technical brilliance to create new vehicles and improve existing ones. Geography and culture have influenced the development of vehicles in far-flung parts of the world, and human travel has, in turn, exerted a profound influence on society and the environment. Whether escaping deprivation, pestilence, persecution, oppression, or fear—or seeking abundance, freedom, fame, fortune, or a fresh start—we have always been a traveling species, and it seems we always will be. Here is the story of humankind's restless impulse to see what's over the next ridge, beyond the next sunrise, on the next planet. Enjoy the journey!

Securitization of the Umbrella Movement in Hong Kong Cora Y.T. Hui,2019-07-05 In recent years, the city many hoped would help democratize China has instead become a research setting in which to study China's increasing intolerance of dissent. Since Hong Kong's return to Chinese sovereignty in 1997, China's treatment of Hong Kong could be divided into three stages: non-intervention, intervention, and securitization. If the July 1 march in 2003 is a watershed that marked Beijing's change from non-intervention to intervention, this book suggests that the Umbrella Movement in 2014 is another watershed that marked Beijing's change from intervention to securitization. This book is a theoretically driven case study of the Umbrella Movement, a massive sit-in that paralyzed key business and retail districts for 79 days in Hong Kong in 2014. Many Hongkongers believe that they have the right to a fair election of the chief executive, and Beijing's insistence on vetting candidates prompted the outbreak of the Umbrella Movement. Drawing insights from the securitization theory and fear appeal literature, the book proposes the framework of "security appeal." It argues that the outbreak of the Umbrella Movement resulted from a premature use of hard repression, that is, before the government convinced the general public that the Umbrella Movement was a threat. The eventual successful securitization entails a general acceptance of the threatening nature of the Umbrella Movement and agreement with its crackdown. This book concludes that one of the consequences of the securitization of the Umbrella Movement is Beijing's eventual switch to the policy of "patriotocracy" – a system that allocates power and resources based on one's professed patriotism – in lieu of One Country, Two Systems. The policy implications and theoretical and methodological contributions of this book will be of interest to scholars and students of security studies; Chinese politics; and various social science disciplines, including political science, psychology, criminology, and sociology.

A Legislative History of the Taiwan Relations Act Martin B. Gold,2016-12-27 This study examines the passage of the Taiwan Relations Act of 1979, which defined U.S.–Taiwan relations after the United States' diplomatic recognition of China. It analyzes how President Carter's original legislation was shaped after extensive hearings, lengthy debates, and sharp disagreement in Congress and eventually achieved broad consensus.

Britain, the US and China's Anti-Soviet Stance in the Cold War Bruno Pierri,2023-08-04 This book shows how international trade was a key part of the classic Western policy of containment towards the Soviet Union in the Cold War in the late 1970s. Trade and containment may summarise the new relation that communist China moulded with the capitalistic West in the late 1970s. Ideology had become less important and a rapprochement between the PRC (People's Republic of China) and the Western powers over trade, with the purpose of isolating and weakening the common Russian rival, was practically unavoidable. Within a relatively short span of time the balance of power in the Indo-Pacific area had been reversed. Simply put, Beijing's market was too big to be ignored and the Atlantic allies collaborated, sometimes even competing with each other, to allow China access to the centres of world finance. However, the Western powers had not realised that Beijing would never pursue alignment with them. On the contrary, the increased trading and financial linkage with capitalistic countries gave China room to manoeuvre, enabling it to play the Western states off against each other. This book will be of much interest to students of Cold War Studies, Chinese history, foreign policy and international relations.

Junk Food Politics Eduardo J. Gómez,2023-01-31 Despite an increased government commitment in some developing countries to eradicating non-communicable diseases and introducing innovative prevention programs aimed at reducing obesity and type-2 diabetes, sugary beverage and fast food companies are thriving there. In examining this paradox, the author presents a political science explanation that emphasizes how junk food industries restructure politics and society before agenda setting for policy ever takes place--

Greater China's Olympic Medal Haul Marcus P. Chu,2023-07-28 Between 1984 and 2021, elite athletes from the member regions of Greater China – China, Taiwan, and Hong Kong – competed at each of the ten Summer Olympics. By winning 263 gold medals, 199 silver, and 173 bronze, China became a global sports superpower. Taiwan and Hong Kong pocketed 7 gold medals, 10 silver, and 17 bronze and 2 gold medals, 3 silver, and 4 bronze, respectively, displaying their world-leading statuses in archery, badminton, baseball, cycling, fencing, gymnastics, Judo, karate, sailing, Taekwondo, table tennis, and weightlifting. In response, the leaders of the three regions delivered high-profile praise. Their administrations awarded cash, badges, and/or honorary titles to the medalists. By reviewing journalistic reports, key-players' memoirs, official documents, and scholarly works, this book aims to understand the significance of the Olympic medal haul to the Chinese, Taiwanese, and Hong Kong authorities. Its findings detail the context in which the Olympic medal haul was leveraged for the political change of the three regions and their relations with each other. They also reveal that the praise and rewards bestowed by the respective authorities on the medalists not only celebrated their jurisdictions' sporting excellence, but served broader strategic goals across domestic politics and international relations.

Making Hong Kong Pui-yin Ho,2018-09-28 This insightful book provides a comprehensive survey of urban development in Hong Kong since 1841. Pui-yin Ho explores the ways in which the social, economic and political environments of different eras have influenced the city's development. From colonial governance, wartime experiences, high density development and the return to Chinese sovereignty in 1997 through to contemporary challenges, this book explores forward-looking ideas that urban planning can offer to lead the city in the future. Evaluating the relationship between town planning and social change, this book looks at how a local Hong Kong identity emerged in the face of conflict and compromise between Chinese and European cultures. In doing so, it brings a fresh perspective to urban research, providing historical context and direction for the future development of the city. Hong Kong's urban development experience offers not only a model for other Chinese cities but also a better understanding of Asian cities more broadly. Urban studies scholars will find this an exemplary case study of a developing urban landscape.

Town planners and architects will also benefit from reading this comprehensive book as it shows how Hong Kong can be taken to the next stage of urban development and modernisation.

The Third Indochina War Odd Arne Westad, Sophie Quinn-Judge, 2006-09-27 This new collection explores the origins and key issues of the Third Indochina War, which began in 1979. Drawing on unique documentation from all sides, leading contributors reinterpret and demystify the long-term and immediate causes of the Vietnamese-Cambodian and Sino-Vietnamese conflicts. They closely examine how both the links between policies and policy assumptions in the countries involved, and the dynamics - national, regional and international - drove them towards war. Rather than explaining the conflicts as determined by age-old resentments and suspicions or seeing war between the former allies as the necessary outcome of the conflicts of the 1970s, the contributors to this volume look at the concrete causes for the breakdown in cooperation and the road to war. This volume includes even-handed assessments of the roles of the major players, including a look at the beginnings of Thai-Chinese military cooperation in support of the Khmer Rouge. The subjects covered remain highly relevant to inter-state relations in South East Asia, where border issues are still a cause of tension. An updated chronology of events leading to the outbreak of hostilities is also included. This book will be of immense interest to all students of the Third Indochina War, Southeast Asian history and of international relations and war studies in general.

Locating Asian Australian Cultures Tseen Khoo, 2013-10-18 Locating Asian Australian Cultures is a timely and challenging interdisciplinary compilation that sets a contemporary benchmark for Asian Australian studies and its future directions. In the dynamic field of diasporic Asian studies, Asian Australian Studies is an emerging and contentious area. While cognisant of issues and critical developments in North America, Europe, and Asia, Asian Australian studies forges its own specific engagements with questions of identity, racialization, and nationalisms in a world of globalized cultures and movements. This book deliberately engages with international perspectives on Asian Australian studies that offer contingent connections and address crucial questions for fields that are rapidly 'de-nationalizing'. The volume focuses on Asian Australian cultural production and identity, presenting work that interrogates notions of belonging and citizenship, representational politics, and disciplinarity in the academy. The broad-ranging essays examine the politics of Asian Australian art and literature, as well as the area's significant interventions in disciplinary formations nationally and internationally. Other essays discuss the Vietnamese War memorial in Cabramatta, notions of the 'sacrificial Asian' in contemporary films, and Chinatown sites in Australia. This book will be essential reading not only for researchers in Asian Australian studies but also for those with an interest in Asian diaspora and Australian studies.

The Global Technology Revolution China, In-Depth Analyses Richard Silberglitt, Anny Wong, 2009-02-13 China's Tianjin Binhai New Area and the Tianjin Economic-Technological Development Area commissioned a technology-foresight study to help them plan for economic growth. The authors recommend seven emerging technology applications (TAs)--solar energy, mobile communications, rapid bioassays, new water-purification systems, molecular-scale drugs, electric and hybrid vehicles, and green manufacturing--and describe drivers, barriers, and plans for each.

In from the Cold Gilbert M. Joseph, Daniela Spenser, 2008-01-11 Over the last decade, studies of the Cold War have mushroomed globally. Unfortunately, work on Latin America has not been well represented in either theoretical or empirical discussions of the broader conflict. With some notable exceptions, studies have proceeded in rather conventional channels, focusing on U.S. policy objectives and high-profile leaders (Fidel Castro) and events (the Cuban Missile Crisis) and drawing largely on U.S. government sources. Moreover, only rarely have U.S. foreign relations scholars engaged productively with Latin American historians who analyze how the international conflict transformed the region's political, social, and cultural life. Representing a collaboration among eleven North American, Latin American, and European historians, anthropologists, and political scientists, this volume attempts to facilitate such a cross-fertilization. In the process, *In From the Cold* shifts the focus of attention away from the bipolar conflict, the preoccupation of much of the so-called new Cold War history, in order to showcase research, discussion, and an array of new archival and oral sources centering on the grassroots, where conflicts actually brewed. The collection's contributors examine international and everyday contests over political power and cultural representation, focusing on communities and groups above and underground, on state houses and diplomatic board rooms manned by Latin American and international governing elites, on the relations among states regionally, and, less frequently, on the dynamics between the two great superpowers themselves. In addition to charting new directions for research on the Latin American Cold War, *In From the Cold* seeks to contribute more generally to an understanding of the conflict in the global south. Contributors. Ariel C. Armony, Steven J. Bachelar, Thomas S. Blanton, Seth Fein, Piero Gleijeses, Gilbert M. Joseph, Victoria Langland, Carlota McAllister, Stephen Pitti, Daniela Spenser, Eric Zolov

Original Copies Bianca Bosker, 2013-01-31 A 108-meter high Eiffel Tower rises above Champs Elysées Square in Hangzhou. A Chengdu residential complex for 200,000 recreates Dorchester, England. An ersatz Queen's Guard patrols Shanghai's Thames Town, where pubs and statues of Winston Churchill abound. Gleaming replicas of the White House dot Chinese cities from Fuyang to Shenzhen. These examples are but a sampling of China's most popular and startling architectural movement: the construction of monumental themed communities that replicate towns and cities in the West. *Original Copies* presents the first definitive chronicle of this remarkable phenomenon in which entire townships appear to have been airlifted from their historic and geographic foundations in Europe and the Americas, and spot-welded to Chinese cities. These copycat constructions are not theme parks but thriving communities where Chinese families raise children, cook dinners, and simulate the experiences of a pseudo-Orange County or Oxford. In recounting the untold and evolving story of China's predilection for replicating the greatest architectural hits of the West, Bianca Bosker explores what this unprecedented experiment in "duplitecture" implies for the social, political, architectural, and commercial landscape of contemporary China. With her lively, authoritative narrative, the author shows us how, in subtle but important ways, these homes and public spaces shape the behavior of their residents, as they reflect the achievements, dreams, and anxieties of those who inhabit them, as well as those of their developers and designers. From Chinese philosophical perspectives on copying to twenty-first century market forces, Bosker details the factors giving rise to China's new breed of building. Her analysis draws on insights from the world's leading architects, critics and city planners, and on

interviews with the residents of these developments.

Child and Youth Well-being in China Lijun Chen,Dali L. Yang,Di Zhou,Qiang Ren,2018-12-13 The true measure of any society is how it treats its children, who are in turn that society's future. Making use of data from the longitudinal Chinese Family Panel Studies survey, the authors of this timely study provide a multi-faceted description and analysis of China's younger generations. They assess the economic, physical, and social-emotional well-being as well as the cognitive performance and educational attainment of China's children and youth. They pay special attention to the significance of family and community contexts, including the impact of parental absence on millions of left-behind children. Throughout the volume, the authors delineate various forms of disparities, especially the structural inequalities maintained by the Chinese Party-state and the vulnerabilities of children and youth in fragile families and communities. They also analyze the social attitudes and values of Chinese youth. Having grown up in a period of sustained prosperity and greater individual choice, the younger Chinese cohorts are more independent in spirit, more open-minded socially, and significantly less deferential to authority than older cohorts. There is growing recognition in China of the importance of investing in children's future and of helping the less advantaged. Substantial improvements in child and youth well-being have been achieved in a time of growing economic prosperity. Strong political commitment is needed to sustain existing efforts and to overcome the many obstacles that remain. This book will be of considerable interest to researchers of Chinese society and development.

Robotics Fernando S. Osório,Denis Fernando Wolf,Kalinka Castelo Branco,Valdir Grassi Jr.,Marcelo Becker,Roseli Romero,2015-11-30 This book constitutes the refereed proceedings of the Joint Conference on Robotics, LARS, SBR, Robocontrol 2014, held in São Carlos, Brazil, in October 2014. The 8 revised full papers presented were carefully reviewed and selected from 76 submissions. The selected papers present a complete and solid reference of the state-of-the-art of intelligent robotics and automation research, covering the following areas: autonomous mobile robots, tele-operated and telepresence robots, human-robot interaction, trajectory control for mobile robots, autonomous vehicles, service-oriented robotic systems, semantic mapping, environment mapping, visual odometry, applications of RGB-D sensors, humanoid and biped robots, Robocup soccer robots, robot control, path planning, multiple vehicles and teams of robots.

Frontiers of Energy and Environmental Engineering Wen-Pei Sung,Jimmy C.M. Kao,Ran Chen,2012-11-23 Frontiers of Energy and Environmental Engineering brings together 192 peer-reviewed papers presented at the 2012 International Conference on Frontiers of Energy and Environment Engineering, held in Hong Kong, December 11-13, 2012. The aim of the conference was to provide a platform for researchers, engineers and academics as well as industry professionals from all over the world to present their activities in the field of energy and environmental engineering as well as share research results. This proceedings volume promotes the development of the field of energy and environmental engineering, strengthening international academic cooperation and intercommunication, and encouraging the fruitful exchange of research ideas and results. The book provides a broad overview of the latest advances made in the field of energy and environmental engineering. Topics covered include energy efficiency and energy management, energy exploration and exploitation, power generation technologies, water pollution and protection, air pollution and protection and environmental engineering and management among others. This volume will be of interest to a global audience consisting of academic researchers, industry professionals and policy-makers active in the wide field of energy and environmental engineering.

The World Heroin Market Letizia Paoli,Victoria A. Greenfield,Peter Reuter,2009-04-10 Heroin is universally considered the world's most harmful illegal drug. This is due not only to the damaging effects of the drug itself, but also to the spread of AIDS tied to its use. Burgeoning illegal mass consumption in the 1960s and 1970s has given rise to a global market for heroin and other opiates of nearly 16 million users. The production and trafficking of opiates have caused crime, disease, and social distress throughout the world, leading many nations to invest billions of dollars trying to suppress the industry. The failure of their efforts has become a central policy concern. Can the world heroin supply actually be cut, and with what consequences? The result of a five-year-long research project involving extensive fieldwork in six Asian countries, Colombia, and Turkey, this book is the first systematic analysis of the contemporary world heroin market, delving into its development and structure, its participants, and its socio-economic impact. It provides a sound and comprehensive empirical base for concluding that there is little opportunity to shrink the global supply of heroin in the long term, and explains why production is concentrated in a handful of countries--and is likely to remain that way. On the basis of these findings, the authors identify a key set of policy opportunities, largely local, and make suggestions for leveraging them. This book also offers new insights into market conditions in India, Tajikistan, and other countries that have been greatly harmed by the production and trafficking of illegal opiates. A deft integration of economics, sociology, history, and policy analysis, The World Heroin Market provides a rigorous and vital look into the complex--and resilient--global heroin trade.

The Aesop's Fable Paradigm K. Brandon Barker,Daniel J. Povinelli,2021-12-07 The Aesop's Fable Paradigm is a collection of essays that explore the cutting-edge intersection of Folklore and Science. From moralizing fables to fantastic folktales, humans have been telling stories about animals--animals who can talk, feel, think, and make moral judgments just as we do--for a very long time. In contrast, scientific studies of the mental lives of animals have professed to be investigating the nature of animal minds slowly, cautiously, objectively, with no room for fanciful tales, fables, or myths. But recently, these folkloric and scientific traditions have merged in an unexpected and shocking way: scientists have attempted to prove that at least some animal fables are actually true. These interdisciplinary chapters examine how science has targeted the well-known Aesop's fable The Crow and the Pitcher as their starting point. They explore the ever-growing set of experimental studies which purport to prove that crows possess an understanding of higher-order concepts like weight, mass, and even Archimedes' insight about the physics of water displacement. The Aesop's Fable Paradigm explores how these scientific studies are doomed to accomplish little more than to mirror anthropomorphic representations of animals in human folklore and reveal that the problem of folkloric projection extends far beyond the Aesop's Fable Paradigm into every nook and cranny of research on animal cognition.
