Genre in a Changing World Charles Bazerman, Adair Bonini, 2009-09-16 Genre studies and genre approaches to literacy instruction continue to develop in many regions and from a widening variety of approaches. Genre has provided a key to understanding the varying literacy cultures of regions, disciplines, professions, and educational settings. *GENRE IN A CHANGING WORLD* provides a wide-ranging sampler of the remarkable variety of current work. The twenty-four chapters in this volume, reflecting the work of scholars in Europe, Australasia, and North and South America, were selected from the over 400 presentations at SIGET IV (the Fourth International Symposium on Genre Studies) held on the campus of UNISUL in Tubarão, Santa Catarina, Brazil in August 2007—the largest gathering on genre to that date. The chapters also represent a wide variety of approaches, including rhetoric, Systemic Functional Linguistics, media and critical cultural studies, sociology, phenomenology, enunciation theory, the Geneva school of educational sequences, cognitive psychology, relevance theory, sociocultural psychology, activity theory, Gestalt psychology, and schema theory. Sections are devoted to theoretical issues, studies of genres in the professions, studies of genre and media, teaching and learning genre, and writing across the curriculum. The broad selection of material in this volume displays the full range of contemporary genre studies and sets the ground for a next generation of work.

The Killing Consensus Graham Denyer Willis, 2015-03-21 We hold many assumptions about police work—that it is the responsibility of the state, or that police officers are given the right to kill in the name of public safety or self-defense. But in *The Killing Consensus*, Graham Denyer Willis shows how in São Paulo, Brazil, killing and the arbitration of “normal” killing in the name of social order are actually conducted by two groups—the police and organized crime—both operating according to parallel logics of murder. Based on three years of ethnographic fieldwork, Willis's book traces how homicide detectives categorize two types of killing: the first resulting from “resistance” to police arrest (which is often broadly defined) and the second at the hands of a crime family' known as the Primeiro Comando da Capital (PCC). Death at the hands of police happens regularly, while the PCC's centralized control and strict moral code among criminals has also routinized killing, ironically making the city feel safer for most residents. In a fractured urban security environment, where killing mirrors patterns of inequitable urbanization and historical exclusion along class, gender, and racial lines, Denyer Willis's research finds that the city's cyclical periods of peace and violence can best be understood through an unspoken but mutually observed consensus on the right to kill. This consensus hinges on common notions and street-level practices of who can die, where, how, and by whom, revealing an empirically distinct configuration of authority that Denyer Willis calls sovereignty by consensus.

Plant-Microbe Interactions in Agro-Ecological Perspectives Dhananjaya Pratap Singh, Harikesh Bahadur Singh, Ratna Prabha, 2017-12-15 This book puts an updated account on functional aspects of multiphasic microbial interactions within and between plants and their ecosystem. Multipronged interaction in the soil microbial communities with the plants constitute a relay of mechanisms that make profound changes in plant and its micro-environment in the rhizosphere at physiological, biochemical and molecular levels. In agro-ecological perspectives, such interactions are known to recycle nutrients and regulate signalling molecules, phytohormones and other small molecules that help plant growth and development. Such aspects are described deeply in this book taking examples from various crop plants and microbial systems. Authors described the most advantageous prospects of plant-microbe interaction in terms of inoculation of beneficial microorganisms (microbial inoculants) with the plants in which microbes proliferate in the root rhizosphere system and benefit plants' with definite functions like fixation of nitrogen, solubilization and mobilization of P, K, Zn and production of phytohormones. The subject of this book and the content presented herein has great relevance to the agro-ecological sustainability of crop plants with the help of microbial interactions. The chapters presented focus on defining and assessing the impact of beneficial microbial interactions on different soils, crops and abiotic conditions. This volume entails about exploiting beneficial microbial interactions to help plants under abiotic conditions, microbe-mediated induced systemic tolerance, role of mycorrhizal interactions in improving plant tolerance against stresses, PGPR as nutrient mobilizers, phytostimulants, antagonists and biocontrol agents, plant interactions with *Trichoderma* and other bioagents for sustainable intensification in agriculture, cyanobacteria as PGPRs, plant microbiome for crop management and phytoremediation and rhizoremediation using microbial communities. The overall content entrust advanced knowledge and applicability of diversified biotechnological, techno-commercial and agro-ecological aspects of microbial interactions and inoculants as inputs, which upon inoculation with crop plants benefit them in multiple ways.

Handbook of Fruits and Fruit Processing Y. H. Hui, József Barta, M. Pilar Cano, Todd W. Gusek, Jiwan S. Sidhu, Nirmal K. Sinha, 2008-02-28 The processing of fruits continues to undergo rapid change. In the Handbook of

Fruits and Fruit Processing, Dr. Y.H. Hui and his editorial team have assembled over forty respected academicians and industry professionals to create an indispensable resource on the scientific principles and technological methods for processing fruits of all types. The book describes the processing of fruits from four perspectives: a scientific basis, manufacturing and engineering principles, production techniques, and processing of individual fruits. A scientific knowledge of the horticulture, biology, chemistry, and nutrition of fruits forms the foundation. A presentation of technological and engineering principles involved in processing fruits is a prelude to their commercial production. As examples, the manufacture of several categories of fruit products is discussed. The final part of the book discusses individual fruits, covering their harvest to a finished product in a retail market. As a professional reference book replete with the latest research or as a practical textbook filled with example after example of commodity applications, the Handbook of Fruits and Fruit Processing is the current, comprehensive, yet compact resource ideal for the fruit industry.

Foundations of Paleoparasitology Adauto Araújo, 2014-01-01 Unprecedented initiative in the world, the book compiles the available knowledge on the subject and presents the state-of-the-art in paleoparasitology – term coined about 30 years ago by Brazilian Fiocruz researcher Luiz Fernando Ferreira, pioneer in this science which is concerned with the study of parasites in the past. Multidisciplinary by essence, paleoparasitology gathers contributions from social scientists, biologists, historians, archaeologists, pharmacists, doctors and many other professionals, either in biomedical or humanities fields. With varied applications such as in evolutionary or migration studies, their results often depend on the association between laboratory findings and cultural remains. The book is divided into four parts - Parasites, Hosts, and Human Environment; Parasites Remains Preserved in Various Materials and Techniques in Microscopy and Molecular Diagnostics; Parasite Findings in Archeological Remains: a paleographic view; and Special Studies and Perspectives. Signed by authors from various countries such as Argentina, USA, Germany and France, the book has chapters devoted to the discoveries of paleoparasitology on all continents.

Perspectives on Integrated Coastal Zone Management Wim Salomons, Kerry Turner, Luiz D. de Lacerda, S. Ramachandran, 2012-12-06 All coastal areas are facing a growing range of stresses and shocks, the scale of which now poses threats to the resilience of both human and environmental coastal systems. Responsible agencies are seeking better ways of managing the causes and consequences of the environmental change process in coastal zones. This volume discusses the basic principles underpinning a more integrated approach to coastal management and highlights the obstacles that may be met in practice in both developed and developing countries. Successful strategies will have to encompass all the elements of management, from planning and design through financing and implementation, as highlighted in this book.

Biotechnology of Animal Reproduction Marcelo Marcondes Seneda, Katia Cristina Silva-Santos, Luciana Simões Rafagnin Marinho, 2016 This is a book concerned with a strategic area of science. All topics on animal production and comparative physiology are very important to aid in the better understanding of areas related to pet companionship, health sciences and food production. Nowadays, humanity is facing breakthroughs in new technologies, genetics and environmental challenges. This book is an attempt at fulfilling the need for information about the scientific and, most importantly, applied aspects of animal reproduction. Considering the importance of many species that need assisted reproductive technologies, the authors covered the most studied models, including cattle, horses, sheep and others. The authors also exposed the main biotechnologies used in animal assisted reproduction, discussing their indications according to each species to which they are applicable. This book covers topics such as the reproductive physiology of males and females; production of embryo (in vivo and in vitro); cryopreservation of embryos; artificial insemination; control of estrous cycle; hormonal treatments; semen analysis; reproductive ultrasonography; in vitro culture of ovarian follicles; animal cloning; advances on biotechnology of small ruminants; epigenetics in animal reproduction; equine reproduction and ovum pick-up. Over twenty leading scientists from several universities and countries have contributed research to create the first single-source reference on reproductive techniques. It is hoped that this book will be convenient to all categories of people dedicated to animal reproduction, whether they are undergraduate and graduate students, teachers, scientists or practitioners.

The Commercial Storage of Fruits, Vegetables, and Florist and Nursery Stocks Robert E. Hardenburg, Alley E. Watada, Chien Yi Wang, 1986 Note for the electronic edition: This draft has been assembled from information prepared by authors from around the world. It has been submitted for editing and production by the USDA Agricultural Research Service Information Staff and should be cited as an electronic draft of a forthcoming publication. Because the 1986 edition is out of print, because we have added much new and updated information, and because the time to publication for so massive a project is still many months away, we are making this draft widely available for comment from industry stakeholders, as well as university research, teaching and extension staff.

A liberdade religiosa e de expressão. A dignidade da pessoa humana frente às ideologias que a degradam. A harmonia dos Poderes do Estado, sem que algum se sobreponha aos demais. O valor do trabalho humano e como pode ser caminho de santificação pessoal e alheia. A defesa da família como célula mater da sociedade. O princípio da subsidiariedade como norteador da intervenção do Estado no domínio econômico e social. A defesa do contribuinte frente a uma carga tributária excessiva que transforma o tributo em confisco. O realismo filosófico, frente ao imanentismo que transforma fatos em narrativas. A objetividade da ordem moral frente ao relativismo moderno. Justamente a defesa desses valores é objeto da presente coletânea, em que seus coordenadores e autores abordam temas atuais e controvertidos, buscando compreender as posições antagônicas no debate em busca da verdade, concebida desde Aristóteles, como a adequação da cabeça à realidade. O Prof. Ives Gandra, como presidente emérito do Centro de Extensão Universitária (CEU), nos Simpósios que lá organizava, costumava dizer: Aqui a ciência se faz com a verdade e não com a vaidade. Ou seja, não permanecemos em nossas posições por serem nossas, mas estamos dispostos a mudar, se nos convenceremos das melhores razões trazidas pelos outros. O que faz do Prof. Ives Gandra Martins verdadeira reserva moral do país e um dos maiores juristas de nossa pátria não é apenas a sua coragem, invejável cultura geral e erudição multifacetada, capaz de discernir a essência dos problemas, vislumbrar os caminhos para suas soluções e sustentá-los. É a sua coerência de vida. Luta por viver todos os ideais, valores e princípios que defende. Trecho do prefácio de Ives Gandra da Silva Martins Filho O conteúdo encontrado nestas páginas é a expressão da gratidão e da admiração ao profundo conhecimento e à sagacidade jurídica de Ives Gandra Martins. Os escritores exploram desafios e questões relacionadas ao Direito Público, Tributário e Constitucional, bem como aos aspectos filosóficos, econômicos e sociais que permeiam o amadurecimento de uma sociedade mais justa e igualitária. Ao aprofundar-se nas páginas deste livro, o leitor será levado diretamente aos conceitos defendidos pelo homenageado, assim como a reflexões sobre a interseção entre o Direito, a Economia e a Filosofia. Os artigos apresentados são um convite à reflexão crítica, ao diálogo construtivo e a uma viagem pela multidisciplinariedade do mundo jurídico. Trecho do prefácio de Luciano Bandeira Arantes

F. Zanatta, Rafael de Freitas Valle Dresch, Roberta Densa, Roger Vieira Feichas, Tatiana Meinhart Hahn, Têmis Limberger, 2023-10-17 Cumprindo o propósito desta obra de ser um repositório amplo sobre a legislação de proteção de dados vigente no Brasil, já na 1a edição pudemos contar com a participação do professor José Sérgio da Silva Cristóvam e da professora Tatiana Meinhart Hahn, que redigiram, em coautoria, comentários aos principais pontos do Decreto Federal 10.474, de 26 de agosto de 2020, com as alterações feitas pelo Decreto Federal 11.202, de 21 de setembro de 2022, que aprovou a Estrutura Regimental e o Quadro Demonstrativo dos Cargos em Comissão e das Funções de Confiança da Autoridade Nacional de Proteção de Dados e remanejou e transformou cargos em comissão e funções de confiança. No texto, vários assuntos que são importantíssimos para corroborar a interpretação que se deve construir quanto à ANPD e à sua atuação foram condensados nas reflexões dos autores, com os desejáveis aportes do direito administrativo. Também é de autoria do professor José Sérgio da Silva Cristóvam e da professora Tatiana Meinhart Hahn o novo capítulo da obra, que passa a compor a 2a edição, com o título **Autoridade Nacional de Proteção de Dados: discricionariedade e a governança regulatória**, no qual são analisados aspectos essenciais da atuação da ANPD com vistas a harmonizar o resguardo à proteção dos dados pessoais com o desenvolvimento econômico, científico e tecnológico é uma meta difícil e de longo prazo. Com isso, ressaltamos a forma metódica que optamos por adotar para a padronização e estruturação dos comentários à lei e ao mencionado decreto. Mais do que uma coletânea de artigos científicos sobre a proteção de dados pessoais, preferimos consolidar o projeto como uma lei comentada, e pudemos contar com a adesão de todos os autores e autoras à concepção formal

e metodológica que traçamos. Complementarmente, assim como pudemos fazer ao agregar os comentários aos pontos centrais do Decreto Federal 10.474/2020, pretendemos, em futuras edições da obra, trazer notas sobre eventuais outros regulamentos que venham a ser editados para compor o ecossistema da proteção de dados pessoais no Brasil. Fruit Processing D. Arthey,P.R. Ashurst,2012-12-06 Fruit and fruit products, in all their many varieties and variations, are major world commodities and part of the economic life blood of many countries, particularly in the developing world. The perception of the healthy nature of fruit is a major reason for its increased consumption in the developed world, and many consumers today find a wider selection of fruit varieties, available at all times of the year, than ever before. This volume, however, is not so much concerned with fresh fruit as those principal areas of processing to which it may be subjected. Fruit processing arose as a means of utilising a short-lived product and preserving its essential nutritional qualities as far as possible. A chapter on the nutritional aspects of fruit is included in this work to reflect the importance of this topic to most consumers. After a general introduction, the chapter on fruit storage is the only contribution which deals with a process from which fruit emerges in essentially the same physical condition. Beyond that the book sets out to cover most of the major areas in which fruit may be processed into forms which bear varying semblances to the original raw material.

Biodiversity and the Law Charles R. McManis,2012 How do we promote global economic development, while simultaneously preserving local biological and cultural diversity? This authoritative volume, written by leading legal experts and biological and social scientists from around the world, addresses this question in all of its complexity. The first part of the book focuses on biodiversity and examines what we are losing, why and what is to be done. The second part addresses biotechnology and looks at whether it is part of the solution or part of the problem, or perhaps both. The third section examines traditional knowledge, explains what it is and how, if at all, it should be protected. The fourth and final part looks at ethnobotany and bioprospecting and offers practical lessons from the vast and diverse experiences of the contributors.
