War Tourism Bertram M. Gordon, 2018-11-15 As German troops entered Paris following their victory in June 1940, the American journalist William L. Shirer observed that they carried cameras and behaved as naïve tourists. One of the first things Hitler did after his victory was to tour occupied Paris, where he was famously photographed in front of the Eiffel Tower. Focusing on tourism by German personnel, military and civil, and French civilians during the war, as well as war-related memory tourism since, War Tourism addresses the fundamental linkages between the two. As Bertram M. Gordon shows, Germans toured occupied France by the thousands in groups organized by their army and guided by suggestions in magazines such as *Der Deutsche Wegleiter für Paris* [The German Guide for Paris]. Despite the hardships imposed by war and occupation, many French civilians continued to take holidays. Facilitated by the Popular Front legislation of 1936, this solidified the practice of workers' vacations, leading to a postwar surge in tourism. After the end of the war, the phenomenon of memory tourism transformed sites such as the Maginot Line fortresses. The influx of tourists with links either directly or indirectly to the war took hold and continues to play a significant economic role in Normandy and elsewhere. As France moved from wartime to a postwar era of reconciliation and European Union, memory tourism has held strong and exerts significant influence across the country.

Development Without Freedom Songok Han

Thornton, 2016-12-05 Thanks to the inroads of IMFism and the war on terror, America has lost much of the soft power it enjoyed in Asia during the early 1990s. The winners, by default, are some of the world's most undemocratic development models, such as Sino-

globalism. Asian values took a hard blow from the Asian Crash, but have returned in this even more virulent form. The West is left sitting on the sidelines of a distinctly Asian contest of development with or without freedom. *Development Without Freedom* explores this crucial trial-by-development, which will define the politics of globalization for decades to come.

Learning, Teaching and Researching on the Internet S. D. Stein, 2014-09-11 *Learning, Teaching and Researching on the Internet: A Practical Guide for Social Scientists* is directed at students and academic staff who want to be able to access Internet resources quickly and efficiently without needing to become IT experts. The emphasis throughout is on the harnessing of the large volume of potentially useful Internet resources to everyday requirements, whether these be focused on learning, teaching or research. The Internet is a significantly rich information, communication and research resource for all those involved in higher education, whether they be students, academic staff involved in teaching and research, or educational administrators. Whilst the author has drawn on the large volume of technical literature, it is written on the basis of practical experience acquired over the many years of using Internet resources in the context of teaching undergraduate and postgraduate courses in the social sciences. In addition to extensive coverage on using Web browsers, searching for information at Web sites, in mailing lists and newsgroups, Part IV provides detailed annotations in the resources available at the best sites on the Internet collating materials on politics, sociology, economics, philosophy, psychology, history, human rights, European Union and other categories. The work is structured so that it will be found useful by both beginners and intermediate level users.

Dependent Arising in Context Linda S. Blanchard, 2013-01-05

Dependent arising is the backbone of the Buddha's doctrine -- all the other lessons he taught relate to it, or refer to it in some way -- yet it is the least understood. There is a confusion of theories as to its meaning: is it about three lives, or one? about rebirth or moment-to-moment creation of the ego? Yet when dependent arising is seen in the light of the central myth of the Buddha's day (the creation of First Man and how that relates to our creation of self) the whole structure becomes much clearer, and many of the points of confusion are straightened out. People have long asked, for example, how the 'actions' of the second step precede consciousness in the third, or why we seem to be being told that we would want to completely stop consciousness, and contact with the world, and feeling. All these questions are easily answered when we see where the structure came from, and what the lesson is really about.

The Languages and Linguistics of South Asia Hans Henrich Hock, Elena Bashir, 2016-05-24 With nearly a quarter of the world's population, members of at least five major language families plus several putative language isolates, South Asia is a fascinating arena for linguistic investigations, whether comparative-historical linguistics, studies of language contact and multilingualism, or general linguistic theory. This volume provides a state-of-the-art survey of linguistic research on the languages of South Asia, with contributions by well-known experts. Focus is both on what has been accomplished so far and on what remains unresolved or controversial and hence offers challenges for future research. In addition to covering the languages, their histories, and their genetic classification, as well as phonetics/phonology, morphology, syntax, and sociolinguistics, the volume provides special coverage of contact and convergence, indigenous South Asian grammatical traditions, applications of modern

technology to South Asian languages, and South Asian writing systems. An appendix offers a classified listing of major sources and resources, both digital/online and printed.

World and Its Peoples, 2010 Incorporates every conceivable focus of interest from holidays to health care, national anthems to gross national product, natural resources, ethnic groups, voting age, performing arts, provincial capitals, leaders of the past and present, native plants and animals, and far more. Newly commissioned political and geophysical maps represent past and present realities. The thirteen volumes of this set examine the 50 countries, dependencies, and states of the European continent, putting into perspective this enormously influential center of commerce and culture.

A BIBLICAL JOURNEY SUPPORTED BY SCIENCE Edouard RIVIER, Emmanuel RIVIER, 2022-09-05 Science, in the present state of our scientific knowledge, including the most advanced, can support our faith in order to make the texts not only understandable, but also interesting and often beneficial for our reflection or our interior life. This systematic alliance between faith and science is one of the most innovative aspects of the book, which is highlighted by its title. Thus, on a general level, history, geography, archaeology, linguistics, paleoanthropology, and other disciplines are now able to retrace the history of ancient palestine over a long period of time. Retracing by the same token, the history of the small territory of canaan that the hebrews conquered under the leadership of moises and then, joshua. You will discover egypt, master of the entire near east for more than a thousand years, and the invasions of the sea peoples who ravaged the land of canaan shortly before its conquest by joshua, as well as the hittites and the invasion of egypt by the hyksos. If we place ourselves at the more modest level of the protagonists of the profane or sacred

stories that are told in this volume 1, “the time of the patriarchs,” science will teach us a lot about their habits, their fears, and their joys. Texts found in the remains of the city-state of nuzi will shed light on the lifestyle of these nomadic shepherds. Finally, I propose to use the theories of information and communication, in a totally new way, as two scientific tools at the service of the bible. We will consider the sacred text as containing a series of “messages” (in the sense of telecommunications) that god addresses to us through time and space. The senders of these messages are characters “inspired” by god (the patriarchs in this volume 1). These messages reach our mailbox (either e-mail or brain). Communication theory and habits will dictate our first action: authenticate the sender so that he doesn’t send spam or bugs! You will discover how to authenticate abraham through history and plate tectonics, and jacob through paleoclimatology and hieroglyphic inscriptions. Geophysics, including paleoclimatology, plate tectonics, volcanology, and seismology, makes it possible to convert facts tainted with divine wonder to simple manifestations of the earth’s moods, which can often be dated, and which make it possible to take these great patriarchs out of the mythical fog in which our ignorance has tended to confine them.

Cultures of Legality Javier Couso, Alexandra Huneeus, Rachel Sieder, 2010-04-30 Ideas about law are undergoing dramatic change in Latin America. The consolidation of democracy as the predominant form of government and the proliferation of transnational legal instruments have ushered in an era of new legal conceptions and practices. Law has become a core focus of political movements and policy-making. This volume explores the changing legal ideas and practices that accompany, cause, and are a consequence of the judicialization of politics in Latin America. It is the product of a three-

year international research effort, sponsored by the Law and Society Association, the Latin American Studies Association, and the Ford Foundation, that gathered leading and emerging scholars of Latin American courts from across disciplines and across continents.

Les derniers jours du rock'n'roll Pierre Achard, 2008-05-21 Ce livre raconte l'histoire d'hommes (et de quelques femmes) avec des guitares, des voitures de sport, des micros, des cuirs, des chaînes, des amplis et autre seringues qui leur faisaient franchir le mur du son et ruer dans les décors... Sorties de route ou tombées du ciel, quand on ne s'y envoyait pas d'une ligne ou d'un rail : le temps des comètes. C'est l'histoire de quelques générations (au sens où l'entendirent les « Who »), pressées d'en finir avant que de vieillir qui prirent la route du rock, du succès et presque aussitôt de la postérité : morts à vingt dans les années 60, à vingt-sept dans les années 70, à peine le temps de se faire un prénom : Buddy, Eddie, Ritchie, Rickyn Jimi, Jim, Tim, Janis, Otis, Elvis, Vince, Marvin, Freddie and co, tout le gotha de nos discothèques jusqu'à Kurt Cobain et son précoce Nirvana. Et puis aussi les demi-dieux : les derniers jours de Morrison à Paris, le traquenard de John Lennon au Dakota, la véritable mort d'Elvis, seul au sommet de son Hilton infernal, le jour où Marvin Gaye père, tua... Marvin Gaye fils, le jour où l'avion d'Otis Reading imita celui de Buddy Holly et piqua du nez vers le Never More... Et puis tous les autres, dont les noms sont aussi méconnus ou oubliés que les succès ou les visages sont célèbres. Au fond, ce livre est l'histoire d'une route, qu'on pourrait appeler... 666, qu'empruntent depuis 50 ans des jeunes gens énervés et pressés de nous raconter que la vie est courte, sauvage et folle comme un bon vieux rock – deux minutes 30 de frisson – et qu'il faut en vivre chaque seconde comme si elle était la dernière...

Intersex Narratives Viola Amato (verst.),2016-02-29 This book explores representations of intersex - intersex persons, intersex communities, and intersex as a cultural concept and knowledge category - in contemporary North American literature and popular culture. The study turns its attention to the significant paradigm shift in the narratives on intersex that occurred within early 1990s intersex activism in response to biopolitical regulations of intersex bodies. Focusing on the emergence of recent autobiographical stories and cultural productions like novels and TV series centering around intersex, Viola Amato provides a first systematic analysis of an activism-triggered resignification of intersex.

Matériel didactique et pédagogique
Collectif,2017-02-01T00:00:00-05:00 A titre de médium, le matériel didactique et pédagogique se situe à la confluence des interactions qui s'instaurent entre l'enseignant, l'élève et les objets d'apprentissage. La question du rapport que les praticiens établissent avec les divers matériels s'avère cruciale. Car ce rapport induit la sélection et les modalités d'utilisation du matériel et affecte les contextes d'enseignement-apprentissage. Les textes abordent : - la question des multiples fonctions du manuel scolaire et de leurs apports au processus

d'enseignement-apprentissage et au développement professionnel des enseignants ; - les caractéristiques pédagogiques et didactiques de certains matériels et leurs incidences potentielles sur les apprentissages des élèves ; - les fonctions et l'utilisation d'autres matériels dont le matériel numérique. L'ouvrage jette les bases d'une réflexion approfondie sur l'étude du rapport d'appropriation des enseignants et des futurs enseignants au matériel didactique et pédagogique. Ont collaboré à cet ouvrage : Corinne Aroq, Johanne Bédard, Robert Bibeau, Vincent Grenon, Abdelkrim Hasni, François Larose, Johanne Lebrun, Monique Lebrun, Yves Lenoir, Marie-Pier Morin, Daniel Niclot, Sébastien Ratté, Gérard-Raymond Roy et Patrick Roy.
